BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT, pursuant to the Act 7th and 8th Victoria. cap. 32, for the week ending on Wednesday, the 6th day of November, 1861.

ISSUE DEPARTMENT.

	£		£
Notes issued	28,053,275	Government Debt	11,015,100
		Other Securities	3,634,900
		Gold Coin and Bullion	13,403,275
		Silver Bullion	..
	28,053,275		28,053,275

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	11,712,187
Rest	3,149,098	Other Securities	16,460,864
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	4,246,889	Notes	7,279,360
		Gold and Silver Coin	807,499
Other Deposits	13,515,241		
Seven Day and other Bills	802,282		
	36,260,510		36,260,510

Dated the 7th November, 1861. M. MARSHALL, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	21,575,597	Securities	28,270,051
Public Deposits	4,246,889	Coin and Bullion	14,210,774
Private Deposits	13,515,241		
	39,331,727		42,480,825

The balance of Assets above Liabilities being 3,149,098*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£107,420
An INCREASE of Public Deposits of	457,264
A DECREASE of Other Deposits of	813,941
A DECREASE of Government Securities of	240,814
A DECREASE of Other Securities of	194,552
A DECREASE of Bullion of	7,828
An INCREASE of Rest of	20,903
An INCREASE of Reserve of	121,047

The principal feature in the above return is the large decrease in the private deposits, which has been only partially counterbalanced by the increase in the Government balance. The reserve, however, shows an augmentation, owing to the diminution in the Government and other securities. The bullion remains nearly the same as last week, while an unimportant decrease has taken place in the circulation.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1851:—

At corresponding dates with the present week	1851.	1858.	1859.	1860.	1861.
Circulation, including bank post bills	£ 21,350,098	£ 21,826,785	£ 22,692,969	£ 22,027,004	£ 21,575,597
Public deposits	6,086,141	6,673,581	6,097,259	4,968,172	4,240,889
Other deposits	9,549,304	12,290,682	14,311,201	13,114,251	13,515,241
Government securities	13,241,768	10,808,591	10,875,157	9,490,273	11,712,187
Other securities	12,215,287	14,697,722	18,619,378	19,968,643	16,460,864
Reserve of notes & coin	9,138,061	11,988,792	9,500,698	7,166,015	8,087,459
Coin and bullion	15,259,401	18,502,827	16,830,168	13,897,085	14,210,774
Bank rate of discount	3 p. c.	3 p. c.	2½ p. c.	4½ p. c.	3 p. c.
Price of Consols	98⅜	96¼	96⅝	93⅜	92⅝ xd
Average price of wheat	36s 1d	42s 8d	42s 9d	59s 9d	59s 5d
Exchange on Paris (shrt)	25 17½ 22½	25 5 12½	25 7½ 12½	25 15 22½	25 20 25
— Amsterdam ditto	11 16½ 17	11 15	11 13 14	11 14¼ 15	11 18 19
— Hamburg (3months)	13 10¼ 10½	13 7	13 5 5½	13 5⅞ 6⅛	13 8¾ 9

In the corresponding week of 1851, the Caffre war continued to be carried on with doubtful success. A large public demonstration had taken place in London in favour of Kossuth. The Royal Commissioners had presented a report to the Queen, stating that the surplus profits from the Great Exhibition exceeded 150,000*l*. The submarine telegraph across the Channel was about to be opened to the public. In France, the President Louis Napoleon had presented to the Assembly a comprehensive message on the affairs of the nation. In Germany, police measures were being carried on rigorously, English travellers being especially subjected to annoyance from the favourable reception in England of Kossuth. The Austrian revenue for the past half-year was estimated to be 4,000,000*l* less than the expenditure. From the United States, it was announced that the immediate Secessionists in South Carolina had been defeated in the late elections. In the London money market the rate of interest was as low as 2½ per cent., and some Australian and Californian gold companies had just been started.

In 1858, a favourable impression had been produced by rumours of an approaching reduction in the French army. Payments of the Turkish and Italian loans were in progress, but had little effect on the money market. The bullion in the Bank was more than eleven millions in excess of the amount in the corresponding period of 1857 when the panic was at its height, whilst the reserve showed an increase of 10½ millions, and the other securities a decrease of 11½ millions.

In 1859, notwithstanding the large shipments of silver to the East, amounting to 13,234,305*l*, the rate of interest had not exceeded 3 per cent. throughout the year. Money was very easy in the discount market at 2½ per cent., and the public continued, as now, to invest steadily in Indian securities.

In 1860, the present position of the London and Paris money markets was precisely reversed. Here there was an active demand, and the Bank of England had just raised their rate of discount from 4 to 4½ per cent. In Paris, on the other hand, money was very easy, and barely commanded 3 per cent. The negotiations respecting the Mirès loan to Turkey had not yet been concluded. Unfavourable accounts had been received respecting the affairs of the Grand Trunk of Canada Railway Company, and were exciting much attention in financial circles. From Italy, news had arrived of a great defeat of the Bourbon army in Naples, and of the subsequent retirement of Garibaldi to Caprera. Satisfactory accounts were published of the reception of the Prince of Wales in New York.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1851, a deficiency of 2,665,983*l*; in 1858, a deficiency of 2,407,040*l*; in 1859, a deficiency of 4,338,172*l*; and in 1860, a deficiency of 6,021,293*l*. In 1861, the deficiency is 2,945,623*l*.

DISCOUNT AND MONEY MARKET.—The Directors of the Bank of England yesterday lowered their rate of discount from 3½ per cent., at which it was fixed on the 19th of September, to 3 per cent.

This alteration has exercised no effect in the discount market, the general rate being still much below the Bank. During the greater part of the week the best bills could be negotiated at about 2½ to ⅝ per cent., but to-day, owing to some exceptional cause, there was a slightly increased inquiry, and the usual terms for three months' paper were 2¾. This afternoon the applications at the Bank were more numerous than usual. The small number of commercial bills offering is still the subject of remark, especially as regards inland trade. The following table shows the rates of discount currently charged for first-class paper, but the terms necessarily vary at different establishments:—

30 days	2½ to ⅝ per cent.
60 days	2⅝ per cent.
3 months	2¾ per cent.
4 months	3 per cent.
6 months	3½ per cent.

On the Stock Exchange, yesterday, loans on Government securities were more inquired for, and 2 to 2½ per cent. was asked. To-day, however, the supply is ample at 1½ per cent.

The tenders for the 100,000*l* Ceylon Government debentures were opened on Tuesday, when it appeared that the whole sum had been subscribed on favourable terms. The minimum fixed was 103½, and the successful tenders ranged from 104*l* 2s 9d to 106*l*. The total subscriptions were for 642,000*l*. As these debentures have only seven years to run, and the stock is new to the public, the price realised is considered very satisfactory.

The following are the rates of discount in the principal cities of the Continent. In Paris there appears to be rather less pressure:—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	6	5
Vienna	6	5
Berlin	4	3½
Frankfort	4	3½
Amsterdam	3	3
Turin	6½	6½
Brussels	4	3½
Hamburg	...	3¾
St Petersburg	7	8

ENGLISH FUNDS.—Consols were rather depressed in the earlier part of the week, partly from the absence of business and partly from political considerations, the difference between France and Switzerland causing an uneasy feeling; while our relations with the United States are generally believed to be in an unsatisfactory position. On the reduction of the Bank rate, however, an advance took place, which continued to-day, the closing prices this week being the highest since last Thursday. The low rate of money still induces investments on the part of banks and other moneyed establishments, while the public appear rather to sell moderately for reinvestment in securities yielding a better interest. Consols closed this afternoon at 93⅝ to ¾ for money, and 92¼ to ⅜ ex dividend for the account, or an advance of ¼ to ⅜ per cent.

The continued ease in the money market has caused a renewed demand for Exchequer bills, and a further rise of about 3s has taken place, the final quotations being 7s to 11s premium for the March issue, and 17s to 20s for the June. India bonds are also higher at 12s to 16s premium.

India Five per Cents. have again been in demand for investment, in some degree from the low rates at present allowed at the joint stock banks diverting deposits into this security. The final transactions were at 106 to ¼, being an improvement of nearly 1 per cent.

Rupee paper securities continue buoyant, the Five-and-a-Half per Cents. being last quoted 104⅞ to 105½, and the Five per Cents. 97⅞ to 98⅛, a rise to-day of a quarter per cent.

FOREIGN STOCKS.—In the foreign department, Mexican again fractionally improved in the earlier part of the week, but on some realisations relapsed about a half per cent. A recovery, however, then took place on the announcement of the signing of the Convention by the three Powers, by which it is proposed in the first instance to occupy the custom houses at the Mexican ports, thus securing to the bondholders their recognised right of 25 per cent. of the revenue collected there. To-day, however, there has been renewed heaviness, but the final price was rather better than at one period of the morning. Buenos Ayres and Venezuelan descriptions have been in fair demand at a further advance. Spanish certificates have also risen on a statement that the greatly increased resources of Spain and the altered public opinion of the country on the subject are likely to bring about a settlement of these claims. Turkish Six per Cents. have been flat, but have now rallied to their previous value. Russian descriptions are generally unaffected by the University disturbances at St Petersburg and Moscow. The new Italian Five per Cent. loan continues heavy.

The final price of French Three per Cents. on the Paris Bourse this evening was 68f 75c, showing a further recovery of three quarters per cent.

The last advices from Chili announce that a law has just passed the Chambers to double the sinking fund of the Four-and-a-Half per Cent. loan, contracted in 1858 through Messrs Baring Brothers. By the original decree, the sinking fund was provided to be not less than ½ per cent. per annum.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks on Oct. 31 and this day:—

RAILWAYS AND OTHER SHARES.—The railway market continues without the slightest animation, the general business being of the most unimportant character. The traffic returns, however, being mostly good, prices have not given way to any material extent. Midland shows the chief firmness among the heavier stocks. London and North-Western, on the other hand, is dull and heavy. Lancashire and Yorkshire has been prejudiced by a renewal of speculative sales for a fall on the gradual cessation of works in the manufacturing districts. South-Eastern has again declined rather considerably, the receipts in this instance being exceptionally unfavourable. Caledonian has about lost the improvement of last week, and was additionally depressed to-day by operations for a fall on the unfavourable traffic return. London and South-Western and North British remain comparatively firm. This afternoon, the market generally showed increased steadiness.

In the colonial department, the rise in other Indian securities has been attended by an advance in the guaranteed railway stocks, which are being steadily purchased for investment. The low value of money is especially favourable to these securities. Canadian descriptions have also improved on the increased traffic from the large shipments of corn.

Foreign railways have been firm, and a renewed inquiry has been manifested for Brazilian and Belgian shares. Great Luxembourg, however, at one period fell to 8⅞, but afterwards rallied to 9 to ¼. French descriptions and Lombardo-Venetian are higher on the improvement on the Paris Bourse. American securities have been rather heavy, especially Illinois Central and New York and Erie shares.

In the miscellaneous department, there have been some large transactions in United Mexican and St John del Rey mining shares, both of which at one time experienced a considerable advance, but have since slightly relapsed. Joint stock banks have been in demand, especially London and County. Red Sea Telegraph are also higher, on the satisfactory character of the meeting. Mercantile Fire Insurance closed at ⅜ to ⅝ premium, and Commercial Union ¼ dis. to par.

Subjoined is our usual list of the closing prices of the principal railway shares on Oct. 31 and this day:—

FOREIGN EXCHANGES.—The tendency this week has been rather unfavourable, and the rates have generally declined both on Tuesday and this afternoon.

BULLION.—The following is the weekly circular of Messrs Pixley, Abell, and Langley, on the movements in bullion during the week, and the transactions in Indian rupee paper:—

Gold.—The market for gold during the past week has been quiet, and business limited; the only arrival of any importance has been the Tyne, from the Brazils, with 119,000*l*, which has been taken for refining. We are daily looking for vessels from Melbourne; the amount now on the way is about 307,000*l*. Further shipments have been made to America, but the amount sent is comparatively unimportant. The exports since our last are as follows:—The Nova Scotian, for Quebec, with 18,000*l*; the Niagara, for Boston, with 20,400*l*; the Saxonia, for New York, with 10,000*l*; the City of Manchester, for New York, with 970*l*; and the Alhambra, for the Peninsula, with 33,000*l*. The Bank has not purchased any bullion since our last circular of the 31st ultimo.

Silver.—The silver, ex Shannon, has been sold at 5*s* 0⅛*d* per oz standard, being an advance of ⅛*d* per oz. The purchases have been chiefly for the Bombay market, and the steamer leaving for that place on the 12th instant will take a considerable amount. There is but little demand for bars at present, all orders for the East having been executed; but, as the market is almost entirely bare of silver, we do not look for any decline in price. The Indus has taken 22,089*l* to India and China, the Atrato has taken 3,347*l* to West Indies, and the Alhambra has brought 2,400*l* from the Peninsula.

Mexican Dollars.—The dollars, ex Shannon, have been sold at 4*s* 11⅛*d* per oz. Although this is a rise of ⅛*d* per oz. yet the same price was obtained for some small lots sold last week. We quote the rate as above, with a quiet market.

Exchange.—We quote the rate for banks' drafts at 60 days' sight; on Bombay, 1*s* 11¾*d* to 1*s* 11⅞*d*; on Calcutta, 1*s* 11⅝*d* to ¾*d*; Madras, 1*s* 11½*d*.

Indian Government Loan Notes.—Transactions to some extent have taken place since our circular of 31st October. The market has been rather weaker during the last day or two; quotations, however, remain as per our last, though in the interim rather higher rates have prevailed. 5½ per Cents. are 104⅝ to 105; 5 per Cents., 97½ to 98.

Quotations for Bullion.—Gold—Bar gold, 77*s* 9*d* per oz std; bar gold, fine, 77*s* 9½*d* per oz std; bar gold, refinable, 77*s* 11*d* per oz std; Spanish doubloons, 75*s* 6*d* to 76*s*, nominal; South American doubloons, 73*s* 8*d* per oz; United States gold coin, 76*s* 5*d* per oz, last price. Silver—Bar silver, 5*s* 0⅞*d* per oz std, last price; bar silver, containing 5 grs gold, 5*s* 1¼*d* per oz std; fine cake silver, 5*s* 5⅜*d* to 5*s* 5½*d* per oz; Mexican dollars, 4*s* 11⅜*d* per oz, last price; Spanish dollars (Carolus), 6*s* 6*d* per oz, nominal.

About 10,000*l* in bar gold was withdrawn from the Bank to-day for shipment to the Peninsula.

The out-going Brazilian mail steamer to-morrow (Saturday) will carry 12,878*l* in specie, of which 3,378*l* is in gold, and 9,500*l* in silver.

FAILURES AND MERCANTILE EMBARRASSMENTS.—Of the bills maturing on Monday, the 4th, a rather larger number were returned than usual, but they were subsequently met, and no permanent case of embarrassment occurred.

The stoppage has been announced of the old-established Riga banking house of W. L. Scheluchin and Son, with moderate liabilities. The estate is expected to pay in full, or at least a high dividend.

There is a report of a suspension, with heavy liabilities, in the metal trade at Paris, where of late considerable speculation in copper, &c., has been going on.

The advices from Buenos Ayres mention the failure of the native house of Delpino and Co., with liabilities of about 160,000*l*. Only a small portion of the loss, however, is expected to fall upon English establishments. The estate, it is feared, will turn out unfavourably. In consequence of this suspension, Messrs Deihl, Fernan, and Co., have also stopped payment.

PUBLIC COMPANIES.—A special meeting of the Red Sea and India Telegraph Company was held on Tuesday, to consider the proposed transfer of the line to a new Company, and the surrender of the Government guarantee of 4½ per cent. for 50 years for an equivalent annuity payable at the Bank of England. It was explained that ever since the interruption in the telegraph the Directors have endeavoured to obtain from the Government permission to repair the line, but the Treasury had thought it inexpedient to give their consent. Some weeks ago, however, a proposition was received for the formation of a new Company to undertake this work; and, the approval of the Government having been obtained, the negotiations resulted in the receipt of the Treasury letter published a fortnight back. By this document the Government, in clause 3, reserve the power of redeeming the annuity "on payment of a capital sum in proportion to the unexpired period," and a large body of the proprietors considered that more definite terms should be given. A portion of the Directors consequently waited on the Chancellor of the Exchequer on the subject, when they were assured that, in case of redemption, the Company would receive a full and fair equivalent. In order, however, to set all doubts at rest, the Directors have determined on proposing a resolution to accept the Government proposal, provided it is made clear that, in the event of the annuity being redeemed, such a sum shall be paid as will be sufficient to purchase a Government annuity of 4*l* 10*s* per cent. for the unexpired term. The Directors have endeavoured to ascertain the views of the Chancellor of the Exchequer on the point, who, while fully conceding that the shareholders shall not experience the slightest disadvantage, is of opinion that there may be some inconvenience in fixing precise terms. He considers that they are still in some degree ambiguous, and might provoke further discussion, and that the details of arrangement had better be left in the hands of the Board. In the course of the discussion, however, a general opinion was expressed by the meeting that the terms for the redemption of the annuity should be distinctly stipulated, and that no opening should be left for treatment similar to that experienced in the commencement of the present year, when the half-yearly dividend was temporarily withheld. The motion proposed from the chair was consequently adopted without a dissentient.

The Directors of the Bank of Turkey have given notice that they have concluded an arrangement with the *concessionaires*, by which they are prepared to return the full deposit of 3*l* per share to those who are anxious to retire from the concern, and of 2*l* to the proprietors desiring to retain an interest in the undertaking.

At a meeting of the Port Phillip and Colonial Gold Mining Company on Monday, convened for the election of two Directors, it was stated that the last advices from the colony, dated August 22, announce an increased yield of gold of eight grains per ton of ore. A further reduction has been effected in the cost of stamping and extracting the gold, the expenditure, which in March last was 13*s* 8*d* per ton, having been brought down in July to 8*s* 4*d* only. The accounts from the various stations of the mine are all satisfactory with one exception. Some diminution, however, has taken place in the supply of quartz in the preceding month, owing to the temporary withdrawal of the workmen for the timbering and execution of other repairs in portions of the works. Two of the Directors have recently visited Germany to examine improved processes in the extraction of gold, and their report has been laid before an intelligent metallurgical chemist. The accounts show a balance in favour of the Company of 8,885*l*, and a reserve fund in Government stock of 2,135*l*.

The Oriental and General Marine Insurance Company have issued the following circular with regard to the non-appointment of a settling-day in the shares. It is necessary, however, to point out that the requirements of the Stock Exchange, that two-thirds of the capital shall have been allotted and paid upon, do not refer to the settlement, but only to the quotation of the shares in the official list. It is expected that a settling-day will be appointed by the Stock Exchange Committee without the intervention of the Company:—

Sir,—I beg to forward you a copy of a resolution unanimously arrived at this day by the Board of Directors:—"That it being impossible to proceed to a settlement, owing to the Company not being able to comply with the requirements of the Stock Exchange, 'that not less than two-thirds of the shares shall have been applied for and allotted, and the deposit paid thereon,' the same be intimated by circular to each subscriber, and that a statement of the amount received on account of shares be at the same time communicated." The amount of shares allotted and paid on are 18,715, making 46,787*l* 10*s*, which the Directors consider ample to carry on the business of the Company satisfactorily. The Directors deem it necessary to inform you that since the Company commenced underwriting, on the 21st ult., the business has been most satisfactory, and you may rest assured that the Board are fully im-

pressed with securing and deserving a respectable and remunerative, rather than a vast, business, in which effort they are cordially seconded by the experience of their able underwriter, Mr Philip Secretan.—By order of the Board,

8 Finch lane, London, Nov. 5. JOHN SCOTT, Secretary.

At a meeting of the Great Ship Company to-day, the Directors were authorised to issue a further sum of 25,000*l* in 10 per cent. debentures, in addition to the 35,000*l* placed some months ago. It appears that the amount required to repair the Great Eastern after the late accident is 8,000*l*, for which the Company have resources in hand. The 25,000*l* is to be expended in equipping the vessel for her next voyage. About 15,800*l* of this amount has already been subscribed.

A meeting of the shareholders of the Red Sea and India Telegraph Company was held on the 5th of November: Mr Marshman in the chair. After some discussion, it was decided to adopt the arrangement made by the Directors with the Government for the conversion of the present guarantee into an equivalent terminable annuity upon just terms. At the close of the meeting, Sir Macdonald Stephenson congratulated the Company on their present position, and gave encouraging assurances as to their future prospects.

The prospectus of the Paris Land Company has been issued. They consider that the large increase of inhabitants in Paris, and the great deficiency of houses, caused by the so-called improvements of the French Emperor, give a great opening for the operations which they contemplate. They likewise state that the low price of land, even in eligible situations in Paris, will enable them to commence business with advantage.

A Company has been formed with the title of the "Hindostan (Singhbhoom) Copper Company, Limited," to acquire and work certain copper mines in the district of Singhbhoom, extending over a district of 800 square miles, which are stated to be intrinsically prolific and to be easy to work.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 2 per mille premium, and the short exchange on London is 25.30 per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 3-10ths per cent. dearer in London than in Paris.

The course of exchange at New York on London for bills at 60 days sight is 107⅛ to 107¾ per cent., which, when compared with the mint par between the two countries, shows that the exchange is against England; but, after making allowance for charges of transport and loss of interest, the present rate leaves no profit on the transmission of gold to the United States.

The Commercial Times.

LETTERS FOR NORWAY.—Information having been received that the packet communication between Denmark and Norway has ceased for the winter, the mails for Norway will be forwarded through Sweden until further notice. During the period of the conveyance of these mails via Sweden, the rate of postage upon letters addressed to Norway will be 1s 5d the half ounce, and so on, according to the scale for charging *inland* letters. This rate comprises both the British and foreign postage on letters addressed to Norway, and constitues the whole charge to the place of their destination, and it may be either paid in advance or the letters may be forwarded unpaid, at the option of the sender; except, however, in the case of registered letters, the postage upon which, as well as the registration fee, must be paid in advance.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

At Mark-lane, to-day, the show of samples of English wheat was very moderate, and the trade ruled firm, at the full prices of Monday, to, in some few instances, a further advance of 1s per quarter. Foreign wheat was by no means extensively dealt in: nevertheless, the quotations were well maintained. Malting barley moved off slowly, yet no change took place in its value. Grinding and distilling sorts were firm in price. The oat trade was firm, at full currencies; and both beans and peas realised extreme rates. Most kinds of flour were in steady request, at full

quotations. This week's imports amount to 11,280 quarters of wheat, 3,400 of barley, 11,720 of oats, and 11,710 barrels of flour.

Wheat changed hands to a fair extent at Liverpool, this morning, at fully the recent advance in prices. Maize sold steadily, at quite previous rates.

During the week ending Oct. 26, the fluctuations in the value of cereals at Alexandria had been trifling. The demand, however, had been active, at fully previous currencies. The following were the sales:—14,210 quarters Saide wheat, private trade produce, 32s 6d to 33s 6d; 3,125 ditto, Pasha's produce, 35s to 35s 4d; 8,018 Beheireh ditto, private trade produce, 32s 3d to 33s; 3,735 white ditto, 32s 9d 33s 6d; 2,250 ditto, Pasha's produce, 35s to 35s; 8,650 Saide beans, private trade produce, 26s 8d to 27s 4d; 2,812 ditto, Pasha's produce, 28s 6d; 815 Beheireh ditto; 25s to 25s 4d; 2,728 barley, 19s to 20s 6d; 1,940 lentils, 26s to 27s 6d; 625 linseed, 48s to 49s per quarter, free on board. Freights—Beans to the United Kingdom for orders may be quoted 6s to 6s 6d per quarter; wheat or other grain or seed in proportion; to a direct port, 5s to 5s 6d per quarter for wheat or beans; by steamer to Liverpool, 6s 6d for wheat, beans, or other grain.

The momentary stillness which occurred in the Liverpool cotton market during the last week has been already followed by renewed activity during the present, and the decline in prices which resulted from some speculators pressing their cotton last week on the market for sale has been fully recovered in the last two or three days. The sales of the week amount to 60,000 bales, including 17,000 bales to spinners, 36,000 bales on speculation, and 7,000 bales for export. Quotations close about the same as on this day fortnight. To-day the market is very active; sales fully 20,000 bales. The market has every appearance of continued excitement during the ensuing week, and higher prices may be looked for.

The exports of cotton from Bombay during the month of September, and also for the nine months ending Sept. 30th, were as follows:—

	Great Britain. bales	Cowes, &c., for Orders. bales.	Foreign Europe. bales.	China, &c. bales.	Total. bales.
Total for the month	221551/2	...	...	...	221551/2
Previously exported this year	756871	185601/2	8426	546561/2	3385141/2

Messrs Briggs, of Alexandria, write as follows in reference to the cotton trade of that port for the week ending Oct. 26:—The new cotton, notwithstanding the interruption of communications, is coming forward. Prices have risen from ½d to ¾d per lb since our report of the 18th. The Nile has fallen below the level of the fields. What damage it has done will probably never be learned with any accuracy, but it is undoubtedly enormous—even the villages themselves, in many places, were carried away and the people left houseless. The operations have been:—186 bales old crop, 1860-61, low ordinary to good, 7 8-10d to 12d; 236 new crop, 1861-62, fully good fair, 12¼d to 12 6-10d; 373 ditto, good, 12¾d to 13¼d; 215 ditto, fine, 13 3-10d to 14d per lb free on board, making a total of 1,010 bales. Freights—By steamers, ½d and 5 per cent.

The public sales of tea were brought to a close on Monday, and no change took place in the quotations. In the private contract market, a full average business has been transacted, at very full prices.

Most kinds of raw sugar have been in slow request; nevertheless all good and fine samples have fully supported previous rates, whilst no alteration has been observed in the value of superior parcels. Refined goods have moved off somewhat slowly on former terms.

We extract the following from Messrs Trueman and Rouse's circular:—

IMPORTS and STOCKS of SUGAR and COFFEE at the PRINCIPAL EUROPEAN PORTS, for the Nine Months ending 30th September, 1860 and 1861.

	Sugar. Imports. 1860.	Sugar. Imports. 1861.	Sugar. Stock, 30th Sept. 1860.	Sugar. Stock, 30th Sept. 1861.

On the whole, the market for coffee has been steady, at last week's currency. At one period of the week, however, prices were decidedly drooping. Cocoa has ruled firm, at extreme rates.

Clean parcels of rice have sold steadily, at full quotations; but rough qualities have been much neglected. The dry fruit trade has been dull, at drooping currencies.

In rum, a limited business has been transacted, yet no change has taken place in its value. Brandy has met a slow inquiry.

The public sales of colonial wool commenced on Thursday, and are announced to continue till the 11th proximo. The attendance of buyers was moderately good, but mostly from our own manufacturing districts, and the biddings, generally, ruled inactive, though without leading to any quotable alteration in prices, compared with the close of last auctions. A few lots, however, have changed hands at rather lower rates.

The market for hemp has been steady, at 34*l* for clean St Petersburg. Flax has ruled stationary.

COMPARATIVE STATEMENT of HEMP and FLAX on hand in London, on the 1st of November, 1860 and 1861, Dealers' Stocks included.

"During the early part of last month," write Messrs Hunt and King, "there were prospects of some improvement in the silk market, and buyers came forward freely to supply their immediate wants, which caused a more buoyant feeling, and prices slightly advanced. Within the last fortnight, however, the demand has gradually subsided, and our present quotations are generally 6d to 1s per lb lower, and nothing doing."

PARTICULARS of STOCK, IMPORTS, and DELIVERIES to November 1, 1861.

	Imports. bales.	Deliveries. bales.	Stock, Nov. 1. bales.
China	6345	5794	25230
Bengal	290	478	5335

The annexed remarks, in reference to the tobacco trade of the past month, are from Messrs Grant, Hodgson, and Co.'s circular;—

During last month a considerable business has been transacted in most descriptions of tobacco, and sales, as closely as can be estimated, consisted of 236 hhds Virginia leaf, 111 hhds and tierces of strips, and 2,246 hhds Kentucky leaf, 123 hhds Kentucky strips, and 189 hhds Maryland,—together, 2,905 hhds. For home trade there has been an improved demand, and several lots, both leaf and strips, were taken at outside quotations, and sales might have been further extended had holders been disposed to progress with sales at current rates. The principal feature in the market has been a considerable demand for exportation, resulting in large sales of Western leaf: a good inquiry still exists, and it is more than probable that further sales will be effected to some extent. Imports—1,212 hhds. Deliveries—1,196 hhds, against 1,050 hhds in the corresponding month of last year. Stock—27,764 hhds, against 20,487 hhds in 1860; 19,733 hhds in 1859; 13,776 hhds in 1858; 10,353 hhds in 1857; and 9,173 hhds in 1856.

With regard to the leather trade of the past month, Messrs Powell observe:—The trade in leather during the past month has not manifested any great activity. Buyers have evinced very little disposition to purchase more than their immediate wants required, but the demand for consumption has generally fully equalled the supplies, and there is not a heavy stock of any description of goods on hand. Our quotations show very little change, almost the only alteration being a slight advance on the best descriptions of heavy English sole leather, which has been in inadequate supply. Raw goods have been nearly stationary in value throughout the month. The imports have been moderate.

The following is from Messrs Churchill and Sim's circular:—

COMPARATIVE STOCK of TIMBER at the PUBLIC DOCKS, Nov. 1.

	1861.	1860.	1859.
Foreign deals... ..... pieces	1,669,000	1,095,000	1,259,000

United States pitch pine timber ...	3,800	2,300	5,300
East Indian teake.....	5,500	900	7,300

Scotch pig iron has been dull at 49s 6d and 49s 3d cash, mixed numbers. The shipments from Scotland, during October, were 47,756 tons, against 37,908 tons last year, making the total since Jan. 1, 495,706 tons and 466,323 tons in 1861 and 1860 respectively. Other metals have been tolerably firm. The arrivals of foreign tin into London during last month were 1,403 slabs of Straits and 1,950 slabs of Banca, making the import since the 1st of January as under:—

	1861 slabs	1860 slabs	1859 slabs	1858 slabs
Banca	9860	10945	12481	50268
Straits	59910	49259	38275	12549
Total	69770	60204	50756	62817

Linseed oil has been in steady request, at 35s per cwt on the spot. Rape, olive, cocoa-nut, and palm oils have changed hands to a fair average extent, at fully previous quotations. American spirits of turpentine have advanced to 70s per cwt.

The receipts and shipments of naval stores at New York, from Jan. 1 to Oct. 22, were as follows.—

	Receipts.		Exports.	
	bbls 1861.	bbls 1860.	bbls 1861.	bbls 1860.
Turpentine	32,139	51,170	19,465	47,029

"The aspect of financial and commercial affairs," observes the New York *Shipping List* of the 23rd ult., "remains without essential alteration. The subscriptions to the national loan continue to a satisfactory extent, though we cannot see that they show any increase. The money market is quiet with an abundance of capital, and a limited demand for it at the following quotations:—

	Per cent. per annum.
Loans on call, stock securities	5 to 6
Do. bond and mortgage	6 7
Prime endorsed bills, 60 to 90 days	6 7
Do. 4 to 6 months.....	8 9
First-class single signatures	7 ...
Other good bills	... ...

The national loan continues to occasion large differences in the discount and deposit lines in the weekly Bank statement, though the actual mercantile transactions make but little difference. The last statement, compared with the report of the previous week, is as follows:—

	Oct. 12. dols	Oct. 19. dols		dols
Loans.....	156,318,914	151,828,438	Dec.	4,490,476
Specie	41,130,606	42,282,884	Inc.	1,145,278
Circulation	8,733,090	8,583,673	Dec.	149,417
Deposits, gross...	143,185,379	146,900,320	Dec.	1,285,059
Do., net.....	129,188,487	126,433,063	Dec.	2,755,424

The following is a comparative statement of the imports of dry goods and general merchandise at the port of New York for the week ending Oct. 19th, and since Jan. 1st:—

	1860. dols	1861 dols
Dry goods	1,635,367	581,172
General merchandise	2,452,365	1,615,957
Total for the week	4,087,732	2,197,129
Previously reported	188,712,697	101,120,013
Since January 1.....	192,800,429	103,317,142"

PROVISIONS.

A slight decline in the bacon maket this week. Fine bacon is selling at 66s, landed. In Irish butters a brisk trade is doing, at a slight advance, in consequence of the inferior quality of Friesland. Jersey butters not so much sought after, the large arrivals of Canadian taking their place in the market. Hams are very scarce, and selling at fabulous prices.

METROPOLITAN CATTLE MARKET.

THURSDAY, Nov. 7.—To-day's market was but scantily supplied with beasts, chiefly in very middling condition. Prime breeds commanded a steady sale, at full quotations; otherwise the beef trade was in a sluggish state, on former terms. Sheep—the supply of which was limited—were in good request, at fully Monday's currency. The top quotation was 5s 8d per 8 lbs. We have to report an active inquiry for calves, at an improvement in value of from 2d to 4d per 8 lbs. The best veal has realised 5s 4d per 8 lbs. Pigs were quite as dear as on Monday; but milch cows were very dull.

Per 8 lbs to sink the offal.

	s d	s d		s d	s d
Coarse and inferior beasts	2 10	3 2	Prime Southdown sheep	5 4	5 8
Second quality ditto	3 4	3 10	Large coarse calves	4 2	4 8
Prime large oxen.....	4 0	4 6	Prime small ditto	4 10	5 4
Prime Scots, &c.....	4 8	5 0	Large hogs	4 0	4 6
Coarse and inferior sheep	3 2	3 6	Small porkers.....	4 8	5 2
Second quality ditto	3 8	4 4	Suckling calves.....each	22 0	32 0
Prime coarse-woolled do..	4 6	5 2	Quarter old store pigs ...	22 0	31 0

Total supply—Beasts, 810; sheep and lambs, 5,450; calves, 230; pigs, 500.
Foreign supply—Beasts, 220; sheep, 880; calves, 140.

NEWGATE AND LEADENHALL.

FRIDAY, Nov. 8.—Although the supplies of meat are only moderate, the trade, generally speaking, rules inactive; yet prices, especially for good and prime qualities, are well supported.

Per 8 lbs by the carcase.

	s d	s d		s d	s d
Inferior beef	2 8	3 2	Middling mutton	3 10	4 2
Middling ditto	3 4	3 6	Prime ditto	4 4	4 6
Prime large ditto	3 8	3 10	Veal	3 8	4 8
Prime small ditto	4 0	4 2	Small pork	5 2	5 6
Large Pork.....	4 2	5 0	Lamb	0 0	0 0
Inferior mutton.....	3 4	3 8			

POTATO MARKET.

SOUTHWARK WATERSIDE, Monday, Nov. 4.—During the past week the arrivals coastwise have been small, but more plentiful by rail. The trade rules dull and the consumption limited, owing to the general inferior quality and condition of potatoes. The following are this day's quotations:—Kent and Essex Regents, 110s to 130s; Yorkshire ditto, 90s to 120s; Lincolnshire ditto, 90s to 110s; Scotch ditto, 60s to 95s; French whites, 100s to 110s per ton.

FRIDAY, Nov. 8.—The receipts of potatoes are very moderate, and the trade rules firm, at full quotations.

HOP MARKET.

BOROUGH, Monday, Nov. 4.—The improvement noticed in our last report has been fully supported by a large trade, and for the finest descriptions, which are fast disappearing from the boards, more money has been obtained. We have but little inquiry for yearlings and hops of earlier date. Mid and East Kents, 180s to 195s, choice 220s; Weald of Kents, 147s to 165s, choice 185s; Sussex, 135s to 145s, choice 155s.

FRIDAY, Nov. 8.—Good and fine hops are in steady request, at very full prices, but inferior parcels move off somewhat slowly, on former terms. About 2,000 bales have come to hand, this week, from the Continent and New York.

HAY MARKETS—THURSDAY.

SMITHFIELD.—Meadow hay, 2*l* 0s to 5*l* 0s; clover ditto, 3*l* 10s to 5*l* 15s; and straw, 1*l* 8s to 1*l* 16s per load. A slow trade.

CUMBERLAND.—Meadow hay, 2*l* 5s to 5*l* 0s; clover, 3*l* 10s to 5*l* 15s; and straw, 1*l* 8s to 1*l* 16s per load. Trade steady.

WHITECHAPEL.—Meadow hay, 2*l* 2s to 5*l* 0s; clover, 3*l* 10s to 6*l* 0s; and straw, 1*l* 8s to 1*l* 16s per load. A fair demand.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Nov. 8.—There is still a fair inquiry for low descriptions of foreign suitable for export to the States, but as the market is pretty well cleared of such kinds, the transactions are of a limited extent only.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Nov. 8.—Fair attendance at to-day's market. Wheat in good consumptive demand, at the full prices of Tuesday. Flour moderate sale, without change in price. Indian corn in fair request; mixed 32s 9d to 33s. Beans steady; Saide, 36s 3d to 36s 6d. Other articles unaltered.

METALS.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Nov. 8.—The market for manufactured iron remains without change, and with only a moderate demand generally. Scotch pig iron has been remarkably quiet during the week, and has slightly declined. In copper, a very limited business doing. More inquiry for tin plates. Little or no alteration in other metals.

The Gazette.

TUESDAY, NOV. 5.

BANKRUPTCY ANNULLED.

J. Moss, Hounsditch, wholesale clothier.

BANKRUPTS.

W. Winniett, Chapel place, Cavendish square, Captain, 2d battalon of Her Majesty's 24th regiment of foot.
M. Duffy, Wapping wall, beerhouse keeper.
H. Nodes, Robert street, Chelsea, undertaker.

EPITOME OF RAILWAY NEWS.

TRAFFIC RECEIPTS.—The traffic receipts of railways in the United Kingdom for the week ending the 26th of October amounted to 548,480*l*, and for the corresponding week of last year to 539,960*l*, showing an increase of 8,520*l*. The gross receipts of the eight railways having their termini in the metropolis amounted to 253,643*l*, and for the corresponding week of 1860 to 250,456*l*, showing an increase of 3,187*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, Nov. 4.—The railway market to-day was flat, partly from the absence of business and partly from the heaviness in the funds. South-Eastern receded nearly 1 per cent., from the decrease in the traffic, Great Northern also declined ½ per cent., and London and North-Western, Midland, Lancashire and Yorkshire, Great Western, and Eastern Counties, ¼ to ⅜. There was only a moderate business in colonial stocks, and prices were generally unchanged. Great Western of Canada shares remained steady at 9⅜ to ⅞. Foreign descriptions were flat, especially Bahia, San Paulo, and Great Luxembourg. The latter closed at 9½ to ¾. Lombardo-Venetian were the same as on Saturday, at ⅞ to 1 prem. No alteration of importance took place in American securities. In mines, United Mexican continued to advance. St John del Rey, on the other hand, were rather less firm.

TUESDAY, Nov. 5.—The railway market to-day was again flat. The principal decline was in Great Northern and Sheffield, which respectively receded 1½ and 1¼ per cent. Midland, Lancashire and Yorkshire, and Caledonian also declined ½ per cent., and the other leading stocks about ¼. There continued a general absence of business. In the colonial department, Indian guaranteed stocks remained in demand, and in several instances exhibited an advance. Cape Town shares and Buffalo and Lake Huron were likewise higher. Foreign descriptions were about the same as yesterday. Great Luxembourg left off at 9⅛ to ¼, and Lombardo-Venetian ⅞ to 1 pm. American securities again closed without alteration. In mines there was a reaction in United Mexican. London and County Bank shares advanced to 37 to 38. In miscellaneous descriptions, London Dock stock improved.

WEDNESDAY, Nov. 6.—The railway market remained without the slightest animation, and to-day showed rather a heavy tendency. North-Eastern stocks, Caledonian, and South-Eastern especially declined ¼ to ½ per cent.; Great Northern, on the other hand, rallied to 110¼ to 111, and Midland, Lancashire and Yorkshire, and Sheffield also fractionally improved. The general business continued entirely unimportant. In the colonial market, Grand Trunk improved to 19¾ to 20¼, and Great Western of Canada to 9⅞ to 10. Foreign descriptions were rather dull; Great Luxembourg in particular receding to 8⅞ to 9. Pernambuco were likewise heavy, while Lombardo-Venetian remained quiet at ⅞ to 1 pm. In American securities there was a rise in Virginia 6 per Cents., and a decline in Erie Preference and Illinois Central. The only change of any importance in mines was a reaction in St John del Rey. Joint stock bank shares were steady, London and Westminster and Oriental being especially firm; Ottoman, on the other hand, rather dull. In miscellaneous descriptions, Red Sea Telegraph advanced.

THURSDAY, Nov. 7.—The railway market remained inanimate. The reduction in the Bank rate caused a temporary advance, but the closing prices were mostly the same as yesterday. Midland, however, and Great Northern improved, especially the former. Great Western was rather flat. No change of importance took place in the colonial department. Foreign descriptions were firmer, especially French. Bahia, Dutch-Rhenish, Great Luxembourg, and Lombardo-Venetian also advanced, the two last being respectively quoted 9 to ⅛, and 1⅛ to ¼ premium. In American securities, Illinois Central shares receded. Mines generally left off without change. A relapse, however, occurred in St John del Rey.

FRIDAY, Nov. 8.—The railway share market to-day was generally steady, with little business. The principal variations were a rise of ¼ per cent. in Great Western and Midland stocks, and a decline of ⅛ to ¼ in Caledonian and South Eastern. Other stocks were quoted much the same as yesterday afternoon. Lombardo-Venetian Railway shares were in considerable request, and advanced to 1 5-16 to 1 7-16 premium. Other foreign lines were quiet. Indian and Canadian railway shares ruled steady. The market for mining shares ruled inactive.

By advices from Hamburg the price of gold is 429½ per mark, and the short exchange on London is 13.7¾ per 1*l* sterling. Standard gold at the English Mint price is, therefore, rather more than 2-10ths per cent. dearer in London than in Hamburg.

HOLLOWAY'S OINTMENT AND PILLS.—Indisputable Remedies.—In the use of these medicaments there need be no hesitation or doubt; by their cooling, healing, and purifying properties, Holloway's preparations must always do good. Both should find a place in every household. The Ointment stands unrivalled for the facility it displays in relieving, healing, and thoroughly curing the most inveterate sores, ulcers, and all other skin affections. The Pills, by purifying, stimulating, and regulating every organ, greatly assist the remedial virtues of this excellent Ointment. They cannot possibly do any harm. Even if used at haphazard, without attention to the directions accompanying each packet, no ill consequences would ensue; they would still operate beneficially according to the strict necessity of the case.

JOZEAU'S COPAHINE, or SACCHARATED CAPSULES.—Copaiba and Cubebs are, doubtless, the best remedies, but these drugs are of a repulsive taste and odour, and occasion colicky pains, nausea, and gastric disturbance. M. Jozeau has succeeded in rendering these valuable therapeutic agents perfectly innocuous by increasing, in in his Copahine, all the curative properties. This preparation has been adopted by the Paris Academy of Medicine, after more than a thousand trials in Paris and the different London hospitals, viz., St Thomas's, Guy's, and St Bartholomew's, under the care of Messrs Lloyd, Poland, and Legros Clark, LANCET, Nov. 6, and Dec. 10, 1857. The Copahine, which is in form of a pretty pink sugar plum, effects a cure in about six days, either in recent or chronic diseases. 100 capsules, 4s 6d; post free, 5s 2d. Post-office order required; at G. Jozeau's, French Chemist, 49 Haymarket, London; 22 Rue St Quentin, Paris; and all the most important Chemists.

DR DE JONGH'S
(Knight of the Order of Leopold of Belgium)
LIGHT-BROWN COD LIVER OIL,
Prescribed by the most Eminent Medical Men throughout the world as the safest, speediest, and most effectual remedy for
CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GOUT, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,
Is incomparably superior to every other variety.

SELECT MEDICAL OPINIONS.

Sir JOSEPH OLLIFFE, M.D., Physician to the British Embassy at Paris.—"I have frequently prescribed Dr de Jongh's Light Brown Cod Liver Oil, and I have every reason to be satisfied with its beneficial and salutary effects."

Sir HENRY MARSH, Bart., M.D., Physician in Ordinary to the Queen in Ireland.—"I consider Dr de Jongh's Light Brown Cod-Liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."

Dr LAWRANCE, Physician to H.R.H. the Duke of Saxe-Coburg and Gotha.—"I invariably prescribe Dr de Jongh's Oil in preference to any other, feeling assured that I am recommending a genuine article, and not a manufactured compound, in which the efficacy of this invaluable medicine is destroyed."

Dr LANKESTER, F.R.S., Superintendent of the Food Collection, South Kensington Museum.—"I consider the Cod Liver Oil sold under Dr de Jongh's guarantee to be preferable to any other kind as regards genuineness and medicinal efficacy."

Dr de Jongh's Light Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; capsuled, and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists.

SOLE CONSIGNEES:
ANSAR, HARFORD, and CO., 77 STRAND, London, W.C.

CAUTION.—Beware of Proposed Substitutions.

NOTICE TO INVENTORS.—Office for Patents, 4 Trafalgar square, Charing cross.—Printed instructions (gratis) as to the cost of Patents for Great Britain or foreign countries. Advice and assistance in disposing of or working inventions. Branch offices and agencies in every continental state and in America. Established 20 years. Full information as to expired or existing patents at home or abroad.—Apply personally or by letter to Messrs Prince and Co., Patent Office, 4 Trafalgar square, Charing cross, W.C.

EDUCATION.—International.—The Royal Continental Collegiate Institute (limited to 20 young gentlemen), on Bushey heath, three miles from Harrow station and two from Watford. Principal, Dr Vellère, late of the Harrow Preparatory School. This school is highly recommended for three reasons—first, for very excellent board, liberal supply, judicious treatment, great success in education, and, above all, as preferable to going abroad with regard to acquiring the French language perfectly; secondly, for very moderate and strictly inclusive terms, within the reach of nearly every one; and, thirdly, that no case of illness has ever occurred since the school has been established in 1857, a fact which has never been heard of in any other school, not even those excepted at the seaside. From the great attention incessantly paid by the principal to his pupils' comfort, happiness, and future welfare, he trusts that he will be patronised by a discriminating public. Travelling expenses beyond 25 miles are entirely paid by him. The quarter or half-quarter is dated from the day of the arrival of the pupil. Terms from 30 guineas upwards. Address, stating age and requirements, Dr Vellère, Bushey heath, Watford.

AT HAMBLY HOUSE ACADEMY, Streatham Common, Surrey, Young Gentlemen are carefully Educated for the Public Schools, Military Colleges, Professions, or Commerce, by Mr R. S. TROUSDALE, L.C.P., aided by highly qualified assistant masters.

The domestic arrangements are on the most liberal scale; and the house is very delightfully situated. The terms for pupils under ten years of age, 30 guineas per annum; ten and under fourteen, 35 guineas per annum; fourteen, 40 guineas per annum. The above amount includes board and instruction in the Latin, Greek, French, and English Languages, Writing, Arithmetic, Merchants' Accounts, History, Geography, the Use of the Globes, Astronomy, Geometry, Algebra, and the other branches of the Mathematics. A library is devoted to the instruction and amusement of the pupils during their leisure hours. Religious works are provided for Sunday perusal; and lectures on various popular subjects are occasionally delivered. German, Drawing, Dancing, and Music, on the usual terms. Washing, half-a-guinea per quarter. Drilling during the summer months, at a trifling charge; and board during a vacation, four guineas. All accounts are expected to be settled quarterly. Excellent accommodation for foreigners or gentlemen of neglected education. A quarter's notice of removal is required.

PRACTICAL OBSERVATIONS on the CAUSES and TREATMENT of CURVATURES of the SPINE. Third edition, price 6s.
AND
Just published, second edition, price 1s 6d,
CASES and OBSERVATIONS illustrative of the beneficial results which may be obtained by close attention and perseverance, in some of the most unpromising instances of Spinal Deformity; with numerous Engravings.
By SAMUEL HARE, F.R.C.S., &c.
"The author has had much success in his plan of treatment, and we are of opinion that the principles on which he acts, in the treatment of these affections, are correct."—LANCET.
"We unhesitatingly commend this work as a truthful and trustworthy statement of the power of scientific surgery and medicine over some of the most grievous hindrances to human activity and industry."—MEDICAL GAZETTE.
"Mr Hare may take credit to himself for having effected much good in the treatment of the cases described."—BRITISH MEDICAL JOURNAL.
"Mr Hare is, we think, a sound and successful practitioner."—MEDICAL CIRCULAR.
London: John Churchill; and may be had of all booksellers.

EXTRAORDINARY DISCOVERY—NEW THEORY
(Medicines Superseded.)
NERVOUS DEBILITY AND ITS train of evils, such as self-distrust, timidity, pimples on the skin, loss of memory, thoughts of suicide, trembling of the limbs, depression and prostration of the system &c., immediately checked and speedily cured by the Newly-Discovered Patent Appliance. Advice and instructions post free on receipt of two stamps, by Dr Watson, U.S., F.R.A.S., President of the Medical Reform Society of Great Britain. No. 27 Alfred place, Bedford square, London. Consultations daily from 11 till 2 and 6 till 8 on all these ailments and infirmities peculiar to youth, manhood, and old age, which tend to embitter and shorten life. For distinguished qualifications vide diplomas.

BLAIR'S GOUT AND RHEUMATIC PILLS.—Price 1s 1½d and 2s 9d per box.
This preparation is one of the benefits which the science of modern chemistry has conferred upon mankind; for during the first twenty years of the present century, to speak of a cure for the gout was considered a romance; but now the efficacy and safety of this medicine is so fully demonstrated, by unsolicited testimonials from persons in every rank of life, that public opinion proclaims this as one of the most important discoveries of the present age.
Sold by all medicine venders. See the name of "Thomas Prout, 229 Strand, London," on the Government stamp.

Just out, price 6d, by post 7 stamps,

RIMMEL'S PERFUMED ALMANACK for 1862, beautifully printed in oil colours; imparts a delightful fragrance to pocket-books, desks, card-cases, &c., and forms an appropriate present to friends at home and abroad. Sold by all the trade.—E. RIMMEL, Perfumer to Her Majesty, 96 Strand, and 24 Cornhill, London; and at 17, Boulevard des Italiens, Paris.

PETROLEUM FOR EXPORT.—A large Supply in Yard, in prime shipping order, on consignment, from the principal Wells in the United States, for Sale on the most favourable terms. Shipping facilities direct from the Yards.—SCHIEFFELIN BROTHERS and CO., 170 and 172 WILLIAM STREET, NEW YORK.

GOOD DIVIDENDS.—Messrs DAUNT and COMPANY, of 30 Clement's lane, Lombard street, E.C., have on SALE some Foreign Government BONDS, yielding Eight and Nine per Cent. Interest, payable half-yearly, as punctually as on Consols, and are perfectly secure. Business transacted in the English Funds at 1-16th, Railways at ¼, and Mines at 1 per cent. A list of safe investments forwarded (gratis) on application. Investors will be cautioned against spurious mines.

MERCHANTS HAVING commissions for Furniture or Carpets of a superior class, are respectfully invited to visit the manufactory and show rooms of Messrs JACKSON and GRAHAM. By the introduction of machinery worked by steam power in various processes, J. and G. have effected a considerable improvement and economy in the manufacture of furniture, and their spacious show rooms afford to purchasers unrivalled facilities for the selection of all requisites, useful and ornamental, in the best taste. Four show rooms, each 120 feet long, are exclusively devoted to the display of Bedsteads and Chamber Furniture. J. and G. are also large importers of Silks, Tapestries, and other Fabrics for Curtains, and their Gallery of Bronzes d'Art is the sole depot for the celebrated productions of F. Barbedienne and Co., of Paris, which they sell at the prices of the Paris catalogue, with 5 per cent. added for expenses of importation.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

ELASTIC STOCKINGS, KNEE CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price, 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.

WHITE, MANUFACTURER, 228 Piccadilly, London.

A BOON TO NERVOUS SUFFERERS.—Twenty Thousand Copies of a Medical Book for gratuitous circulation. HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., who has devoted fifteen years to the study and treatment of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, will send free, for the benefit of Nervous Sufferers, a copy of the New Medical Guide, containing his highly successful mode of treatment, with necessary instructions, by which sufferers may obtain a cure. Post free on receipt of a stamped directed envelope. Address Dr Henry Smith, 6 Burton crescent, Tavistock square, London, W.C.

DR MARSTON'S LECTURES—FREE ISSUE.—The following Lectures are ISSUED GRATUITOUSLY by the Professors of the Royal Institute of Anatomy and Science, 369 Oxford street, London, Firstly, as a mark of esteem to their distinguished colleague, Dr MARSTON, M.R.C.S., L.S.A., and Secondly, from a conscientious belief that the Lectures will do a vast amount of good by enlightening the public upon subjects of the highest importance to their moral welfare and physical health, ignorance of which has to the present day been a most fruitful cause of human suffering and misery.

No. I.—NERVOUS DEBILITY (the result of youthful error), loss of memory, shortness of breath, dimness of sight, exhaustion, and general incapacity. Addressed specially to Young Men.

No. II.—MARRIAGE: Its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who desire Children.

No. III.—THE BRAHMIN'S ELIXIR OF LIFE: Its History—Secret Remedies of the Hindoos no Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Reinvigorator of the Impaired Functions, and in all Cases of Nervous Debility.

No. IV.—THE DISEASES INFLICTED UPON MANKIND BY THE GREAT SOCIAL EVIL. With a simple means of complete Cure without Mercury.

"These lectures contain Dr Marston's experience during Twenty-five Years of Successful Practice, and point out to those who need it Simple yet Effectual means of complete restoration to vigorous health."—MEDICAL JOURNAL.

State the No. of the Lecture required, and enclose 2 Stamps to prepay postage; or the whole Four may be had, neatly bound, 164 pages, octavo, post free, for 6 Stamps.—Address, Treasurer, Royal Institute, 369 Oxford street, London.

Cooper, Esq., assisted by Miss Emma Snelson and Madame Allene, for his highly successful musical entertainment, entitled "The Rose, the Shamrock, and the Thistle." Lecture on Haworth's Patent Pezambulator and New Street Railway. The Series of Magnificent Dissolving Views with Descriptive Lecture, by J. D. Malcolm, Esq., illustrating "The Citizen of the World." Beautiful Electrical Experiments, by Mr J. L. King. All the other Entertainments as usual. Open from 12 to 5, and from 7 to 10. Admission to the whole, 1s. N.B.—John Snell, Waterman, of Hampton, will illustrate the Rope Feats.

ADOPTED LARGELY BY HER MAJESTY'S GOVERNMENT.

CHEAP, LIGHT AND DURABLE ROOFING.

CROGGON'S PATENT ASPHALTE ROOFING FELT has been extensively used and pronounced efficient and particularly applicable for warm climates

1st. It is a non-conductor.

2nd. It is portable, being packed in rolls, and not liable to damage in carriage.

3rd. It effects a saving of half the timber usually required.

4th. It can easily be applied by any unpractised person.

5th. From its lightness, weighing only about 42 lbs to the square of 100 feet, the cost of carriage is small.

INODOROUS FELT, for damp walls and for damp floors, under carpets and floor cloths; also for lining iron houses, to equalise the temperature.

Price ONE PENNY PER SQUARE FOOT.

CROGGON and CO'S PATENT FELTED SHEATHING for Covering Ships' Bottoms, &c., and

DRY HAIR FELT, for Covering Steam Boilers, Pipes, &c., preventing the radiation of Heat, and saving 25 per cent. of Fuel.

Samples, testimonials, and full instruction on application to CROGGON and CO, 2 Dowgate hill, London and at 2 Goree Piazzas, Liverpool.

DINNEFORD'S PURE FLUID MAGNESIA has been, during twenty-five years, emphatically sanctioned by the Medical Profession, and universally accepted by the Public, as the Best Remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion, and as a Mild Aperient for delicate constitutions, more especially for Ladies and Children. Combined with the Acidulated Lemon Syrup, it forms an agreeable Effervescing Draught, in which its aperient qualities are much increased. During hot seasons and in hot climates, the regular use of this simple and elegant remedy has been found highly beneficial. Manufactured (with the utmost attention to strength and purity) by DINNEFORD and CO., 172 New Bond street, London; and sold by all respectable chemists throughout the Empire.

DR CURTIS'S MEDICAL WORK "MANHOOD,"

An Essay on Nervous and Generative Diseases.

The 140th thousand, with numerous plates, in a sealed envelope, price 1s, or post paid, by the Author, for twelve stamps.

MANHOOD: THE CAUSE AND CURE of PREMATURE DECLINE in MAN, with Plain Directions for Perfect Restoration to Health and Vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, the result of twenty-five years' successful practice. By Dr J. L. CURTIS, 15 Albemarle street, Piccadilly, London. Consultations, Ten till Three and Six till Eight.

REVIEWS OF THE WORK.

"We feel no hesitation in saying that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a parent, preceptor, or clergyman."—SUN, evening paper.

"Dr Curtis has conferred a great boon by publishing this little work, in which is described the sources of those diseases which produce decline in youth, or more frequently premature old age."—DAILY TELEGRAPH, March 27, 1858.

N.B. The author of the above Medical Treatise may be consulted, as usual, either by letter or personally, at his residence. The efficacy and harmless nature of the remedies employed by Dr Curtis having been demonstrated by the most complete success during a practice extending over a period of 20 years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

Published by Allen, 20 Warwick lane, Paternoster row; Mann, 39 Cornhill; and free from the Author for 12 stamps.

HEAL AND SON'S EIDER-DOWN QUILTS, from One Guinea to Ten Guineas. Also GOOSE-DOWN QUILTS, from 8s 6d to 24s. List of prices and sizes sent free by post. Heal and Son's Illustrated Catalogue of Bedsteads and Priced List of Bedding, also sent post free.

196 Tottenham Court road, W.

HARVEY'S SAUCE.—CAUTION.—The admirers of this celebrated Sauce are particularly requested to observe that each bottle bears the well-known label, signed "Elizabeth Lazenby." This label is protected by perpetual injunction in Chancery of the 9th July, 1858, and without it none can be genuine.

E. LAZENBY and SON, of 6 Edwards street, Portman square, London, as sole proprietors of the receipt for Harvey's Sauce, are compelled to give this caution, from the fact that their labels are closely imitated with a view to deceive purchasers.

Sold by all respectable grocers, druggists, and oilmen.

ALLEN'S PATENT PORTMANTEAUS and TRAVELLING BAGS with square openings.

LADIES' WARDROBE TRUNKS, DRESSING BAGS, with silver fittings.

DESPATCH BOXES, WRITING and DRESSING CASES, and 500 other articles for home or continental travelling. Illustrated catalogues post free.

Also Allen's Barrack Furniture Catalogue of Portable Bedsteads, Drawers, Easy Chairs, Washhand-stands, Canteens, &c., post free.

J. W. ALLEN, Manufacturer and Patentee, 22 and 31 West Strand, London, W.C.

Under the Patronage of the Governments of Great Britain, Spain, Denmark, Brazil, Russia, &c., &c.

EASTON'S PATENT BOILER. FLUID effectually removes and prevents incrustation in steam boilers (land and marine), without injury to the metal, with great saving in fuel, and with less liability to accident from explosion. It is now generally used by the principal steam-packet companies of London, Liverpool, Hull, Southampton; by H.M. steam store-ships, Woolwich Arsenal, by the Honourable Corporation of Trinity House, the War Department, and India Store Department, at Bombay, Calcutta, and Kurrachee, and by engineers and manufacturers throughout the country.

Testimonials from eminent engineers, boiler-makers, millwrights, manufacturers, and steam-boat proprietors, with full particulars, will be forwarded on application to P. S. EASTON and G. SPRINGFIELD, sole manufacturers and patentees, 37, 38, and 39 Wapping wall, London, E.; or of their agents in the principal towns of Great Britain.

A WELCOME ANNOUNCEMENT.

E. MOSES AND SON beg respectfully to acquaint the public that they have made preparations, on an unprecedentedly large scale, for the Autumn and Winter Seasons. Their stock of OVERCOATS comprises every modern style in all kinds of seasonable and serviceable materials, with the latest improvements in workmanship. The Eversley and Shelburne overcoats are particularly recommended.

Their general stock includes every description of attire for all classes, all ages, and all occupations; the articles are too numerous to particularise, but may be gathered from their several trades of—

READY-MADE AND BESPOKE TAILORS, HABIT MAKERS, WOOLLEN DRAPERS, HATTERS, HOSIERS, BOOT AND SHOE MAKERS, AND GENERAL OUTFITTERS.

Their BESPOKE CLOTHING DEPARTMENT is too important a branch of their business to be passed over without a special notice. It offers a perfect fit, combined with the most fashionable and comfortable styles, and the most elegant workmanship.

E. MOSES and SON need scarcely remind the public that in every department of all their establishments the Highest Degree of Excellence is associated with Prices the Most Moderate.

Any article not approved of will be exchanged or the money returned.

Rules for self-measurement and lists of prices post free.

E. MOSES and SON'S establishments are closed every Friday evening at sunset till Saturday evening at sunset, when business is resumed until Eleven o'clock.

E. MOSES and SON.

N.B.—Our Celebrated "INDISPENSABLE SUIT," adapted equally for walking, riding, travelling, or business, may be had in a large variety of seasonable and fashionable materials, from 30s to 70s.

DR KAHN ON MARRIAGE.—A new and entirely re-written edition (the forty-seventh of this celebrated treatise), with illustrations, engravings, &c., is now ready.

The object of the work is not to maintain any particular hypothesis, but to enable every one to understand for himself the structure and functions of the organs concerned in the fulfilment of the physical obligations of the married state; to acquaint him with the consequences arising from excesses; to prevent unnecessary misapprehension from unfounded fears, and to indicate, when those fears are well founded, the means of speedy relief. The work is not crowded with the technicalities of ordinary professional books, nor does it present the crudeness which characterises the so-called "popular works" on the subject.

Price One Shilling, free by post for thirteen stamps, or in a sealed envelope twenty stamps, either from the publisher, J. Allen, 20 Warwick lane; or from the author's address, 17 Harley street, Cavendish square, London, where he may be consulted daily.

HUBBUCK'S PATENT WHITE ZINC PAINT,

Made by their process, where it is sold by the Paint Grinders without adulterating it, is the most durable and beautiful of all Paints.

It is also sold by the Patentees, ground into paint, each cask stamped "HUBBUCK, LONDON, PATENT," to counterfeit which is forgery.

Extract from the Report of NATHAN MERCER, Esq., F.C.S.

7 Church street, Liverpool, April 6th, 1859.

On Saturday I visited the iron ship "William Fairbairn," for the purpose of ascertaining whether or no her plates had been affected by the red lead with which she was coated previous to her late voyage to Calcutta. She was in the hands of the scrapers, and showed the great extent to which the iron had been corroded, patches of rust protruding through the paint, and being thickly spread over the unscraped portions. The red lead coating was covered with blisters, from each of which, on being opened, a clear fluid escaped, and left exposed on the surface of the iron a number of brilliantly shining crystals of metallic lead, and that they were formed at the expense of the iron, was evident from the corroded and pitted appearance of the plate beneath every blister. The fluid from the blisters is produced by the combination of the chlorine of the sea-water with the iron of the ship, showing that the "sweat," so well known to every person interested in iron ships, is not salt water, but a solution of chloride of iron.

On those portions which had been scraped, this "sweat" was exuding from every pore; and on looking along the surface, myriads of glittering particles of lead were seen.

The injurious effects produced by red lead were unmistakeable and self-evident.

Greenock, 7th August, 1859.

GENTLEMEN,—My object in writing to you, is to call attention to the state of the frames and plating of the iron ship "Thomas Hamlin." This vessel, when built eight years ago, was coated inside and outside with your Zinc Paint; the inside coating has never been renewed.

From the reports on other ships of even less age, I was led to fear that both the plates and rivet heads might be a good deal destroyed, the ship having had frequently sugar cargoes home from India, and molasses from the West Indies.

When the ship was opened fore and aft for the inspection of Lloyds' surveyors in London, my pleasure was not less than the surprise of those gentlemen, Messrs Ritchie and Light, to find that both the frames, plates, and rivet heads were as good as the day on which they were coated when the ship was building; in fact, to use the expressive words of the surveyor, nothing could be better.

The iron of the plates, rivets, and frames, were no doubt good originally, but the high state of preservation I attribute to having had them coated, before any red oxide had formed on them, with your Zinc Paint.—I am, Gentlemen yours very truly, JAMES HAMLIN.

Messrs Hubbuck and Son, 24 Lime street, Fenchurch street.

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

TEETH.—REGISTERED PNEUMATIC VENTILATING PALATE.—Discovery of a new principle in dentistry, and great reduction in price.—Mr LEWIN MOSELY, 30 Berners street, W., established 25 years, offers for inspection Specimens of all the latest inventions in ARTIFICIAL TEETH. His PNEUMATIC VENTILATING PALATE is recognised as the best combination of improvements submitted to the medical profession, supplying all dental deficiencies without extraction of stumps or any painful operation. Sharp edges, wires, springs, ligatures, and all metals, especially avoided, rendering impossible unpleasant secretions and vitiated breath (hitherto causes of general complaint). This Palate may be added to teeth in wear, and defies competition for cheapness and durability. Consultation and every information free. Success guaranteed in all cases by Mr Lewin Mosely, 30 Berners street, Oxford street, W.

DEANE'S TWO-HOLE BLACKPENS which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped

"G. and J. Deane, London bridge,"

and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed

"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

FORD'S FLANNEL SHIRTS.—Patterns of all the newest designs in fancy wove and printed flannels sent per post free.
RICHARD FORD and CO., Patentees, 38 Poultry, London.

FORD'S EUREKA SHIRTS are made with that rigid adherence to details in manufacturing, which alone can ensure a good and comfortable shirt. A box of six excellent shirts for 33s. Illustrated catalogues, mode of self-measurement, price list, &c., post free.
RICHARD FORD and CO., 38 Poultry, London, E.

LAMBERT BROTHERS, Walsall, Staffordshire, (Established 1830,) Manufacturers
WROUGHT-IRON WELDED TUBES & FITTINGS, Chandeliers, High Pressure Steam and Water Valves. Patent Metallic Bedsteads for exportation.
*** Illustrated catalogues on application.

THE NEW SPIRIT ACT.—By the 24 and 25 Vict., cap. 21, wine merchants are now allowed to sell a Single Bottle of Spirits. To carry out this boon to the public, J. J. R. is prepared to forward one dozen or half-dozen cases of assorted spirits, according to order. Brandy, 4s 6d; Whisky, 3s 6d; Rum, 3s; Gin, 2s 6d; Geneva, 2s 10d per bottle. Terms cash.
J. J. ROURKE, Importer, 31 Eastcheap, City, London.

FRENCH WINE BOTTLES, Soda Water Bottles, Confectioners' Bottles, Drug, Dispensing, and Castor Oil Bottles, Wine, Ale, and Porter Bottles, from Stock in London or direct from the Works.—AIRE and CALDER GLASS BOTTLE COMPANY, Castleford; Free Trade Wharf, Ratcliff; and 61 King William street, E.C. The Patent Stoppered Bottles of all kinds.

ALLSOPP'S PALE OR BITTER ALE.—Messrs S. ALLSOPP and SONS beg to inform the Trade, that they are now registering orders for the October Brewings of their Pale Ale in Casks of 18 Gallons and upwards, at the Brewery, Burton-on-Trent; and at the undermentioned Branch Establishments:—

Messrs SAMUEL ALLSOPP & SONS.	LONDON ..... 61 King William st., City
	LIVERPOOL ..... Cook street.
	MANCHESTER ..... Ducie place.
	BIRMINGHAM ..... Upper Temple street.
	DERBY ..... London road.
	WOLVERHAMPTON ... Exchange street.
	CHESTERFIELD ..... Low Pavement.
	STOKE-UPON-TRENT. Wharf street.
	DUDLEY ..... Burnt Tree.
	WORCESTER ..... The Cross.
	SOUTH WALES ..... King street, Bristol.
	DUBLIN ..... Crampton quay.
	CORK ..... Cook street.
	EDINBURGH ..... Union street lane.
	GLASGOW ..... St Vincent street.
	PARIS ..... 279 Rue St Honoré

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Bottles and Casks, and on Draught, from all the most respectable wine and beer merchants and licensed victuallers, on "ALLSOPP'S PALE ALE" being especially asked for.

When in bottle, the genuineness of the lable can be ascertained by its having "ALLSOPP and SONS" written across it upon red and white ground striped.

The Brewery, Burton-on-Trent, April 30, 1860.

H. J. AND D. NICOLL'S CURRENT LIST of PRICES for GENTLEMEN'S CLOTHING, LADIES' CLOAKS, HABITS, &c., and YOUNG GENTLEMEN'S DRESSES, for different ages, for the present season. Charles Morrison, Esq. | T. M. Weguelin, Esq., M.P.

BANKERS—Messrs Glyn, Mills, and Co.

The Directors are prepared to grant Debentures for loans of sums of £100 and upwards, for periods of 3, 5, 7, or 10 years.

Any information required can be obtained on application to the Secretary. FRED. FEARON, Secretary.

65 Moorgate street, London.

NEW ZEALAND (AUCKLAND HARBOUR LOAN).

—The Union Bank of Australia, being empowered by the Superintendent of the Province of Auckland, under authority of Act of the General Assembly of New Zealand, intituled "The Auckland Harbour Debenture Act, 1860," to negotiate a Loan of £25,000, by the issue of debentures in terms of the said Act;—Notice is hereby given, that the Board of Directors are prepared to receive up to Monday, the 18th November instant, at 2 o'clock precisely, sealed Tenders, in writing, of parties who may forward the same, addressed "Tenders for Auckland Harbour Debentures under Act 1860," or attend in person therewith. Such tenders will then be opened in the presence of all so attending, and read publicly, and the purchasers be forthwith declared, provided the price be not under the minimum fixed by the Superintendent of the Province of Auckland, which will be placed on the table under seal.

These Debentures of £100 each, with Coupons attached, will become due on 1st January, 1876, and bear interest at the rate of 7 per cent. per annum from the 1st day of July, 1861, both principal and interest to be payable by arrangement, at the option of the bearer, either in London, Melbourne, Sydney, or Auckland.

The official documents and acts authorising the raising of this Loan can be seen at the Bank daily, between the hours of 1 and 3, by parties desirous of tendering.

Payment for the amounts that may be allotted will be required as follows:—

£10 per centum on the purchaser being declared; and the balance on the 16th December next.

H. W. D. SAUNDERS, Sec.

No. 38 Old Broad street, London, E.C., Nov. 1, 1861.

DENT, CHRONOMETER, Watch, and Clock Maker to the Queen and Prince Consort, and Maker of the Great Clock for the Houses of Parliament, 61 Strand, and 34 Royal Exchange.

GREAT FIRES IN BELFAST,

in which nine of MILNER'S SAFES (six in the first and three in the last) have preserved their contents. The following is one of the certificates from all the owners:—

(Copy.)

"Messrs Thos. Milner and Son.

"Belfast, February 13, 1861.

"Gentlemen,—We beg to say that the block of buildings in Bedford street, in which our warehouses and offices were situated, was totally destroyed by fire on the 8th instant, but we are happy to say that all our books contained in two of your Safes were found, on forcing the Safes open, to be perfectly secure and the writing quite legible, though the edges and some leaves were stained by the steam, and some of the covers damaged by adhering to the sides of the Safes from the heat to which they were exposed.

"We are, Gentlemen, your obedient servants,

"J. B. RALSTON and Co."

Milner's Phœnix Safe Works, Windsor, Liverpool.

London Depot, 47A Moorgate street, City.

THE ELBE COLLIERY COMPANY (Limited).

Capital £15,000, in 15,000 shares of £1 each.

Registered under the Joint Stock Companies Acts, 1856-7, whereby the liability of each shareholder is expressly limited to the amount subscribed for by him.

2s 6d per Share to be paid on application, and 2s 6d on allotment; the remainder, in sums of 5s, at intervals of not less than three months.

DIRECTORS.

John Jenkins, Esq., the Elms, Epsom.

H. W Abbott, Esq., York buildings, Adelphi, London, W.C.

Major Groer Scheinbruch, Commandant of the Rifle Battalion.

BANKERS.

The Bank of London, Threadneedle street, E.C.

OFFICIAL AUDITOR.

George A. Cape, 3 Adelaide place, London, E.C.

SECRETARY—J. Elliot Square.

Offices, 196, 197, and 198 Gresham House, London, E.C.

This property, consisting of 10 freischurfe, each being a circle of 448 fathoms in diameter, is situated near Maniaschein, at a distance of less than a quarter of an English mile from the Dresden, Vienna, and Teplitz Railway, by which the coal will be conveyed to Aussig, the port of shipment, a distance of less than 10 English miles.

The fact that the following well-known and highly productive collieries adjoin this property, in the same basin, will give some idea of its immense value. Saxonia, the property of a company at Leipzig; Count Nostitz, Count Westphalens, the Bohemia, the property of the Dessau Crédit Mobilier, Prince Clary's, Storchswerk, the Elizabeth Pits, and many others, worked by foreign capital. The French Railway Company, who made the line from Bodenbach to Brünn, the capital of Moravia, and who are most extensive coalowners in other parts of Bohemia and Moravia, have commenced operations which will unwater this colliery.

The thickness of the first seam of coal is about 80 feet; it is of the higher species of lignite closely resembling the cannel coal of Lancashire. The depth of the seam from the surface varies from 20 to 60 fathoms.

Two permanent shafts are in course of sinking; the Albert shaft has been sunk 36 fathoms; the Victoria or engine shaft 20 fathoms. These shafts will win the coal at or about 50 fathoms from surface. These shafts will be completed by the time the engines are ready to work, as they are dry until the crust of the coal is cut. The value of dry shafts need not be commented on. In addition to the above, seven trial shafts have been sunk to and through the coal of the respective depths of 9, 10, 15, 17 2-10ths, 25, and 34 fathoms. The fact that the railway passes close to the colliery is of the greatest importance, as by it coal can be conveyed to Dresden, Berlin, Magdeburg, Hanover, Brunswick, Hamburg, &c., &c. The pits opened in this basin are utterly inadequate to supply the present and rapidly increasing demand, the merchants prepaying for coal three and more months to ensure delivery.

The coal is preferred to all other for house and steam purposes throughout Austria, Prussia, Saxony, and the Upper and Lower Elbe; it has an agreeable aroma, and is in every respect better than any other for steam boilers. Containing no sulphur, it does not corrode or injure iron.

One fact greatly increases the value of this property—the absence of fire damp; thus the immense risk of destruction of life and property, and the great expense incidental to the use of safety lamps is avoided.

Labour is cheap, a skilled miner rarely obtaining more than 2s a-day, whilst an interior workman obtains about 1s. Two such labourers at 3s can break and deliver at the foot of the shaft five tons of coal daily. This can be placed at bank, including all engine charges, expenses of management, taxes, &c., for 1s 3d per ton; to this add a royalty of 10d; making the cost of the coal 2s 1d per ton, whilst its selling price averages 5s. Assuming the lowest estimated profit (2s 6d per ton), a daily delivery of 1,000 tons will give for a working year of 300 days £37,500, divisible amongst the shareholders. Startling as these figures may be to those not acquainted with colliery operations, they will be fully confirmed by every coalowner and colliery agent who may investigate the facts.

A provisional contract has been entered into for the purchase of the property,—on which many thousands of pounds have been expended,—for £3,000, in fully paid shares, subject to the royalty of 10d per ton.

CAPABILITIES OF THE PROPERTY.

The coal-field belonging to this Company, taking the mean thickness of the coal at only 60 feet, contains 112,000,000 tons of coal.

The facts to which special attention is called are—

That the coal is 80 feet thick.

That it is within a quarter of an English mile of the great European lines of railway, and less than ten miles from the port of shipment—Aussig-on-the-Elbe.

The great facility for developing the work consequent on the absence of fire damp.

Preparations are made for the immediate and vigorous prosecution of the works, and the capital will be applied as subscribed for this purpose.

The quality of the coal is fully established by the testimony of the leading manufacturing firms in Prague.

Specimens, plans, Government and other reports, may be seen at the Company's offices, 196, 197, and 198 Gresham house, London, E.C.

Forms of application for shares can be obtained at the offices of the Company.

GLENFIELD PATENT STARCH,

USED in the ROYAL LAUNDRY.

The Ladies are respectfully informed that this Starch is EXCLUSIVELY USED in the ROYAL LAUNDRY, and Her Majesty's Laundress says, that although she has tried Wheaten, Rice, and other Powder Starches, she has found none of them equal to the GLENFIELD which is the FINEST STARCH SHE EVER USED.

WHEN YOU ASK FOR

GLENFIELD PATENT STARCH,

see that you get it, as inferior kinds are often substituted

WOTHERSPOON and CO., Glasgow and London.

NORTH POOL COPPER MINING COMPANY.

To be incorporated under the statutes limiting shareholders' liability to the amount subscribed.

Capital £24,000, in 6,000 shares of £4 each. Deposit, 2s 6d per share on application, and 2s 6d per share on allotment. The remainder by quarterly instalments of 5s per share, as required for working the mine, of which due notice will be given.

Directors to be chosen by shareholders at the first meeting.

BANKERS—Messrs Bolithos, Sons, and Co., Penzance, Cornwall.

SOLICITOR—F. W. Snell, Esq., 1 George street, Mansion House, London, E.C.

AUDITORS—Messrs Cooper Brothers, and Co., 13 George street, Mansion House, London.

MANAGING AGENT—Capt. Thomas Faull, late Manager of Linares and other home and foreign mines, now of Camborne, Cornwall.

ENGINEERS—Messrs Mitchell and Jenkin, Redruth, Cornwall.

SECRETARY—J. S. Phillips, 12 St Michael's alley, Cornhill, London.

Offices—7 George yard, Lombard street, London, E.C.

A grant to work the extensive sett called North Pool, Illogan, Cornwall, has been obtained, at £20 per annum minimum rent, and 1-18th maximum dues.

The geological position of North Pool is unsurpassed by any mine in the kingdom, being situated about half a mile north of, and parallel to the celebrated granite hill Carn Brea, around which six square miles have produced at least £6,000,000 sterling profits, by the comparatively small outlay of about £600,000, and more mineral wealth than has been returned by all the other mines of Devon and Cornwall by tenfold outlay.

It is a very extensive sett, Cook's Kitchen (and other mines) being only about one-fourth as long on the lodes, although it has been at work upwards of 200 years, and even now about to become a rich tin mine in depth.

Its immediate neighbours are, on the north and east, the Tolguses; southward, Wheal Agar, East Pool, Carn Brea and Tincroft; and westward, the Croftys, Setons, and North Roskear Mines.

North Pool has been worked once, but only to a very limited extent (£61,450 profits were made in eight years, at a cost of only £3,180, in about 100 fms long, and above the 80 fm. level), whereas several of the best mines of this district have been re-worked twice and thrice most profitably, to the depth of from 200 to 300 fms.; and still continue very rich and promising, although much less so for the ground first wrought therein.

The promoters consider the old mine a good speculation in depth: but as at least 19-20ths of this lode in such a long sett is quite unexplored at a fair mineral depth, and moreover, four side lodes, almost entirely unworked, they confidently believe it to be an unusually valuable property, and eminently deserving attention and trial.

Two good engines—a 70-inch for pumping, and a 28-inch for winding and crushing—will be amply sufficient to work the engine and side lodes to a proper depth, and long before this capital is fairly expended good results will, in all probability, be attained.

Much work has been executed that will speed progress, such as roads, floors, and well-timbered shafts, at a cost of many thousand pounds, which are immediately available for future operations; and the Hayle and Portreath Railway passing through the mine will greatly facilitate the transit of materials and minerals.

The limited liability has been adopted, as a guarantee of good faith to the large portion of the public who prefer it to the unlimited (and sometimes abused) Cost-book System; and to counteract the greatest evil of the former £24,000 is intentionally more than sufficient.

All money will be drawn from the bank by cheques signed by two or more directors and the secretary.

The promoters agree to accept 300 fully paid-up shares (as a guarantee of their confidence), and 2s 6d per share cash, for the sett, and which shall clear all the preliminary expenses of incorporation, travelling, reporting, mapping, printing, law costs, advertising, and broker's commission, with grants and leases.

Reports with sections and plans of the sett and neighbouring mines were published in the MINING JOURNAL of Oct. 5, 1861, from which the most sceptical will see and allow its merits, and that no more has been stated than plain statistical facts will most amply verify.

Applications for prospectuses and form of order for shares to be addressed to the secretary.

EXTRACTS FROM REPORTS.

W. Bowden, Manager of Camborn Vean, and late Agent at North Pool Mine.

Sept. 10, 1861.—I have been engaged in North Pool Mine upwards of eleven years, during which period it made £61,000 profit from the adit to the 72, having an almost continuous bunch of copper ore for about 100 fms in length. I should more particularly call the attention of those embarking in this speculation to the western part of this sett, on the engine and side lodes, which part was totally neglected by the late workers. The stratum and indications, as far as seen, are precisely similar to the old mine, where such large deposits of ore existed; and I, therefore, see no reason why you may not have as good a mine here as the old party had further east. This sett lies on the same run of lodes as the Tolguses on the east and Setons on the west, and being in such a good locality is a speculation rarely to be met with. In conclusion, I may say that as only about 200 fms long have been explored at a fair mining depth, and that as the sett is 900 fms long, and contains five lodes, exceedingly little has been worked for this rich district; therefore it is highly probable that many other bunches of ore may be discovered, that will, I have no doubt, lead to large profits; and I can highly recommend it to the mining community.

J. Daw, Manager of Corn Brea Mines, &c.

Sept. 12, 1861.—I beg to hand you my report of North Pool Mine. This mine is situated in the parish of Illogan, and is bounded on the east by South Tolgus, which is on the same run of lodes, and has given great profit to the adventurers—on the west by North Crofty and Wheal Seton. The sett is very extensive, it being about 900 fms long and 200 fms wide, with four or five parallel lodes, traversing its entire length. These are intersected by cross courses and elvans, with patches of iron or greenstone. About 500 fms east of the western boundary a shaft is sunk through the great north lode at 12 fms below the surface, where it is large, and spotted throughout with copper ore. Looking at the situation of this mine, I consider it to be more than an ordinary speculation, having such a long piece of unexplored ground in this highly mineralised district, and on lodes which have been so productive in the mines to the east and west, so I think it well worthy the attention of capitalists.

J. Vivian, Manager of North Roskear, North Crofty, &c.

Sept. 11, 1861.—In reply to yours of yesterday, I am well acquainted with the district of North Pool Mine, and believe it to be a first-rate piece of mining ground.

W. Pascoe, Manager of South Frances, &c.

July 25, 1861.—In reply to your kind favour of the 22nd inst., respecting the above mine, I beg to say that I know but little about the old workings, but I believe with you that there is an extensive piece of untried ground to the north and west of the old mine, which, in such a good locality, ought to be tried. I think you very fortunate to get the setts, and wish you every success in the undertaking.

W. H. Reynolds, Manager of Great Retallack, Wheal Unity, &c., of Messrs Watson and Cueli's firm.

Sept. 3, 1861.—I am glad to find that you have secured the sett of North Pool Mine, and I know of no ground in the district lying idle that is so deserving of attention. It is an extensive sett, being about 900 fms. long by 200 fms. wide, and traversed by at least five lodes, some of which I suppose to be those of South and Old Tolgus on the east, and the Setons on the west. The most important feature, however, is that there is upwards of half a mile of unexplored ground between the late workings and the Seton Mines; and, judging from the general productiveness of these lodes, it is highly probable that in this ground valuable discoveries may be made. When we look at the very rich locality in which this mine is situated, and the immense returns made from so small a portion of the sett, it certainly does appear that the prospects of the speculation are unusually good.

G. Rickard, Manager of Great Onslow Consols.

Sept. 26, 1861.—I have considered the feasibility of North Pool sett as a speculation for further working, and, taking into consideration the fact that very extensive and profitable mines have been, or are being, worked at both ends of the property, the recent richness of the mine itself, the rich locality, and great extent of unexplored ground in the sett, there does not appear to me any sound reasons why the unexplored portions of the engine lode, as well as any parallel lodes, may not prove profitably productive; and I consider if these lodes are properly worked there is a very fair chance of success.

M. Edwards, late Manager of Wheal Kitty, &c.

Sept. 3, 1861.—The extensive and valuable mining property of North Pool is situated in the parish of Illogan, and is closely surrounded on the south, east, and west by some of the most productive and profitable mines in Cornwall. These lodes, however, run the entire length of the sett, and as there is a large amount of unexplored ground in the western part of it, I would strongly recommend you to commence operations there, open on the lodes, and give it a vigorous and spirited trial. For this purpose only a moderate amount of capital will be required, which in my opinion will not fail, if judiciously laid out, to make a lasting and profitable mine.

An early application should be made to secure shares, which are being rapidly taken up.

ORIENTAL PARCELS CONVEYANCE.—THE ORIENTAL INLAND STEAM COMPANY (Limited), under subsidy from the Indian Government. Capital £500,000.

The Directors have the pleasure of intimating for general information that they are now prepared to transmit parcels, and various descriptions of merchandise, from the coast to many places in the interior of India, by the most eligible means of conveyance, and at very moderate charges; and also, in connection with such internal traffic, to forward such parcels and other goods from Europe to India.

The Company having efficient agents established for their own steamers at Kurrachee, Calcutta, and most of the principal stations on the Indus and the Ganges, as well as in various other parts of India, are enabled to offer unusual advantages in the transmission of goods to the interior, and such as no existing agency can afford, undertaking to act as forwarding agents from the termini of their own navigation.

Packages will be cleared at and removed from the Customs in India, and forwarded to their destination, bearing import duty, which, with the landing and other internal charges, must be paid by the consignee previous to delivery; but the freight to India of such goods as are required to be forwarded from Europe must be paid in England.

For tariff rates, &c., apply at the Company's offices, 9 Billiter street, London, E.C.; or 2 Queen's terrace, Southampton; or to the Company's agents at the following stations in the East, at which agencies have either been already formed, or will be formed as early as practicable. Agencies have been already established at many other points not enumerated herein:—

Agra	Ferozepore	Moultan
Ahmednuggur	Futteyghur	Neemuch
Allyghur	Fyzabad	Nynee Tall
Allahabad	Ghazeepore	Patna
Assam	Gwalior	Peshawur
Attock	Hydrabad, Scinde	Poonah
Baroda	Kurrachee	Rajmahal
Bareilly	Lahore	Rowal Pindee
Benares	Laudour	Sattara
Bombay	Loodheana	Selwan
Calcutta	Lucknow	Shikarpore
Cawnpore	Mahabuleshwur	Simla
Commercolly	Meerut	Sukkur
Dacca	Mirzapore	Tatta
Delhi	Moorshedabad	Umritsur

The arrangements for the Madras Presidency are not yet matured, but will be announced when completed.

WEST SILVER BANK MINING COMPANY (LIMITED).

Incorporated by virtue of the 19th and 20th Vict., c. 47, and 20th and 21st Vict., c. 14.

Capital, £18,000, in 6,000 shares of £3 each. Deposit, £1 per share.

And the balance, if required, to be paid by instalments of not exceeding 5s per share, of which thirty-one days' notice must be given for payment.

DIRECTORS.

J. M. Thistleton, Esq., Old Quebec street, Portman square.
Albert Milstead, Esq., Old Ship chambers, Water lane Tower street.

BANKERS.

Bank of London, Threadneedle street, City.

SOLICITOR.

Frederick William Snell, Esq., 1 George street, Mansion House, City.

CONSULTING ENGINEER—Capt. Matthew Francis.

SECRETARY—Mr Thomas Spargo.

OFFICES—224 and 225 Gresham House, Old Broad street, London, E.C.

PROSPECTUS.

The West Silver Bank Mining Company has been formed for the purchase and effective working of one of the richest metallic properties in the county of Cardigan.

It is situate to the north of the Great Frongoch Mine, and to the west of Silver Bank Mine, the lodes of which are filled with rich lead, and close to the boundary pass into and through the West Silver Bank grant, which is in the heart of the dividend-paying mines of that productive county.

The property, which comprises an area of one mile square, is held under a licence granted by Colonel Powell, with a guarantee for a lease for twenty-one years, at 1-15th royalty or dues.

There are several rich lodes traversing its entire length, worth from £30 to £40 per fathom, within a few feet of the surface, and the estimated value of that already opened upon at one point alone is upwards of £30,000.

The county of Cardigan has for several centuries been distinguished as one of the richest lead-producing districts in the kingdom. Immense fortunes have been made by the adventurers in the mines of the county, and fortunes are being realised in the present day to a great extent upon insignificant outlays. Men possessing colossal fortunes, which they have in their own time dug out of the Cardiganshire mines, still exist; others with noble fortunes have passed away. And it is well-known that when an old Cardiganshire mine has been re-opened with capital, spirit, and good prospects, the adventurers have been rewarded with fortunes for their investments.

There are few mines in the world more favourably situated than the West Silver Bank, with respect to its geological and mineralogical conditions. It is placed in the heart of all the dividend-yielding mines of Cardiganshire.

The convenience of carriage is unrivalled, the Aberystwith and Devil's Bridge turnpike-road passing over the top of the lode. The carriage distance is between eight and nine miles to port, and when the Manchester and Milford Haven Railway is constructed, the distance to the station will not exceed two miles.

The necessity for the erection of a steam-engine, and the heavy expense attendant upon one, will be avoided by the adoption of the water-power, which is available to an unlimited extent,

The capital of the Company is to be £18,000, divided into 6,000 shares of £3 each, whereon £1 per share is to be paid at the time of subscribing, and the remainder, or balance, if required, to be called by instalments of not exceeding 5s per share each, of which calls 31 days' clear notice is to be given for payment. It is not, however, expected that a larger sum than the £1 deposit will be required to place the mine in a productive position, and to yield from the produce a regular dividend to the shareholders.

This important and valuable property has been acquired by the promoters of the Company for the sum of £7,500, to be represented by and paid in 2,500 shares of the capital of the Company fully paid upon, thus leaving £10,500 nominal capital applicable to the mining operations of the Company.

The undertaking will be under the immediate direction and management of the Board of Directors, to consist of not less than three nor more than seven members.

The mining operations of the Company, which will be immediately commenced, will be prosecuted under the scientific and practical management of Captain Matthew Francis, whose acquaintance with the district, aided by the rich discoveries he has already made, cannot fail to bring the Company to great and eminent success.

The Company is incorporated under the 19 and 20 Vict., cap. 47, and 20 and 21 Vict., cap. 14, to limit the liability of shareholders to the amount of their respective subscriptions to the capital thereof, and the Articles of Association to define the system of management under which the Company is to be conducted, and to contain provisions to secure and maintain a true and proper system of check and counter-check in its financial transactions, and in the issue and transfer of shares; and to reserve power to the Board of Directors to commence the operations of the Company, and to carry out and conduct the business thereof before the whole of the capital be subscribed, and when in its discretion it shall deem expedient.

Prospectuses and forms of application and full particulars may be obtained at the offices of the Company.

CHUBB'S PATENT SAFES —the most secure against Fire and Thieves.—CHUBB'S FIRE-PROOF STRONG ROOM DOORS. CHUBB'S PATENT DETECTOR and STREET-DOOR LATCHES. CHUBB'S CASH and DEED BOXES. Illustrated Price-list gratis and post free.

CHUBB and SON, 57 St Paul's churchyard, London; 28 Lord street, Liverpool; 16 Market street, Manchester; and Wolverhampton.

THE PARIS LAND COMPANY
(LIMITED.)

Incorporated under the Joint Stock Companies Acts, whereby the liability of the shareholders is limited to the amount subscribed.

Freehold property in France, belonging to foreigners, enjoys the same protection, even in case of war, as the property of French subjects.

Capital, £100,000, in 10,000 shares of £10 each; £1 to paid on application, and £9 on allotment.
(With powers to increase to £500,000.)

BROKERS—Messrs George Burnand and Co., 69 Lombard street, and Messrs J. and J. Whitehead, 8 Moorgate street, E. C.

OFFICES—85 Gresham house, E.C.

EXTRACTS FROM LONDON JOURNALS.

DAILY TELEGRAPH, 31st Oct.—"Another new joint stock undertaking, entitled the Paris-Land Company, has been announced to-day, with a proposed capital of £100,000, which may be increased to £500,000. The shares are to be £10 each, £1 to be paid on application, and the remaining £9 on allotment. The object in view is to buy and sell or let freehold land in the French capital; and it is stated that purchases have already been made, from which, by re-sale in smaller lots, considerable profit has been derived. The views of the promoters are fully set forth in the prospectus."

DAILY NEWS, 31st Oct.—"The Company's first purchases are said to afford, already, a very large profit. It is assumed that, under judicious guidance, the Company will be able to obtain a return as good as that frequently realised by individual buyers, in a locality where it is scarcely possible to place a limit to the rise in the value of land."

MORNING CHRONICLE, 31st Oct.—"This Company is founded upon the principle of buying freehold land in large and disposing of it in smaller lots, in the most eligible sites at the west end of Paris; the purchases already made being estimated to make very large returns on the original cost. At present, the English money market is so much more favourable than the French, as to give sufficient reason for launching the Company here; and as the French law places foreign freeholders on precisely the same footing as natives (even in case of war), there appears to be every probability of the capital being speedily subscribed."

MORNING STAR, 1st Nov.—"The prospectus has appeared of the Paris Land Company. With a capital of £100,000, in £10 shares, it is proposed to take advantage of the derangement in the Paris money market to purchase certain lands in the best neighbourhood of the capital, and to dispose of them as building sites. Large profits are anticipated."

MORNING POST, 1st Nov.—"In the list of trustees, directors, &c., are to be found the names of gentlemen whose standing and practical knowledge bespeak confidence; and the comparative ease of our money market will account for the undertaking not being originated in Paris."

MONEY MARKET REVIEW, 2nd Nov.—"Immense profits have been realised by individuals through the vast rise which has taken place within the last few years in the value of land, as well as of house property, in Paris. The present Company propose to embark with due caution and judgment in the same class of business. Its objects are primarily to buy, re-sell, let, and improve land. The capital is £100,000. Freehold property in France belonging to foreigners is fully protected by the law."

LIMITED LIABILITY COMPANIES' JOURNAL, 2nd Nov.—"The management of this undertaking appears to be such as doubts cannot be thrown upon it; and we question much if the engineer, Mr Manby, C.E., would permit his name to be attached to the prospectus unless the statements made could be entirely relied upon. Our readers know that we believe in the peace and goodwill between France and England being made the more and more secure by every sovereign which is embarked in trade and undertakings of any kind for the mutual benefit of the two countries. We should, therefore, be glad to see, in the success of this Company, another link in the golden chain, which, we trust, will one day or other bind us irrevocably together."

JOHN BULL, Nov. 2nd.—"Any one who knows what Paris was, and what Paris is at this present day, cannot be otherwise than struck with the beauty of the western or aristocratic end, from the Tuileries to the Bois de Boulogne. The rapid and great improvements effected in the course of a few years have, naturally, very considerably enhanced the value of land in the direction referred to. The higher classes of French society are, at the same time, adopting English ideas of social and domestic comfort, and are taking villas in the outskirts, thus making land there, also, adapted for building purposes, very valuable. The Paris Land Company, Limited, is taking advantage of these highly favourable circumstances."

TIMES, 4th Nov.—"An article, opportunely published at a moment when our capitalists are invited to subscribe to a Paris Land Company, gives an elaborate analysis of the costs and probable results of the recent improvement in that capital.*

"* 'The Improvements of Paris.' 'Bentley's Miscellany,' November, 1861.

"'If you pull down existing houses to replace them by others, you cannot help raising rents, and if this is done simultaneously in every direction of the town, you produce a rise beyond all measure, which is still further aggravated by every new application of the system.

"'If you built on unoccupied land, the result would be perfect; the new houses would then compete with the old ones, and rents would fall in both. But it is the exact contrary which is done.'"

It will be observed by the prospectuses of the Paris Land company, Limited, that its special object is, to promote the building of houses on unoccupied land, in the most eligible parts of Paris and its vicinity.

Prospectuses and forms of application for shares may be obtained of the brokers of the Company, Messrs George Burnand and Co., 69 Lombard street, and Messrs J. and J. Whitehead, 8 Moorgate street, City; or at the office of the Company, 85 Gresham house. Each appliation must be accompanied by a receipt signed by the Bankers or the Company's Secretary, for the deposit of £1 per share applied for. This sum will be returned in full to the applicant in case of no allotment being made.

THE ROODEE IRON SHIP
BUILDING COMPANY, Incorporated under Limited Liability.

Capital £100,000, in 10,000 shares of £10 each. 10s to be paid on application, £2 on allotment; and the remainder in calls not exceeding £2 10s, at intervals of not less than three months each.

DIRECTORS.

Admiral Sir Henry John Leeke, K.C.B., M.P., Chairman.
George Braginton, Esq., Banker and Shipowner, Torrington, Devon, Deputy-Chairman.
James Bancks, Esq., 32 Bucklersbury.
Septimus Beardmore, Esq., C.E., 27 Albion street, Hyde park.
Nathaniel Cox, Esq., Liverpool and Chester.
G. J. von Dadelszen, Esq. (von Dadelszen and North), 158 Leadenhall street.
Henry Fox, Esq., 2 Royal Exchange buildings.

MARINE ENGINEER AND DRAUGHTSMAN.

Mr E. C. Wheeler (late of H.M.'s Dockyard, Devonport).

BANKERS.

Messrs Roberts, Lubbock, and Co., Mansion House street, E.C.
Messrs Herries, Farquhar, and Co., 16 St James's street, S.W.

BROKERS.

Messrs Crosley Brothers, 30 Cornhill, London.
Messrs Gasquoine and Chamberlaine, Liverpool.
Messrs Hoyland and Co., Manchester.

SECRETARY, pro tem.—Mr H. W. Pearson.

OFFICES.

12 Gresham House, Old Broad street, London, E.C.

The objects of the Company are—

1st. The purchase of the well-known Roodee Iron Ship Building Yard at Chester, on the banks of the Dee.

2nd. The extension of the present works on ground already secured, whereby the property may be made one of the largest establishments for Iron Ship Building in the world.

The Directors have been enabled to secure the whole property at a valuation, the Proprietor receiving the whole of the purchase money in shares.

In all contracts for building ships, it is usual to have the payments made according as the work proceeds, and to retain the security of the vessel until final payment is made; and it is on this account that a Capital of £100,000, with proper management, will be ample to carry on a business to almost any extent, and as a minimum profit of 10 per cent. is calculated upon all estimates for work undertaken, the subscribers may confidently anticipate dividends of at least 20 per cent. per annum on the capital invested.

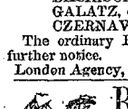
Prospectuses and Forms of Application for the remaining shares may be obtained from the Secretary or the Brokers of the Company: but no application will be considered unless the deposit of ten shillings for each share applied for shall have been previously paid. This sum will be returned if no allotment is made to the applicant.

THE ROODEE IRON SHIP
BUILDING COMPANY, LIMITED.

NOTICE OF CLOSING.—Applications for Shares in this Company must be sent in to the Secretary, on or before Wednesday, the 13th instant.—By order of the Board,

H. W. PEARSON, Secretary.

12 Gresham House, Old Broad street, London, E.C.
5th Nov., 1861.



IMPERIAL AND ROYAL
DANUBE STEAM NAVIGATION COMPANY of VIENNA.—The last Departure of the Express Boat on the Danube will be from

PESTH, on the 11th November,
BASIASCH, on the 12th November,

I.

THE COTTON KINGDOM:

A Traveller's Observations on Cotton and Slavery in America, based upon three former volumes of Travels and Explorations,

By FREDERICK LAW OLMSTED.
With Map. 2 vols. post 8vo, 21s.

"Mr Olmsted give his readers a wealth of facts conveyed in a long stream of anecdotes, the requisite humour of many of them making parts of his book as pleasant to read as a novel of the first class."—ATHENÆUM, Oct. 12.

"This book is a compendious re-cast of Mr Olmsted's invaluable volumes on the Slave States; volumes full of acute, pithy, and significant delineation, which bear in every line the stamp of an honest and unexaggerating, but close and clear-sighted, study of those States. We know of no book in which significant but complex social facts are so fairly, minutely, and intelligently photographed, in which there is so great intrinsic evidence of impartiality—in which all the evidence given is at once so minute and so essential, and the inferences deduced so practical, broad, and impressive."—SPECTATOR, Oct. 12.

II.

SLAVERY AND SECESSION:

Historical and Economical,
By THOMAS ELLISON, Esq., F.S.S., of Liverpool,
Author of "A Handbook of the Cotton Trade."

With coloured map, and numerous appendices of State Papers, population returns, new and old tariffs, &c. Forming a complete handbook of reference on all matters connected with the American War. 1 vol. post 8vo, cloth, 8s 6d.

"Mr Ellison's volume is a serviceable compendium of the events which have taken place, and especially of the State Papers, speeches and opinions of the men who on both sides have borne a prominent part in them. Mr Ellison, is not an abolitionist, in the extreme sense of the term. His views are moderate, his facts are carefully collected; and, upon the whole, his book is the most useful contribution we have seen to the history of the crisis in American affairs."—EDINBURGH REVIEW, October.

"A succinct history of the American quarrel, with an estimate of its probable cause and proximate issue. To the information Mr Ellison has already acquired, he has added a faculty of inference equal to the occasion, and such a rational estimate of the work required of him, that he has compiled a convenient book of reference, available in some other respects to the journalist and politician."—TIMES.

"Abounds with impartial and amply authenticated information. It is a volume that was much wanted, and one which we can highly recommend."—DAILY NEWS.

Sampson Low, Son, and Co, 47 Ludgate hill.

This day is published.

BANK OF AUSTRALASIA.

STATEMENT of the directors to the proprietors assembled at the half-yearly meeting, held at the office of the corporation, No. 4 Threadneedle street, London, on Monday, 19th August, 1861:—

1. In their last annual report, which exhibited the accounts of the bank for the year ending October, 1860, the directors stated that the present year had commenced under more favourable auspices; that indications of a revival of trade in the Australian colonies, and of a gradual and steady return to confidence were apparent; and it affords them pleasure to be enabled now to report that the accounts since received confirm these anticipations. Commercial affairs were assuming a sounder and more legitimate character; the prosperity of the agricultural and pastoral interests continued undiminished; and a more cheerful feeling prevailed throughout the community.

2. Mr Falconer reached Melbourne early in March, and resumed his duties as superintendent. He reports that he found everything going on well, and the affairs of the bank generally in a satisfactory position. A better understanding also existed among the banks in regard to the purchase of gold; and the allowance of interest on deposits is now confined to those of a fixed character.

3. Under these circumstances, the directors have reason to expect that the transactions of the current year will prove satisfactory.

4. The directors have the pleasure to state that Mr M'Arthur, the assistant superintendent, has arrived in England on leave of absence, and they anticipate much benefit from the opportunity thus afforded them of communicating with him personally on the various matters connected with the interests of the bank.

5. The directors have to announce their intention of declaring the same dividend and bonus as for the half-year in April, being together at the rate of 10 per cent. per annum, free of income tax, payable on Tuesday, the 15th October next.

T. WINGATE HENDERSON, Chairman.

London office, 19th August, 1861.

BANK OF BOLTON.

THE annual general meeting of this company was held on the 30th of August, and was attended by many gentlemen of standing and influence in Bolton and the neighbourhood. The chair was occupied by William Cannon, Esq., who has been for many years chairman of the board of directors. The report gave a very favourable account of the progress and prospects of the company; announced a dividend on the paid-up capital at the rate of 10 per cent. per annum free of income tax, and an addition to the guarantee fund of nearly 5,000*l*, making the reserve equal to 25 per cent. of the paid-up capital. It also announced the appropriation of 1,800*l* towards the fund for the purchase and rebuilding of the bank premises. The directors are now engaged in arranging plans, &c., for the new building, which is to be commenced immediately. The retiring directors were unanimously re-elected, and cordial votes of thanks were given to the chairman and directors, to Mr Ferguson the manager, and to Mr Horrocks the cashier, and staff.

BANK OF BRITISH NORTH AMERICA.

REPORT of the directors at the twenty-fifth yearly general meeting, on Tuesday, June 4th, 1861.

The improvement in the business of the North American colonies, referred to in the reports presented to the proprietors last year, scarcely realised the expectations which the directors then entertained.

This may be accounted for by the time required fully to recover from the very severe depression under which their trade had laboured during the two preceding years; and from the fact that, though the crops of all grain in Canada were the most abundant ever gathered in that colony, a very large proportion of them was not got to market previous to the close of the season, consequently the beneficial effects of the last harvest will tell more upon the business of the present than of the past year.

The annexed statements of account show the position of the bank on 31st December last, and on comparing the business of the first four months of the current year with the same period of 1860, the directors have the pleasure to state that the present year exhibits an important improvement.

The lamentable events occurring in the United States have not hitherto injuriously affected the interests of the bank; but in view of these, and of strengthening the position of the bank, and to enable the managers to take full advantage of any favourable opportunity for the purchase of exchange or otherwise, the directors have added considerably to the amount of specie held at the branches. It will be seen that the sum on hand at 31st December was 301,107*l* 3s 2d, against 194,160*l* 5s 10d at 31st December, 1859.

Your directors have made, as they conceive, ample provision for all bad and doubtful debts; they have also deemed it advisable at this time to write off the whole of the preliminary expenses connected with the opening of the branch at Victoria in Vancouver's Island; the above deductions being made, the available net profit for the year amounts to 61,897*l* 9s 1d, out of which they have declared a half-yearly dividend, payable on and after the 5th July next, at the rate of six per cent. per annum, free of income tax.

This will leave the sum of 1,897*l* 9s 1d to be carried to the rest or balance of undivided profit, which, including this addition, amounted on 31st December, 1860, to 125,766*l* 3s, after providing for the dividend that was paid on the 5th January last.

BALANCE SHEET—December 31, 1860.

BANK OF EGYPT.

Report to be presented to an extraordinary general meeting of shareholders, to be held on Monday, the 5th day of August, 1861:—

In submitting to the shareholders the accounts for the half-year ending 30th June, 1861, the directors have to report that the debt due from the estate of the late Prince El Hami Pasha has been reduced to 30,000*l*, inclusive of interest, and this balance is amply secured.

Of the other dependencies mentioned in the last report, a considerable sum has been realised, although with the sacrifice anticipated, which, however, the directors have been able to meet without infringing on the reserve fund. They have, nevertheless, thought it prudent, out of the present half-year's profits, to set aside a farther sum to provide for any loss which may be experienced in the settlement of the remainder.

The amount standing to the credit of profit and loss is 12,479*l* 10s 4d, which enables the directors to recommend the usual dividend at the rate of 7 per cent. per annum for the half-year, free of income tax, leaving 3,729*l* 10s 4d to be carried forward to the next account.

The directors cannot close this report without acknowledging the highly honourable conduct and friendly support which has characterised the proceedings of His Highness the Viceroy in all matters connected with the settlement of the late Prince's debts.—By order of the court,

Edward Chrshire, Secretary.

26 Old Broad street, E.C., London 24th July, 1861.

Balance Sheet—June 30, 1861.

George William Horn, Henry Lloyd Morgan, } Auditors.

London, July 25, 1861.

BANK OF IRELAND.

Half-yearly dividend 5 per cent., free of income tax; rest, or reserve fund, 1,065,200*l*.

BANK OF LONDON.

The ordinary meeting of the shareholders of the Bank of London took place on the 17th July at the London Tavern: Sir John Shelley, Bart., M.P., occupied the chair. The usual preliminary business having been disposed of, the secretary (Mr Allen) read the 11th report, which was as follows:—

The accounts which the directors have now the satisfaction of submitting to the shareholders show that the result of the operations of the bank for the past half-year has been unusually favourable. It will be seen that the balance of profit and loss account amounts to 37,580*l* 2s 6d.

After payment of all expenses, making ample provision for bad and doubtful debts, and allowing for rebate of interest on bills discounted not yet due, there remains available the sum of 17,543*l* 13s 9d.

The directors are therefore enabled to declare a dividend at the rate of 5 per cent. per annum free of income tax, and to carry to the reserve fund the sum of 10,000*l*, by which addition that fund is increased to 41,000*l*. The balance, viz., 43*l* 13s 9d, is transferred to the credit of profit and loss account of the current half-year.

The directors who retire on this occasion are John Griffith Frith, Esq., Alderman Sir Henry Muggeridge, and Robert Porter, Esq., who, being duly qualified, offer themselves for re-election.

Report of the directors to the general meeting of shareholders, 16th July, 1861, for the half-year ending 30th June, 1861:—

The directors of the Bank of Manchester beg to submit, for the information of the shareholders, their semi-annual report and balance sheet to the 30th June last.

The half-year just ended has been characterised by an unusually severe and lengthened pressure. As the spring advanced, the great deficiency of the home harvest was demonstrated; very large importations of foreign grain were necessitated; a steady and continued export of gold followed, producing a rise in the rate of interest scarcely less heavy in its pressure on trade than that experienced in the autumn of 1857. The famine in the North-West Provinces, adding to the depression of the Indian market,—the failures in the Greek trade,—the adoption of a prohibitory tariff in the United States,—the enhanced price of cotton, and the stimulated export of gold to America, consequent upon the unhappy civil strife in that country,—have been causes all adversely affecting the general trade of this district.

Largely sympathising with American interests, your directors, in common with every generous and sensitive mind, have witnessed with deepest regret the deplorable events which week by week have been developed in the United States. These events have severely tested, and thus far have borne out the high character entertained of this port in the bank's business. Their earnest hope that an end may soon be put to a conflict which threatens to become fatal to the commercial, financial, social, political, yea, national prospects of both parties for very many years, will, your directors believe, be shared by every proprietor.

The general business of the bank has steadily and satisfactorily increased, and fresh and gratifying proofs of public confidence continue to be received. But your directors regret to have to state that the bank has not escaped the casualties incident to an adverse state of trade; and that the profits of the half-year have been seriously encroached upon by failures. They cannot too strongly express their reprehension of the conduct of the principal insolvents; nor too earnestly seek to disabuse

the commercial world of the error of supposing that bills of sale given as preferential security are invalid unless registered.

During the half-year, the capital of the bank has been increased to 174,544*l* paid up, by the issue of 1,886 shares, at an aggregate premium of 4,648*l*. The reserve surplus fund now amounts to 25,148*l*, being an increase of more than 5,000*l* during the half-year.

The statement of profit and loss will be submitted to the meeting, from which it will be observed that, after paying the dividend recommended by the board, there will remain to the credit of the account a balance of 11,232*l* 3s 7d, which, with the sum already reserved for risk of debts, your directors believe will be more than sufficient to meet the probable losses of the half-year. W. S. STELL, Chairman.

BANK OF NEW SOUTH WALES.

TWENTY-FIRST report of the board of directors to the half-yearly general meeting of the proprietors, held at the banking house, on Wednesday, 24th day of April, 1861 :—

In conformity with the provisions of the deed of settlement, the directors now place before the shareholders the annexed statement of the accounts of the bank for the half-year ended on the 31st ultimo :—The undivided balance of 30th September was 2,561*l* 16s 1d ; to which is to be added the profits, after deducting rebate on current bills, allowing interest on deposits, paying expenses of management, providing for bad and doubtful debts, and making an allowance in reduction of bank premises and office furniture, 60,274*l* 12s 11d ; leaving for distribution 62,836*l* 9s ; which the directors recommend to be appropriated as follows :—To payment of dividend, at the rate of 15 per cent. per annum, 56,250*l* ; increase of reserve fund, 2,017*l* 10s 6d ; balance carried to present half-year, 4,568*l* 18s 6d ; total, 62,836*l* 9s. With the above addition to reserve fund, and the sum of 5,109*l* 17s 9d, which they are happy to say has been recovered from debts previously written off as bad or doubtful, that fund will amount to 212,500*l*. The directors have had for some time past under their consideration the propriety of extending the operations of the bank to the important colony of New Zealand, and believing that the time has now arrived for doing so, they have to request the sanction of the shareholders to certain alterations in the clauses 4, 5, and 60 of the deed of settlement, requisite to enable them to accomplish this object, and they do not hesitate to express their opinion that the opening of branches there will add to the position which the bank has already attained, and prove remunerative. Owing to the falling off in the escort returns of gold dust from Timbarra and the Rocky River, the agencies of the bank in those places have been withdrawn, and a fresh agency has been opened at Lambing Flat.

BELFAST BANK.

Board Room, Belfast, Oct. 11, 1861.

THE annual general meeting of the shareholders of the company took place this day. Robert Batt, Esq., J.P., D.L., was called to the chair. The Chairman read the following report :—

Your board of superintendence, in reporting to the proprietors of the Belfast Banking Company, at their thirty-fourth annual meeting, have much pleasure in congratulating them on the continued prosperity of their bank.

Your board and directors, out of the profits of the year ending 31st July last, have been enabled to declare the usual dividend of 12 per cent., and an extra dividend of 6 per cent., making in all 18 per cent. per annum ; and have carried 28,000*l* to the credit of their "reserve fund," which now amounts to 178,000*l* (invested in Government stock), and 1,542*l* to the credit of "profit and loss." The sum now standing to the credit of this account is 23,971*l* 2s 1d, which is quite ample to meet all doubtful debts outstanding, and, from past experience, any bad debts likely to arise for some years to come.

Your board and directors might this year have paid a much larger extra dividend, but they consider that they should not pay more than the rates paid this year, until the "rest fund" shall have amounted to 200,000*l*, and they hope to arrive at these figures in a short time.

Your board have to report that lately two branch banks have been opened by the company, viz., at Ballibay and Rathfriland.

They have been often solicited by persons of standing resident in Dublin and elsewhere to open a branch in that city ; but they have always declined to do so, on the ground that so long as their present bankers there (the Bank of Ireland) conduct the business of this company satisfactorily, its interests will be better served thus than through the medium of a branch bank. ROBERT BATT, Chairman.

The report having been read,

It was moved by the Chairman, seconded by James Alexander Henderson, Esq., and resolved unanimously—"That the report be received, adopted, and entered ; and that it be printed, and a copy sent to each shareholder."

Moved by Andrew Mulholland, Esq., seconded by James G. Bell, Esq., and resolved unanimously :—"That the cordial thanks of this meeting be offered to the officers of the bank for their valuable services in promoting the interests of the company, and for their steady, prudent, and safe management of its affairs, thus raising the bank to its present high standing."

The Chairman then ordered that seven members be balloted for to serve on the board for the coming year.

The ballot having been taken, the following gentlemen were duly elected :—Robert Batt, Esq., J.P., D.L., Purdysburn ; A. Mulholland, Esq., J.P., D.L., Springvale house ; Robert Thomson, Esq., J.P., D.L., Castleton ; William S. Mitchell, Esq., Ulinda ; James Greer Bell, Esq., Tullylish house ; James Hamilton, Esq., Belfast ; James Carlisle, Esq., Enfield house.

James Hamilton, Esq., moved a vote of thanks to the Chairman for his proper conduct in the chair, and for the very deep interest he had always manifested in the affairs of the bank.

The vote of thanks having been seconded by Andrew Mulholland, Esq., J.P., D.L., was carried unanimously.

ROBERT BATT, Chairman.

BILSTON BANKING COMPANY.

THE directors of this company have declared a dividend at the rate of 5 per cent. per annum for the half-year ending the 30th June last, and a bonus of 2½ per cent., payable on and after September the 2nd.

BIRMINGHAM AND MIDLAND BANK.

AT the twenty-fifth annual general meeting, held at the bank on the 5th of August, 1861, Samuel Beale, Esq., M.P., in the chair, the following report was presented :—

The directors have the pleasure to report that

	£	s	d
The year's profits, after paying the past year's income tax, and providing for every bad and doubtful debt, amount to	40,111	11	7
Deduct dividend of 4*l* per share paid for half-year ending 31st December, 1860 ..... £13,200 0 0			
The directors recommend a dividend of 4*l* per share for half-year ending 30th June last, which will amount to 13,200 0 0			
	26,400	0	0
Leaving a balance to be carried to the guarantee fund of	13,711	11	7
The guarantee fund at the last annual meeting amounted to	118,397	13	2
Add interest to 30th June, 1861	3,593	7	8
Surplus profits as above	13,711	11	7
The present amount of the guarantee fund will then be	135,702	12	5
The paid-up capital amounts to ..... £165,000.			

It was resolved :—1. That the report now read be received and approved, and a copy thereof, together with the proceedings of this day, be sent to each proprietor.

2. That a dividend of 4*l* per share, for the half-year ending 30th June, be now declared, payable on or after the 1st of September next.

By resolutions of the twenty-second annual general meeting of the company, held on the 3rd day of August, 1858, and confirmed by a special general meeting held on the 4th day of October following, the capital of the bank was ordered to be increased from the sum of 150,000*l* to the sum of 200,000*l*, by the creation of 1,000 additional shares of 50*l* each, and the sum of 15,000*l* was transferred from the guarantee fund to the capital account, to be treated as capital paid up in respect of 300 of such shares, and the same 300 shares were ordered to be divided *pro rata* by way of bonus amongst the then existing shareholders, taking dividend thereon from the 31st day of December, 1858, and the remainder of such additional shares were ordered to be held for the future disposal of the proprietors.

Resolved :—3. That the further sum of 35,000*l* be transferred from the guarantee fund to the capital account, and that the same be treated as capital paid up in respect of the remaining 700 of such additional shares ; and that 550 of such 700 shares be divided *pro rata* by way of bonus amongst the existing shareholders, taking dividend thereon from the 31st day of December next ; and the remaining 150 shares to be held or disposed of for the benefit of the proprietors in such way as the directors in their discretion shall think fit.

Insane's own

BIRMINGHAM TOWN AND DISTRICT BANKING COMPANY.

THE twenty-fifth annual general meeting of the proprietors was held at Dee's Royal Hotel, on the 13th August: Mr Thomas Goodman in the chair. The following report was read:—

The directors of the Birmingham Town and District Bank have called the proprietors together to lay before them the twenty-fifth annual report, showing the success which has resulted from the business of the bank since the last general meeting. The shareholders will be gratified to learn that, notwithstanding the great want of activity in most branches of trade in the time comprised in this report, the profit arising from the business is of a very satisfactory and promising character. The high rate of interest which has prevailed during the last half-year more than compensated for any deficiency in the general business of the town. The accounts have been carefully audited by all the directors, as balanced up to the 29th June last, and found to be correct and well kept. This examination shows that after paying the income tax on last half-year's profit, all expenses incidental to the management of the business, and writing off a sufficient amount to cover bad debts, there remains a net profit on the year of 18,597*l* 14s 5d. The directors, therefore, feel fully justified in proposing, in addition to the dividend of 7s 6d per share, a bonus of 2s 6d, making together 10s per share for the half-year, to be paid in September next, both free of income tax. Should this proposal have the sanction of the meeting, the statement of the profit account, with its appropriation, may be thus shown:—Brought forward from June, 1860, 3,201*l* 6s 9d; profit from June, 1860, to June, 1861, 18,597*l* 14s 5d; total, 21,799*l* 1s 2d. Appropriation of the above:—Dividend paid in March last of 7s 6d per share, free of income tax, 6,556*l* 2s 6d; ditto ditto for September next, free of income tax, 6,556*l* 2s 6d; a bonus of 2s 6d per share, free of income tax, 2,185*l* 7s 6d; subscription in January last, to relieve distress in Birmingham, 30*l*; building fund, as usual, 100*l*; and to be carried over to next year's account, 6,371*l* 8s 8d; total, 21,799*l* 1s 2d. The present paid-up capital of the bank is 87,415*l*, and there are 517 of the new shares unappropriated. The guarantee fund is 60,000*l*.

Resolutions receiving and approving the report, and declaring the dividend and bonus therein recommended, were unanimously passed.

Thanks were voted to the directors for their services during the past year, and to Mr Bassett Smith, the manager, for his continued assiduity in conducting the business of the bank.

John Aston, Esq., J. O. Bacchus, Esq., and Mr James Collins, the retiring directors, were re-elected.

BIRMINGHAM BANKING COMPANY.

THE directors of this company have issued a circular notifying a dividend of 10s, and a bonus of 5s per share, for the past half-year.

CARLISLE CITY AND DISTRICT BANK.

SIR,—I beg to inform you that the directors have declared a dividend, payable on the 8th of August next, of 1*l* 2s 6d per share, for the half-year ending 30th June, 1861, being equal to 18*l* per cent. per annum. The profits for the half-year, after paying all expenses, amount to 6,674*l* 13s 9d, being at the rate of 23*l* 0s 4d per cent. per annum on the paid-up capital of 58,000*l*. After paying the above dividend there will remain in the auxiliary fund a sum of 3,428*l* 18s 11d, subject to half-a-year's income tax. The guarantee fund remains complete at 19,333*l* 6s 8d. Annexed is an abstract of the balance sheet of the company.—I am, respectfully, your most obedient servant,

Carlisle, July 22, 1861. WILLIAM FARRAR, Manager.

DAVID NELSON, Manager.

CITY BANK.

THE half-yearly meeting of the City Bank was held on the 16th July, at the London Tavern: Alderman Sir R. Carden occupied the chair. The usual preliminary business having been gone through, the secretary (Mr C. J. Worth) read the eleventh report of the bank, which was as follows:—

The report now presented to the shareholders exhibits statements of account which show the result of the operations of the bank for the six months ending the 30th of June last. On reference to the abstract of the profit and loss account, it will be found that the gross profit for the half-year, including a small balance of 625*l* 5s 4d brought forward from the last account, amounts to 45,034*l* 14s 2d; and that, after deducting from this amount the current expenses, bad and doubtful debts, and rebate of interest on bills discounted not yet due, there remains at the disposal of the directors the sum of 22,822*l* 0s 5d, which they have dealt with as follows, viz.:—To the payment of a dividend at the rate of 6 per cent. per annum, free of income tax, 9,000*l*; ditto a bonus of 15s per share, also free of income tax, 4,500*l*; transfer to the reserved fund (thereby increasing that fund to 40,000*l*), 7,000*l*; and the balance amounting to 2,322*l* 0s 5d has been carried to the new profit and loss account. The directors who on this occasion retire by rotation, are Mr H. V. East, Mr John Hackblock, and Mr Andrew Lawrie, all of whom offer themselves for re-election. The directors take leave to express their deep regret at the death of their much-esteemed colleague, Mr John Lidgett. This lamentable event having so recently occurred, they have not deemed it expedient to fill up at present the vacancy thus occasioned in the direction. The dividend and bonus will be payable on and after Tuesday, the 23rd instant.

	45,034	14	2

The Chairman said, in moving the adoption of the report, he had little information to furnish to the proprietors beyond that which it contained. He might, however, very properly refer briefly to one item of the current expenses, which might require explanation; for it did appear larger than might be expected: he referred to the item for losses. At the last meeting they thought that they had entirely finished with the affairs of Streatfeild, Laurence and Co.; they then put down their loss at 17,000*l*, and believed that that was the total, and they had every reason to believe it was so, for they all knew the ability and clearness with which Mr Commissioner Holroyd gave his judgment, and his decisions were always entitled to the greatest respect. The learned Commissioner decided that in respect of the 5,000*l* for which the bank held security they would be able to repay themselves, and therefore they calculated on recovering that 5,000*l*. There was, however, an appeal, and the Lords Justices had reversed the Commissioner's decision, and said this must go to the assignees. That had just added 5,000*l* more to the expenses of the bank than they expected, and made them appear very large. He hoped that their current expenses, however, would annually increase, for it would indicate that their business was progressing, and if it did this they must have additional clerks. The loss of this 5,000*l* was never for a moment anticipated; the judgment of Mr Commissioner Holroyd was perfectly clear on the point; he did not express the slightest doubt, but said most distinctly that they had a right to hold the collateral security, and pay themselves the 5,000*l* before giving it up. The proprietors, however, had fortunately suffered nothing; they had received their 7½ per cent., and the only disadvantage that had been occasioned to the bank was that for this year the reserve fund was not increased. They were now about to increase it by 7,000*l*, and he believed he might say that it was highly gratifying to the directors that they were enabled to say, that in

no bank—considering their infant growth—had the prosperity been so great as in the City Bank. It was due to the proprietors that he should say that this was owing, in a considerable measure, to the manner in which many of them had brought accounts to that bank, and he would simply point out that if each would only bring one account it would at once double their business; and this, he thought, they could very easily do. The progress they had made and the general opinion entertained of their power and greatness had sometimes been not a little embarrassing to the directors. They had been called on by the public to proceed as if they were in their manhood, whereas they were only in their infancy. It had, therefore, been a matter of consideration whether they should not increase their capital, to do which he believed they had full power. They had now 600,000*l* capital, 300,000*l* of which was paid up; but it had been thought advisable to consider if it could not be increased to a million; that course had not been decided upon, but they had determined to issue 2,000 more shares, that would make an additional nominal capital of 200,000*l*, and a paid-up capital of 100,000*l*. They had a gross receipt of 44,000*l*, that was the earnings of the half-year. These earnings had arisen from a cause which he hoped would not prevail many months longer—that cause was the extreme rate of interest. Though the banks had benefited by this, they could not but see that it must have a detrimental effect on the commercial interests of the country. Though they did not hope this high rate of interest would continue to rule, yet he trusted that what they lost by its diminishing would be more than counterbalanced by what they gained in the shape of increased business, for only four weeks in this year had the Bank rate of discount been down to 5 per cent., and during the remainder of the time it had been at six, seven, and even eight per cent., a state of things that could not fail to be detrimental to a trading country. Another question had arisen from the proprietors. It was said that this was the only bank holding so substantial a position which had not any branches; constant representations were made by proprietors that there should be a branch at the West end. The directors had nothing to say on the matter further than they had no thought of establishing a branch at the West end at present. There was a general feeling that they should leave well alone. And it was perfectly clear that branches had sometimes been disastrous, and there could not be the same strict supervision maintained over them that there could be over the parent establishment. He did not know that he had anything further to add to the observations he had made, but he would gladly answer any questions, and would content himself now with simply moving the adoption of the report.

Mr H. G. Brown wished to know if the bank could appeal from the decision of the Lords Justices.

The Chairman—Certainly, to the House of Lords; but it was thought that it was not advisable to throw good money after bad.

In reply to another shareholder, the Chairman said that they had at present received Is 6d in the pound from the estate of Streatfeild, Laurence, and Co. They expected more, but it was doubtful whether they would get it.

Mr Gilby seconded the motion for the adoption of the report, and said he should like to know at what premium the new shares were to be issued, if the directors had no objection to state.

The Chairman said he should not like at present to state at what premium the shares would be issued, though he might do so about a week before they were issued. It would be so fixed as to confer a mutual benefit on the bank and the proprietors.

The report was then adopted.

CLYDESDALE BANK.

AT the annual general meeting of the partners of the Clydesdale Bank, James Lumsden, Esq., Dean of Guild, in the chair, Mr Readman, manager, read the following report by the directors:—

The directors have now to submit to the shareholders, in terms of the contract of copartnery, the annual statement of the affairs of the bank for the year ending 12th June last.

The net profits for the year, after making ample provision for bad and doubtful debts, amount to 85,544*l* 14s 5d; and the directors unanimously recommend that the same dividend as last year, viz., 7½ per cent., be paid to the shareholders, under deduction of income tax, at the usual periods of 2nd August and 3rd February next. This dividend will absorb 60,553*l* 10s, and leave a balance of 24,991*l* 4s 5d. Of this sum the directors recommend that 22,386*l* be added to the reserved surplus fund, and that the balance of 2,605*l* 4s 5d be carried forward to next year's account.

The affairs of the Edinburgh and Glasgow Bank are now almost closed, and the valued assets taken over by the Clydesdale Bank have all been collected, excepting a sum of about 4,000*l*, which is in process of being realised. The deficiency, as referred to in the reports of the last two years, will not exceed the estimated amount of 25,800*l*, and this sum the directors have set aside from the reserved surplus fund, in terms of the resolution of the general meeting of 13th July, 1859. The mutual discharge is in the hands of the law agents of the two banks, but has not yet been finally adjusted.

Although the profits of last year would have allowed a higher rate of dividend than that now proposed to the meeting, the directors believe that the permanent prosperity of the bank is best promoted by recommending a moderate rate of dividend, and by adding periodically to the reserved surplus fund. As stated in last year's report, this fund amounted at that date to 163,414*l*; deduct sum now set aside for Edinburgh and Glasgow Bank deficiency, 25,800*l*; sum proposed to be aded this year, 22,386*l*; making a total of 160,000*l*, equivalent to nearly 20 per cent. on the paid-up capital of the bank.

The directors who retire by rotation at this time are James Merry, Esq., M.P., and James Muirhead, Esq.; and the board unanimously recommend that Sir James Anderson and Alexander Hastie, Esq., be elected in their room.

Annexed will be found the usual abstract of the balance sheet, to which the directors beg to refer.—By order of the directors.

Glasgow, July 8, 1861. GEO. READMAN, Manager.

	5,007,181	14	8

The Chairman moved the adoption of the report, and trusted that it would be considered as satisfactory by the shareholders as it had been by the directors. During the past year the many and very sudden fluctuations in the value of money, combined with that depression which for some time had been so severely felt by the mercantile interests of this country, had tended very much to the restriction of business, and had caused a more than usual amount of caution to be necessary in conducting banking operations. Still, it was gratifying to find that the business of the bank steadily increased, and that they were enabled to lay before the shareholders the result which they now did. As in former years, every attention had been bestowed by their directors, and their accounts, both at the head office and at the branches, had been carefully and minutely examined, and a sum ample and sufficient laid aside to meet any bad and doubtful debts. Such being the case, they were still enabled to place at their disposal the sum of 85,544*l*, which was fully 10 per cent. in excess of last year's profits, prosperous as that year was beyond all preceding years. Two years ago authority was given by the general meeting to the directors to deduct from the rest the amount of the deficiency in the assets of the Edinburgh and Glasgow Bank. This, at the time, for various reasons, it was not considered advisable to do; but now it had been acted upon, and that sum had been deducted from the rest. The directors, however, satisfied that a large reserved fund was of the utmost importance in placing the bank on a sure footing, and securing that confidence which the public had hitherto placed in it, thought it more for the interest of the bank that a larger sum than usual should this year be placed to the reserved fund. They therefore recommended that 22,386*l* be added to that fund, making the surplus fund, as stated in the report, 160,000*l*. In last year's report allusion was made to the change in the premises occupied as the head office. It was satisfactory to state that these premises had been found sufficient and very commodious. They had afforded a greater amount of facility and comfort to their customers in transacting business, while they had enabled the officials of the bank to conduct their respective departments in the most satisfactory manner. Conducted as the affairs of this bank would be, upon the same principles which had in times past actuated the directors in the management of the bank, he had no doubt that the confidence which the public had placed in it would be maintained, and that the prosperity of the Clydesdale Bank would keep pace with the growth and prosperity of Glasgow. He had much pleasure in moving that the report be adopted, that a dividend of 7½ per cent. be declared, payable at the usual terms of August and February next, and that Sir Jas. Anderson and Alex. Hastie, Esq., be elected directors, in the room of Mr Muirhead and Mr Merry, who retired.

Mr Robert Aitken seconded the motion, and expressed his satisfaction that the course recommended in the report as to the dividend was the most prudent they could follow, especially in the circumstances in which they were now placed. They had great cause to be thankful that they had such an excellent manager and such directors, who looked narrowly into everything; and he was satisfied that there had been no desire to make things more pleasant, to use an old railway term, than they should be. They knew the best and the worst of everything, and the best greatly predominated.

Dr M. Hamilton having suggested that in future the dividend should be declared free of income tax, the motion was approved of.

Dr M'Farlane, Edinburgh, in moving a vote of thanks to the directors and the manager, said, that they had all done their duty was clear from the report, and that they retained the confidence of the public to as great an extent as most of the banks in Scotland. This he knew quite well, for he belonged to other banks than

this. The Clydesdale Bank, under such management as they had at present, was sure to prosper, unless something very extraordinary should happen. He did not know a bank that possessed a more faithful manager than Mr Readman.

The Chairman briefly expressed the acknowledgments of the directors and Mr Readman, and the proceedings then terminated.

COLONIAL BANK.

THE forty-seventh half-yearly general meeting of the shareholders in this company was held on the 3rd July, at the London Tavern, Bishopsgate street: Mr C. Marryat, the chairman of the board of directors, presided. The Secretary read the following report:—

In accordance with the requisitions of the charter, the directors submit to the proprietors the following statement of the debts and assets of the corporation on the 31st of December, 1860, which comprises the net profit made during the half-year ending at that period, viz.:—Debts.—Circulation, 265,572*l* 12s 6d; deposits, bills payable, and other liabilities, 1,478,443*l* 3s 9d; paid-up capital, 500,000*l*; reserved fund, 80,940*l* 17s 9d; net profit, 36,774*l* 0s 7d; total, 2,361,730*l* 14s 7d. Assets.—Specie, 278,965*l* 11s 11d; due to the bank in the colonies on bills discounted and purchased, including those past due, 1,238,482*l* 1s 1d; due to the bank in the colonies on current accounts, 36,777*l* 2s 8d; due to the bank in London on bills remitted, cash at bankers, &c., 803,037*l* 9s 9d; bank premises and furniture in London and in the colonies, 4,468*l* 9s 2d; total, 2,361,730*l* 14s 7d.

The directors have much pleasure in being able again to present to the proprietors such a satisfactory statement, and to add that the latest accounts received from the branches compare favourably with those of the corresponding period of the preceding year. They now, therefore, recommend that out of the net profits reported above, which amounts, after providing for income tax and for all bad and doubtful debts, to 36,774*l* 0s 7d, a dividend be made of 5 per cent. for the half-year ending 31st December, 1860, being at the rate of 10 per cent. per annum on the paid-up capital of the corporation, which will require 25,030*l*, leaving 11,774*l* 0s 7d to be added to the reserve fund, which will then amount to 92,714*l* 18s 4d.

The Chairman, in moving the adoption of the report, said, as the shareholders had had the accounts in their possession for some days, and as they afforded all the information he could give, it would not be necessary for him to detain them with any lengthened observations. He might, however, say that the progress of the bank was generally satisfactory. They had, of course, experienced losses like other undertakings of a similar character, but, such as they had been, they were amply provided for.

Mr Mocatta would like to be informed whether the bank was likely to be injuriously affected by by the disruption in America.

The Chairman said no doubt injurious effects would be produced in a variety of ways if the war went on; but, directly, the bank was not likely to be affected, inasmuch as the directors had already stopped direct communication with New York to avoid anything of the kind.

In reply to a question from a shareholder,

The Chairman said he thought it unadvisable to state publicly the extent of their losses, or in what direction they had been sustained.

Mr Hines said he had been a shareholder from the first, and had great confidence in the board; but he put it to them whether they ought not to divide a tithe more of the earnings than they proposed to do. He had anxiously watched the reserve fund, which he thought was being increased more rapidly than necessary. He should like a small increase to the dividend, and believed another 2,500*l* might be devoted to that purpose. The reserve fund would then be 90,000*l*, and next year the goal of 100,000*l* could be reached. The increase in the dividend would enhance the value of the shares, which at present were quoted at 37, 38, and 39,—certainly below what they ought to be. With a dividend of 10 per cent. they ought to be quoted at 40. He threw the subject out as a suggestion, but would not press it to disturb the unanimity of the meeting.

Mr C. Cave, a director, said that his hon. friend knew the value of a large reserve as well as any man in private business, and therefore he was somewhat surprised that he should not also wish for it in his corporate capacity. The directors felt that the reserve fund should amount to 100,000*l*, not only as a defence against any sudden calamity, but to maintain the regularity of the dividend. When they arrived at the happy goal of 100,000*l*, they would then increase the dividend in the shape of a bonus, but not even then to the full extent of their earnings, for it would still be necessary to put by something to meet the great responsibility of their vastly increasing business.

Mr Scott said that whilst he should like an increase of dividend, he hoped that prudence would never be lost sight of.

The report was then adopted, and a dividend of 5 per cent. for the half-year declared.

CUMBERLAND UNION BANK.

REPORT of the directors to the proprietors, at their thirty-second annual general meeting, held at the Green Dragon Hotel, Workington, on Tuesday, the 30th July, 1861:—

The directors have to report that the books of the bank have been made up to the 30th June last, and that they have been carefully audited.

After writing off to the debit of profit and loss account 335*l* 19s 11d, the amount of two bad debts incurred at the branches, setting aside 868*l* 10s, towards the new buildings at Maryport and Penrith branches, and making provision for doubtful debts,

	£	s	d	£	s	d
The net profit for the year amounts to				18,958	1	10
From which deduct 1 year's interest on guarantee fund at 5 per cent.	1,277	9	0			
And income tax for the past year	506	17	6			
				1,784	6	6
Thus leaving				17,173	15	4

as the amount of disposable profit for the year, out of which the directors recommend the usual dividend of 5*l* per share. They have also the satisfaction to recommend this year a bonus of 2*l* per share.

These payments will absorb 14,000*l*, leaving 3,173*l* 15s 4d to be carried to the guarantee fund, which with that addition and the year's interest, 1,277*l* 9s, as already stated, will then amount to 30,000*l*, thus making the proprietary funds of the bank to stand at 110,000*l*.

In the spring of this year a favourable opportunity presented itself to the directors to reopen the branch at Carlisle closed some years ago. This was accordingly taken advantage of, and business was recommenced in the county town on 1st May. The progress made in the short time which has elapsed has been very satisfactory and encouraging.

The Maryport branch building commenced about 12 months ago is now nearly complete, and in a few weeks will be ready for occupation. The directors have just entered into contracts for the erection of the new Penrith office upon the site purchased there two years ago.

ENGLISH, SCOTTISH, AND AUSTRALIAN CHARTERED BANK.

REPORT of the directors to the proprietors, at the sixteenth ordinary meeting, on Wednesday, the 31st July, 1861:—

The directors have to submit the accompanying statement of the accounts of the bank made up to the 31st March in the colonies, and to the 30th June in London.

Referring to what was said at the last meeting on the subject of a change in the colonial management, the directors have now great satisfaction in informing the proprietors that they have appointed, as manager of one of the branches, Mr John Salmon, a gentleman of banking and mercantile experience, strongly recommended, and who has already sailed for his destination.

Although the profits of the past six months have considerably exceeded those of any previous half-year, yet, owing to the provision made for losses, arising from failures which have occurred since the date of the last report, and a consequent depreciation in the value of securities, the amount available for distribution is reduced to 16,600*l* 12s 6d.

The general amelioration of circumstances in Australia, and the increase in the bank's profits for the half-year, seem to justify the hope of a steadily improving future.

The directors recommend the following appropriation of the balance of profit and loss account, viz.:—To the payment of a dividend at the rate of six per cent. per annum, free of income tax, on 500,000*l*, the paid-up capital of the bank, 15,000*l*; towards the reduction of the amounts at debit of preliminary expenses, 500*l*; bank premises and furniture accounts, 1,000*l*; leaving 100*l* 12s 6d to be added to the reserved fund, which will then amount to 22,587*l* 17s 9d.—(Signed)

STEPHEN P. KENNARD, Chairman.

Examined, compared with the books and vouchers, and together with the securities, found correct, 18th July, 1861.

(Signed) JOHN HENRY STEINMETZ, PHILIP VANDERBYL, } Auditors.

The preceding report and statement of accounts for the last half-year ending 30th June, 1861, having been read by the Secretary, it was resolved unanimously—"That the report and balance sheet now read be received and approved; that the dividend for the half-year ending the 30th June last be made, in accordance with the recommendation contained in the report, at the rate of six per cent. per annum (free of income tax), and that it be payable on and after the 5th August."

The proceedings of the meeting concluded with a vote of thanks to the court of directors. (Extracted from the minutes.)

HENRY MOULES, Secretary.

73 Cornhill, E.C., London, 31st July, 1861.

GLOUCESTERSHIRE BANKING COMPANY.

THE thirtieth annual general meeting of the proprietors of this bank was held in Gloucester, on Wednesday, the 14th of August,

Samuel Baker, Esq., in the chair, when the following report was presented by the directors:—

Your directors have again the satisfaction to report to you a steady improvement in the affairs of this company. The injurious influences of a bad harvest, combined with the lamentable dissensions in America, have seriously affected the agricultural and trading interests of the country, and thereby given cause for much anxiety to your managers. But notwitstanding largely increased demands made upon them for accommodation, they have, by means of the ample capital at your disposal, not only met the requirements with great liberality, but also by care and strict supervision kept down the losses by bad debts to less than the average annual amount. The position of monetary affairs during the past year has tested and fully sanctioned the wisdom of the system you have pursued of accumulating disposable funds out of annual profits. This has fortified your directors against every emergency. The average rate of interest has been favourable for its employment. The profits throughout the year have been large. They may be considered exceptionable so far as they depended upon the increased rate of interest. It would, therefore, be unwise to deal with them as an ordinary average. Your directors believe that your interests will be best served by again adding to the capital and guaranteed fund, by which means you will increase the power of the bank, and provide sources for future profit. At the date of your last annual report the paid-up capital was 225,000*l*, the guarantee fund 112,500*l*, and the rest (or reserve account) 12,236*l* 11s 2d. The profits of the year (after payment of the Christmas dividend) have raised the rest to 49,514*l* 15s 6d, from which we now recommend you to take 30,000*l* to be added to the capital and guarantee fund, in proportion of two-thirds to the capital and one-third to the guarantee fund, and to declare an increased dividend for the half-year, viz., 25s per share, making, together with the Christmas dividend, 47s 6d per share, clear of income tax, for the year terminating on the 30th June, 1861. There will then remain an unappropriated balance on the rest account of 764*l* 15s 6d. Your directors confidently hope that, during the present year, you may add a further sum of 7,500*l* to the capital and guarantee fund, so as to raise them together to the sum of 375,000*l*, or one-half the full authorised capital of the company. They also hope that you will then be enabled to maintain a future dividend of 50s per share per annum. It must be gratifying to proprietors to remember that they have attained a state of unquestionable stability, concurrently with a steadily increased dividend. Your directors have always felt that the character and success of the bank demanded that with increasing business there should be increasing capital, and they trust that you will continue this course of prudent policy. The value of your shares depends as much upon sound stability as upon the dividends you may be able to pay. The new branch at Ross has fully answered the expectations of your directors. They have no doubt that a considerable business will be established there. They have also been induced by the invitation of influential friends in the Dean Forest, and with the view of maintaining their interests in that important district, to open a branch at Coleford.

The report having been read, the Chairman announced that a preparatory meeting had been held the previous day, in accordance with the 28th clause of the deed of settlement, for the purpose of receiving and examining the lists for directors; and having produced an abstract of the votes as they were returned that day, showing that the greatest number of votes were given for the following gentlemen, they were accordingly appointed directors for the ensuing year:—Samuel Baker, Samuel Bowly, John Blagden Hale, Nathaniel Hartland, Samuel Jones, William P. Price, James Maurice Shipton, John W. Wilton, Lindsey Winterbotham.

Resolved—1st. That the report of the directors be received and approved, and that the same be printed for distribution amongst the proprietors; and also that a dividend for the half-year of 25s per share, clear of income tax, be made to the proprietors.

2nd. That the sum of 20,000*l* be transferred from the rest account to the capital account, being at the rate of 1*l* 6s 8d per share on the 15,000 shares of the company, thereby increasing the paid-up capital to 245,000*l*; and making (with 15*l* per share previously paid) the sum of 16*l* 6s 8d per share paid up.

3rd. That the sum of 10,000*l* be transferred from the rest account to the guarantee fund, thereby increasing it to 122,500*l*.

4th. That the sum of 1,000*l* be placed at the disposal of the directors, for their services during the current year.

5th. That the best thanks of this meeting are due, and are hereby tendered, to the directors and managers of the company.

6th. That the best thanks of this meeting be given to the chairman for his able and impartial conduct in the chair.

The meeting then separated.

HALIFAX COMMERCIAL BANKING COMPANY.

At the annual meeting of the shareholders of this company, the directors reported that the net profit of the year amounted to 10,140*l* 17s 9d, being nearly 16½ per cent. upon the share capital. A dividend of 10 per cent. was declared, in addition to a bonus of 8s per share, making an entire dividend of 14 per cent. for the year, and leaving a balance of 1,439*l* 17s 9d to be added to the fund for contingencies. It appears that the net annual profits of this company during the last eight years have averaged more than 14⅛ per cent., and that there is now a surplus in the reserve and other contingent accounts exceeding one-third of the share capital.

HALIFAX AND HUDDERSFIELD UNION BANK.

At the annual meeting of this company, a dividend at the rate of 10 per cent., and a bonus at the rate of 7½ per cent. per annum, free of income tax, were declared; the sum of 2,000*l* was added to the surplus fund, and a balance of 2,354*l* 2s 6d carried forward to next year's account.

IONIAN BANK.

The following is the twentieth yearly report of the directors, submitted to the proprietors on Thursday, 30th May, 1861:—

The directors of the Ionian Bank, in presenting to the proprietors their annual report, have little to communicate beyond what appears from the summary at foot, as the result of the year's transactions.

The return of the rest to an amount exceeding what it was before the pressure of adverse times, has enabled the court to resume the former rate of dividend, viz., six per cent. per annum.

This step was not taken without mature consideration, nor until the directors had assured themselves that the same rate might, according to all reasonable expectation, be steadily continued, together with a due provision for contingencies and addition to the rest.

Since the renewal of the charter the attention of the court has been mainly directed to old dependencies covered by securities, which have unavoidably remained unliquidated.

After a careful examination of these securities, the directors have satisfied themselves that no material loss is to be apprehended in their ultimate realisation; they have, nevertheless, thought it right to make provision for any such contingency, and they have further directed measures to be taken for effecting, as promptly as prudence will permit, the liquidation thereof.

The character of the business transacted during the year 1860, as well at the branches as also at the agencies of the bank, has been satisfactory, and it is gratifying to be able to add that the agitation which occasionally ruffles the surface of the Ionian commonwealth has no sensible effect on the operations of the bank.

The following is an abstract of the profit and loss account for the year:—The balance to the credit of profit and loss on the 1st January, 1860, was 17,087*l* 6s 7d; the net profit, after deduction of charges and allowance for doubtful debts, is 11,526*l* 19s 3d; together, 28,614*l* 5s 10d; from which is to be deducted the amount of two half-yearly dividends paid in 1860, at the rate of 5 per cent. per annum, 7,500*l*; leaving to the credit of profit and loss on the 1st January, 1861, 21,114*l* 5s 10d.

LONDON AND COUNTY BANK.

The half-yearly meeting of the proprietors of this bank was held on the 1st August, at the London Tavern: Mr W. Champion Jones occupied the chair.

After the usual preliminary business, the Chairman called on the secretary to read the report, which was as follows:—Your directors have the pleasure to lay before the proprietors of the bank their report and balance sheet for the six months ended on the 30th June last. These accounts have been examined and signed by the auditors. They show a net profit for the half-year of 44,473*l* 3s 3d, after payment of interest to customers 47,451*l* 0s 5d, and of the expenses at the head office and branches, income tax, rebate on bills discounted and not due, and making provision for bad and doubtful debts. Your directors have declared a dividend of 5 per cent. for the half-year out of the net profit, as above stated, and carried forward the balance of 19,473*l* 3s 3d. The dividend will be payable at the head office, or any of the branches, on and after Monday, the 12th instant.

	165,850	3	7

The Chairman, in moving the adoption of the report, said the directors had hoped to have held the present meeting in the hall of the new bank in Lombard street; but the greater general convenience of assembling at the London Tavern until the new premises were completed had led them to forego a wish, the accomplishment of which, if practicable, would no doubt have

been gratifying to all parties. He believed that with the result of the business of the six months ending the 30th of June, as shown in the accounts, they would have no reason to feel disappointed. The rate of interest in banking concerns for the past six months had been generally high, and had been so far in favour of banking profits, of which, he was happy to say, a very fair share had fallen to the lot of the London and County. Otherwise, their business had not been specially effected by any particular commercial or international event. The disruption of the North American Union had not in any degree come home to their interests, and therefore all they had to say on that theme was to express the general sympathy which that event had everywhere occasioned. They were affected rather by matters of a domestic character, as, for instance, the last two harvests. The condition in which the crops had been got in last year had pressed severely upon the agriculturists, and in those districts where the bank had branches they had been called upon, as they expected to be, to afford assistance to those of their agricultural customers whose position and standing fairly entitled them to it. The directors felt it to be fairly within the sphere of the institution to grant, as they desired to do, assistance to the farmers in those districts who were known to them as having long been customers of the bank. Nor had they any reason to regret having afforded such aid. Most of the accounts so opened had been already entirely paid off, and the present prospects of the forthcoming harvest, he was happy to say, left every reason to believe that the whole of the advances still outstanding would be liquidated in a short time. The legal proceedings in which the bank was engaged had not undergone any material alteration since the last meeting. The pending litigation in reference to the Chandos mortgage, would, he believe, come on for hearing before the next meeting in February, and he hoped the shareholders would accept the assurance of the board that they saw no reason to qualify the expectations they had on previous occasions stated as to the ultimate result, inasmuch as they were entitled, by the opinion of the solicitors of the company, and of every authority to which they had access, to believe that the final decision would be in harmony with those which, in the suits they had been engaged in, had happily preceded it. He would now turn to the balance sheet, to point out the amount to which the balance had augmented during the six months, and to show how much each head had increased the amount for the accumulation of capital which had come into their possession in the course of the six months. Beginning on the debtor side, the capital paid up remained as it was, namely, 500,000*l*. The reserve fund had been augmented by the vote of the last meeting by 15,000*l*. The increase on customers' balances in the six months was 136,351*l*, a sum which would have been three or four times multiplied, probably, if the last harvest had been more favourable. The next item, liabilities on acceptances and endorsements, was a new one, and represented a connection which the directors hoped to see in a state of further progression in the next and every succeeding six months. These acceptances were given by the bank on the security of banks in India and the Cape of Good Hope, whose London agency was executed by the London and County on commission. The increase in salaries throughout the establishment (which salaries were revised every year in January and February) amounted, together with income tax, the rent of premises in Threadneedle street, and other charges of a like nature, to 5,006*l*; and these several sums, less the item of deduction he had mentioned, would be found to equalise the amount of additional capital received for working during the half-year. In the profit and loss account there were two items which called for special attention—one the dividend of 5 per cent., the other the balance of 19,473*l* carried over. The directors had fixed the dividend at 5 per cent. after mature consideration, and begged to remind the shareholders that this was but an instalment of what might turn out to be the profits of the year. It was not intended at this, the half-yearly meeting, finally to conclude anything, and the board considered that the division they recommended was all that the circumstances of the moment required. The only other point he would refer to was one that always afforded the best indication of the progress they were making in popular favour, that was the increase in the number of accounts; and he was happy to inform them, that during the six months the addition to the number of current and deposit accounts had been no less than 1,850. He begged to conclude by moving the adoption of the report and accounts, and the confirmation of the dividend.

Mr Nicol, M.P., seconded the motion.

Mr Harrison, one of the auditors, testified to the correctness of the accounts, the admirable manner in which the books were kept, and the facilities afforded by the direstors to the auditors. The system of check in the country branches was satisfactory. The current accounts at the branches had fallen off, but that was to be expected, in consequence of the bad harvest. With regard to the Chancery suit referred to, he had no doubt they would be successful.

In reply to questions, the Chairman stated that the 1,800 new accounts was the balance, after deducting those which had been withdrawn.

Mr Nicol added that the total loss on the estate of Smith, Sinclair, and Co., the whole liabilities of which to the bank on bills under discount were something under 10,000*l*, was not more than 500*l* or 600*l*.

The resolution was carried unanimously.

LONDON JOINT STOCK BANK.

THE half-yearly meeting of the directors of this bank was held on the 18th July, at their establishment in Princes street, Bank: Mr P. W. Flower occupied the chair.

The secretary (Mr Kennedy) having read the notice convening the meeting, read the 48th report, which was as follows:—The annexed accounts, which the directors have the pleasure of submitting to the shareholders, show that the bank has realised during the past half-year a net profit of 84,006*l* 15*s* 10d, which is appropiated as follows, viz.:—37,500*l* to the usual dividend at the rate of 12½ per cent. per annum; 37,500*l* to a bonus of 12s 6d per share; and 9,006*l* 15s 10d to the augmentation of the guarantee fund. The decline in the market value of Government and Indian securities since the 31st December having reduced the value of these held by the bank on the 29th of June to the extent of 17,875*l*, that sum is carried to the debit of the guarantee fund, which fund, being credited with six months' interest, and the undivided profit stated above, now amounts to 198,458*l* 5s 9d. It will be satisfactory to the shareholders to learn that the sum reserved from the profits of last year has proved ample to cover the loss sustained by the failures in the leather trade, and that some portion of it will probably be recovered on the final liquidation of the bankrupt estates. The directors have to announce that the bank has been deprived of the valuable services of one of its few remaining original directors and founders, by the resignation of their friend Ambrose Moore, Esq.; and they desire, at the same time, to record their high appreciation of their late colleague's talents, and of his unremitting attention, during so many years, to the affairs of the bank. The retirement of this gentleman, induced by considerations of health, will make it necessary to call an early general meeting to fill up the vacant seat at the board. The dividend and bonus, free from income tax, will be payable on and after Friday, the 25th inst.

Cr.			
Balance brought down	151,719	15	3

The Chairman said he had now to declare a dividend after the rate of 12*l* 10s per centum per annum upon 600,000*l*, the amount of the paid-up capital upon 60,000 shares, and a bonus of 12s 6d per share, payable on and after Friday, the 26th instant. He had also to move that the report be received, printed, and circulated amongst the shareholders.

Mr Henry Lee seconded the motion, and it was put and carried unanimously.

The Chairman said this concluded the business. He had no further remark to make, except it was to congratulate the meeting on the success of the bank during the past year.

Mr Corney said he presumed that the silence of the shareholders indicated that they had no complaints to make; he certainly had none, and he thought they would be doing an injustice to the directors if they did not return to them a vote of thanks for the way in which they managed the affairs of the bank. He had his fears on the last occasion of their meeting that their calculations would not meet all the demands of the leather trade losses. They were now happily relieved of that anxiety, and found that they had rightly estimated the amount of the loss, and that they would probably have a small balance in their favour. He begged to move that the best thanks of the shareholders be returned to the chairman and the board of directors for their constant attention to the business of the bank, and the ability they had displayed in conducting its operations so successfully.

The resolution was put, seconded, and carried unanimously.

The Chairman said, on the part of himself and his brother directors, he begged to return their best thanks for the expression and approval of the management of the business of the bank. He could not promise them that the endeavours of the directors should be greater in the future than they had been in the past, but he might confidently say that there should never be less. The proprietors went from that room with his confident assurance

that the bank was never more prosperous than it was at the present time.

Mr Corney then moved a vote of thanks to the manager of the bank.

The resolution was seconded and carried unanimously.

Mr Hewett, the manager, said he had to thank them for the kind manner in which they had passed the resolution. He was much pleased with the position of the affairs of the bank, and it was exceedingly gratifying to him to receive this mark of approbation for the small share he had in bringing them to the present state.

LONDON AND WESTMINSTER BANK.

THE half-yearly meeting of the proprietors was held on the 17th of July, at the bank in Lothbury: Alderman Salomons, M.P., in the chair.

The following report was read by the secretary (Mr Fairland):—

The directors have to report that after making provision for all bad and doubtful debts, paying the income tax, and setting apart 2,000*l* towards the buildings of the bank, the net profits of the last half-year amount to 131,591*l* 16s 4d. This sum added to 10,941*l* 8s 5d remaining from the profits of the preceding half-year, will amount to 142,533*l* 4s 9d.

From this sum, interest on the surplus fund at the rate of 5 per cent. per annum (5,253*l* 2s 6d) has been added to such fund, which now amounts to 215,378*l* 2s 6d.

The directors now declare a dividend to the shareholders at the rate of 6 per cent. per annum, and by way of further dividend out of the profits, a bonus of 7 per cent. on the paid-up capital.

After these payments are made, there will remain 37,280*l* 2s 3d, and the directors recommend that 20,000*l* be added to the rest or surplus fund, and the remaining 17,280*l* 2s 3d carried to the profit and loss account for the current half-year.

The vacancies in the direction occasioned by the deaths of the late Henry Bosanquet, Esq., and William Haigh, Esq., have been filled up by the nomination of Alexander Gillespie, Esq., and Charles Freeman, Esq., subject to confirmation at the next annual meeting of proprietors.

The dividend and bonus (without deduction of income tax) will be in course of payment on Monday, 22nd instant.

The Chairman—Gentlemen, in moving the adoption of the report, I will make but a very few observations. Indeed, the figures speak for themseves. We have had a most successful half-year. Our deposits, which are the source of our prosperity, have increased considerably, and that augmentation is mainly in the deposits at interest. Certainly our deposits in the aggregate have been increased by the transfer of a portion—a considerable portion—of the business of the Commercial Bank. The deposits you will see by the report—and those are deposits at interest—and our guarantee account, including the moderate sum that we have out upon circular notes, amount to the large sum of 14,800,000*l*, nearly 3,000,000*l* in excess of this time last year, and about 2,300,000*l* over the account shown when we had the pleasure of meeting you in January last. And besides that, which I am sure you will be gratified to hear, the losses for the half-year are below the average, and are very inconsiderable. Our net profits for the half-year amount to 131,000*l*, and we have in hand besides about 11,000*l*, the balance carried to profit and loss at the January meeting. We, therefore, declare to you a dividend and bonus together, which will be at the rate of 20 per cent. per annum, being 10 per cent. for the half-year. In other words, in fact, paying you out of the net profits of the half-year one-fifth of your paid-up capital. Of course 20,000*l* is a large sum to recommend to be added to the reserve or surplus fund, but I am sure you will all approve of it. That will carry forward a sum of about 17,000*l* as balance of profit and loss for the current half-year. I may say, further, that all this has been accomplished without any effort on our part. Our desire always has been, and our desire always will be, not to force our business in any way, but to employ those large assets intrusted to us on the best security; and I cannot give you a better proof of the true conservative spirit that prevails on our part than this, that, notwithstanding the high rate of money, we thought it desirable that we should increase our funded security, seeing the large amount of deposits that we had in hand; and you will find on reference to the report that our permanent investments show an increase for the last half-year of half a million. That is, that on the 31st of December last our cash in hand and Government securities represented a sum of three millions and a half sterling. The chief incident of the half-year, and no doubt your will expect some information from us upon it, has been the transfer of the business of the Commercial Bank to ourselves. You are aware that when our aid was solicited it was promptly given, and I believe the result of that aid was that the state of alarm which any great commercial establishment being in difficulties is calculated to produce in the commercial world, and amongst the public at large, was entirely got rid of. The effect of our interference was, that while a large portion of the accounts have come to us, the proprietors of that establishment have been saved from depression, while all the customers of the bank were not under one moment's apprehension. I believe I may fairly take some credit for the board of directors for the promptitude and decision with which the application was received, and the success with which it has been carried out. I may further for ourselves—and it is perhaps something to say on behalf of the establishment for whom we interfered—that we should not have interfered if we had not, on a cursory examination by our chief executive officers, found the bank in such a state that we might safely take it. It required considerable advances on our part, which we were quite ready to give, provided we should not in the smallest degree compromise the interests of our establishment. I have no doubt that in future half-years you will have the advantage of an increase of business from that source, because we have met all the demands on that board, and we have satisfied their utmost liabilities; and I think in all our transactions with the board itself we have acted with the utmost consideration. We took a great number of the staff of that establishment, and our establishment has felt in that proceeding that some of our rules with respect to age had to be relaxed, by which the condition of some of our own officers was improved, while the business, as well as the general prosperity of the establishment, was thus interested in the proceeding. We have besides given fairly and liberally to those other officers of that establishment who were, by this unlooked-for misfortune, thrown on to the world. I think it is but fair to say hat we acted towards the Commercial Bank with every consideration at that time. No doubt we shall profit by the accession of business that we shall receive, and I doubt not that in future years we shall find that it is considerable. But the present half-year does not show any profit derived from the transfer of the business of the Commercial Bank to ourselves. Now let me say one word with regard to the transfer of that business. Of course we are ready to receive any business that may come to us—our doors are open for that purpose—but we do not wish in any way to increase the business of the establishment by the misfortune or distress of our neighbours. We are interested, in common with everybody, in seeing the commercial, the trading, and the banking world of this country, and this city particularly, prosperous and doing well. We do not desire to see fewer establishments, but to see them all flourish. Now, having called your attention to this point, I will go to the other parts of the report. I must, of course, speak with great regret of the loss of two excellent directors, most useful and honourable men, who were taken from us in the course of the last half-year. I allude to Mr Bosanquet and Mr Haigh. Mr Bosanquet, although belonging to the legal profession, was from the earliest period a director, and joined this establishment even before it was licked into shape, or assumed any form whatever that was presentable to the public, and he was up to the last a most earnest, useful, and honourable individual; most welcome to the board, and on all occasions most earnest to promote the success of the bank. And I may say of Mr Haigh, also, that he was an old director. He came to us after the bank was formed, and was many years with us, and I may say of him, as I said of Mr Bosanquet, that he was a most zealous, active, and useful man, and I deeply regret the loss of two colleagues with whom for so many years I was associated. The board have temporarily, under the provisions of the deed, filled up the vacancies by the nomination of two gentlemen who, I trust, hereafter will be found most useful directors of this establishment. One of them is Mr Gillespie, of the firm of Gillespie, Moffat, and Co., an old firm. He is a gentleman of a great deal of experience. The other gentleman is Mr Freeman, of the firm of Freeman, Ashton, and Co., largely connected with the China and East India trade. These gentlemen will be a most useful addition to this side of the

table. Of course they will come before you in the ordinary way at the annual meeting for confirmation. I do not know that I have any further observations to make in reference to our actual business. I can only repeat to you that it has been our good fortune to go through the last half-year with a comparatively small amount of loss, and I think I may say, considering the large amount of commercial transactions which we represent, and the small number of commercial failures during the last half-year that have taken place, that there is something to be said for the general commercial morality of the kingdom. I have only, in conclusion, to say, that if any proprietor should require any further illustration of the report, I shall be most happy to afford any information in my power. With these few remarks, I beg to move that the report be received and adopted, and circulated amongst the porprietors.

The resolution was unanimously carried.

Sir C. Burrell, M.P., moved a vote of thanks to the chairman and directors, and the meeting separated.

LONDON AND SOUTH AFRICAN BANK.

Sir,—In accordance with the instructions of the court of directors, I have the pleasure to hand you a financial statement of the accounts of this bank made up to the 30th June. I beg at the same time to inform you that since the date of the public announcement to the shareholders that the necessary certificate had been obtained from the Government to enable the directors to commence business, the manager and a staff of officers for the Cape Town branch left England in the month of May, and the manager for the Port Elizabeth branch in the month of June. The managers will be aided in the discharge of their duties by gentlemen of position and character, resident in Cape Town and Port Elizabeth, who have been specially selected by the directors for that purpose. The directors have much pleasure in stating that their advices from the colony continue to be of a most encouraging character as regards the future prospects of this bank; and they still retain the opinion already expressed of their confidence in the successful result of this undertaking.—I am, Sir, your obedient Servant, J. A. Merrington, Secretary.

LONDON CHARTERED BANK OF AUSTRALIA.

Report of the court of directors, presented at the ninth ordinary general meeting of the proprietors, held at the London Tavern, Bishopsgate street, on Friday, the 7th June, 1861:—

1. The present being the period appointed by the charter of incorporation and deed of settlement for the yearly meeting of the company, the directors now place before the proprietors their ninth annual report, accompanied by the accounts, duly audited, showing the state of the bank's affairs to the 31st December, 1860.

2. Although failures of some magnitude have, during the past year, occurred in the colonies, the directors are gratified to be able to report to the proprietors, that no losses of any importance have been sustained by the bank, and that the year's operations may be viewed as satisfactory. The vigilance and caution exercised by the inspector, Mr Bramwell, aided by the other executive officers of the corporation, have in great part contributed to produce this gratifying result, and merit the acknowledgments of the proprietors.

3. Adhering to the policy of strengthening the reserve fund, which has already had the approval of the shareholders, the directors propose out of the half-year's profits to add the sum of 10,000*l* to that fund, which will then amount to 45,000*l*. To the colonial building fund, the directors propose making the usual half-yearly addition of 1,500*l*, which will then amount to 6,000*l*, which the directors recommend should be appropriated as stated in the next paragraph.

4. The bank's premises at Sydney having participated in the general depreciation which has affected house property in that city, the directors considered that a revaluation of this asset of the bank was expedient, with a view to its being placed at its actual market value in the books of the corporation. Acting on the result of that valuation, the board now propose to write off the sum of 3,000*l* from the cost of this property, debiting the amount so written off to the "colonial building fund," which it will be in the recollection of the proprietors was created in order to meet contingencies of the character now under consideration. The balance standing at the credit of the above fund will be applied in reduction of the cost of the other freehold properties held by the corporation in the colonies.

5. The latest advices from the colonies extend to the 25th March from Melbourne, and to the 23rd March from Sydney, and represent the position of the bank's affairs as satisfactory.

6. The accounts appended to this report are made up to the 31st December last, from which it appears that after the usual deductions, and also after making allowance for bad and doubtful debts to the full amount recommended by the inspector, there remains to the credit of profit and loss the sum of 43,848*l* 4s 10d, out of which the directors recommend that a dividend be declared for the half-year of 3½ per cent. free of income tax; and that a sum of 10,000*l* be placed to the reserve fund; also that a sum of 1,500*l* be placed to the colonial building fund; leaving to be carried to next account a balance of 7,848*l* 4s 10d.

7. The directors and auditors now go out of office, but being eligible for re-election they offer themselves accordingly.—By order of the court,

James Strachan, Secretary.

LIVERPOOL COMMERCIAL BANKING COMPANY, LIMITED.

At the twenty-eighth annual general meeting of the Liverpool Commercial Banking Company, Limited, held in pursuance of the provisions of the deed of settlement, at the Clarendon Rooms, South John street, Liverpool, 9th March, 1861, Kenneth Dowie Esq., in the chair, it was unanimously resolved—"That the report of the directors, as now read, be received and adopted." "That Thomas Bouch, Esq., and James Fletcher, Esq., be re-elected directors." It was moved by the Chairman, seconded by Thomas F. Bennett, Esq., and carried unanimously—"That the present is a suitable time to commence a fund to be called 'The Bank's Provident Fund,' the object of which shall be to make occasional payments and to grant annuities to the clerks and other officers and servants of the bank, under the rank of deputy-manager, at periods of long sickness, or on being otherwise disabled, and extending to widows and children of deceased clerks and other officers and servants, and to near connections or relatives who may be dependent on such clerks and other officers and servants, being at the time of their death in the service of the bank. That, as a commencement of such fund, there shall be placed to the credit of 'The Bank's Provident Fund,' on the 30th June next, the sum of one thousand pounds, and at every 31st December following the sum of one hundred pounds, so long as the same shall be annually voted. That voluntary contributions to the said fund shall be received from the clerks and other officers and servants of the bank, and from any other source that the directors shall approve of. That interest at the rate of five per cent. shall be credited to the fund, on the amount in hand annually on the 31st December. That the whole control and disposal of 'The Bank's Provident Fund' shall be in the hands of the directors for the time being, joined with the manager, as a representative of the clerks and other officers and servants of the bank.'

The Chairman having left the chair, it was unanimously resolved—"That the cordial thanks of the meeting be given to the chairman for his able conduct in the chair."

William Dalglish, Manager.

REPORT.

The directors, in again meeting the proprietors, are gratified that they are able to report to them the continued and increased prosperity of the bank's business.

The directors having carried out the alterations in the deed of settlement, caused by the change of the share from ten to twenty pounds, proceeded under the powers given them at the last annual general meeting, which were confirmed at a special general meeting held 9th June last, to register the bank under the Joint Stock Banking Companies Acts 1857 and 1858. The registrar's certificate of incorporation and limited liability is dated 15th August, 1860; the first schedule of assets and liabilities as required by the act was exhibited in the bank on the 18th of August, and next on the 1st February, 1861, and such schedule will in future be exhibited half-yearly.

It is in a high degree pleasing to the directors to be enabled to state, as they confidently do, that the principle of "limited liability" adopted by the bank has so far fully justified their hopes. The general business of the bank has never been better; no branch of it has suffered; on the contrary, new and valuable accounts are added, bringing an increase of business, while some substantial and valuable proprietors who objected to hold shares under "unlimited liability" have joined the bank as shareholders; the number of proprietors is increased, and the price of the bank's shares shows that they are considerably enhanced in public estimation.

The directors thinking it proper that a new valuation should be obtained of the bank's premises and freehold property, employed two professional gentlemen of character and ability for this purpose, and have obtained from them a careful and joint report upon and valuation of the whole, which gives a result in value of 123,360*l*; but although this is most satisfactory to the directors, they do not raise the value of the property in the bank's books over 100,000*l*, at which it now stands.

The directors early in this year, looking to the extending business of the bank, determined to increase the capital to 350,000*l*. To carry out this, they have issued 2,360 shares at a premium of 5*l* per share; this small issue, while it adds 35,400*l* to the working capital, gives an increase in the current year to the reserved surplus fund of 11,800*l*, and thus the paid capital and surplus fund are brought up to half a million of pounds sterling. KENNETH DOWIE, Chairman.

LIVERPOOL UNION BANK.

REPORT of the directors to the shareholders, at their twenty-sixth annual meeting, held on Wednesday, the 6th February, 1861:—

The directors have much pleasure in laying before the proprietors the results of the operations of the bank during the past year, feeling assured that they will meet with their cordial approval.

By the second resolution at the last general annual meeting, it was left optional with the directors to continue the dividend of six per cent. per annum only, till they should have accumulated a reserve surplus fund of 150,000*l*, with authority, however, to add to such dividend by bonus, or otherwise, if it seemed expedient for them to do so.

On mature consideration the directors deemed it advisable to raise the dividend to seven per cent., as the profits of the year enabled them, after providing amply for all bad and doubtful debts, to place a large sum to the credit of the reserved surplus fund, whilst the prospects of the bank are such as to warrant the conviction that this dividend can be maintained without interfering with their policy of progressively accumulating the reserved surplus fund until it is raised to 150,000*l*.

The paid-up capital of the bank is 450,000*l* and the number of proprietors 170.

	£	s	d
On Dec. 31, 1859, the reserved surplus fund was	42,265	15	6
To which add net profits for the year 1860, after providing for all bad and doubtful debts	54,165	4	7
	96,431	0	1
Deduct dividend of three per cent. £13,500 0 0			
— Dividend of four per cent. 18,000 0 0

Leaves the present reserved surplus fund	63,219	10	10

The directors retiring are Joseph Robinson, Esq., and George Glen, Esq., whose places will have to be supplied by the shareholders.

The directors beg to express their reliance upon the continued co-operation of the shareholders in the furtherance of the interests of the bank. J. ASPINALL TURNER, Chairman.

LINCOLN AND LINDSEY BANKING COMPANY.

TO THE EDITOR OF THE ECONOMIST.

SIR,—The meetings of this company are *annual*, and there is no change to report in its affairs since the last statement in your paper, with the exception of 1,600*l* addition of interest to the guarantee fund, which is now 38,600*l*, invested in Bank stock. Besides this, there are unincumbered bank houses at Lincoln, Louth, Gainsborough, Horncastle, and Sleaford.—Yours, faithfully, W. T. PAGE, Manager.

Lincoln, Oct. 19, 1861.

NATIONAL PROVINCIAL BANK OF ENGLAND.

ON Thursday, May 9, the twenty-eighth annual general meeting of shareholders was held at the head office, Bishopsgate street, when, upon the proposition of the Right Hon. Lord Ernest Bruce, M.P., seconded by Mr Henry Paull, M.P., Mr Laurie occupied the chair.

The notice convening the meeting having been read, the Chairman said he did not think he should have any difficulty in obtaining the proprietors' approval of the report which he was about to read. Never was the National Provincial Bank of England in a greater state of prosperity than at the present time, nor never did it enjoy—and he thought he could say, without boast, never did it deserve—a greater amount of confidence and support on the part of its customers and the public at large. It would be in the remembrance of proprietors, for it was a fact far too agreeable to be erased from their recollection, that at their last annual meeting the board were able, out of the undivided profits, to add 20 per cent. upon the paid-up capital. Since then the affairs of the bank had been progressing most satisfactorily and successfully, and upon the present occasion the board were able to come to the proprietors with profits amounting upon the whole of the paid-up capital to 20 per cent., out of which they would be enabled to pay the usual amount of dividend of 8 per cent., and also a bonus of 10 per cent. He was sure such a position could not but be satisfactory to all who were in any way connected with that bank. As to the future, it did not become him to be a prophet; their income must of course depend upon many circumstances—upon foreign and domestic politics, and also upon the seasons of the year; but he could confidently express his belief, and also that of his colleagues, that the National Provincial Bank of England was as firmly established as England itself, of which it was a permanent and beneficial institution. Although it might appear, taking one year, that their affairs were stationary, yet it would be found, taking many years together, that their affairs were going on steadily, and substantially progressing. It would be recollected at their last annual meeting one of the proprietors, after passing a well-merited eulogium upon his honourable friend at his right—Mr Robertson, their general manager—expressed a wish that some substantial mark of their appreciation of his valuable services might be conferred upon him. That opinion was received with general approbation on the part of the proprietors, when a pledge was given from the chair that the subject should have the due consideration of the board. He felt assured that he need not enlarge for one moment upon the valuable services of their general manager, who had been connected with the bank for twenty-seven years. Mr Robertson came to them, not then unknown in the banking world of Scotland—that classical land, if he might so call it, of joint stock banking: twenty-seven years was no small period in the life of a man—indeed, it included, he believed, with the exception of a few months, the whole term of the existence of this institution. The National Provincial Bank of England was not then, as it is now, a great institution, covering the whole kingdom with its branches; and, therefore, Mr Robertson had much important work to perform. In the first place, he had to organise an efficient staff of officials; and what was a still more difficult task, he had to get rid of a defective system which had been highly detrimental to their interests, and which, indeed, might have become fatal even to the existence of the institution. It might be said of their general manager with reference to this institution what had been once said of a great architect, whose epitaph was placed in a splendid edifice he had himself erected—"If you want a monument for his fame, look around you." The existence, the position, and the prosperity of the National Provincial Bank of England was the greatest possible proof which could be desired of the great merits and achievements of their general manager. The recommendation which the board were prepared to submit, with reference to the acknowledgement which they asked proprietors to bestow upon Mr Robertson, was, he knew, totally inadequate to the value of the services rendered; but he was sure Mr Robertson would value that testimony, not so much for its amount, but as conveying the approbation of those whose good opinion he so much valued. This institution was much indebted to Mr Robertson for the organisation of the general staff, which was a body of gentlemen of whom they might well be proud; for industry, for zeal, and for honesty, they stood unexceptionable. Sometimes looking over their correspondence he had

been quite struck, not only with the neatness and precision with which they expressed their opinions, but even with the elegance with which their sentences were formed. The best possible spirit reigned amongst them, and all their affairs were conducted with the greatest possible harmony, the only contention, he believed, being to see who could best discharge his duty, and best promote the interest of the institution. Considering the great success of the present year, the board had presented them with a bonus of 10 per cent. upon their incomes. Since last year they had had to mourn the death of one of their colleagues—Major Moore. He brought to bear upon the board a long knowledge of mankind, and considerable shrewdness in business, and there was but one feeling with the board, of regret at his loss. With regard to the vacancy thus occasioned, a candidate had presented himself in the person of Mr George Hanbury, who was a gentleman of well-known commercial family. He then read the following report:—

In the discharge of their annual duty, the directors have now the pleasure to present their twenty-eight report to the proprietors, embodying the results of the operations of the company for the year 1860.

Since last meeting, the directors, in consequence of the failure of the private bank of Messrs Ledgard and Co., of Poole and Ringwood, have opened a branch at the latter place, under the management of Mr Chapple, who conducted Messrs Ledgard's business at Ringwood for a long period previous to their stoppage. The directors are happy to state that the branch thus opened at Ringwood has met with the general support of the customers of Messrs Ledgard's bank. The event just referred to has led us also to a considerable accession of business at the company's branch at Poole.

During the past year a succession of circumstances of a political and financial character caused considerable fluctuations in the money market. In January the rate of interest was 2½ per cent., but owing to a renewal of the export of silver to the East and some internal monetary disturbance, the rate gradually advanced, until in April it reached 5 per cent. A reaction, however, shortly afterwards occurred, and in May the rate stood at 4 per cent., at which point it remained until September, when a foreign demand for gold, and the certainty of a deficient harvest, once more enhanced the value of money. In November the rate stood at 6 per cent., but a reduction to 5 per cent. again took place before the close of the year.

Notwithstanding the checks given to commerce by the uncertainty as to the future course of the money market, the war in the South of Italy and in China, and the social disruption in America, the year 1860, although not without reverses in some branches of trade, may be characterised as one of considerable commercial prosperity. Owing to the activity in trade, and the comparatively high rates of interest just adverted to, the directors are happy to state that the business of the company for the past year was both large and profitable, of which the statement of accounts that they have now the pleasure to submit to the meeting will, they hope, be considered as affording gratifying evidence.

		£	s	d
1860—Jan. 17.	Rest or undivided profits at Dec. 31, 1859, as exhibited at the annual meeting in May, 1860	265,015	3	7
	Less bonus declared and paid in cash in 1860, out of this amount £42,000 0 0			
	Ditto added to share capital 120,000 0 0	162,000	0	0
	Reserve fund set apart in Government securities	103,015	3	7
Dec. 31.	Net profits of 1860, after making allowance for bad and doubtful debts, and paying a bonus of 10 per cent. to officers	141,800	0	0
	Making	244,815	3	7
	Deduct dividend on company's stock for June, 1860 £24,000 0 0			
	Ditto December, 1860, paid January, 1861 28,800 0 0	52,800	0	0
	Leaving	192,015	3	7

Out of the profits of last year the directors propose to declare, in addition to the half-yearly dividend paid to the proprietors above stated, a bonus of 10 per cent., making the division of profit in 1860 in all 18 per cent. upon the whole of the paid-up capital of the company, free of income tax.

After deduction of the bonus and the two half-yearly dividends, there will remain the sum of 17,000*l* to be added to the reserve fund, which will then stand at 120,015*l* 3s 7d.

With a view to a more equal distribution of the profits of the bank half-yearly, it is the intention of the directors to pay a bonus in future in January, along with the half-yearly dividend, when the state of the bank's affairs justifies them in doing so.

Appreciating the zeal and intelligence of the officers of the company, the directors have awarded them a bonus of 10 per cent. upon their salaries for last year. And in accordance with the wishes expressed at the last annual general meeting of the proprietors, and in consideration of the very prosperous condition of the company's affairs, the directors have, by a unanimous resolution, presented Mr Daniel Robertson, the general manager, with the sum of 2,500*l*, as a special acknowledgment of his long and valuable services.

NORTH OF SCOTLAND BANKING COMPANY.

REPORT by the directors to the shareholders, at the twenty-fifth annual general meeting, held in the banking house, on Friday, the 1st November, 1861; agreed to at a meeting of the Board, held on 11th October, 1861:—

The time has again arrived when the directors have to fulfil the duty of making their annual report to the shareholders.

The free business profits of the year ending 30th September last, including a balance of 647*l* 12s 4d brought from the previous year, amount to 35,492*l* 15s 10d, after making ample provision for all bad and doubtful debts incurred during the year, former bad debts having been all duly provided for.

These profits the directors have resolved to allocate in the following manner—namely, 20,000*l* in payment of a dividend of ten per cent., half of which was paid in May last, the remaining half to be paid on 1st November ensuing; a bonus of three per cent., equal to 6,000*l*, to be paid along with the latter half of the dividend, making a return for the year on the capital of the company of thirteen per cent., free of income tax; to place 7,063*l* 1s to the reserved fund; 1,250*l* to the banking houses' account; and 500*l* to account cost of bank notes. After these appropriations, a balance of 679*l* 14s 10d will remain to be carried to next year's account.

The interest of the reserved fund for last year was 2,936 19s, which will be added to the fund, along with the allocation from the profits, and the reserved fund will thus be increased from 80,000*l* to 90,000*l*. There is very little change on the contingent account.

Last year the cost of banking houses was reduced to 4,000*l*, but 250*l* were afterwards added, being the balance of price of the Montrose property; so this account, by the appropriation of 1,250*l* from the profits, will now stand at 3,000*l*. To this will have to be added the price of the new buildings at Keith, which are finished, but the accounts are not all settled.

As mentioned last year, the whole capital of the bank, as well as the reserved fund, is invested in Government and Bank of England stocks.

Annexed is a statement of the assets and liabilities, and of the appropriation of the profits:—

Liabilities.	£	s	d
Paid capital	200,000	0	0
Reserved fund—Invested, per contra £80,000 0 0			
Dividends accrued 2,936 19 0	82,936	19	0
Notes in circulation	191,823	0	0
Lodged with the bank on accounts current and deposit receipts with interest added	1,479,905	4	11
	1,954,665	3	11

	£	s	d
Surplus as above	35,492	15	10
	35,492	15	10

NORTH AND SOUTH WALES BANK.

REPORT by the directors to the proprietors, at their twenty-fifth annual meeting, held at the Clarendon Rooms, Liverpool, 16th August, 1861:—

"In submitting to the proprietors the twenty-fifth annual report, the directors have pleasure in stating that, during the financial year ended 30th June last, the business of the bank, both in Liverpool and at the branches, has continued to increase. There has been an active demand for capital throughout the year, and the bank has consequently been enabled fully to employ its funds at the high average rate of interest which has prevailed. These circumstances, coupled with the absence of losses of any moment, have contributed, with other causes, to produce the largest amount of profit ever realised by the bank in any one year.

	£	s	d
The profits of the bank for the year ended 30th June last, after deducting interest due to depositors, rebate of interest on bills, salaries, and all other charges and expenses, and making provision for losses, amounted to	37,679	9	10
Deduct dividend at 8 per cent. per annum, on shares held by proprietors, including those held by the bank, viz.:—			
Half-year ended Dec. 31, 1860 £6,463 10 0			
— June 30, 1861 6,463 10 0			
Income tax paid by bank 538 12 6	13,465	12	6
Surplus profits of the year	24,213	17	4
This amount, in accordance with the report of last year, the directors have passed to the credit of "restoration of capital fund," the amount of which, as per last report, was	17,901	13	7
The restoration fund, therefore, will now amount to	42,115	10	11
The reserve fund remains at the amount stated in last report, viz.:	32,317	10	0

It will appear, from the statement given above, that the rate of profit for the twelve months has been a little over 23 per cent., of which 8 per cent. has been divided amongst the proprietors, and 15 per cent. carried to the restoration of capital fund.

The sum required to restore the shares from 7*l* 10s to 10*l* each, is 53,862 10s, and it will be seen that the restoration of capital fund is now short of this amount only 11,746*l* 19s 1d.

There would not appear to be any reasonable doubt, therefore, that the directors will be able to announce at the next annual

meeting, that they are in a position to restore the shares of the bank to their originial amount of 10*l* each, without touching the reserve fund, which they are especially desirous to leave intact, considering the moderate amount to which it is at present restricted by the deed of settlement.

The accounts and bills at the head office and branches have, as usual, been carefully examined by the directors, and the securities taken at their present values. The branches have this year again been visited by a deputation of directors, accompanied by the general manager, and the accounts, bills, and securities of each branch investigated on the spot; and the directors have to report that they found matters at the branches highly satisfactory. They have to report in like favourable terms of the accounts, &c., at head office."

The general manager having read the preceding report, the Chairman moved that it be adopted, printed, and circulated amongst the proprietors, which was seconded by Mr Robert Roberts, tea merchant, and carried unanimously.

The motions after-mentioned were then made and carried unanimously:—

Moved by Mr William Whaley, and seconded by Mr John H. Greene—That Mr Stephen Watson and Mr Edward Thompson be re-elected directors of this bank.

Moved by Mr James Cooban, and seconded by Mr George Haworth—That the sum of 1,050*l* be placed at the disposal of the directors, as a remuneration for their services during the ensuing year.

Moved by Mr Richard Bryans, and seconded by Mr R. W. Prichard—That the thanks of the meeting be tendered to Mr Rae, the general manager, Mr Beck, and the other officers of the bank at Liverpool, and at the branches, for their valuable services and attention to the affairs of the bank.

Moved by Mr Richard Nicholson, and seconded by Mr Charles Kingcome—That the thanks of this meeting be given to the chairman and board of directors for their zealous attention to the interests of the bank. JOHN RAVENSCROFT, Chairman.

The chairman having vacated the chair, on the motion of Mr William Jones, a vote of thanks to the chairman was carried unanimously.—Extracted from the minutes,

GEORGE RAE, General Manager.

ORIENTAL BANK CORPORATION.

TENTH annual report of the court of directors to the proprietors:—

The general statement of affairs, and balance sheet for the year 1860, now submitted for the information of the proprietors, show the net profit of the corporation for that period to amount to 214,757*l* 13s 8d, after defraying current expenses and providing for all bad and doubtful debts.

The dividend and bonus for the half-year ending 30th June, 1860, already paid (dividend 5 per cent. and bonus 2 per cent.), have absorbed 88,200*l* of this amount, leaving 126,557*l* 13s 8d available for present distribution. This sum it is now proposed to appropriate to the payment of a dividend of 5 per cent for the half-year ending 31st December, 1860, and a bonus of 4 per cent., which together will require 113,400*l*, and leave a balance of 13,157*l* 13s 8d to be carried forward to the credit of the next year's account.

The present dividend and bonus, equal together to 9 per cent., or 2*l* 5s per share, will be payable here, free of income tax, on and after the 1st May, making, with the previous payment, a distribution of profit for the year 1860 equal to 16 per cent. on the capital of the corporation.—(Signed) H. G. GORDON, Chairman.

OTTOMAN BANK.

THE following report was presented to the extraordinary meeting of shareholders held on Wednesday, the 4th of September, 1861:—

The directors beg to submit to the shareholders the accounts of the bank for the half-year ending the 30th June, 1861, duly examined and certified to by the auditors. After making the necessary reductions for expenses of management, and provision for bad and doubtful debts, these accounts show a net profit for the half-year of 20,104 5s 8d, to which has to be added the sum of 5,836*l* 2s 3d carried forward from the 31st December, 1860, making 25,940*l* 7s 11d. From this sum, however, there has to be deducted the 250*l* subscribed to the Galatz Inundation Fund, as sanctioned by the shareholders at their meeting last March, leaving a sum of 25,690*l* 7s 11d to be dealt with on the present occasion. The shareholders will have been prepared to learn that the general business of the bank has, during the past half-year, been of a restricted character. In the Danubian Principalities, however, it has considerably extended itself, under the able management of Mr A. L. Powell, the local director, with good profit and promise for the future. The negotiations in which the directors have been engaged for the settlement of the bank's claim upon the Turkish Government have not hitherto resulted in any definite arrangement, but the financial reforms which have attended the accession of the Sultan, lead to the hope that no considerable time can elapse without an adjustment in accordance with the distinct pledges of the Government. In the place of the late Mr F. De P. Falconnet, the directors have appointed as local director at Constantinople, Mr Gilbertson, the secretary of the bank, in whose ability they have the utmost confidence. They have also recommended to the contractors of the loan of 1858, his appointment as one of the Syndics of that loan.

The directors recommend that a sum of 3,000*l* be added to the reserve fund, bringing it up to 71,196*l* 12s 9d; that a dividend shall be paid at the rate of 8 per cent. per annum, free of income tax, as usual, and that the balance then remaining of 1,894*l* 12s be carried forward to next account.

LIABILITIES AND ASSETS—June 30, 1861.

PROVINCIAL BANK OF IRELAND.

THE thirty-sixth annual general meeting of the proprietors of this bank was held at the offices in Old Broad street, on 16th May, 1861: Sir Minto Farquhar, M.P., presided.

The first business was the re-election of three directors, retiring by rotation, all of whom were unanimously reappointed; a fourth director, who would have gone out by rotation, had died since the last meeting, viz., Mr Henry Alexander, and, in mentioning the fact, the Chairman paid a high compliment to the efficiency and worth of his deceased colleague.

Mr Henry R. Alexander, who was the only candidate, was then proposed, seconded, and unanimously elected to the vacant office.

Mr Hewat, the secretary, read the following report:—

The directors report that since the last annual meeting two new branches have been established—one at Clogheen, in the southern division of the county of Tipperary, which was opened on Nov. 1, 1860; and the other at Newcastle, in the county of Limerick, opened on March 25 in the present year, making the total number of the bank's branches at this date forty-four. It is satisfactory to the directors to be enabled to state that the affairs of the bank continue to prosper, and that the business of the past year has been attended with peculiarly favourable results. The ordinary rate of profit has been more than maintained, and no loss of any importance has been incurred. The year was marked by unusual fluctuations in the value of money and by several heavy failures in some important branches of trade in England, but the general business of the country has been active, and has apparently enjoyed a fair share of prosperity. The harvest of 1860 was, however, a deficient one, and being the second unfavourable season in succession, it has no doubt, in some degree, tended to check the growing prosperity of the agricultural

classes in Ireland. The prospects of the present year are now more favourable, and the directors sincerely hope that these may be realised. The following statement, to which the attention of the meeting is requested, exhibits the result of the bank's operations for the year ending on 30th March last:—The accounts ubmitted to the yearly general meeting in May, 1860, showed the amount of rest or undivided profits at 31st March, 1860, to be 240,304*l* 12s 8d; out of which there has been paid to the proprietors the amount of two ordinary and extraordinary dividends, as follows:—At Midsummer, 1860, ordinary dividend of 4 per cent., 21,600*l*; extraordinary dividend of 6 per cent., 32,400*l*, together 54,000*l*. At Christmas, 1860, ordinary dividend of 4 per cent., 21,600*l*; extraordinary dividend of 6 per cent., 32,400*l*—54,000*l*; together, 108,000*l*; leaving a balance of 132,304*l* 12s 8d, to which has since been added the amount of net profits for the year ending on the 30th, being the last Saturday of March, 1861, after deducting property tax and providing for all bad and doubtful debts, 119,388*l* 15s 9d; making the rest or amount of undivided profits at 30th March, 1861, 251,693*l* 8s 5d. It affords the directors much pleasure to present so satisfactory a statement of the profits of the past year, which enables them to make an addition to the rest, and to continue the same rate of dividend as in the last four years; and they have now, in conclusion, to intimate that it is their intention to pay in July next an extraordinary dividend of 30s on each 100*l* share, and 12s on each 10*l* share of the capital stock of the bank, in addition to the ordinary dividend of 4*l* per cent,, making the amount to be then paid 2*l* 10s on each 100*l* share, and 1*l* on each 10*l* share, for the half-year ending at Midsummer next; and they propose also, as heretofore, to pay the property tax for the proprietors.

The Chairman—I think, gentlemen, you will agree with me that the report, though short, is pithy and satisfactory, and as it really contains all that the directors have to say, there is no reason why I should detain you with any remarks of my own in moving its adoption. It is very gratifying to the directors to be able to assure the proprietors that the bank continues to enjoy the confidence of the public in Ireland, and that it never at any time was in a more prosperous condition, or was ever held in higher estimation. It is very pleasing to us to receive, as we do, the most conclusive assurances on this point from the customers and connections of the bank at all its branches. The Provincial Bank of Ireland has now been established six-and-thirty years, during which period it has continued to progress steadily and with certainty, until it has arrived at the sound and good position it now holds. It is exceedingly satisfactory to the directors to state that this is the fifth occasion on which they have felt justified in declaring a dividend at the rate of 20 per cent. per annum, which dividend we pay free of income tax, and I submit that this fact alone is sufficient to prove to the proprietors what the actual state of the bank is. With regard to Ireland as an agricultural country, it has no doubt felt the evil effects of two unfavourable harvests following the one upon the other; but, on the other hand, the high prices which the Irish farmer has obtained for his butter, his cattle, and his corn, must have been some compensation, and enabled him to recoup a considerable portion of the loss arising from the deficiency in the grain crops. I am also glad to believe that the condition of the labouring population has not suffered in consequence of the defective harvest or the high prices, but that throughout the year they have found ample employment. With regard to the trade and commerce of Ireland, it may be said generally to have been in a sound position in the year 1860-61, and one pleasing result of that position to us is, that, as is stated in the report, the bank has suffered no loss of importance during the year. As regards the North of Ireland, I am afraid we must expect that the linen trade will suffer to some extent from the lamentable state of affairs in America; but I will not be a prophet of evil, I would rather hope for the best, and trust that that great country on the other side of the Atlantic, a country so nearly allied to us, and in whose prosperity we have so great an interest, will yet avoid the horrors of a fratricidal war, and that the indirect consequences of such a war to us may be averted. In conclusion, I would beg leave to remind you that we owe much of our prosperity to the ability, the assiduous zeal, and the devoted services of the officers of the establishment, both in England and Ireland; and I may mention especially the name of Mr Murray, our chief officer in Ireland, and Mr Hewat, the secretary in England. It is only just, however, that in acknowledging the services of these gentlemen, I should give expression to the feeling of approbation which is felt by the board at the efforts of all the officers, and the great appreciation in which we hold services that have contributed largely to the high position the bank occupies, and to the safe and sound manner in which its business has been conducted. I have now to move that the report be adopted, printed, and circulated.

SHEFFIELD AND HALLAMSHIRE BANK.

REPORT of the directors:—For some time a considerable depression of trade has existed; this has diminished the returns of the bank for the last half-year, although the aggregate amount of business done for the whole year is about the same as that of the one preceding. After payment of all the expenses of the bank, and the income tax, the profit is 20,181*l* 13s 2d. This exceeds the profit of the last year by 1,208*l* 12s 2d. The amount of bad and doubtful debts is 1,500*l*. The sum of 193*l* 4s 7d has been received from debts previously written off as bad. For the half-year ending 31st December last, the directors paid a dividend after the rate of 10 per cent. per annum. They have declared a dividend, after the same rate, for the half-year ending 30th June last. This may be received on or after the 30th July. Thirty-five shares have been issued to customers. These have produced 87*5l* additional capital, and the sum of 250*l* for premiums. The latter sum has been added to the surplus fund. The paid-up capital now is 179,225*l*. The balance of profit remaining, after payment of the dividends, and deduction for bad and doubtful debts, is 790*l* 8s 2d. The amount of the surplus fund last year was 43,396*l* 10s 2d; balance of profit as before stated, 790*l* 8s 2d; premium received on shares issued, 250*l*; amount received from debts previously written off as bad, 193*l* 4s 7d; present amount of surplus fund, 44,630*l* 2s 11d.

It was unanimously resolved,—

That the report and statement of the general balance, and profit and loss, which have been read, be approved by this meeting; and that the same be printed, and a copy thereof sent to each shareholder.

That the thanks of this meeting be given to the directors for their valuable services; and that the sum of 500*l* (free of income tax) be presented to them from the funds of the company.

That the thanks of the meeting be given to the manager, for the able and courteous manner in which he has discharged the duties of his office.

That the thanks of this meeting be given to the chairman.

SHEFFIELD AND ROTHERHAM BANK.

REPORT of the directors to the annual general meeting of proprietors, held at the bank, in Sheffield, February 6th, 1861:—

The directors have again the pleasure of meeting the shareholders, and of reporting to them the results of the past year's transactions. The profit and loss account shows a net gain of 27,008*l* 0s 8d, after payment of all the usual expenses of management and the income tax. Out of this sum, your directors have written off for losses 2,544*l* 13s 6d, and they now declare a dividend of twelve and a half per cent. on the company's paid-up capital. The balance remaining of 4,406*l* 19s 8d has been passed to the credit of the reserve fund. For many years the bank has held a number of shares in the company's stock, a portion of which your directors have recently sold, and the profit thereon, amounting to 1,012*l* 10s, has also been credited to the reserved fund. This fund, after these additions, and after payment of 700*l* to the directors, in accordance with a resolution of the last annual meeting, amounts to 63,472*l* 0s 9d. It is with much regret that your directors have to report that one of the clerks of the bank, of whose honesty and integrity not the slightest doubts were entertained, has succeeded in appropriating to his own private purposes a considerable sum of money from the funds of the bank, but a security is held from the Guarantee Society, and a claim has been made upon them for the amount. Mr John Sorby and Mr Thomas Jessop are the retiring directors, and they offer themselves for re-election. It is with great regret that the directors have to announce that in consequence of continued ill health, Mr Brown has expressed a wish to be relieved from the onerous duties that have hitherto devolved upon him as manager. The directors desire to express their very high sense of the services rendered by Mr Brown to the bank during a period of upwards of 27 years, and of the uniform good feeling that has existed between the directors and himself,

GENERAL BALANCE SHEET—December 31, 1860.

SHROPSHIRE BANKING COMPANY.

THE twenty-fifth annual report, 16th July, 1861 :—

The directors of the Shropshire Banking Company have much pleasure in meeting the proprietors and presenting their annual report. The accounts, which have been duly audited by the auditor, Mr Banks, show the net profits for the year to be 5,267*l* 15s 5d, to which has to be added 129*l* 2s 8d, the balance brought forward from last year's statement, making a total of 5,396*l* 18s 1d. Under these circumstances the directors have now the gratification of recommending a dividend of 5s per share, a sum which they consider the improved state of the bank fully justifies. This will absorb 3,750*l*; and after adding 1,395*l* to the guarantee fund, which will then amount to 5,000*l*, leaves a balance of 251*l* 18s 1d to be carried to next year's account. Should this recommendation be adopted, the account will then stand as follows:—Net profits for the year ending June, 1861, 5,267*l* 15s 5d; balance from last year, 129*l* 2s 8d; total, 5,396*l* 18s 1d. Dividend, 5s per share, 3,750*l*; to be carried to guarantee fund, 1,395*l*; balance to next year's account, 251*l* 18s 1d; total, 5,396*l* 18s 1d. The guarantee fund will be as under:—Amount from last year's statement invested in the 3 per cent. consols, 3,500*l*; interest at 3 per cent., 105*l*; to be added from this year's profits, 1,395*l*; total, 5,000*l*.

SOUTH AUSTRALIAN BANKING COMPANY.

The twentieth report of the court of directors, presented to the annual general meeting, June 18th, 1861 :—

THE court of directors have the pleasure to report that the operations of the bank during the past year have been of a satisfactory character. These have been largely aided by the trade of South Australia having continued in a sound condition, and the colony showing in all its material resources a decided progress. The mineral discoveries and the increased quantity of good land recently found available for stock, cannot fail to give an impetus which will attract population, and enlarge commercial relations with England and the adjacent settlements. The company's affairs have been exempted from any casualties which would diminish the returns of profit, and the court have the satisfaction of showing the following as the result of the years's business :—

	£	s	d
Balance as per last statement	41,365	3	4
Annual profits from all offices	47,230	3	9
	89,095	7	1
Dividend, July, 1860	£19,742	1	8
Ditto, January, 1861	19,794	3	4
Income tax	1,211	19	2
	40,748	4	2
	48,347	2	11

After deducting 4,834*l* to be added to the reserve fund, according to the regulations of the company, the net profit of the year will amount to 43,513*l* 2s 11d. The court, therefore, recommend a dividend should be declared of 10 per cent. per annum, free of income tax. The affairs of the bank have been subjected to the closest scrutiny, and every necessary reduction made in the valuation of assets. The condition of the company is shown in the balance sheets, and the accounts, as usual, have undergone examination of the auditors.

LIABILITIES.	£	s	d
Circulation	99,225	0	0
Deposits and current accounts	292,954	14	2
Debts due to colonial banks and other liabilities	27,598	9	0
Bills payable	107,696	10	0
Capital paid up	400,000	0	0
Reserved fund	81,444	10	9
Profit and loss	43,513	2	11
	1,052,342	6	10

ASSETS.	£	s	d
Coin and bullion	152,059	5	2
Bills receivable and securities	731,998	12	3
Debts due from colonial banks and other assets	68,704	0	5
Bank premises and furniture	18,673	17	3
Investments for reserved fund	80,906	11	9
	1,052,342	6	10

Two new branches have been added to the company's establishment. That at Robe embraces a district rapidly being stocked with sheep and cattle, and that at Wallaroo will supply to the large mining interests now developing themselves facilities needed for monetary transactions.

The court will endeavour to preserve the affairs of the bank in a condition to advance the improvements now manifest in South Australia, and it is their conviction that a large increase of business will result, alike conducive to the substantial prosperity of the bank and that of the colony.—By order of the court,

EDWARD DIVETT, Chairman.
WILLIAM PURDY, Manager.

54 Old Broad street, London, 14th June, 1861.

UNION BANK OF AUSTRALIA.

THE half-yearly meeting of the proprietors in this bank was held at the bank offices, Old Broad street, on July 15th: Mr J. J. Cummins in the chair.

The proceedings commenced by the secretary reading the advertisement convening the meeting, and the following report of the directors and statement of accounts :—

Although considerable commercial depression still continues in the Australian colonies, the directors have confidence in stating that there are evidences of improvement. Trade seems to be restricted within more legitimate bounds, the exorbitant degree of speculative competition which had existed being evidently checked.

The produce of the goldfields nearly equals that of the year 1859, and the other general and staple interests of the Australian colonies appear to be satisfactory.

Commercial matters in New Zealand have not been very seriously disturbed by the war with a portion of the natives in the northern island. It is confidently hoped that these unfortunate outbreaks may be effectually quelled. The restoration of peace will probably be followed by increased activity in the formation of settlements and the extension of trade and civilisation.

Not much relief has as yet been obtained by the reduction in the allowance of interest, but it is hoped that the evil of the course pursued will lead to its own modification, and that arrangements may be made more in accordance with those adopted by the leading joint stock banks in this country, which have proved satisfactory.

Robert Carter, Esq., and Thomas Young, Esq., are the directors who retire on this occasion, in accordance with the provisions of the deed, and now offer themselves for re-election.

It gives the directors pleasure to bear testimony to the zeal, energy, and ability manifested by the inspector and general manager, in regard to the safe and prudent conduct of the bank's business, and to his firm and impartial adherence to their instructions in making such changes as they believe will prove of great benefit to the bank.

The subjoined statement of accounts presents an amount of profit for the past year of 127,426*l* 3s 7d to be added to the former balance of 3,540*l* 2s 4d; from which, deducting income tax and dividend to Christmas last, there remains 64,425*l* 12s, as the amount of undivided profit. The directors have, therefore, determined to apply the sum of 60,000*l* as a dividend of 6 per cent. for the half-year on the capital of the bank, payable in London, free of income tax, on the 30th July, and in the colonies, with the addition of income tax, as soon as the inspector and general manager shall fix after receipt of advice.

STATEMENT OF LIABILITIES AND ASSETS—At the Branches, December 31, 1860, and at the London office on June 30, 1861.

UNION BANK OF LONDON.

THE annual general meeting of proprietors was held on the 10th of July, at the offices, Princes street, Bank: Mr P. Northall Laurie in the chair.

After the usual preliminary proceedings, the following (being the 26th) report was read by the secretary, Mr H. Newmarch :—

In presenting the 26th report on the affairs of the bank, the directors have the pleasure of stating that the net profits of the bank for the six months ending 30th June last, after payment of all charges (including the sum of 107,511*l* 1s 4d for interest paid and due to customers on their current and deposit accounts), and making due provision for all bad and doubtful debts, amount to 95,616*l* 18s 2d, which, with the sum of 30,470*l* 18s brought forward from the 31st of December last, leaves for appropriation 126,087*l* 16s 2d. The directors now declare a dividend of 12s per share, clear of income tax, for the six months ending 30th of June last, amounting to the sum of 36,000*l*, which will leave a balance of 90,087*l* 16s 2d to be carried forward. In the early part of the year, John Barnes, Esq., tendered his resignation as a director, to the regret of his colleagues, with whom he had been so long associated, and in conformity with the provisions of the deed of settlement, the directors elected William Scholefield, Esq., M.P., a duly qualified proprietor, to fill the vacancy. The following directors retire by rotation, viz., P. N. Laurie, Esq., James Farquhar, Esq., and John Chapman, Esq., who, being eligible, offer themselves, and are recommended by the court for re-election.

The report was unanimously adopted.

UNITY JOINT STOCK MUTUAL BANKING ASSOCIATION.

THE report of the bank for the past half-year, which the directors now submit to the shareholders, shows that its business during that period has steadily progressed.

After the payment of current expenses of the chief office and branches, and making provision for bad debts, the available surplus, including the balance of the preceding half-year, is 4,066*l* 2s 4d.

Out of this amount the directors propose paying a dividend of twelve shillings and sixpence per share, free of income tax, the balance to be carried over to the next half-year.

The retiring director is Benjamin Bower, Esq., who, being qualified, offers himself for re-election.

J. J. MECHI, Chairman.

Chief offices, 10 Cannon street, City, London, July 23, 1861.

	7,059	18	10

We, the undersigned, have examined the foregoing balance sheet, and compared the items it comprises with the several books and vouchers relating thereto, and have found the same to be correct.—(Signed) WM. GOULD, WM. HOPWOOD, } Auditors.

AT the annual general meeting of the shareholders of the Unity Joint Stock Bank, held at the London Tavern, Bishopsgate street, on Friday, the 26th July, 1861, at twelve o'clock, Mr Alderman Mechi in the chair, the Secretary having read the notice convening the meeting, with the report and balance sheet, the Chairman moved the adoption of the report, which, after some discussion, was carried unanimously. It was then resolved unanimously that Benjamin Bower, Esq., the retiring director, be re-elected. It was also further resolved unanimously that William Gould and William Hopwood, Esqrs., be re-elected auditors. Thanks were then unanimously voted to the directors, managers, and auditors.

(Signed) J. J. MECHI, Chairman.

UNION BANK OF SCOTLAND.

THIRTY-FIRST annual report:—

It may be in the recollection of the proprietors that, at last general meeting, it was agreed to alter the annual balance of the company's books at Glasgow from 20th to 2nd April, so as to correspond with the balancing at Edinburgh and the branches. This alteration causes a diminution equal to nearly three weeks of the Glasgow profits for the past year. The directors now lay before the proprietors the balance sheets of the company's books as at 2nd ult., showing the net profits from 20th April, 1860, to that date to be 122,998*l* 17s 1d, after providing, as usual, for all ascertained bad debts, with the exception of the loss by the Messrs Blaikie, of Aberdeen, which, at the last annual meeting, was stated as likely to be from 25,000*l* to 30,000*l*. It is now, after investigation, estimated at 30,634*l* 8s 2d; towards meeting that loss, there was set aside out of last year's profits 12,018*l* 1s 6d, and it is proposed to take from those of this year 18,616*l* 6s 8d, thus providing for the whole, without calculating on any dividends from the bankrupts' estates. The directors regret exceedingly this heavy loss. The account was one of those taken over from the Aberdeen Bank (a junction which has been of such material benefit to this company); and although that account latterly caused the directors considerable uneasiness, they never had reason to anticipate that the advances to a firm of such high repute, and large business connection in the district, could have terminated so unfavourably. The directors, nevertheless, have the satisfaction to report the continued general prosperity of the bank; and although, as already stated, the profits of the Glasgow department do not embrace a full year, they are enabled to place at the disposal of the proprietors a clear profit of 104,382*l* 10s 5d, out of which they recommend that a dividend of 9 per cent. be declared, free of income tax, payable on 1st June and 2nd December next, leaving a surplus of 14,382*l* 10s 5d, which amount it is proposed to dispose of as follows, viz., 3,375*l* for income tax on the dividend, 5,000*l* to the Perth Bank amalgamation account, and 6,007*l* 10s 5d to the present year's account. The rest or undivided profit account would thus remain at 200,000*l*. Resolutions will be tabled at this meeting having for their object the fixing of the capital of the company at one million, being the amount already paid up; the conversion of the shares into stock; and other relative, although minor, alterations on the contract of copartnery.

ABSTRACT STATE OF THE AFFAIRS OF THE BANK—April 2, 1861.

DR.			£	s	d
Liabilities, consisting of—					
1. Capital paid up			1,000,000	0	0

Glasgow, 9th May, 1861.

ULSTER BANKING COMPANY.

AT the twenty-fifth annual meeting of the proprietors, held at the bank, Belfast, on Thursday, the 26th of September, 1861, James Heron, Esq., in the chair, the following report of the committee was presented:—

The committee have, in accordance with the deed of co-partnership, to furnish their report of the proceedings of the year ending 31st August last, and beg to submit the following statement:—

	£	s	d
Reserved fund, as declared in September, 1860	71,550	6	7
Net profits of the year, after writing off all bad, and making full provision for doubtful debts	£31,360 8 2		
Out of which there have been paid two half-yearly dividends, at the rate of 10 per cent. per annum, free of income tax, amounting to	18,340 10 0		
Leaving a surplus of	13,019 18 2		
To be appropriated as follows, viz.:—To credit of the building fund	1,000 0 0		
And the residue	12,019 18 2		
To be added to the reserved fund, which now stands at	83,570 4 9		

There have been considerable fluctuations in the value of money during the period embraced in the present report; the Bank of England have made no less than fourteen changes in the rate of discount. On the whole, the average rate has been high, and banking profits have been accordingly large. Considering the depression of trade, caused by the unfortunate state of affairs in America, and the unfavourable results of the harvest of 1860, there have been few commercial failures, and the trading community have shown great soundness and strength. The directors, with the approval of your committee, have, since the last general meeting, opened branches in Trim and Longford. They have also decided on opening a branch in Dublin, for which they have taken premises in College Green. The necessary alterations are about to be made, and it is expected that, in a short time, business will be commenced by this company in the metropolis of Ireland. The directors, in pursuance of the policy indicated in the last report, have, during the year, made a further considerable addition to the amount of their public convertible investments, considering it desirable to maintain a reserve of such securities in proportion to the business of the bank. Your committee have again to request that each individual shareholder will exercise his influence in furtherance of the interests of the company.

WOLVERHAMPTON AND STAFFORDSHIRE BANK.

THE directors of this bank have declared a dividend of 5s per share for the half-year, payable on the 2nd of September, free of income tax.

WORCESTER CITY AND COUNTY BANK.

The Manager of the above bank presents his compliments to the Editor of the ECONOMIST, and begs to annex some particulars of the Worcester City and County Bank:—

31st December, 1860.—Capital, 50,000*l*; dividend, 10 per cent.; reserve fund, 15,500*l*.

30th June, 1861.—Capital, 72,750*l*; dividend, 10 per cent.; reserve fund, 24,500*l*.

Worcester, 22nd October, 1861.

LONDON:—Printed and published by DAVID AIRD, of 18½ Exeter street, Strand, in the parish of St Paul's, Covent Garden, at the ECONOMIST office, 340 Strand, parish of St Mary-le-Strand, in the County of Middlesex.—Saturday, November 9, 1861.

FOR SALE,—OAK and BEECH TIMBER fit for Maritime Purposes.—Apply to Henry Bresson, Merchant, 2 rue Tuvache, à Rouen, (Seine Inférieure), France.

FOR SALE.—THE ECONOMIST, bound in 2 volumes, from No. 1, Sept. 3, 1843, to No. 55, Sept. 14, 1844.—Apply to A. B., 18 Exeter street, Strand.

TO BE LET, A BED ROOM, Furnished, for a single gentleman, in a most respectable neighbourhood. Terms moderate.—Apply at 6 Augustus square, Regent's Park, five minutes' walk from the Hampstead road, and close to Cumberland market.

A SWEDISH GENTLEMAN, conversant with German and Danish and Book-keeping, wishes a situation in a house of respectability in the Colonial Trade before returning home, with a view to represent such firm there afterwards, joining an already established house. First-rate references. Address P. R., Wm. Smith, printer, 33 Aldermanbury, City.

WANTED, BY A GENTLEMAN who has had twelve years' active experience in New York business, particularly in Banking operations, a situation of confidential trust and responsibility. The most respectable references will be given.—Address G. E., care of Messrs Nissen and Parker, Great Tower street, E.C. London.

CLERK.—A HIGHLY respectable Young Man, of unimpeachable character, will be open to a re-engagement on the 20th instant, as Bookkeeper or General Clerk. Has been for several years in the office of a public company, and has had the entire charge of the transfer and other books. References to present employers.—Address Y. Z., 50 Devonshire street, Queen's square, W.C.

TO MERCHANTS, &c.—Wanted, an engagement as Corresponding Clerk in a mercantile house, or as Secretary to a private gentleman or public company, where the advertiser's thorough knowledge of the English, French, and Spanish languages would be available.—Address Navigator, Post Office, Moorgate street.

TO WINE & SPIRIT MERCHANTS.—PARTNERSHIP.—A Gentleman, well-connected, of active business habits, is prepared to embark £5,000 in the Wine and Spirit trade, as partner in an established wholesale City house.—Address (confidentially), in the first instance, G. H., care of Messrs Davies and Co., advertising agents, 1 Finch lane, Cornhill.

TO BANKS AND PUBLIC COMPANIES.—A Gentleman who has had during the last six years charge of Branches of a Bank of issue doing a large discount and general business, wishes an appointment as Manager or Secretary. No objection to go to any place not in the Tropics. Can give references of the most unexceptional character.—Address D., care of Messrs Pearson and Son, 35 Bishopsgate street, E.

PARTNERSHIP.—A GENTLEMAN, with from £4,500 to £5,000 at command, can find an excellent investment for his money, and employment in an old-established Wine Business in the City.—Letters to be addressed to A. D., at Messrs Chilton, Burton, Leafs, and Hart, Chancery lane.

PARTNERSHIP.—A GENTLEMAN, aged 35, of nineteen years' Mercantile experience (the latter ten as principal), wishes to join a well-established firm. Speaks five languages. Can introduce about £3,000, and give the highest references.—Address M., care of Messrs Pearson and Son, 35 Bishopsgate street, E.

DOUCEUR—£300.—A Gentleman will give £300 to obtain for his Son a Clerkship in a high-class Bank, or approved Assurance Office.—Address F. G., at Messrs Davies and Co., Advertising Agents, 1 Finch lane, Cornhill.

GEORGE SMITH, Wine Merchant, 86 Great Tower street, 9 and 10 Great Tower street, and 1 St Dunstan's hill, E.C., and 17 and 18 Park road, Greenwich, S.E. Established 1785. A large and valuable stock of old bottled Ports, of various shippers and vintages, accumulated during the last forty years, including a bin fourteen years in bottle, of eight hundred and fifty dozen, bottled by the late Mr Fenwick, of the firm of Messrs Ruck, Fenwick, and Ruck, known to the trade as his celebrated "Six Vintage" Wine, dry, full of "beeswing," of immense flavour, delicacy, and bouquet. Samples forwarded on payment,

WHOLESALE HOUSES, Merchants, Shippers, &c., requiring Bookkeepers, Travellers, Clerks, Warehousemen, or other Assistants, can have the same forwarded for approval (without charge) by addressing a letter, stating their want, to Smith, Barry, and Co., 12 Bucklersbury, sole proprietors of the "Employers' Assistant," which always contains particulars of very eligible parties seeking employment of time and capital. S., B., and Co., do not in any way interfere with or make themselves responsible for the characters of applicants. Those seeking employment can obtain prospectuses with full particulars on application at 12 and 13 Bucklersbury.

UNITED KINGDOM LIFE ASSURANCE COMPANY,

8 WATERLOO PLACE, PALL MALL, S. W.

THE HON. FRANCIS SCOTT, CHAIRMAN.
CHARLES BERWICK CURTIS, ESQ., DEPUTY-CHAIRMAN.

FOURTH DIVISION OF PROFITS.

SPECIAL NOTICE.—Parties desirous of participating in the fourth division of profits to be declared on policies effected prior to the 31st December, 1861, should make immediate application. There have already been three divisions of profits, and the bonuses divided have averaged nearly 2 per cent. per annum on the sums assured, or from 30 to 100 per cent. on the premiums paid, without the risk of copartnership.

To show more clearly what these bonuses amount to, the three following cases are given as examples:—

Sum Insured.	Bonuses added.	Amount payable up to Dec., 1854.
£	£ s	£ s
5,000	1,987 10	6,987 10
1,000	397 10	1,397 10
100	39 15	139 15

Notwithstanding these large additions, the premiums are on the lowest scale compatible with security; in addition to which advantages, one-half of the premiums may, if desired, for the term of five years, remain unpaid at 5 per cent. interest, without security or deposit of the policy.

The Assets of the Company at the 31st December, 1860, amounted to £730,665 7s 10d, all of which had been invested in Government and other approved securities.

No charge for Volunteer Military Corps whilst serving in the United Kingdom.

Policy Stamps paid by the Office.

For prospectuses, &c., apply to the Resident Director, No. 8 Waterloo place, Pall Mall.

By order, E. L. BOYD, Resident Director.

SEVENTH DIVISION OF PROFITS.

IMPERIAL LIFE ASSURANCE

COMPANY, No. 1 Old Broad street, London, E.C. Instituted 1820.

Policies effected during the year 1861 will participate in the profits to be declared in the year 1866, equally with policies of the longest duration, in proportion to the amounts insured.

Prospectuses and further information may be had at the chief office, as above; at the branch office, 16 Pall Mall, S.W.; or of the agents in town and country.

SAMUEL INGALL, Actuary.

Instituted 1824.

SCOTTISH UNION FIRE AND LIFE

INSURANCE COMPANY.

London offices, 37 Cornhill; Edinburgh, and Dublin.

The books closed for the quinquennial division of profits on the 31st July last.

The bonus will be declared at the Annual General Meeting of the Company on the 4th December next.

Persons effecting life insurances now, and before the end of July next, will be entitled to five full years' profits at the division in 1866.

Mercantile and other Fire insurances on the most liberal terms and conditions.

MANAGER—Henry Thomson, Esq.
BANKERS—The London and County Bank.
SOLICITORS—Messrs Marten, Thomas, and Hollams, Mincing lane.

The Directors are prepared to accept proposals for Fire Insurance on all descriptions of property.

The Tariff for London Mercantile Business has been adjusted on the principle of classification; adopting the plan that each class of goods should be charged a premium proportionate to the risk.

The Directors, in deciding upon this tariff, have endeavoured faithfully to fulfil the wishes of the Commercial community expressed at the influential meeting held at the Mansion House on the 25th July last, and trust they will be supported by the public to enable them to carry out this system with success.

Ordinary Insurances taken at the usual rates.

A commission will be allowed to solicitors and agents introducing business.

Forms of proposal and all information can be obtained at the temporary offices of the Company, 34 Gracechurch street, E.C.

UNIVERSAL LIFE ASSURANCE

SOCIETY, No. 1 King William street, London, E.C.

Committees in Calcutta, Madras, and Bombay.
Agents throughout India.

The last Annual Reduction of Premium amounted to 45 per cent., so that a person being assured for £1,000 at the age of 30 is now paying £13 8s 7d instead of £24 8s 4d.

Invested Capital upwards of £780,000.

M. E. IMPEY, Secretary.

Empowered by Act of Parliament. 3 Wm. IV.

THE ECONOMIC LIFE

ASSURANCE SOCIETY, 6 New Bridge street, Blackfriars, London.

Established 1823.

DIRECTORS.

Robert Biddulph, Esq., Chairman.
William Routh, Esq., Deputy Chairman.

Alfred K. Barber, Esq.	Rear-Admiral Robert Gordon.
Henry Barnett, Esq.

Pascoe Charles Glyn, Esq.	Augustus Keppel Stephenson, Esq.
Sir Alex. Duff Gordon, Bart.	

ACTUARY.—James John Downes, Esq., F.R.A.S.
SECRETARY.—Alexander Macdonald, Esq.

The Society offers the following Advantages:—
The lowest rates of Premium on the Mutual System.
The whole of the Profits divided every Fifth Year.

	£
Reversionary Bonuses have been added to Policies to the extent of	1,365,000
The last Bonus, declared in 1859, which averaged £65 per cent. on the Premiums paid, amounted to	475,000

8,471 Policies are now in force, yielding an annual income of £189,000, assuring the sum of £6,697,572, which, with £610,827 Bonus additions, makes a total Liability of £7,308,399.

The Invested Capital is £1,911,505, producing upwards of £74,000, thus making the present Annual Income of the Society £263,000.

Service in the Militia, Yeomanry, or Volunteer Corps will not affect the validity of Policies.

Prospectuses and further particulars may be obtained on application to

Alfred Head, Esq.	Bonamy Dobree, Esq.

The London Life Association was established more than 50 years ago on the principle of mutual assurance, the whole of the benefits being shared by the members assured. The surplus is ascertained each year, and appropriated solely to a reduction of the premiums after seven yearly payments have been made.

If the present rate of reduction be maintained, persons now effecting assurances will be entitled, after seven years, to a reduction of 73½ per cent., whereby each £10 of annual premium will be reduced to £2 13s.

This Society has paid in claims more than £4,150,000.
And has policies now in force amounting to £6,450,000.
Its accumulated fund exceeds £2,750,000.
And its gross income is upwards of £340,000.

Assurances may be effected up to £10,000 on the same life.

The Society has no agents, and allows no commission; nevertheless the new assurances effected in the last financial year amounted to £287,240, and the new annual premiums to £10,567.

EDWARD DOCKER, Sec.

IMPERIAL LIFE INSURANCE

COMPANY, No. 1 Old Broad street, London, E.C. Instituted 1820.

DIRECTORS—1861.

Thomas Newman Hunt, Esq., Chairman.
James Gordon Murdoch, Esq., Deputy-Chairman

Thos. G. Barclay, Esq.	George Field, Esq.
James C. C. Bell, Esq.	George Hibbert, Esq.
Charles Cave, Esq.	Samuel Hibbert, Esq.
Ed. H. Chapman, Esq.	Frederick Pattison, Esq.
Geo. W. Cottam, Esq.	W. R. Robinson, Esq.
Geo. Henry Cutler, Esq.	M. T. Smith, Esq., M.P.
Henry Davidson, Esq.	Newman Smith, Esq.

Profits.—Four-fifths, or 80 per cent. of the profits are assigned to policies every fifth year. The assured are entitled to participate after payment of one premium.

Bonus.—The decennial additions made to policies issued before the 4th of January, 1842, vary from £78 to £116 15s per cent. on the sums insured, according to their respective dates.

The quinquennial additions made to policies issued after the 4th of January, 1842, vary in like manner from £28 17s to £1 5s per cent. on the sums insured.

Purchase of Policies.—A liberal allowance is made on the surrender of a policy, either by a cash payment or the issue of a policy free of premium.

Loans.—The Directors will lend sums of £50 and upwards on the security of policies effected with this Company for the whole term of life, when they have acquired an adequate value.

Insurances without participation in profits may be effected at reduced rates.

Prospectuses and further information may be had at the chief office as above; at the branch office, 16 Pall Mall; or of the agents in town and country.

SAMUEL INGALL, Actuary.

THE LANDS IMPROVEMENT

COMPANY (incorporated by Special Act of Parliament in 1853), 2 Old Palace yard, Westminster, S.W.—To Landowners, the Clergy, Estate Agents, Surveyors, &c., in England and Wales, and in Scotland.—The Company advances money, unlimited in amount, for the following works of agricultural improvement, the whole outlay and expense in all cases being liquidated by a rent-charge for 25 years:—

1. Drainage, irrigation, and warping, embanking, enclosing, clearing, reclamation, planting for any beneficial purpose, engines or machinery for drainage or irrigation.

2. Farm roads, tramways, and railroads for agricultural or farming purposes.

3. Jetties or landing places on the sea-coast or on the banks of navigable rivers or lakes.

4. The erection of farmhouses, labourers' cottages, and other buildings required for farm purposes, and the improvement of and additions to farmhouses and other buildings for farm purposes.

Landowners assessed under the provisions of any Act of Parliament, Royal Charter, or Commission, in respect of any public or general works of drainage or other improvements, may borrow their proportionate share of the cost, and charge the same with the expenses of the lands improved.

No investigation of title is required, and the Company, being of a strictly financial character, do not interfere with the plans and execution of the works, which are controlled only by the Government Enclosure Commissioners.

For further information and for forms of application apply to the Hon. William Napier, Managing Director, 2 Old Palace yard, Westminster, S.W.

KENTISH TOWN COLLEGIATE

SCHOOL, N.W.—Head Master, DR SHERRIN, F.R.G.S.—The above school offers high advantages to parents seeking for their sons sound practical tuition, combined with domestic comfort, and careful moral and religious training. Premises very commodious. Situation most healthy. Masters selected with great care. For prospectus and references, which are unexceptionable apply to Head Master, Leighton House, Kentish town.

The Political Economist.

THE FIRST OFFICIAL ACCOUNT OF THE CONEFDERATE TREASURY.

THE circular of their Secretary of the Treasury gives no very encouraging account of the pecuniary resources of the Confederate States. So complete is the official silence of the rulers of the New Commonwealth, that we have now, for the first time, a distinct account of the nature of the cotton loan, of which so many vague descriptions have been hazarded.

In the first place, it is not a loan or a "subscription" of *cotton* at all. It gives the Government no right to any specific bales whatever. It is only an engagement on the part of the planter to subscribe, for the use of the Government, a certain sum of money out of the proceeds of a certain number of bales of cotton *when sold*. The planter retains the produce in his custody, has the exclusive right of declaring when he will sell it, and at what price he will sell it. The Government get nothing *in præsenti*, and it is open to the obvious effects of many contingencies whether the Government will ever get anything. The planter may become bankrupt, and the cotton on his estate may be seized by his creditors; or he may be needy and fraudulent, and dispose of the crop surreptitiously. All the Government appears to receive is an order on the factor or commission agent who is to conduct the sale; but the factor can have no present possession of the cotton, for the Government will not permit it to be brought down to the seaport town where he conducts his business. He can only pay the Government when he receives and sells the cotton, and, especially if the Confederate Government should chance to be unsuccessful, he may never receive or sell it. Some other broker, who has no cognisance of the transaction, may be selected to sell the cotton and to transmit the proceeds to the planter. From other parts of Mr Memminger's circular, it would appear that just now the planters are extremely desirous of cash.

What, then, it may be asked, do the Government get by this uncertain promise to make a loan at a distant period? They gain, or hope to gain, present credit. They bind the most wealthy part of the population to give them aid, not indeed now,—for even the richest planters have now little money, though much cotton,—but as soon as it is in their power. The Government gets all it can from its future subjects, and it must do with it as best it may.

The Government must want credit exceedingly. It is issuing promissory notes, which Mr Memminger officially tells us have supplanted all the other currency of the country. It is carrying on a *war of existence upon credit*, and the sole wonder is that it is so successful as it has been. Probably, rather stringent measures would be put in force both by the Government and the populace against any cautious person who objected to take Treasury notes. As the Government are issuing a vast paper currency, it naturally wishes to have some vague connection with real wealth, and asks even the present promise of a nominally secured loan at an indefinitely distant period.

Such is the glimpse which Mr Memminger affords of his own Treasury. The account he gives of that of the planters is not much better. It appears they want a loan too. As they are to lend to the Government something hereafter as soon as they have sold their cotton, they ask the Government to lend them a little now to carry them over the trying interval previous to its sale. The Government is issuing countless promissory notes, and the planters would like, not unnaturally, some for their own use. But upon this Mr Memminger is even amusingly stern. He is not deficient in political economy. He says he wants his notes for himself. He has a very expensive war to carry on, and his resources are tried to the utmost, and no portion of them can be squandered. If he helped the planters, he would issue so many notes that the whole currency would be depreciated, and so the Government would have to pay in a medium which became less and less efficient every day.

It is evident that the difficulty which we pointed out many months since is really pressing upon the Confederate States. We showed on the 26th March, 1861, that the Southern States were utterly defective in pecuniary resources,—that the deposits in their banks were only 15,000,000*l*, a little more than those of a single London Joint Stock Bank. Mr Memminger recommends the planters to ask aid from the banks; but if the banks had plenty of money to lend, the planters would not have petitioned Mr Memminger.

THE CONSTITUTIONAL CHANGE IN FRANCE.

IT is not often that the radical strength of Parliaments, their efficiency as taxing machines, is so conclusively demonstrated as by the edict signed by Louis Napoleon on the 14th instant. Our readers are well aware that for some time past there have been signs of a financial crisis impending in France. The origin of the singular uneasiness which existed in financial circles was believed to be partly the deficiency in the harvest, and partly the apprehension excited by the excessive expenditure of the State. Few, however, even of well-informed men conjectured the true state of affairs—a deficit of a thousand millions of francs, accompanied by a short supply of corn, a suspended import of tobacco, and a general depression of the great manufacturing cities. Such, however, was the fact; and the Emperor, as the truth broke upon him, roused himself to one of those fits of decisive energy, which so strangely alternate in his somewhat apathetic nature with habitual mental indolence. He sent for M. Fould—a capable financier—and after some discussions with the Cabinet, which we need not repeat, accepted his programme, and named him Minister of Finance.

The dangers which influenced the Emperor must have been great indeed, for M. Fould's programme is nothing less than a Constitutional Budget,—expenditure, that is, absolutely limited to the amount voted each session by the Legislative Corps. At least we cannot in fairness interpret the follow-

ing sentences in any less restricted sense. The Emperor says:—"The only efficacious means to attain this end [that "of an unvarying Budget] is to resolutely abandon the "faculty which appertains to me of opening a fresh credit "in the absence of the Chamber. I am determined to intro- "duce changes, and the Senatus Consultum which will be pre- "sented to the Senate on the 2nd December next will con- "tain this resolution, and determine your Budget, and those "of the different Ministries, by large sections." The Chamber, it is clear, will vote the totals, and also the sum allotted to each department, for that is the practical meaning of voting by large sections. The members were anxious to vote by chapters, which would have given them the control over details exercised by an English Parliament, but to this the Emperor evidently could not make up his mind. Still he has yielded much, and the authority refused affects the statesmanship rather than the *credit* of France. It is highly desirable that an individual should spend his money wisely and in the most reproductive way; but still it is his total expenditure, as compared with his income, which regulates the amount of his *credit*. For the future, if the decree is honestly carried out, the Chamber will be responsible for the credit of France, and as its deliberations are public, the market will be informed of the grounds upon which its action is taken. It was the secrecy as much as the irresponsibility of the recent *régime* which imperilled its financial position.

But will the decree be honestly carried out? We confess to a lingering doubt in our own minds as to the possibility of the Empire dispensing with some exceptional mode of meeting sudden demands. The entire system of French Administration depends so greatly on "credits," "subventions," sudden interpositions to avert unexpected calamities, and equally sudden exertions of force,—the people are so accustomed to see the Head of the State act as if he were a Providence, that the Emperor will need all his self-restraint to adhere to his self-imposed rule. He will be very apt, when the immediate pressure is passed, to grant credits "subject to sanction," which the Chamber dare not refuse, and a national "emergency" in France overrides every rule. Still he has undoubtedly made every such interference much more difficult, while he has wholly prohibited his Ministers from asking credits in which he himself is not specially interested. This last effect will be a strong security for economy; for it is the demands from every department, each moderate in itself, which make the aggregate so unendurable.

We shall not of course attempt to predict the means M. Fould may adopt to meet the immediate deficit. It is, however, obvious, despite the *Moniteur*, that the temptation to raise a great loan will be very strong. The amount itself is excessively large, as large as the cost of a great war; and though the issue of floating paper has, we believe, been carried over two or three years, its redemption must be effected much more rapidly. Economy is a very slow and a very difficult process. It is tedious enough even in England where it is popular with the public; but in France, where every second man in the governing class is interested in some salary, or some subvention, or is in the army, or has an "idea" which State assistance is to develop, stringent economy is all but impossible. The revenue of France is great, and the devotion of so large a portion to military expenses and public works admits sometimes of sudden cessations of outlay; but then the Empire is not the Government which can afford to offend the army or dismiss the workmen employed on the new State buildings. A loan will seem, we greatly fear, even to M. Fould a much lighter political risk; and, despite the decree, political risk must still be the first thought of a man who looks to his dynasty as something which any incidental failure may shake or uproot.

COTTON SCARCITY.

MITIGATING CONSIDERATIONS.

We know that there are few more thankless functions than that of attempting to comfort and console a sufferer by pointing out to him the various alleviations of his distress. By doing so we seem to be extenuating his grievance, and generally end in exasperating his feelings. In spite of this warning experience, however, we shall venture to point out to the manufacturers of the North one or two considerations which are not beside the mark, in view of the losses and the suffering which menace themselves and their workpeople. Beyond all question those losses are extremely heavy, and those sufferings will, there is too much reason to fear, be both heavy and prolonged:—still it is undeniable that the calamity which has fallen upon them might have occurred at a time when they were much less able to bear it, as well as have been far more completely unaccompanied than it is by mitigating circumstances and prospective compensations.

In the first place, the last two years have been years of very unusual prosperity in the cotton trade; and the year 1860 especially was the most splendidly profitable ever known. Manufacturers made enormous gains and added greatly to their capital. Never were they before in so advantageous a position to face severe losses. The same, we fear, cannot be said of the operatives—at least not to anything like a proportionate degree; for though their employment was unusually continuous and their wages unprecedentedly high, there is little reason to believe that they laid by largely to meet future wants. Still they are better off than usual, if it were only in this particular;—that the shopkeepers and small tradesmen who habitually supply them, and on whom in all periods of "short time" the first and chief pressure always falls, are (owing to the two years of brisk and profitable business they have had) in a much better position than usual to bear that pressure and to give credit to their regular customers. The calamity of a scarcity of cotton is great, no doubt;—but it would have been greater had it come upon us in any other year during the last quarter of a century.

In the second place, even if no American war had intervened and if the cotton crop had come forward as usual, this year must still have been one of serious privation and of heavy loss in nearly all the manufacturing districts. The enormous production and the excessive exports of last year had glutted several of our most important markets. Goods sent out to those quarters, especially to India, had become quite unsaleable except at prices which left no profit but considerable loss. "Short time" in Lancashire and Cheshire would have been inevitable to some extent, even though the supply of cotton had been as abundant as in ordinary years: only it would have been forced upon the producers not by inability to purchase, but by inability to sell. In some instances it appears from certain trade circulars that the rise of price consequent upon the expected cotton famine has so enhanced the price of shirtings and other articles in distant markets, as to cause the consignments of merchants and manufacturers to return considerable profits, where otherwise they would have left serious losses. To them, at least, therefore, the scarcity has been by no means an unmixed evil.

In the third place, though the continuance of the American blockade will inflict much present inconvenience to this country and much actual suffering in the manufacturing districts, yet we are by no means sure that the future benefit which must ensue will not far outweigh the immediate mischief. For it is believed by all the parties most qualified to form a judgment, that nothing except a prolonged withholding of the American crop is needed to enable and induce our enterprising merchants to open communications with the interior cotton districts of India, from which abundant supplies can be obtained. These communications, once opened, will not readily close again; for when the means of transport have been once organised, the chief obstacle is overcome. Moreover, when our manufacturers have habituated themselves and their machinery to the use of Surat cotton, they will be inclined to continue it to a great extent even after Orleans and Uplands are again procurable; so that the difference of price between the two will be no longer so greatly to the advantage of the American article as it has hitherto been. But the principal compensation will be this;—that the stimulus given to the growth of cotton all over the world by a year or two of artificially high prices, will tend to ensure such an ample supply, and therefore such moderate prices for long years to come, that future profits will more than indemnify our manufacturers for the trials and losses of the present crisis, even though it should last over another year. The Confederate States will continue, for an indefinite period, we do not doubt, our main source of supply, but no longer our only one. We shall deal with them almost as extensively

as ever; but our painful *dependence* on them will be over. To attain this position is worth much temporary distress.

THE FRENCH PARTY IN ITALY.

M. Ratazzi has chosen an infelicitous moment for the panegyric on the Emperor of the French and the expression of the profound gratitude that Italy feels to him, in which he indulged at the dinner given to him by the French Liberals in Paris on Sunday last. Not that we would for a moment wish Italians to disguise from themselves the fact, which is indeed evident to all the world except perhaps M. Mazzini and the Garibaldians, that Italy does owe her present freedom to France, and could not have regained for years, perhaps scarcely for generations, her freedom and independence without the French Emperor's helping hand. Therefore, when in the spring of 1859 almost all the English Press were showering invectives on Sardinia for calling in the aid of so unscrupulous and dictatorial an ally, we resolutely upheld the Sardinian policy as holding out the only hopeful solution of the Italian problem. Without pretending to believe in the pure disinterestedness of French aid, we did venture to think that the price of that aid was not too much for the service rendered, and that the risk of French dictation, great as it was, was a risk Italy could not choose but run. Count Cavour, with the true instinct of a great statesman, did not hesitate to accept the only aid which seemed commensurate with the work in hand. And we now know that the events which justified English *jealousy* and *suspicion* have also justified Count Cavour's daring move. Yet, admitting this in the fullest manner, we cannot but repeat that M. Ratazzi's emphatic gratitude is scarcely appropriate to the moment in which it is expressed. The absorption of Savoy and far more of Nice has done much to tone down the fervour of mere tender emotion in Italians' breasts. The long and persevering stand made by the Emperor in favour of Francis II. at Gaeta did still more to undermine in Italian breasts the sentimental glow towards the French Ruler which M. Ratazzi expresses with such pathetic warmth. But at no time has the enthusiasm of gushing gratitude seemed quite so inappropriate to the occasion as the present. Rome is the centre of an incessant conspiracy against the Italian King and Government. There it is that all the conspiracies are organised which keep Naples in effervescence and most of the other Italian provinces on the *qui vive*. The consecration of Rome to reactionary politics has much the same effect on the great Italian revolution which, as one of our evening contemporaries has well remarked, the occupation of London in 1688 by Louis XIV. in the name of the Stuarts would have had in retarding and counteracting the great English revolution. Rome is the centre and key of the political position, and Rome is kept sacred to the enemy by the Emperor's own troops. General Goyon, the head of the troops of occupation, has just been raised to a higher titular rank, that of Commander-in-chief of the army of occupation, as if to mark the importance which the Emperor still attaches to that post as one of no temporary or transitional character. Baron Ricasoli's efforts to persuade the French to withdraw from Rome have failed, and Italy is compelled to look forward to another winter of treacherous and seditious plots, hatched in the very centre of the Italian capital and among the most loyally Italian population which the Peninsula can boast.

It is at such a moment as this, when the Spanish Queen is suggesting from the throne a holy alliance against Italy in the interest of the Pope, and all real friends of the new Kingdom are redoubling their remonstrances with the Emperor of the French for the policy which encourages, if it does not generate, such schemes as these, that M. Ratazzi takes occasion to express with the warmest emphasis and without any shadow of expostulation or condition, his unreserved gratitude to France for all her bounties to Italy, and his belief that the whole stock,—Italian and French,—is governed by "*ideas perfectly alike*," so that "the union of the Latin race is not an idle word." "Those "persons who have spoken so hastily of the ingratitude of "the Italians had not given themselves the trouble to come "amongst us; they would otherwise have learned that we "are richly endowed with the memory of the heart, I love "to repeat, before you all. No! Italy will never forget "what she owes *this* august Emperor, who, for her sake, "has braved so many dangers—who alone held out a helping "hand to her at the crisis of her agony; she will never forget "the admirable soldiers who have fallen in her cause—the "glorious army which has won her freedom, the generous "writers who have so gallantly defended her, and this French "people, whose good wishes accompanied each phase of the "great enterprise of her enfranchisement. The future can "only give still more force to these sentiments. At this "epoch of the reconstitution of nationalities, of the grouping "of sister nations, the union of the Latin race is not an idle "word. Fraternally allied, as is befitting in nations of the "same origin, of equal civilisation, of ideas perfectly alike, "possessing the same interest in all matters, our two nations, "supported by the sympathies of other Liberal nations, "have nothing to fear from the rest of the world. Let the "crisis come, and France will see how Italy understands its "debt of gratitude and its duties of responsibility." Thus runs M. Ratazzi's bid at Paris for the Prime Ministry at Turin, which it is no secret that he hopes to fill in place of the present Premier, Baron Ricasoli. By cultivating the favour of France he hopes to win his way to rule in Italy, and by that gratitude which consists in a "lively sense of "favours to come," to smooth away the difficulties which manly remonstrances have failed to remove. Ratazzi's *programme* is evidently that of Italian subserviency to France.

Without, therefore, in the least ignoring the greatness of the obligation to which French intervention in 1859 subjected Italy, let us ask what Italy has to gain or to lose by returning to the same attitude again, and throwing herself as a suppliant at the feet of France for those further safeguards of Italian freedom, which she sees that it will be difficult and tedious to wring single-handed out of Austria on the one hand, and out of the public opinion of Europe on the other. It is obvious that a step like Cavour's, which is advisable and bold at one time, may be unadvisable and cowardly at another, in a quite different attitude of affairs. That you risk much by calling in active French aid, Cavour never doubted for a moment,—but he knew that he risked far more by declining to call it in. Is this still the case? Do the hopes and welfare of Italy depend on French patronage still? If so, Ratazzi is right, and Italy cannot do better than replace the proud and independent Minister by the courtly and dependent one. If not, it may be the greatest of blunders.

There are three different classes of considerations:—(1) the effect on France of courting her favour;—(2) the effect on Europe;—(3) the effect on Italy itself. The effect on France is not very easy to determine with any accuracy. There can be no doubt that with a subservient Ministry at Turin it would be a moral certainty that Austria would never be allowed to *repass* her present limits,—which is perhaps not quite impossible if the Italian Minister were one who had *piqued* the Emperor by his independence of French counsel and aid. Moreover, it is quite possible that great deference to Imperial wishes might accelerate the Emperor's determination to cut the Venetian knot, even if not the Roman, by a new war with Austria. It is, however, scarcely doubtful that such deference would be taken advantage of to minister to the national vanity of France by insisting on Italian countenance to French policy in other parts of Europe, if not on a new cession of territory to France. Nor do we think that profound *complaisance* to France is the way to hasten the evacuation of Rome. There the Emperor has both a personal and a political excuse for staying while Pius IX. can plead a specific pledge, and while French Roman Catholicism continues to demand the French Protectorate. Both these reasons might yield to a great outcry from all Europe;—but the more entirely Italy acquiesces in the will of her Imperial master, the less will Europe feel inclined to cry out against the occupation of Rome. In short, while the Emperor may be more *inclined* to aid Italy, should he find her pliant to his purposes, it seems to us that this aid will be of less permanent advantage to Italy under the same hypothesis. It will be given so as to guarantee for the future, as far as possible, that subserviency and flexibility which had purchased it in the past.

(2) As to the effect on Europe of a French policy in Italy we have already half indicated our opinion. It was not till the issues of the Villafranca convention had proved that France did not and could not bend Italy to her will, that

Europe or England came round to the Italian side. Many English Liberals scarcely dared to rejoice in the victories of Magenta or Solferino, so strong was the popular jealousy of Napoleon and the suspicion that he was carving out for himself a subordinate kingdom in the Peninsula. English opinion, which has done so much morally for Italy since Villafranca, and also public opinion in Prussia, have been hearty in exact proportion to the evidence that Napoleon would not rule either indirectly or directly at Turin; and we can imagine nothing so dangerous to English or German sympathy with Italy as the installation of a French Cabinet in the new Kingdom.

(3) But after all the main question is an Italian one. English and German and European sympathy are useful, but not indispensable to Italy, as the past has proved. If French aid is really essential to the recovery of Venetia,—if French good humour is really a *sine quâ non* of the withdrawal from Rome,—then it were better to disregard English murmurs, and Prussian suspicions, and European coldness, than to lose French aid. But is it so? Is not Italy adequate to her task single-handed, if she is firm, patient, and persistent? And if there be any fair moral probability of this, is it not a hope on which much—very much—should be staked? Austria is almost certainly breaking up;—slowly indeed, but also surely. Hungary and Croatia can scarcely ever again be anything but a great drain upon her military resources, even if they be not soon again actual battle-grounds. Financial embarrassments are crowding upon Austria; the Emperor vacillates in his policy; the Reichsrath is divided; Austrian Poland is agitated to its centre; Russia is not in a position to lend her aid. Let but Italy and Hungary combine, and there is at least a very fair chance of success without any extrinsic aid. And what does not depend upon such an effort in the national life of Italy itself? Party spirit grows high and rancorous. Garibaldi and his friends are as jealous of France as they are of Austria. Naples is only to be heartily won by the fusing power of a common national sacrifice and a common national glory. For this almost anything should be hazarded. Let but Italy be conscious of having won her freedom by a gigantic and simultaneous strain on all her newly-renovated strength from Sicily to Liguria, and in the pride and gratitude of the victory she will start fair on a truly national career. But let her be chiefly dependent on France for the last blow,—even if France act with scrupulous disinterestedness and honour,—and we shall have mutual recriminations breaking out almost before the nominal independence is proclaimed, and the jealousies of the various sections outliving and perhaps eclipsing the dangers of the Peninsula from foreign intruders. Much must be risked to save Italy in any way. But more, we think, will be risked by the policy of subserviency to France than by the proud policy with which Ricasoli has identified his unsullied name.

AMERICA.

(FROM OUR SPECIAL AMERICAN CORRESPONDENT.)

NEW YORK, Oct. 26, 1861.

During the last three days I have had the good fortune to meet with two friends from the South, and I have availed myself of the opportunity to get a good deal of information of a nature not easily obtainable, now that passes are refused for individuals and not even business letters are allowed to be carried. One arrived a fortnight ago—the other yesterday. They are both intelligent Englishmen, resident at the South, and come from different points of the country, each having passed through several of the Seceded States during the last few weeks. Our conversations have extended over nine hours, affording sufficient time (of which I have freely availed myself) for cross-examinations, and having met them separately I have had the opportunity of checking the information of one by that of the other. Substantially they agree, both in their facts and their views, and in the report I propose to make I shall, where there is any discrepancy, either strike an average or give the reply which bears the strongest inherent evidence of probability.

I. ARMY.—With regard to the Southern force in the field. Immediately following President Lincoln's call for 500,000 men, President Davis called for an equal number. The response was made in about the same proportion. The South has now about 350,000 men in the field or drilling at the various camps, or more by about 50,000 than I estimate for the North. The army is drawn chiefly from the middle classes and from the Irish and other labourers, draymen, stevedores, and steamboatmen of the ports and rivers. A large proportion of the white men usually occupied in moving the cotton crop—from the labourer on the river landing to the factor in the port and even the exporting merchant—are in the field. They must make excellent fighting material. The "white trash" are too lethargic and constitutionally weak to have enlisted in great numbers at the further South. It may be different in Tennessee and in the other Middle States.

II. FINANCES.—In the present state of affairs it has of course been difficult to raise much money by taxation. The main reliance is, therefore, upon the issue of Government paper money. With this currency, called Confederate notes, all expenses of the the war are paid. To create confidence in these notes there needed to be some security imparted to them—real or nominal. This could not be given by holding specie, for they had not got it, so the plan was formed and adopted of a great cotton loan. Extraordinary as the arrangements may appear, and weak as the security may be thought in Europe, yet there is a high degree of confidence shown in the notes. Being legal tender, they have become the money standard of the country, and gold is talked of as being at a premium—not notes at a discount. But the premium commanded by gold is only 10 to 15 per cent., or about the same as that in Russia, and very much lower than that in Austria, which I believe varies from 25 to 40 per cent. As the amount increases, the premium on gold will of course increase with it. The most remarkable circumstance, however, is that the notes of the New Orleans banks—which are considered as safe as any institutions in the country, and always hold a very large amount in specie, much larger in proportion to their circulation and deposits than the Northern banks—are at an equal discount as compared with gold. It is true they have suspended specie payments (except one of them—the Southern Bank—with a very small circulation), not, however, from inability to continue, but at the recommendation of the Governor of the State, in order to allow the Government notes to obtain a circulation which was impossible while notes of wealthy specie-paying banks were to be had. One of my informants states the specie held by the New Orleans Bank at 14,000,000 dols, and that this is above the average in time of peace. The Confederate notes are issued in amounts of from 5 dols upwards—the bank notes in similar amounts, but with the privilege, as regards the latter, of cutting in two, each half note representing and passing freely at half the amount represented by the whole note. In South Carolina and Virginia the Legislatures, in view of the scarcity of change (gold and silver being either held by the banks or hoarded by individuals), have authorised corporations, showing that they are solvent and possessed of solid means, to issue small notes—technically called "shin-plasters,"—and these circulate extensively in amounts of from 25 cents (about 1s 0½d English) to a dollar. The New Orleans City Corporation have also been authorised to issue 1 dollar notes, and they are availing themselves extensively of the privilege.

Oct. 29, 1861.

In my letter of the 26th I gave such particulars of the plan and object of the Southern cotton loan as I had learned from my Southern friends who had lately "run" the land blockade. That account is to-day fully confirmed by a document which has been copied into a New York paper from a Southern source. It is an address of Mr Memminger, Secretary of the Confederate Treasury, to the Commissioners appointed to receive subscriptions to the produce loan. This document you no doubt have.

This address is creditable to the Southern Secretary for its calmness and its candour in pointing out to the planters the serious nature of the struggle they are engaged in, and for its freedom from anything like Buncombe. And the advice it gives as to the policy of directing part of their labour into the raising of provisions, the manufacture of clothing, and so forth, indicates that the prospect of a long war is realised and being prepared for.

At the meeting of the "Southern Commercial Convention," held at Macon, and which concluded its sittings on the 18th of this month, the following extraordinary resolutions were introduced:—

1. To place a discriminating duty of 20 per cent. on all foreign goods imported into the Confederate States through or for account of Northern parties for a period of ten years.

2. To place a direct "income tax" upon all Northern exchange or bills payable there for a similar period.

3. Recommending the banks and merchants to make all cotton produce bills accepted payable in Europe, at least to the extent of the foreign importations.

These resolutions did not pass.

The report of the proceedings furnished to the *Memphis Appeal* goes on to remark:—

The position taken by General Duff Green was, that these resolutions were so fatal to Northern commerce with the South, so destructive of all hope of New York ever again participating in the importation of our goods, in our wealth, through the discount of our cotton bills and the control of our exchange, that to pass them would be to prolong the war. That the direct trade resolutions, in fact, would make any adjustment with the North impossible, and prevent any reconstruction of the commercial and financial connections between the North and South. These views, suddenly put forward, had great weight with the Convention. All debate being cut off, by nature of the motion with which General Duff Green closed the argument, the "direct trade resolutions" were tabled.

The greatest excitement followed this unexpected vote. The direct trade men were only the more convinced of the importance of these measures from the fact that their opponents considered them too dangerous to the North. They believe that the free-trade resolutions, unless practalised by "direct trade," would not give to the South the full measure of commercial benefit desired.

In order to allow the utmost harmony to prevail, it was agreed to suppress the exciting debate which flowed from this unexpected position of General Green. But I understand that the direct trade resolutions will be taken up soon in another form, and pressed upon the consideration of the Government

There is no doubt that the result was brought about by a powerful Georgia influence, and that parties in high position in the Government from this State are opposed to disrupting by legislation those commercial and financial ties which are only suspended, and which are to be preserved as an inducement for peace to the North, as well as a basis of adjustment of terms of that peace. What the ultimate social and political result of such commercial and financial reconstruction will be, is a matter of grave concern to the Southern people. As your correspondent, I give the simple facts. They are certainly significant and pregnant with great events hereafter.

I am certain that free-trade England will neither encourage nor thank the South for this policy should it be adopted, nor approve of the spirit which dictates it.

It must, however, be understood by merchants that this "Commercial Convention" is a totally unauthorised body of business men, planters and others, who meet annually to deliberate on the means of extending Southern trade, and to recommend to Congress the plans which may seem to them conducive to the prosperity of their section. For many years past the creation of a direct trade with Europe in imports such as already exists in exports has been their darling scheme; but their recommendations never received much attention at Washington. They will have more weight at Richmond; but how much more it is impossible to say. For so far it has been the determined policy of the Government to discourage and prevent any exports of cotton except to countries which may recognise the independence of the Confederate States. Ultimately it is very probable that sufficient pressure will be brought upon them to induce a change in this policy; but how soon that may be it is difficult to form an opinion on the partial knowledge obtainable. The temper of the people at large is said to be in favour of the policy of the Government rather than of the propositions in the Convention. And even if those were adopted by the Government, it is doubtful if they would have the effect of removing any considerable quantity of cotton. Of the larger ports, at least, it is probable that the blockade will be a very close one; and even were it otherwise, no great portion of the crop could be moved without the return from the army of thousands of landing and steamboatmen, draymen, stevedores, and labourers who have enlisted for the war, and are thus debarred from returning to their regular occupations so long as the war lasts, even if the occasion should arise.

But (to proceed with the information furnished by my Southern friends) with regard to the new cotton crop, their reports are much more unfavourable than I have been prepared for. It appears that the crop has suffered from the longest spell of wet weather that has been experienced for many years, so that the prospects, which were on the whole favourable till July, now point to a very defective yield. To begin at the beginning, the dearness of breadstuffs, owing to the defective Southern crop of the previous June, caused a tendency to a larger planting of corn. This was stimulated by the fears of war which prevailed all through the winter and spring, and it is probable that there was at least from 5 to 7½ per cent. less cotton planted in order to increase the breadth under corn. The planting was about completed on the 12th of April when the war actually commenced by the attack on Fort Sumpter, and the President called on the country for 75,000 men to protect Washington and reoccupy the Southern forts. This satisfied the whole South that a formidable war was inevitable. It is usually the case that a small or considerable percentage of the cotton crop does not come up on the first planting, owing to defective seed, excess of wet, or of drought, or of cold. It is supposed that there was not less than from 5 to 7½ per cent. of this year's crop which thus showed what is called a defective "stand," and which, under ordinary circumstances, would have been replanted in cotton during the last fortnight in April or early in May. Nearly all such land was this year ploughed up and planted in corn. It is considered that this reduction in the breadth under cotton, added to what had previously occurred, could not have been less than 12½ per cent. or one-eighth; and owing to this cause and the great success of the corn crop this year, it is universally admitted that the supply of corn in the Southern States is about double what is usually held at this season. If we therefore estimate that under ordinary circumstances the breadth under cotton should have been equal to a possible yield of 5,000,000 bales, we have now to reduce that by ⅛th, which would make the greatest possible yield about 4,375,000 bales. But during the summer the large crop of corn required a great deal of labour, and the certainty that the crop would be valuable, while it was probable there would be no market for cotton, made it the interest of planters to devote great attention to it, even at the expense of the cotton crop. Thus the cotton generally suffered from defective hoeing, weeding, &c., and my informants think that the loss from this and from careless picking and general indifference to the crop, now that there is no prospect of a market, while there is a great scarcity of bagging and rope and of money to buy them with, is fully equal to an eighth of the entire crop, which would reduce the total to about 3,800,000 bales, even had it been favoured with the best possible weather. But from this has to be deducted the loss caused by the long spell of wet weather, which set in about the first week in August in Alabama, Mississippi, Louisiana, Arkansas, and Texas, to the certain knowledge of my informants, and presumably, therefore, throughout the whole cotton country, and continued with hardly a dry day for six weeks. The effects on the bottom lands are represented as disastrous in the extreme, and my friends think there is no prospect of more than half an average crop from them; while the damage on the uplands, though much less, is also very considerable. Both parties are emphatic in the assertion that the loss from excess of rain this year has been greater than from the excess of drought last season, and that we know exceeded a million of bales. There is, therefore, much to support what is now said to be the current Southern estimate, viz., 3,000,000 bales, supposing the gathering, baling, and housing to be accomplished without much further damage. With so small a crop as this, it is evident that high prices of cotton would be maintained throughout the season, even were peace restored to-morrow. I arrived in this country believing that there was little prospect of the crop falling short of 4,000,000 bales, and it is only after very careful inquiry that I am disposed to concede so low an estimate as the above, and I would desire not to commit myself to it without more definite information than I yet possess from the Atlantic States. The above calculations are founded on the state of affairs in the five States I have named, and though it is probable, it is not certain that they will apply equally to South Carolina, Georgia, and Florida.

The great maritime expedition to which I have before referred has at last sailed from the Chesapeake for its Southern destination. It is upon an enormous scale, and excites the national pride in a high degree, and not unnaturally. It consists of about seventy-six vessels of all kinds, many of them among the largest steamers and sailing ships afloat, carrying from 4 to 500 guns, and about 15,000 soldiers.

SOUTHERN FINANCE.

THE following are the most important portions of the letter addressed by Mr Memminger from the Southern Treasury of Richmond to the Loan Commissioners:—

Treasury Department, Richmond, Oct. 17, 1861.

TO THE COMMISSIONERS APPOINTED TO RECEIVE SUBSCRIPTIONS TO THE PRODUCE LOAN.

GENTLEMEN,—Inquiries have been made from various quarters:—

1. Whether, during the continuance of the blockade, efforts should be made to procure further subscriptions.

2. Whether the Government will authorise promises to be held out of aid to the planters, as an inducement to such further subscriptions.

The first inquiry seems to imply a misunderstanding of the scheme of subscriptions. Many persons have supposed that the Government was to have some control of the produce itself; others that the time of sale appointed by the subscription was to be absolute and unconditional. The caption at the head of the lists, when examined, will correct both these errors. The subscription is confined to the proceeds of sales, and contains on order on the commission merchant or factor of the planter to pay over to the Treasurer the amount subscribed in exchange for Confederate bonds. The transaction is simply an agreement by the planter to lend the Government so much money, and in order to complete the transaction a time and place are appointed when the parties may meet to carry it out. The important point is that it shall certainly be completed at some time, and that is secured by the engagement of the planter.

* * * * * *

It is obvious that the subscriptions are as valuable to the Government during the blockade as after it. The blockade simply suspends the completion of the engagement. It becomes the interest of both parties to wait for a good price, and the Government will readily consent to a postponement of the sale.

You perceive, therefore, that it is desirable to continue your exertions to increase the subscriptions, and you are authorised to say that the Government will consent to a reasonable extension of the time appointed for sales.

3. The next inquiry is as to promise of material aid from the Government to the planters.

* * * * * *

Two plans of relief have been proposed. The one is that the Government should purchase the entire crop of the country; the other, that an advance should be made of part of its value. In either case the payment is to be made by the issuance of Treasury notes; and, therefore, if we put aside for the present the many and serious objections to the possession, transportation, and management of the crop by the Government, it becomes simply a

question of amount. To purchase the whole crop would require its whole value, less the amount of subscriptions. If we estimate the whole crop of cotton at 200,000,000 dols, and the subscriptions at 50,000,000 dols, the purchase would then require 150,000,000 dols of Treasury notes, and if to this sum be added the amount of value for other agricultural products, which would certainly claim the same benefit, the sum required would probably reach 175,000,000 dols.

The amount called for by the other plan of making an advance would depend upon the proportion of that advance. Few of the advocates of this plan have put it lower than five cents per pound on cotton, and at the same rate on other produce. It may, therefore, be very fairly set down at about 100,000,000 dollars.

If we consider, first, the least objectionable of these plans, it is certainly that which requires the smaller sum; and, if this be found impracticable, the larger must, of necessity, be rejected. Our inquiry, then, may be narrowed down to a proposal that the Government should issue one hundred millions of Treasury notes, to be distributed among the planting community upon the pledge of the forthcoming crop.

The first remarkable feature in this scheme is, that it proposes that a new Government, yet struggling for existence, should reject all the lessons of experience, and undertake that which no Government, however long established, has yet succeeded in effecting. The "organisation of labour" has called forth many ingenious attempts, both speculative and practical, among well-established Governments, but always with disastrous failure. With us, however, the experiment is proposed to a new Government which is engaged in a gigantic war, and which must rely on credit to furnish means to carry on that war. Our enemies are in possession of all the munitions and workshops that have been collected during forty-five years of peace; their fleets have been built up at our joint expense. With all these on hand they yet are obliged to expend nearly ten millions of dollars per week to carry on the war. Can we expect to contend with them at less than half that expenditure? Supposing that it may require two hundred millions of dollars, then the proposal is that, at a time when we are called upon to raise this large sum for the support of the Government, we shall raise a further sum of one hundred millions for the benefit of the planting interest.

For it must be observed, first, that the Government receives no benefit whatever from this advance. The money is paid to each individual planter; and, in exchange, the Government receives only his bond or note—or, if the cotton be purchased, the Government receives only certain bales of cotton. That is to say, the Government pays out money which is needful to its very existence, and receives in exchange planters' notes or produce, which it does not need, and cannot, in any way, make use of.

It must be observed, in the next place, that Treasury notes have now become the currency of the country. They are, therefore, the measures of value. In this view it is the duty of Government to limit their issue, as far as practicable, to that amount which is the limit of its currency. Every person acquainted with this branch of political science is aware that, if the currency passes this point, it not only becomes depreciated, but it disturbs the just relations of society, precisely as though an arbitrary authority should change the weights and measures of a country. If the currency of a country should be suddenly extended from one hundred to two hundred millions of dollars, that which was measured by one dollar is now measured by two, and every article must be paid for at double its former price. The Government, from the necessities of war, is the largest of all purchasers, and thus, by a kind of suicidal act, compels itself to pay two dollars for what one would formerly have purchased, and at this rate of advance two hundred millions of dollars can effect no more than one hundred millions of dollars would have effected before—or, in other words, one hundred millions of dollars are actually sunk in the operation.

Such a condition of the currency the Government has anxiously endeavoured to guard against. The war tax was laid for the purpose of creating a demand for Treasury notes, and a security for Treasury notes, and a security for their redemption. Their redundancy has been carefully guarded against by allowing them to be funded in eight per cent. bonds. If necessity shall compel the Government to issue for the defence of the country, and keep out two hundred millions, it is plain that every accession must impair and may defeat all the precautions.

If the Government should undertake, for the sake of private interests, so large an increase of issues, it may hazard its entire credit and stability. The experiment is too dangerous, and relief for the planters must be sought in some other direction;—and may not that remedy be found?

In the first place, let the planters immediately take measures for winter crops, to relieve the demand for grain and provisions. Let them proceed to divert part of their labour from cotton and make their own clothing and supplies. Then let them apply to the great resource presented by the money capital in banks and private hands. Let this capital come forward and assist the agricultural interest. Heretofore the banks have employed a large part of their capital in the purchase of Northern exchange. Let them apply this portion to factors' acceptances of planters' drafts secured by pledge of the produce in the planters' hands. An extension of the time usually allowed on these drafts would overcome most of the difficulties. This extension could safely reach the probable time of sale of the crops, inasmuch as the suspension of specie payments throughout the entire Confederacy relieves each bank from calls for coin. The banks are accustomed to manage loans of this character, and will conduct the operations with such skill as will make them mutually advantageous. The amount of advance asked from the banks would be greatly less than if advances were offered by the Government, and all the abuses incident to Government agencies would be avoided.

It seems to me, therefore, that it is neither necessary nor expedient that the Government should embark upon this dangerous experiment. It is far better that each class of the community should endeavour to secure its own existence by its own exertions, and, if an effort be at once made by so intelligent a class as the planters, it will result in relief. Delay in these efforts, occasioned by vague expectations of relief from Government, which cannot be realised, may defeat that which is yet practicable. C. G. MEMMINGER, Secretary of the Treasury.

Agriculture.

TECHNICAL OBJECTIONS TO FARM LEASES.

THE letter of a correspondent, which we print below, will show that there are objectors to leases upon grounds different from those which usually prevent English landowners from granting them. Such objectors raise difficulties which are technical, formal, and law-created. They go to the method and terms, rather than to the principle of leases, and involve considerations, mainly of detail, which we always bear in mind when, in asserting the necessity of a lease, we say it must be a "rational lease." Our correspondent refers to our notice of Sir John Pakington's speech upon leases at the Worcester agricultural meeting, and objects that neither Sir John nor the commentator has hit the real objection entertained (by farmers we presume) to accept leases of their farms for 21 years. We suggested that there might be something in Sir John Pakington's leases which rendered his tenants indifferent, if not averse to them, and our correspondent, Mr Mewburn, argues with some force the objections which farmers may take to leases according to their ordinary form and as regulated by the existing law. This opens considerations with which we did not attempt to deal in our comments on Sir John Pakington's speech. It was well to find a landowner so personally and politically influential as Sir John Pakington, asserting the proposition that farmers who farm properly make a mistake if they do not demand the protection of leases, and stating his own willingness to grant leases to his tenants. But we expressly said that before the tenant entered on his farm, he should carefully and deliberately settle with his landlord all the terms of the lease by which both are to be bound for twenty-one or more years. Now, such a settlement of the terms of a lease involves, of course, the preliminary consideration on the part of the tenant of all its legal consequences. No farmer should agree to be bound by a lease until he has subjected it to the full consideration of his own legal adviser. His lawyer is as necessary to him as his surveyor. Our correspondent's letter will suggest to the reader some of the grounds of that necessity.

AGRICULTULTURAL MEETINGS.

TO THE EDITOR OF THE ECONOMIST.

SIR,—I have read with the attention it justly merits your article on "Agricultural Meetings" in your paper of the 2nd inst., and the speech of Sir John Pakington on farm leases. Allow me with all deference to say, neither of you have, it seems to me, hit the right nail on the head. The great objection to farm leases for 21 years, or a less term, arises from the state of the law. If a tenant dies, having by his will appointed executors, who are not members of his family, they will have to inquire into the state of his affairs. The testator may have left debts to a great amount, and the sale of the lease may become absolutely necessary. But a difficulty here may arise; the lease will prohibit any assignment or under-lease without the landlord's consent. Much delay may take place in obtaining an unobjectionable tenant, or the tenant's family may desire to retain the farm in their own hands; but here a greater difficulty will start up. The executors are liable to the landlord for the rent from the testator's death to the termination of the lease; for the tenant in his lease covenanted for himself, his heirs, executors, and administrators for payment of the rent, and for the performance of the numerous covenants entered into by him for the due management of the farm. I am aware it will be said the produce on the farm will also be a sufficient security for the rent. Granted. But when the term expires, various questions may arise between the landlord and the executors on the alleged breach of covenants in the lease. The tenant's family may at the end of the term be nothing worth, and the landlord's remedy is against the executors. Between them there will be no sympathy. The former will say,—"You should have taken the management of the farm into your hands, and protected yourselves; I will not be a sufferer by your neglect." If the landlord has sold his estate, the purchaser will assuredly turn a deaf ear to the cries, however piteous, of the executors. But, assuming the tenant appoints his sons executors of his will, and they waste his effects; the landlord in that case must bear with his loss if any arises from breach of covenant. Does not this view of the case account for the paucity of leases complained of? I shall be glad to hear Sir John Pakington's answer to it.—Yours, &c.,

Larchfield, Darlington. FRAS. MEWBURN.

Now a farmer, who is a man of business, knows, or he might learn from his lawyer, that the covenants he enters into with his landlord will be binding upon his executors, and on the property he leaves behind him should he die before the term of the lease has expired. He knows also, that if the state of his property is such, that at his death the capital represented by the stock and crops of the farm must be divided amongst his children or other relatives, the farm cannot be carried on except all his legatees agree to carry it on together, or one of them can take to the whole stock and pay off the rest of the persons entitled to it. If the farmer leaves debts, they must of course be paid in the first instance. But assuming the debts to be paid, the question raised by Mr Mewburn is how are the executors to deal with the farm? The natural answer would be, they should sell the deceased tenant's interest in the lease, as well as the stock, and divide the produce amongst those who are entitled to his property. A prudent farmer will by his testament direct how his farm and farming stock are to be disposed of. But, practically, there is usually this difficulty, the lease contains, as most farm leases do, a stipulation that it shall not be assigned without the consent of the landlord; and it often happens that the landlord will not consent to such an assignment as would be most beneficial to his deceased tenant's estate. The effect of such a covenant may be, virtually to render a lease of 21 years available for that period only in case the tenant shall so long live, for the landlord may refuse to assent to any assignment, and the executors may decline to carry on the farm. Nothing can then be done but to sell the stock and surrender the lease. But it may be objected that, should the landlord refuse to accept a surrender of the lease, the executors will remain liable to the extent of their testator's property for the due performance of all the covenants of the lease. Under such circumstances (though they would seldom arise), the executors would not carry on the farm, and would assign it so as to create a forfeiture. These, however, are difficulties which presuppose a landlord to be perversely regardless of his own interest, for, in fact, he is commonly quite ready to concur with the executors of his deceased tenant in transferring the farm and the lease to some other responsible tenant, in most cases to one of the late tenant's own family or connections. Now, by a recent Act of Parliament for the amendment of the law of property and the relief of trustees (22 and 23 Vict., c. 35, s. 27), it is provided that where an executor, liable as such to the rent, covenants, and agreements contained in a lease granted or assigned to his testator, shall have satisfied all such liabilities up to the time of the assignment and shall have assigned the lease to a purchaser thereof, he shall be at liberty to distribute the estate of the deceased amongst the parties entitled thereto without appropriating any part of the estate to meet any future liability under the lease, and the executor shall not then be personally liable in respect of any subsequent claim under the lease. And a subsequent section authorises the executor to distribute the estate, after giving such public notice by advertisements of his intention so to do, without being afterwards affected by claims not then asserted.

Thus, when assignment of the lease has been arranged and made, the deceased tenant's executors are discharged, though of course his estate remains liable in the hands of his legatees for any breaches of the covenants. This may be, and in practice is, guarded against by taking a covenant from the assignee of the lease duly to pay the rent and perform the covenants, and to indemnify the executors and the deceased tenant's estate against all consequences of future breaches of covenant. A well-cultivated farm is not assigned to a man of straw, and by regular and careful arrangements there is really no more difficulty in disposing of a farm lease on the tenant-farmer's death than there is in disposing of a trade or business of any other kind. In any such case proper and well-considered arrangements are necessary. The effect of the stipulation in a farm lease that the tenant shall not assign, is however often very onerous upon the tenant's property in the event of his death, and looking at the present state of husbandry a remedy ought to be provided in every carefully prepared lease. Thus it might be agreed that the landlord should accept as his substituted tenant any person to be nominated in the will of the deceased tenant, or in case of his death intestate by the administrator, provided such nominee were shown to be possessed of sufficient means to carry on the farm. Or it might be agreed generally that the lease should not be assigned until notice of the intended assignment and proof of the responsibility of the intended assignee had been given to the landlord. Either of those stipulations would amply protect the landlord's interest, without unfairly impeding the tenant or his executors in the disposal of the farm. We have seen the latter stipulation, viz., that previous to assigning the lease the tenant shall show that the intended assignee is a responsible person, adopted in practice on several occasions, and always with the most satisfactory results. Such and other details, however, will readily be arranged when once a landowner has determined to improve his property by granting business-like and rational leases. Let the practice of granting leases become general, and the contracting parties would soon arrange the stipulations of their leases so as to provide for the exigencies of human life and business.

One of the benefits a general system of farm leases would confer on English agriculture would be the increased care and deliberation with which farms would be let and taken. The landlord would require proof of the capital and experience of his tenant, while the tenant would scrutinise and be well-advised as to the stipulations of the lease. The preliminary discussion which would often precede the letting a farm on lease would be useful to both parties, and would tend greatly to increase the security of the landlord, and to improve the social and business status of the tenant.

Foreign Correspondence.

(FROM OUR OWN CORRESPONDENTS.)
BY EXPRESS.

PARIS, Friday Evening.

The *Moniteur* of this morning has published the following return of the Bank of France. The figures of last month and of the corresponding period in 1860 are added:—

DEBTOR.	Nov., 1861.	Oct., 1861.	Nov., 1860.
	F c	F c	F c
Capital of the Bank	91,250,000 0	91,250,000 0	91,250,000 0
New ditto	91,250,000 0	91,250,000 0	91,250,000 0
Profits in addition to capital (Art. 8, of Law of June 9, 1857)	2,316,503 57	2,316,503 57	1,510,527 65
Reserve of the Bank & branches	12,980,750 14	12,980,750 14	12,980,750 14
New Reserve	9,125,000 0	9,125,000 0	9,125,000 0
Ditto in real property	4,000,000 0	4,000,000 0	4,000,000 0
Notes in circulation of the Bank and branches	728,566,125 0	766,439,725 0	757,413,025 0
Dratts drawn by the Bank on the branches or the branches on Bank, and payable at Paris or in the Provinces	6,573,619 99	5,051,031 15	6,515,370 0

PARIS, Thursday Evening.

At last the long-expected decree appointing M. Fould to the Ministry of Finance has appeared in the *Moniteur*; but, to the surprise of the public, it is preceded by documents as extraordinary as any which have ever emanated from the Imperial Government. One of these documents is a letter from the Emperor to the Minister of State, containing the important announcement that he "will abandon resolutely the power" of opening in the intervals between the legislative sessions "extraordinary and supplementary credits." Another of these documents is a "memoir" (so it is called) from M. Fould, giving various weighty reasons for that measure, and at the same time presenting some account of the financial situation. Of the desirability of His Majesty's abandoning the aforesaid power, there cannot be two opinions. It has rendered the voting of Budgets by the Legislative Body (the institution which, under the Imperial *regime*, does duty for a House of Commons) a perfect farce. Of what utility, in fact, was the vote by that Body of certain sums for particular purposes, when the Emperor by decree could and did accord large additional sums for the same objects, and, moreover, made grants for purposes on which the Chamber was never consulted? The reasons which M. Fould urges for the abandonment of this system will be, in the eyes of English readers, unanswerable. But, as a substitution for it, he recommends what the French call *virements*,—that is, the power to a Minister of transferring grants

made for special objects to other objects. On this point he will certainly not carry the English with him; but his plan is a great improvement compared with that of unlimited supplementary and extraordinary credits accorded by decree. It is, however, the financial part of his "memoir," which will attract the greatest attention. He does not, indeed, say anything that is new, or that has not appeared in the ECONOMIST in one form or other more than once; notably on the last discussion of the Budget by the Legislative Body and on the publication of the pamphlet on the financial situation by M. Perier. But he groups facts which are startling, and which have made a profound impression on the public,—an impression all the greater from the circumstance that heretofore the invariable policy of the Imperial Government has been to represent things *couleur de rose*, never in their naked reality. These, then, are the facts that M. Fould reveals:—From 1840 to 1847, the extraordinary and supplementary credits accorded amounted to 1,200,000,000f (48,000,000*l*), but from 1851 to 1858—that is the first eight years of the new Empire—they were 2,400,000,000f; in 1859 they were 83,000,000f; in 1860, 115,000,000f; and for the present year they will approach 200,000,000f. And yet the ordinary Budgets in those ten years varied in round figures from 1,500,000,000f to upwards of 2,000,000,000f—a remark I venture to make *en passant*, though it is not in M. Fould's report. On the whole, therefore, the Empire has awarded itself, without the authority of the Legislature, during the ten years it has existed, not less than 96,000,000*l* in English money. After recording this "great fact," M. Fould makes the following statement:—"To provide for these expenses recourse has been had to credit in every form; and even the resources of special establishments, of which the State has the direction, have, with the consent of the public powers, been utilitised. The loans in *rente*, negotiated in 1854, 1855, and 1859, do not amount to less than 2,000,000,000f (80,000,000*l*). On the renewal of the privilege of the Bank, the Treasury absorbed the augmentation of 100,000,000f in the capital imposed on that establishment. The Caisse de la Dotation de l'Armée, which had received 135,000,000f, saw all that sum absorbed by the Treasury, which gave it in return Government stock. Lastly, recourse has been had to a new system of loan, called trentanary bonds, of which this year 132,000,000f have been issued."

M. Fould next makes these remarks, the gravity of which need not be pointed out:—"The public subscribed these loans with great readiness, but it would be a dangerous illusion to count indefinitely on the development of national credit. The state of that credit ought all the more to occupy the Emperor's attention from the fact that the situation of finances preoccupies everybody. In the last discussion of the Budget, it was calculated that the accumulated deficits would by the end of the present year amount to nearly a *milliard* (40,000,000*l*), and that figure is certainly not exaggerated. The Legislative Body and the Senate have expressed disquietude on the subject; and this sentiment has spread in the class of business men, *all of whom presage and announce a crisis*, which will be all the graver from the fact that, in imitation of the State, and with the object of promoting improvement and progress, departments, towns, and companies have launched into considerable expenses."

M. Fould next affirms that "the veritable way of meeting this crisis is to act with promptitude and decision, and to close the source of evil by suppressing supplementary and extraordinary credits." But will that suffice? Must not a loan be raised? Ought not the army and navy to be largely reduced? Ought not the extravagant expenditure which has prevailed for years in every department of the Government to be energetically stopped? And even if all this is done, must not new taxes be imposed? To these questions, M. Fould himself is, according to all accounts, disposed to return affirmative answers; and no doubt we shall soon learn what he has resolved on. Other measures of importance are ascribed to him: the transformation of 4½ per cent. stock into 3 per cent.; the abolition of the tax on the sale of shares and other securities, which in practice is ourdensome and vexatious; the abolition of the payment for admission to the Bourse, which payment has not only destroyed the wild speculation it was designed to prevent, but has done much to limit legitimate enterprise; and, lastly, the breaking up of the monopoly of the stockbrokers, to which nobody, except perhaps the brokers themselves, will object.

The Bank of France is just now assailed with great vigour from different quarters. A pamphlet entitled "De la Banque de France et de la Fixité du taux de l'Escompte," complains bitterly of it for varying its rate of discount according to the fluctuations in its metallic reserve, and according to the variations in foreign markets, especially London. The pamphlet blames it also for not selling its *rentes*, for not making an issue of 50f notes, as it is authorised to do, and at the same time accuses it of thinking more of its own interests than those of the public. It maintains the extraordinary doctrine that the Bank could and ought to maintain a *fixed* rate of discount, say 4 per cent.,—a rate which it kept unchanged from 1820 to 1852, with the single exception of 1847. But, saying nothing of the heresy of such a doctrine, the pamphlet writer entirely overlooks the fact that of late years the Bank is a very different institution to what it was formerly; inasmuch as its operations have undertaken an enormous development, and embrace all France and parts of Europe, instead of being, so to speak, almost confined to Paris. And it follows, not, indeed, that the Bank was right in maintaining a fixed rate of interest in the former stage of its existence, but that it could then do without danger what would be impossible now. The following extract will give an idea of the writer's strange theory:—

A fixed rate of discount would give to national commerce the inappreciable benefit of perfect security as to the ever-regular and easy circulation of engagements representing realised exchanges. Commercial engagements would thus be freed from the fear of a sudden reduction of credit, an element which is all the more disquieting and painful from the fact that it cannot be taken into account in advance in a satisfactory and rational manner, unless by condemning oneself to impossible inaction.

The variability of the rate of discount presents, on the contrary, grave inconveniences. In all countries when that rate is reduced below the habitual level, the Banks, to increase their profits and maintain the amount of their dividends, are less severe in the control of bills to be discounted. The result is an illegitimate extension of commercial credit, a false representation by means of bills at short dates of capital engaged for a long term, and, consequently, a factitious excitation of the movement of manufactures and commerce, to be followed by numerous disasters.

The increase in the rate of discount causes much greater danger. First of all, it occasions a vague and immense disquietude which makes public opinion accept the most alarming hypotheses; business becomes slackened; all the elements of public wealth undergo a great depreciation; the credit of the State is itself attacked, and the operations of the Treasury and of the municipal Caisses are sensibly embarrassed, at the risk of delaying the most urgent works.

The consequences of the rise in discount would be much more dangerous if they were to arrive at the result expected by their authors—that of occasioning an effective diminution in the mass of bills discounted, a real restriction of commercial credit. For then the movement of exchanges would be checked, manufactories would be closed, the most useful works would be suspended, bankruptcies would be increased, the working classes would be deprived of labour and of bread.

It is needless to remark that the author does not indicate *how* his fixed rate of interest is to be attained; unless, indeed, he considers as a proof the simple affirmation that money does not flow from Paris to London when it is dearer there than here, and *vice versa*. Yet this strange pamphlet of his has obtained the hearty praise of two or three daily journals,—one of them a Government organ!

In my last an account was given of the import and export of grain and flour from the 1st January to the 20th October. The following were the imports and exports made from the 21st to the 31st October:—

Designation.	Importations. General Commerce. quintals.*	Importations. Special Commerce. quintals.	Exportations. General Commerce. quintals.	Exportations. Special Commerce. quintals.
Flour	93,219	88,662	9,503	5,952
Wheat, spelt, &c.	919,936	876,534	10,045	5,200
Rye	1,010	968	2,100	2,100
Barley	23,132	23,196	885	740
Maize	11,947	16,359	1,574	67
Oats	14,053	13,834	1,199	1,199

* The quintal is nearly 2 cwts.

"General Commerce," in the French Customs vocabulary, means in imports the total quantities brought in, and "Special Commerce" the portion thereof taken out of bond for consumption. In exports, "General Commerce" signifies foreign *and* French grain and flour, and "Special Commerce" the part thereof which is exclusively of French production.

The Minister of Commerce has just addressed a circular to the Chambers of Commerce, which is of some importance to shipowners. After stating that an Imperial decree, of the 25th August last, authorised, on the payment of certain duties, the French naturalisation of sailing vessels or steamers built in the United States, or sailing under the Union flag, the Minister says that, "in order to give every facility to maritime commerce for the acquisition of American vessels and the rendering of them French, the Government has decided that the purchase may be made not only in the ports of the United States, but also in all foreign ports"; also, that the sending of the said vessels direct to France shall not be obligatory, but they may during six months carry on any operations they may consider desirable in any ports on the way to France; and, lastly, that as regards the composition of crews, the Government will show tolerance when it shall be clear that the minimum of three-fourths of French sailors required by law could not be completed. The Minister adds a declaration which is of special importance to English shipowners:—"The facilities hereby accorded, are, in virtue of the treaties with England and Belgium, to be extended to the vessels of those countries." The duties fixed in the aforesaid decree of the 25th of August, are 25f the French ton on wooden vessels, 70f on iron ditto; 15f the ton on hulls in wood, 50f on hulls in iron; and 25f the 100 kilogs (about 1*l* the 2 cwts) on engines on board the said vessels.

A company under the name of Société Financière d'Egypte, lately announced an issue of shares, and the issue was closed on the 5th. But as the company had the misfortune to be disavowed by the Egyptian Government, under whose auspices it had affirmed itself placed, the subscription to the shares was excessively limited.

The negotiations for the treaty of commerce between France and the Zollverein have been suspended, or, according to some

authorities, broken off altogether. But the semi-official journals of Paris declare that they are shortly to be resumed. It is alleged that some of the States composing the Zollverein require France to make concessions to which she cannot possibly consent.

The return of M. Fould to the Ministry of Finance has afforded the greatest satisfaction to the speculating fraternity on the Bourse, and they have got up a considerable rise in *rentes* and other securities in honour of it. But the gravity of the financial situation as revealed in the Minister's report, and the necessity of adopting measures for providing for it, make many persons think that the advance will not be long maintained. The following are the quotations :—

The following is an account of the markets :—

FLOUR.—Business at *Paris*, during the last week, has not been active, and prices have receded. Yesterday, the quotation was 79f to 83f the sack of 159 kilog. The four marks were for the current month at 80f 75c; December, 81f 75c; January and February, 84f 75c; March and April, 86f.

WHEAT.—At *Paris*, yesterday, offers, though inconsiderable, exceeded the demand, and prices declined 50c, 78c, and even 1f. on certain qualities. Wheat from the Allier and the Centre was offered at 41f to 42f 50c, but not taken; other sorts went at 42f to 45f 50c. Some sales have been made at this last rate. In foreign, the decline has varied from 75c to 1f. American was offered at 39f to 40f; Hungary, 40f 50c to 42f, but at that rate the latter was unsaleable, and 40f had to be accepted. English, Dantzic, and Stettin were at 44f to 46f the 120 kilogs. Of the provincial markets, 19 present a rise of from 8c to 2f; 63 a decline of 10c to 2f 50c; 19 are reported firm, 24 without variation, 11 calm.

COTTON.—At *Havre*, in the week ending Friday, business was at first dull, but became animated, and prices rose. The sales were 12,081 bales, against 1,106 arrivals. The closing quotations were 3f higher for very low qualities; 2f to 3f for low; and 3f for other sorts. Consequently very low New Orleans was at 141f the 50 kilogs; low ditto, 151f; and very ordinary, 158f. The stock, on Friday, was 164,750 bales, against 113,400 at the same date in 1860, and 32,760 in 1859. This week, business has been active, and prices have continued to rise. Very low was yesterday at 144f, and low 154f.

COFFEE.—At *Havre*, in the week ending Friday, business was very animated, and prices advanced. The sales were 300 sacks Hayti Port-au-Prince, disposable, at 86f to 89f 50c the 50 kilogs in bond; 2,000 ditto ditto, for delivery, 85f to 86f; 700 Cape, disposable, 88f to 91f; 500 ditto ditto, for delivery, 87f to 89f; 1,000 Rio, not washed, disposable or in the port, part at 75f to 81f, the other at prices kept secret; 6,350 ditto ditto, for delivery, 74f 50c to 80f; 106 Rio, washed, disposable, 95f; 371 ditto ditto, for delivery, 93f 50c to 95f; 2,900 Ceylon native *triage* for delivery, 110f to 111f 50c duty paid; 500 ditto disposable, 112f. By auction, 115 Maracaibo damaged were also disposed of. The arrivals were about 10,000 sacks. The stock on the 31st Oct. was 3,147 tons. This week, Hayti has been at 90f to 91f; Rio, 71f to 81f; Guayra, 92f; Manilla, 114f; Bourbon, 70f; Gonaives, 92f 50c; Santos, 78f 50c; Ceylon, 112f to 113f. At *Nantes*, last week, no business; this week, same situation. At *Bordeaux*, last week, the sales were 350 sacks Mysore, 114f; 1,100 ditto, 115f; 140 ditto damaged were also disposed of. Some Java went at 118f; 2,700 Guayra, *non-graged*, 89f; 1,400 Costa Rica, 114f; 300 Rio, not washed, 79f to 80f; 2,700 Rio, washed, at prices kept secret; 1,545 Mangalore, 115f. This week, Guayra *trie* has been at 70f; ditto, *non-grage*, 88f; Rio, 104f; French West India, 145f; Java, at prices kept secret. At *Marseilles*, last week, business was not very considerable, but prices were firm. The sales were 1,000 sacks Rio, for delivery, at 73f; 1,000 Rio, very common, 67f; 100 Maracaibo, 86f in bond; 1,000 bales Reunion, 115f duty paid. This week, Guayra has been at 90f to 92f 25c; Maracaibo, 88f 25c; St Dominique, 88f; Malabar, 87f to 88f.

SUGAR.—Business, at *Havre*, in the week ending Friday, was not very active, but prices were firm. 220 casks French West India disposable or for delivery, went at 45f to 46f the 50 kilogs duty paid; 580 Cuba, 45f to 45f 12½c; 650 Havana and Cardenas, 33f to 33f 50c in bond. The arrivals were 1,473 casks and 980 sacks. The stock on the 31st was 16,500 casks French West India, 50,000 bales or sacks Reunion, 38,562 casks and 34,000 sacks in foreign sugar. This week, French West India has been at 46f; Pernambuco, 25f. At *Nantes*, last week, business was very active, owing to the demands of refiners, and prices improved. The sales were 24,240 sacks Reunion at 49f; 7,141 ditto at 49f; 110 ditto, 53f 50c; 3,022 casks French West India, 45f 50c in bond. This week, no business. At *Bordeaux*, last week, 178 casks French West India went at 46f: 82 ditto, 46f 75c to 47f; 65 Santiago, 46f 25c; 150 colonial. The quotations of Havana, Pernambuco, and Bahia were nominally below those of the last week.

INDIGO.—At *Havre*, in the week ending Friday, the only sales were 6 or 7 chests Bengal, 7 Madras, 3 Kurpah, 3 Bombay, at prices kept secret; 3 Caraque, at 7f the ½-kilog. In spite of the dulness of business, prices were very firm. The arrivals were 15 chests. This week, 27 chests Bengal were sold at prices kept secret. At *Bordeaux*, last week, the sales consisted of 44 chests Bengal and 30 Madras; the former at a premium of 4f 25c, the quotation of the latter not given. This week, 4 chests Caraque, 16 Bengal, and 4 Kurpah have been also sold; quotations not given.

HIDES.—At *Havre*, in the week ending Friday, the sales were 5,800 Buenos Ayres dry, at 95f to 117f 50c the 50 kilogs; 600 Rio Grande salted, 66f for cow and 70f for ox; 275 Rio Janeiro salted, 50f; 200 horse, salted La Plata, 83f 50c the 100 kilogs. The arrivals were 2,381. This week, Buenos Ayres dry have been at 101f 50c to 110f; Monte Video salted, green, 70f to 73f; Porto Cabello dry, 85f; Rio Grande salted, 66f to 70f; Maracaibo dry, 85f to 86f 50c; Gambia, 95f; Goree, 90f.

WOOL.—At *Havre*, in the week ending Friday, 215 bales La Plata washed went at 1f 75c to 2f 30c the kilog; 150 ditto German washed, 5f 10c. The arrivals were 312 bales. This week, Russia washed has been at 7f 95c.

TALLOW.—At *Havre*, in the week ending Friday, the demand was active. 26 casks New York, disposable, went at 65f the 50 kilogs; 50 ditto, for delivery, 65f and 66f; 500 Buenos Ayres, for delivery, at prices kept secret. The arrivals were 25 casks. This week, 28 casks Buenos have been sold at prices kept secret. At *Paris*, yesterday, the 100 kilogs went at 133f.

SPIRITS.—At *Paris*, yesterday, 3-6 of 90 deg., first quality, was at 81f the hectolitre; Montpellier, disposable, of 86 degs., 110f. At *Bordeaux*, the day before yesterday, Langnedoc was at 106f; and beetroot, first quality, 92f.

ANTWERP, Nov. 13.

An official return of the navigation of Belgium just published gives these results :—

COMMERCIAL AND MISCELLANEOUS NEWS.

Advices from Calcutta are to Oct. 7. The annexed commercial report is to that date :—Imports—We have had continued and increasing demand for all Manchester staple fabrics during the past fortnight, which has led to a considerable amount of business, much larger indeed than is usual at this period of the year, when, owing to the near approach of the general holidays, dealers, as a rule, feel disposed to do little or nothing. From all the neighbouring marts we have a steady demand, and the accounts from all the upper provinces are such as to strengthen the hands of importers, so that we have to report an advance in the value of all leading Manchester fabrics, with a tendency to a further rise in prices. Exports—For some days after the date of our last report considerable activity prevailed in our produce market, but it has since become quiet; the principal buyers having ceased purchasing on account of the near approach of the holidays, and the advanced rates of freight demanded for ships ready to receive cargo. Stocks are consequently accumulating a little, and a decline has been established in the value of some articles.

The following is dated Rangoon, Sept. 30 :—Imports—Cotton Manufactures—The business transacted in our market during the past month has been insignificant both in its character and extent. Dealers are averse to purchasing unless they have an immediate resale for their investments, or when they can induce importers to accept lower terms. Exports—Rice—Up to the 16th inst. supplies were unusually full for the season, and there were some grounds for supposing that a reduction in value must ensue. The news of a decline in freights at our Chief Bay ports, however, kept exporters steadily purchasing without increasing rates. During the immediate past fortnight, grain supplies have not been so ample, owing to gusty and unsettled weather, and this fact, coupled with the expectation of lately chartered tonnage to arrive shortly, has made some buyers more eager than necessary, so that an advance of 2 rs per 100 baskets has been the consequence, and quotations are now 83 to 88 rs.

The advices from Adelaide, South Australia, by the present mail are at the 28th of September. Trade was dull, and was especially affected by the decline in the rates of two of the principal exports of this colony, copper and wool. The crops looked extremely well, and the clip of wool was likely to be heavy. The price of copper was 87*l* per ton. Burra Burra shares continued to decline, and were at 116*l*. The banks were buyers of bills on England at 60 days' sight at ½ per cent. premium, and sellers to 2½ per cent. premium.

The following is dated Port Louis, Oct. 4 :—Our produce market remains almost in *statu quo*, especially as regards transactions for England. Large arrivals of imports have to be noticed, which have brought down the price of most articles, without, however, encouraging speculation. Business is limited to immediate requirements, and while sugars continue unsaleable, no favourable change can be well looked for. Heavy engagements fall due this month, in presence of which we think the stagnation noticed in our produce market cannot be long maintained. Rice—A further decline has to be noticed in the price of this article, which has arrived in large quantities. Sugar—Only four vessels have been despatched to England since the commencement of the

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The supply of English wheat at Mark lane, to-day, was very small; nevertheless, all descriptions were a dull inquiry, and sales could only be effected by submitting to lower prices. Foreign wheat was held at previous rates; but the amount of business transacted in it was much restricted. The finest samples of barley were firm in value; otherwise, the trade was dull, at drooping currencies. Oats—the supply of which was moderately extensive—moved off slowly, on former terms. Beans and peas were in limited supply, and prices were fully maintained. Flour changed hands to a limited extent, yet no change took place in the quotations, compared with Monday. This week's imports amount to 28,240 quarters of wheat; 12,790 of barley; 18,480 oats; and 14,390 barrels of flour.

At Liverpool, this morning, both wheat and flour were in limited request, at late rates. Maize and other articles sold slowly, on former terms.

The demand for wheat at Alexandria, during the week ending November 4, was active, although less animation was observable towards its close. All descriptions, and especially Beheireh wheat, realised extreme rates. Beans and linseed were very firm. Annexed are the sales:—Saide wheat, private trade produce, 16,720 qrs, 33s to 33s 10d; ditto, ditto, Pasha's produce, 3,125 qrs, 35s 6d to 36s; Beheireh ditto, private trade produce, 10,412 qrs, 32s 6d to 33s 6d; ditto, ditto, Pasha's produce, 2,050 qrs, 33s 3d to 35s 10d; ditto, ditto, Buhi, private trade produce, 620 qrs, 34s to 34s 6d; Saide beans, private trade produce, 7,640 qrs, 27s 9d to 28s 3d; ditto, ditto, Pasha's produce, 940 qrs, 28s 6d; Beheireh ditto, 1,800 qrs, 25s 6d to 26s 6d; barley, 5,940, 20s to 21s; lentils, 630 qrs, 26s to 27s; ceci, 72 qrs, 31s to 32s; linseed, 180 qrs, 48s 6d to 49s per quarter, free on board. The freight market is firmer. Beans by sailing vessel to the United Kingdom for orders may be quoted 6s 6d to 7s per qr, and other descriptions in proportion; to a direct port, 5s 6d to 6s per quarter. The rate by steamer to Liverpool has advanced to 7s, with prospects of further rise.

There has been again a large business transacted in cotton in the Liverpool market during the present week, the total sales amounting to 105,000 bales, including 42,000 bales to the trade, 51,000 bales on speculation, and 12,000 bales for export. Quotations for American are unchanged since Friday last. Surats, for which there is a very strong demand, are ¼d to ⅜d per lb dearer than on that day. To-day's market closes active, with sales of 12,000 bales at extreme rates.

The cotton trade of Alexandria, for the week ending Nov. 4, is thus reported by Messrs Briggs and Co.:—Prices of cotton have again advanced, and extravagant prices are being paid in the villages. We may also remark that in the last two days of the past week no cottons have been sold under 14d per lb, f.o.b. Besides the sales of the week noted as follows, 200 bales of El Hami Pasha's cotton, first and second qualities, in equal quantities, have been bought for arrival at a price equal to 16d per lb, f.o.b. 122 bales old crop, 1860-61, sweepings to fair, 6d to 11d; 50 bales new crop, 1861-62, fully good fair, 12¼d to 13d; 339 bales ditto, good, 13¼d to 13½d; 1,216 bales ditto, fine, 13⅝d to 14⅝d per lb, free on board, making a total of 1,727 bales. Freight, by steamer, has risen to ¼d per lb, and is expected to reach 1d.

EXPORT of COTTON in bales from ALEXANDRIA from 3rd Oct. to 2nd Nov.

The market for raw sugar has been dull; nevertheless, all good and fine qualities have supported former currencies. Most descriptions of refined sugar have sold slowly, on former terms.

COMPARATIVE STATEMENT of SHIPMENTS of SUGAR from the Mauritius, from the 1st August to the 30th September of each Crop.

There has been increased activity in the demand for coffee, and, in some instances, an advance of 6d per cwt has taken place in prices.

With regard to the coffee trade of Ceylon for the fortnight ending Oct. 17, Messrs Fryer, Schultze, and Co. observe:—

The weather has been fine during the fortnight, and shipments of produce have progressed with little interruption. The exports of the present season's crops to date are as under:—

PLANTATION COFFEE.

To Great Britain	cwts 12,432	against last year, cwts	9,333
Foreign Ports	...	—	—
Australia and India	1,858	—	—

NATIVE COFFEE.

To Great Britain	cwts 987	against last year, cwts	2,610
Foreign Ports	...	—	—
Australia and India	1,850	—	—
	2,837		2,610

Plantation coffee, from low estates, has been finding its way in during the past two weeks, but the receipts to date are very far below those at the same time last year, and as yet none of the new gatherings are afloat. Crops are now ripening rapidly, and in some districts a good deal has been got in; the weather has been favourable for curing and transport. The Ouvah native crop is now pretty well exhausted, but as yet very little new Kandy coffee has found its way down. The quality of such parcels as have come to hand is about the average of ordinary years.

On the whole, the public sales of tea, held this week, have gone off steadily, at previous rates. In the private contract market, a fair business has been transacted, at full quotations.

IMPORT and DELIVERY of TEA in London, from Jan. 1 to Oct. 31, 1860 and 1861, with STOCK on hand on November 1, 1860 and 1861.

In rum, sales have progressed slowly. Prices, however, are without quotable change. Brandy is dull, and drooping in value.

The market for indigo continues very firm, at fully the advance already noticed in the quotations. Messrs Thomas and Co., of Calcutta, write as follows in reference to indigo. The communication is dated Oct. 8:—

Indigo—Since our circular of the 6th ultimo, the rivers Jumna and Ganges rose suddenly to a height unknown since 1836, inundating the whole country from Allahabad downwards. At the same time very heavy rains fell over the whole of the N. W. Provinces, causing floods to a greater or less extent in every district. The out-turn of the Doab and Benares will, therefore, probably be less by about 2,000 maunds than we last estimated it. Tirhoot has been partly inundated, and some concerns have lost plant there, but not to any sufficient extent to reduce the out-turn materially. Every indigo district will begin the new season with abundance of moisture, and with lands in very much better condition than last year. The indigo season of 1860-61 has come to an end, and has proved one of almost unparalleled disaster.

The biddings for all kinds of colonial wool at the public sales have been very inactive, and the business doing for export is exceedingly limited. For good and fine qualities, prices, compared

has taken place. Hemp has sold *steadily, at 34l* for clean Russian.

Scotch pig iron has fallen to 49s per ton, cash, mixed numbers. Copper has sold freely; and most other metals have ruled firm, at extreme rates.

Linseed oil has been in good request, and the quotation has advanced to 36s per cwt on the spot. Rape continues dull. Cocoa-nut, olive, and palm rule steady. Sperm, however, is neglected. American spirits of turpentine are quoted at 73s per cwt.

Very little change has taken place in the value of tallow. The market, however, is by no means active. P.Y.C. is quoted at 52s 3d per cwt, and at 53s for January to March delivery. Town tallow, 53s 3d nett cash.

COTTON.

NEW YORK, Oct. 29.—The market presented no change of moment as to prices, while the chief inquiry proceeded from spinners. A sale from store of 1,000 bales was made to a Boston house, on private terms; and from 100 to 200 bales additional, in lots, were sold. We continue to quote middling uplands within the range of 21½c to 22c. The stock in this market it is considered does not exceed 25,000 bales, and may fall below it.

There has been pretty constantly an active demand for cotton during the past week, by far the largest amount of business having been transacted in East India. The trade have purchased Surat freely, at length apparently recognising the necessity of relying mainly on them, whilst artificially deprived of American. The former have consequently advanced ¼d to ½d per lb, whilst American are merely firm at last week's prices. Egyptian are without alteration in value. Brazil are ¼d to ½d per lb higher. The sales to-day are 12,000 bales. The market is firm, but not excited. The reported export amounts to 12,350 bales, consisting of 950 American, and 11,400 East India.

MARKETS IN THE MANUFACTURING DISTRICTS.

The accounts at hand this week from the manufacturing districts are of a more favourable character than those received for some time past. Both for home use and export, increased quantities of goods have been disposed of, and, in some instances, prices have had an upward tendency. The stocks still continue very moderate. Iron has changed hands slowly, on rather easier terms, but the transactions in coals have increased to some extent.

MANCHESTER, Nov. 14.—This week, confidence seems to have greatly enlarged as to the persistence for a time of high prices in cotton manufactures. Business has been done on a considerable scale at full rates, both by buyers on speculation and by those directly connected with the East. The latter have been also encouraged by telegrams from Calcutta to 26th ult., reporting a rise at the conclusion of the holidays of 3 to 4 annas on 7-lb shirtings, and of 1 to 2 annas on others, with more favourable prospects from up-country markets. Where yarns could be secured for delivery during some months to come, orders have been accepted for a proportionate length of time,—a feature which had not existed lately, and which rapidly tells on a diminished production. But many more manufacturers seem determined on closing their mills till a more remunerative rate be attained, whilst others are adapting their machinery to the spinning of Surats.

BRADFORD.—The wool market in all its branches is very similar to that of last week. All bright wools, all bright yarns, and all bright goods are sought up with avidity, and have an upward tendency, but everything else is neglected. Deep-grown wools, of all kinds, must be quoted dearer, and are not difficult to sell at a slight advance from last week. Lustre and mottled yarns are dearer to meet the advance in wool, and show considerable activity. The export trade is very quiet. The piece market is very dull.

ROCHDALE.—As the weather is now becoming cold, though it can scarcely be called wintry, the demand for flannels increases. The trade, it is true, cannot be said to be brisk, but it is slightly improving, and the leading manufacturers are working their machinery full time, or nearly so, and prices keep very steady. The Yorkshire trade, too, is rather better, which is partly attributable to the orders for America. Woolsshow scarcely any variation in demand or prices, and the latter are nominally the same as last week.

HUDDERSFIELD.—The low goods trade continues very quiet, and stocks on hand heavy. The demand for plain goods, of all descriptions, in black and mixture doeskins, and superfines is also extremely flat.

LEEDS.—In the coloured hall some very fair parcels of winter goods, as meltons, tweeds, and ordinary cloths, were made up by merchants, and there was also in the warehouses a good demand for blankets, principally designed for the use of the Federal Government and our own soldiers. A few shipping orders are in process of execution. The flax trade is still without any perceptible improvement.

LEICESTER.—There is a fair demand for hosiery goods. Yarns are very high in price, and extreme rates are obtained, spinners being well employed. There is no material change in the price of wool; the demand, however, is slow, and the market is tolerably firm.

NOTTINGHAM.—There has been a shade more doing in some departments of the lace trade, but business, upon the whole, is in a very depressed condition. Plain goods are selling to a small extent; there is also a little doing in fancies. Great dulness is experienced in the silk lace trade. The demand for hosiery is tolerably good.

BELFAST.—There has been more done in exports, chiefly by houses which have representatives in the chief cities. For the Continent, there is only a small business going on. Home markets are taking larger quantities of medium fabrics, and for the heavier descriptions a fair demand exists.

WOLVERHAMPTON.—Current prices of pig iron:—Staffordshire cold blast, *4l 5s*; Old Windmill End Mine, Nos. 1, 2, and 3 melters, warm air, *4l*; Old Windmill End, second quality,

Nos. 1 and 2, melting pig iron, 3*l*; Old Windmill End Mine forge pig iron, 3*l* 5*s* to 3*l* 7*s* 6*d*; best native hydrate pigs, 3*l* 7*s* 6*d* to 4*l*, according to the brand; first-class All Mine grey forge pigs, 3*l* 5*s* to 3*l* 7*s* 6*d*; Seend Grey Forge Mine pig iron, 3*l* to 3*l* 2*s* 6*d*; Seend Mine melting pigs, 3*l* 10*s* to 3*l* 15*s*; good mine pigs, with a modicum of flue cinder, 2*l* 10*s* to 2*l* 15*s*; mine pigs, deteriorated by cinder, 2*l* 10*s* to 2*l* 12*s* 6*d*; Cleator Moor hæmatites, 3*l* 5*s*; Barrow hæmatites, 3*l* 5*s*; Workington hæmatites, 3*l* 5*s*; grey forge cinder pig iron, 2*l* 10*s* to 2*l* 15*s*; white forge cinder pigs, 2*l* 5*s* to 2*l* 10*s*; ordinary melters, Nos. 1, 2, and 3, 2*l* 12*s* 6*d* to 2*l* 17*s* 6*d*; superior makes of mine melting iron, 3*l* 7*s* 6*d* to 3*l* 17*s* 6*d*, according to make and quality. The above prices are all delivered on to the wharfs at the South Staffordshire manufactories. Gadlys (Aberdare, South Wales), No. 1 foundry pig, cold blast, 4*l* 10*s* f.o.b. Favourite Shropshire and Forest of Dean brands, hot blast, 3*l* 12*s* 6*d* to 3*l* 15*s* delivered; Northern hæmatites, 3*l* 5*s*, according to brand or quality.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Oct. 29.—The flour market was firm, with a good demand from the trade, and for some descriptions prices slightly improved. The sales for the day footed up here and to arrive about 27,000 brls, closing within the following range of prices:—Superfine State, 5.45 to 5.50 dols; extra State, good to choice, 5.45 to 5.95 dols; superfine Western, 5.45 to 5.50 dols; common to choice Western extra, 5.70 to 6.60 dols; extra Canada, 5.70 to 7.75 dols; mixed to straight Southern, 6.20 to 6.40 dols; straight to good extra ditto, 6.45 to 7.25 dols; choice extra family and bakers' brands, 7.25 to 8 dols; rye flour, 2.90 to 4.20 dols; corn meal, Jersey and Brandywine, 2.80 to 3.25 dols. Canadian flour was firm, and in good request. The sales embraced 1,800 brls, closing within the range of the above prices. Southern flour is in good demand, with sales of 700 to 800 brls, closing within the range of the above prices. Rye flour was steady at quotations, with sales of 400 brls. Corn meal was in fair request, and rates steady at our figures, with sales of 200 brls. Wheat was firmer at the opening, but, owing to firmness in freights and large receipts, the market, though active, closed dull and rather easier at Saturday's prices.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Notwithstanding that most of the leading markets of consumption have been fairly supplied with English wheat, the demand for both red and white qualities has continued steady, and, in some instances, prices have further advanced 1s per quarter. Fine foreign samples have produced rather more money; but inferior kinds have commanded very little attention. The inquiry for malting barley has certainly improved; but grinding and distilling sorts have moved off slowly, at about stationary prices. On the whole, the malt trade has shown signs of improvement, at fully late rates. Good sound oats have realised quite as much money; but low and damp parcels have gone a shade lower. Both beans and peas have sold readily on former terms, and the flour trade may be considered somewhat active.

The French markets, almost generally, continue to feel the effects of the late heavy importations of wheat and flour. Prices are still drooping, and scarcely any business is doing on speculation. The outflow of food from America is still very large, and the stocks of wheat in the interior of the country are represented as heavy for the time of year.

The Scotch markets have shown rather more firmness for wheat; nevertheless, very little change has taken place in the quotations. Barley and oats have moved off readily, at very full prices, and other kinds of produce have realised extreme currencies. The shipments of grain to the South have continued on a very moderate scale.

In Ireland, there has been a fair average business doing in most descriptions of wheat, and fine samples have ruled a shade higher. Spring corn, maize and flour have commanded full quotations. The advices in reference to the potato crop continue conflicting.

At Mark lane, to-day, the demand for wheat was in a very sluggish state, and sales could only be effected by submitting to lower prices. Foreign wheat was held at previous rates; but the transactions in it were very limited. Barley was dull, at late quotations. Oats moved off slowly, on former terms; but beans and peas were firm, at extreme currencies. In flour, very little was doing, at late rates.

Mr E. Rainford reports that, since the 7th inst., there have been 33 arrivals, off coast, for orders, viz., 13 cargoes of wheat, 15 maize, and 5 miscellaneous. The business doing in cargoes afloat has been very moderate, and, in some instances, prices have been rather drooping.

The London averages announced this day are:—

	qrs	s	d

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT, pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 13th day of November, 1861.

ISSUE DEPARTMENT.

	£		£
Notes issued	28,206,675	Government Debt	11,015,100
		Other Securities	3,634,900
		Gold Coin and Bullion	13,556,675
		Silver Bullion	..
	28,206,675		28,206,675

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	10,812,187
Rest	3,164,899	Other Securities	16,392,515
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	3,769,269	Notes	7,477,225
Other Deposits	13,190,306	Gold and Silver Coin	805,820
Seven Day and other Bills	810,273		
	35,487,747		35,487,747

Dated the 14th November, 1861. M. MARSHALL, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	21,539,723	Securities	27,301,702
Public Deposits	3,769,269	Coin and Bullion	14,362,495
Private Deposits	13,190,306		
	38,499,298		41,664,197

The balance of Assets above Liabilities being 3,164,899*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£35,874
A DECREASE of Public Deposits of	471,620
A DECREASE of Other Deposits of	324,935
A DECREASE of Government Securities of	900,000
A DECREASE of Other Securities of	68,349
An INCREASE of Bullion of	151,721
An INCREASE of Rest of	15,801
An INCREASE of Reserve of	195,586

The principal features in the above account are the changes in the Government securities and the public deposits, which arise from the repayment to the Bank of a large sum borrowed by the Treasury on deficiency bills. An increase has again taken place in the reserve, and also in the bullion. The other securities continue to diminish.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1851:—

At corresponding dates with the present week	1851.	1858.	1859.	1860.	1861.
Circulation, including bank post bills	£ 20,775,174	£ 21,552,123	£ 22,330,133	£ 21,438,067	£ 21,539,723
Public deposits	6,938,290	6,821,973	6,425,066	5,804,022	3,769,269
Other deposits	9,308,899	12,561,558	14,642,617	12,603,792	13,190,306
Government securities	13,241,768	10,808,591	10,925,157	9,490,273	10,812,187
Other securities	11,318,439	14,711,033	18,870,785	20,310,515	16,392,515
Reserve of notes & coin	10,109,779	12,380,861	9,867,650	7,130,541	8,283,045
Coin and bullion	15,695,344	18,638,916	16,860,730	13,314,811	14,362,495
Bank rate of discount	3 p. c.	3 p. c.	2½ p. c.	6 p. c.	3 p. c.
Price of Consols	99	98¼	96	93⅜	92⅝ xd
Average price of wheat	36s 4d	41s 10d	42s 10d	58s 9d	59s 8d
Exchange on Paris (shrt)	25 10 15	25 5 12½	25 7½ 12½	25 17½ 25	25 27½ 35
— Amsterdam ditto	11 17 17½	11 14 15	11 13½ 14	11 14½ 15	11 18 18¼
— Hamburg (3months)	13 10¼ 10½	13 6¾ 7	13 5½ 5¾	13 7¼ 7½	13 8¼ 8¾

In the corresponding week of 1851, further demonstrations in favour of Kossuth had taken place in London, Birmingham, and Manchester. The ultimate fate of the Crystal Palace was causing some discussion, the general feeling being against its removal from Hyde Park. Submarine electric telegraph communication between France and England had been opened to the public. From abroad, appeals to the army were being made both by the President of the French Republic and by the Assembly. It was reported that the Austrian Minister of Finance was contemplating a new foreign loan. Silver in Vienna had risen to 28 per cent. premium. Further advices had been received of the productive yield of the Australian gold-fields. The London money market continued very easy, and some more gold mining companies had been launched.

In 1858, a very confident feeling prevailed in financial circles in France, and the 3 per Cent. Rentes had risen to 75f 20c. At home, the payments were in progress in the second Indian debenture loan.

In 1859, the East Indian Railway having contracted a debenture loan of 1,600,000*l*, on which 5 per cent. had been paid, preparations were being made to provide the balance, the whole of which fell due on the 21st instant.

In 1860, the Bank of France was experiencing great pressure for money, and had raised its rate of discount from 3½ to 4½ per cent. A contract had also been entered into with English bullion merchants for a supply of 1,000,000*l* in gold, in consequence of which withdrawals had taken place from the Bank of England to the amount of 713,000*l*. The rate of discount here had therefore been put up from 4½ to 5 per cent., and afterwards to 6. The affairs of the Grand Trunk Railway Company of Canada continued to be discussed at much length, both in the press and by the general public. The Empress of the French had just visited England. News had been received of the march of the allied forces on Pekin. King Victor Emmanuel had entered Naples, and met with the most enthusiastic reception. The siege of Gaëta was being actively carried on. The advices from New York announced that the election of President Lincoln might be considered certain, and the threats of secession by the Southern States were causing more uneasiness, although the general belief in the North was still that no real separation would take place.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1851, a deficiency of 2,509,540*l*; in 1858, a deficiency of 2,149,475*l*; in 1859, a deficiency of 4,228,168*l*; and in 1860, a deficiency of 7,706,283*l*. In 1861, the deficiency is 3,202,209*l*.

DISCOUNT AND MONEY MARKET.—The demand for money this week has again been very quiet until to-day, when a slightly increased inquiry took place. The rate for the best short paper, however, remains at 2⅝ per cent., and the supply of capital continues very abundant. The following are the general terms for first-class bills at various dates, the charges necessarily varying in some degree at the different establishments:—

30 days	2⅝ per cent.
60 days	2⅝ to ¾ per cent.
3 months	2¾ per cent.
4 months	3¼ per cent.
6 months	3½ per cent.

On the Stock Exchange, loans on Government securities could yesterday be obtained at 1½ per cent., but to-day 2 per cent. was usually demanded.

Notice has been given by the Agents-General of the Crown Colonies that tenders will be received up to the 25th instant for 200,000*l* 6 per cent. debentures of the Cape of Good Hope, issued by the local Government for the general purposes of the colony. The debentures will be of 100*l* each, with interest from the 1st of next month, and redeemable in 12 years from that date. A deposit of 5 per cent. is required on allotment, and the remainder on the 3rd of December. The following memorandum details the present liabilities of the colony; but, with reference to the sum guaranteed on the Cape Town Railway, it should be mentioned that in the first instance it is for 30,000*l*, the Government receiving a sub-guarantee from certain landowners and others for a moiety of the amount:—

Debentures placed on the London market:	£	£
For the promotion of immigration		75,000
For the construction of a breakwater in Table Bay		200,000
For public works in the colony		150,000
		425,000
Debentures issued in the colony:	£	
For immigration	80,000	
For public works	38,400	
For roads and bridges	21,250	
		139,650
Total debt, bearing interest at 6 per cent.		564,650

Interest at 6 per cent. is also guaranteed by the Government on 52,500*l* raised for carrying out improvements in Port Elizabeth, Kowie Harbour, and Mossel Bay.

The increasing port dues of these several places, which are mortgaged for the debt, render this liability merely nominal.

A sum not exceeding 15,000*l* per annum is also guaranteed as interest upon 500,000*l* capital of the Cape Town and Wellington Railway.

These constitute the whole of the debts and liabilities of the Government.

The Bank of France return for the past month was pub-

lished in the *Moniteur* of this morning, and exhibits the following results:—

DECREASE.	£
Cash in hand	780,000
Bank notes	1,510,000
Treasury balance	40,000
Current accounts	480,000
Advances	400,000
INCREASE.	£
Bills discounted, not yet due	1,080,000

The following are the rates of discount in the principal cities of the Continent:—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	6	5
Vienna	6	6
Berlin	4	3½
Frankfort	4	3½
Amsterdam	3	3
Turin	6½	6½
Brussels	4	3½
Hamburg	...	3¼
St Petersburg	7	8

ENGLISH FUNDS.—The funds this week have been favourably influenced by purchases said to be on account of the Court of Chancery, and also by the new financial measures in France. The latter events have stimulated speculative operations for the rise. Compared with last week, Consols have risen a quarter per cent., the final prices this evening being 93⅞ to 94 for money, and 92⅝ to ⅝ ex dividend for the account. The uneasiness lately felt regarding our relations with the United States appears to have subsided, and political considerations generally seem for the present to have exercised little influence on the market.

The recent advance in Exchequer bills has been followed by a partial reaction, the June issue having fallen to 13s to 16s premium. This decline is attributed to the expectation that the Government may exercise the power of altering the rate of interest at the end of the six months from their date of issue, with the alternative of paying them off at par. The March bills are without change at 7s to 11s premium, while India bonds are firmer at 13s to 16s premium.

The public continue to invest freely in India Five per Cents., and a renewed improvement has taken place to 106⅝ to ⅞. For the account, the quotation is 104¼ to ⅜ ex dividend.

Another rise has taken place in rupee paper, the Five-and-a-Half per Cents. being last quoted 105 to ½, and the Fives 98¾ to 99¼.

FOREIGN STOCKS.—There has been increased buoyancy in the foreign market, and, in several cases, an advance has taken place. Venezuela bonds have been in good demand, especially to-day, on the satisfactory tenour of the advices from that Republic. Other Spanish-American descriptions have also improved. There has been a rather active inquiry for the certificates of the confiscated coupons on the Spanish debt, and a further rise has been established, the quotation being at one time as good as 7⅛. The ordinary stock is likewise higher. Mexican has experienced a renewed advance, and remains firm in the market, holders appearing unwilling to sell at the present prices with the large accrued dividends on this stock. Buenos Ayres securities steadily maintained the previous improvement. Russian Four-and-a-half per Cents. have been purchased to a moderate extent, in anticipation of the dividend next month. The new Italian loan has rallied, in sympathy with the movement in the Paris Bourse. Turkish Sixes have risen about 1 per cent. French Three per Cents. closed this evening on the Paris Bourse at 69f 65c, showing an improvement in the week of nearly one per cent. The advance has been mainly caused by the accession of M. Fould to office, and the consequent financial changes, but in some quarters it is also considered partly attributable to efforts to keep up the market, so as to assist the floating of the new loan.

The Committee of Turkish Bondholders state that the money lodged in the Bank of England on account of the loan of 1858 is understood to be about 90,000*l*. The bonds for the sinking fund of 56,180*l* (being 1 per cent. on the total of 5,000,000*l*, in addition to the dividend on the debt already cancelled) will be drawn next month.

The following satisfactory letter respecting the affairs of Venezuela has been published:—

Sir,—Letters by the West India mail were delivered too late yesterday to admit of my sending you the following information, which will be interesting to many of your readers. The news from Venezuela is to October 22, and during the previous fortnight great progress had been made in the pacification of the country, many of those who had been hostile to the previous Governments having voluntarily sent in their adhesion to General Paez, whose Government daily acquired strength and popularity.

A charter had been granted to the Bank of Venezuela, at the head of which is the well-known firm of Pardo and Co., with many others of the highest standing in that country. This measure, which was to come partially into operation on the 1st of this month, has given great satisfaction, as being likely to afford immediate and considerable relief both to the public and the Government. A very great rise has also taken place in the value of the paper currency, which represents some portions of the internal loans raised in 1859 and 1860, especially in the notes of the smaller amounts, which most beneficially affects the humbler portion of the population.

The cultivation of cotton was also exciting the most lively interest among all classes. It is well known that some of the best cotton has been produced in Venezuela, where there are immense districts capable of growing it to any extent; but it has required more capital than they have hitherto been able to command. The quality, and the shortness of the voyage to England, give them many advantages over some of the more distant parts of the world; and, to encourage the introduction of capital for its more extended cultivation, the Government have expressed their desire to afford every possible facility to those who are willing to join in so desirable an object.

FREDK. H. HEMMING, Consul for Venezuela.

25 Moorgate street, Nov. 14.

Annexed is a less favourable communication from the Ecuatorian Commission of Agency:—

The mail from Guayaquil has brought a remittance on account of the dividends on the debt of Equador of 3,000*l*. Intelligence has been received by the same opportunity of the failure of Messrs Gutierrez and Co., who held the agency for receiving from the Custom House and remitting to England the funds for the dividend until the 28th of July last, when, in consequence of the delay in making remittances by Messrs Gutierrez and Co., the agency was transferred, by order of the Commission of Agency, to the hands of the British Consul at Guayaquil, Mr Francis Mocatta. The amount remaining in the hands of Messrs Gutierrez and Co. not remitted is 42,521 dols, to which is to be added the draft on Messrs F. Huth and Co., not accepted, for 3,697*l*, making in sterling about 10,075*l*. A meeting of the creditors of the house had been held on the 11th of October, at which it was proposed, in consequence of the high personal character of Mr Gutierrez, that the estate should be liquidated under his management, placing all funds collected in deposit until a dividend should be made.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and this day:—

RAILWAYS AND OTHER SHARES.—Business in the railway market continues restricted by the apprehended stagnation of trade in the winter, but prices are generally firm. The fortnightly settlement this week showed a limited supply of stock; Lancashire and Yorkshire, and Midland, being especially in demand for transfer. Owing to the cheapness of money, holders are unwilling to sell, especially with the inducement of the extra receipts from the Exhibition next year. Great Northern has been flat, owing to the competition of the Eastern Counties for the coal traffic from the

North. South-Eastern has also declined, the weekly returns in this instance being exceptionally unfavourable. London, Chatham, and Dover, on the other hand, has improved. Eastern Counties has been rather heavy. The market closed this afternoon with a generally steady appearance.

In the colonial department, Indian guaranteed stocks have again been in demand for investment, and occasionally show an advance. Canadian descriptions are also higher, especially Great Western of Canada shares.

The principal feature in the foreign market has been a rise in Sambre and Meuse shares. South Austrian and Lombardo-Venetian have also improved to 1½ to ⅝ premium. American securities have shown increased strength, particularly Erie ordinary and preference shares.

In miscellaneous descriptions, there has been a renewed improvement in United Mexican Mining. Joint stock banks have also been inquired for, especially Bank of London and London Joint Stock. Mercantile Fire Insurance have advanced to ¾ to ⅞ premium on the issue of the Directors' report.

Subjoined is our usual list of the closing prices of the principal railway shares last Friday and this day:—

Foreign Exchange.—The tendency this week is again rather dull, the rates on Hamburg and Amsterdam especially showing a decline.

Bullion.—Annexed is the weekly circular of Messrs Pixley, Abell, and Langley, on the movements in bullion during the week, and the transactions in Indian rupee paper:—

Gold.—Our market is still without any great demand for gold for export; and although about 10,000*l* was withdrawn from the Bank on the 8th inst., the greater part of any amounts now arriving will be sent to the Bank of England; in fact, that establishment has purchased during the past week about 248,000*l*, partly consisting of gold ex Tyne, from Brazil, that has been refined, and partly of the gold ex Anglesea, from Melbourne; and further sums are likely to be sent to the Bank during the next few days. The remittances to America continue to a trifling extent, the Norwegian having taken 5,000*l*, and the Etna 7,880*l*. The other exports comprise the Oneida, to Brazils, with 3,378*l*, and Delta, to Bombay, with 8,985*l*. The imports have been the Anglesea, from Melbourne, with 292,000*l*; the Ethiope, from Africa, with 5,500*l*; and the Seine, from the West Indies, with 30,200*l*. The Australian mail reports the sailing of the Roxburgh Castle with 201,000*l*, and the Wellesley with 307,000*l*. The Salsette brings by the overland route 129,000*l*, and we are hourly looking for the arrival of the James Wilson with 76,000*l*.

Silver.—Our anticipations that the Delta would take a large amount of silver to Bombay have been verified, that vessel having sailed with 223,920*l*. The market still remains firm at our last quotation of 5s 0⅝d per oz standard; and although the Seine has arrived from the West Indies with 120,000*l*, we do not look for any decline in price, as the demand for the next Bombay mail is likely to be active. The Oneida has taken 9,500*l* to the Brazils, and the other exports have been unimportant.

Mexican Dollars.—A few small orders that have come on the market have caused a slight rise in the price; the transactions, however, have not been to any extent, and we quote the rate 4s 11⅝d per oz.

Exchange on Bombay and Calcutta, for banks' drafts at 60 days' sight is 1s 11⅞d to 2s; bills with douments, 1s 11¼d to 1s 11½d. On Madras, 1s 11½d to 1s 11⅝d.

India Government Loan Notes.—The prices of these securities have an upward tendency. We quote the 5½ per Cents. 105 to 105½, and the 5 per Cents. 98¾ to 99¼.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; bar gold, fine, 77s 9½d per oz std; bar gold, refinable, 77s 11d per oz std; Spanish doubloons, 75s 6d to 76s, nominal; South American doubloons, 73s 8d per oz; United States gold coin, 76s 5d per oz, last price. Silver—Bar silver, 5s 0⅝d per oz std, last price; bar silver, containing 5 grs gold, 5s 1¼d per oz std; fine cake silver, 5s 5⅜d to 5s 5½d per oz; Mexican dollars, 4s 11⅜d per oz; Spanish dollars (Carolus), 6s 6d per oz, nominal.

About 92,000*l* in gold, chiefly Australian, by the Anglesea, was taken to the Bank to-day.

The rate of insurance on the James Wilson gold ship, now 125 days out from Melbourne with 76,000*l*, has advanced to eight guineas per cent.

Public Companies.—A meeting of the Union Steam Ship Company took place on Tuesday, when a report was presented, stating that the available balance of profit was 5,876*l*, out of which a dividend of 1*l* per share free of income tax was recommended. It was announced that the negotiations with the Government for a renewal of the postal service to the Cape of Good Hope, after the termination of the present contract, are still pending, owing, it is believed, to some delay in the receipt of a despatch from the colony. The local Parliament, however, have expressed a wish that the service shall be left in the Company's hands. A movement is on foot to obtain mail communication with the Mauritius, and, by running steamers in concert with the Peninsular and Oriental, to give the Cape a regular fortnightly postal service with India and China, and also with England *via* the Red Sea. The fleet is in a complete state of efficiency, and the ships are all insured. After some discussion the report was adopted, and the dividend declared at the proposed rate.

An amalgamation is said to have been arranged between the new London and Lancashire Fire Insurance Company and the Queen Insurance Company. It is intended to carry on the business of the amalgamated undertakings separately, the Queen Insurance conducting the life department, while the fire business will be managed by the London and Lancashire.

The first half-yearly meeting of the Trust and Agency Company of Australasia took place yesterday, when a report was presented, stating that the first series of shares, representing 125,000*l*, had been successfully placed, the applications for this issue having exceeded 200,000*l*. An experienced agent has been sent out, and arrangements finally completed for commencing business in New South Wales, Victoria, and Queensland. An extension to New Zealand is also being considered. The Directors propose shortly to issue the second series of shares, in the first instance to the existing proprietors, and the remainder to the public. Large subscriptions have already been promised. Money will also be raised by debentures, which, from the difference of interest here and in the colony, will leave a considerable margin of profit. The emigration to Australia has received a great impulse from the crisis in the United States, and the emigrants to these colonies are now larger in number than to any other quarter of the globe. The last advices, received yesterday, describe the New Zealand gold-fields to be increasingly productive. After a few remarks from the Chairman, the report was adopted unanimously, without discussion.

The prospectus of the Mercantile Bank has been issued. The proposed capital is 1,000,000*l*, in 10,000 shares of 100*l* each.

The Government are stated to have accepted the resolutions passed at the recent meeting of the Red Sea Telegraph Company, subject to the new Company raising its capital and despatching a vessel with the required amount of fresh cable.

A prospectus has been issued of the Universal Private Telegraph Company, with a capital of 100,000*l*, in shares of 25*l* each.

Subscriptions for the unappropriated shares in the (new) Telegraph to India Company will be received up to and inclusive of the 20th instant, the allotment taking place the following day.

It is announced by the Directors that the list of applications for shares in the Paris Land Company (Limited) will close on Wednesday, the 20th instant.

The Indian Carrying Company announce that no further

applications for shares will be received after Wednesday, the 20th instant.

FAILURES AND MERCANTILE EMBARRASSMENTS.—The stoppage has taken place of Messrs Kelly and Co., the publishers of the London Directory. It is stated that the estate will probably pay 20s in the pound, provided a question connected with a valuable copyright can be satisfactorily adjusted. No delay will be caused by this disaster in the publication of the Directory for next year.

The suspension has been announced of Messrs Bedford, Burys, and Co., an extensive house in the Sheffield trade.

The suspension has taken place of Messrs Amott Brothers, silk mercers, of St Paul's churchyard, with liabilities for about 30,000*l*. The assets are said to be considerable. The failure is attributed to large losses on stock during the depressed state of trade.

A meeting of creditors of Messrs Barnard, Rosenthall, and Co. was held this morning, when a balance sheet was presented showing liabilities 66,857*l*, and assets 44,655*l*. In addition, there have been consignments to New York of goods costing 33,567*l*, but the consignee, a relative of one of the partners, states that the net sum realised for these articles has been only 1,645*l*. In the opinion of a committee of creditors appointed to investigate this case, there are many unsatisfactory features in the transaction, and they decline to accept the result arrived at by the consignee as the true position of affairs. The firm has been in existence for many years, but until a very recent period, when the shipments to America commenced, never owed more than 9,000*l* or 10,000*l*. It was, therefore, considered singular that the house should have suddenly commenced a large class of business entirely different from their ordinary trading, and which, according to their own showing, has turned out so disastrously. The drawings of the partners also excited dissatisfaction, having continued up to the eve of suspension. After some discussion, and the hearing of explanations from the insolvents, it was resolved to take the estate into the Court of Bankruptcy. An offer of 6*s* 8d in the pound was declined.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 3 per mille premium, and the short exchange on London is 25.27½ per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 1-10th per cent. dearer in London than in Paris.

The course of exchange at New York on London for bills at 60 days' sight is about 107½ per cent., which, when compared with the mint par between the two countries, shows that the exchange is against England; but, after making allowance for charges of transport and loss of interest, the present rate leaves no profit on the transmission of gold to the United States.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

For Report of This Day's Markets, see "Postscript."

Mincing Lane, Friday Morning.

Sugar.—Several parcels of foreign muscovado (chiefly Cuba) sold at the close of last and the commencement of the present week, but the public sales have since gone off without spirit, as the market on Tuesday opened more quietly than had been generally anticipated. Importers, however, bought in freely rather than accept any decline. West India is unaltered, with a moderate inquiry from the refiners. 495 casks Barbadoes, by auction, about one-third part sold at 35s 6d to 41s 6d. Of 230 casks other descriptions, a portion only found purchasers at former rates. Some of the low soft grey East India, by auction, sold upon easier terms. The landings last week were 2,615 tons, and the deliveries reached 4,500 tons, consequently the stock at the close was reduced to 78,850 tons; this, however, being larger than at the same period in the three preceding years.

Mauritius.—4,171 bags, by auction, about half sold: brown, 32s to 34s 6d; low grey to middling greyish yellow, 35s to 39s 6d; crystallised, 42s 6d to 44s; grainy, 39s 6d to 40s per cwt.

Bengal.—1,565 bags Gurpatta date were taken in at 39s to 39s 6d for middling to good middling. Privately, business has been done at 38s 6d to 39s per cwt.

Bombay.—200 bags sold at 33s per cwt for bright soft yellow.

Manilla.—The sound portion of 16,109 mats clayed was bought in at 37s, about one-fourth part washed being sold at 33s 6d to 34s.

Penang.—1,840 bags were principally sold: low grey to good greyish yellow, 35s to 39s 6d; brown, 31s 6d to 34s 6d per cwt.

Foreign.—2,292 boxes Havana were withdrawn at high prices: white (18s 4d duty), 51s; grey to florettes, at 41s 6d to 48s. 1,114 casks 303 barrels Porto Rico were partly sold: brown and grey, 36s 6d to 40s 6d; yellow, low to fine, 38s to 44s 6d. 1,407 casks 186 barrels Cuba partly sold: brown, 32s to 35s 6d; grey to good yellow, 36s to 41s 6d. 100 boxes clayed part sold at 50s for white, 18s 4d duty. Privately, 1,500 casks Cuba have sold; also some Porto Rico. A floating cargo of Cuba has sold at 24s per cwt for the United Kingdom, and 400 tons China to arrive at 25s per cwt.

Refined.—No change of importance has transpired in the market, which is rather quiet, with a moderate inquiry for dry goods. Crushed and pieces command a steady sale.

Molasses.—Few sales are reported in West India, but 100 casks Cuba muscovado have realised 16s per cwt.

Melado.—600 casks Cuba sold privately at 27s 6d to 29s. At auction, 181 casks were bought in at 25s 6d to 28s 6d per cwt.

Rum.—The market is quiet, and quotations for West India do not show any alteration since last Friday. 250 puncheons Cuba have sold, of which the price has not transpired. A small quantity of fine Jamaica sold at 4s 6d per gallon. The total stock in London is 33,120 puncheons 3,653 hhds, against 28,150 puncheons 3,750 hhds at the same time last year.

Cocoa.—329 bags Trinidad, by auction, were disposed of as follows: low grey to good red, 60s to 76s per cwt, being about the previous value.

Tea.—The market maintains the improved tone noticed of late, and a steady demand prevails from the trade. New season's congous, just received from Hankow, have sold readily at full quotations. Public sales, on Wednesday and yesterday, comprising 13,156 packages, went off at about former rates for green teas and congous, and 5,700 packages sold in the room.

Coffee.—Quotations of plantation Ceylon have advanced about 6d at the public sales, and all other descriptions are very firm. Of the former, 1,420 casks 427 barrels and bags found buyers at 73s to 80s 6d. 3,051 bags 66 casks native: small berry to superior, 67s to 70s 6d; one lot, 71s. 13 casks Jamaica: fine fine ordinary to middling, 70s to 82s. 440 cases 52 bags Naidoobatum were principally taken in at 92s to 95s. 800 bags Malabar sold at 52s 6d to 55s 6d for triage, &c. Some few lots of good Tellicherry realised 84s 6d to 88s. A floating cargo of good first Rio has sold at 56s per cwt for a near continental port.

Rice.—Sales in parcels on the spot have been rather limited, and prices are nominally unaltered. A floating cargo of Necrancie Arracan, to be shipped next spring, has been contracted for at 11s. 100 tons Balsam to arrive sold at 10s 6d per cwt ex ship.

Imports and Deliveries of Rice to November 9, with Stocks on hand.

	1861.	1860.	1859.	1857.
	tons	tons	tons	tons
Imports	64500	33150	31800	77400

Stock	27170	40150	74000	88700

Spices.—There has been more business doing in brown nutmegs, and 107 cases, by auction, went 1d to 2d per lb dearer for some kinds: small sizes, 11d to 1s 2d; middling to fair mixed, 1s 3d to 1s 7d; one lot sold at 3s. 13 cases mace realised 1s to 1s 3d for low middling to fair. 9 cases Penang cloves: very ordinary to good, 1s 0½d to 1s 4½d. 229 bags greyish Singapore pepper partly sold at 4d. The market is less active than of late, large sales being declared. 637 bags Singapore white sold steadily at 6d to 6⅛d per lb. Of 581 cases Cochin ginger, the bulk sold, at and after the sale, at 2*l* 10s to 5*l* 8s for wormy and rough to superior bold soft, 170 mats Japan cassia, 33s per cwt for ordinary and chips.

Sago.—302 boxes good middling small grain, by auction, sold at 23s 6d to 24s per cwt.

Saltpetre.—Fully 6d advance has again been paid, making the advance on Bengal 2s per cwt from the late lowest point. The last transactions were at 35s 6d to 36s per cwt for fine quality.

Imports and Deliveries of Saltpetre to November 9, with Stocks on hand.

	1861.	1860.	1859.	1858.
	tons	tons	tons	tons
Imported	9880	11485	13365	9190
Delivered	10190	10990	15340	12290
Stock	3006	4340	3980	2950

Shellac.—The market is unsettled, and prices may be quoted 20s lower within the past fortnight, owing to the pressure of several parcels for sale. DC orange last sold at 9*l*; good orange, 8*l* 12s 6d per cwt.

Cochineal.—921 bags about two-thirds sold: Honduras silver at stiffer rates, from 1s 6d to 3s; black about the same as before, from 2s 6d to 3s. Teneriffe silvers, 2s 7d to 2s 10d; black, 2s 8d to 2s 11d; the latter being rather cheaper.

Drugs.—A small parcel of camphor, recently landed, sold at higher prices, from 9*l* 7s 6d to 9*l* 10s per cwt.

Other Dyestuffs.—Holders of Cutch are asking still higher rates. Good quality has sold at 25s to 25s 6d this week. Gambier remains steady.

Rubber.—East India is firmer, good quality selling at 1s 3d per lb.

Metals are not favourably influenced by the abundance of money, most descriptions being inactive. Scotch pig iron has declined to 48s 9d to 49s. The makers have not reduced the prices of British manufactured. No sales reported of spelter. The nominal price is now 19*l* 5s. Foreign tin presents no change either here or in Holland. Straits firmer at 116s 6d to 117s; Banca, 118s 6d to 119s per cwt, with moderate inquiries. Copper is very firm. Lead fully maintains the recent advance.

Jute.—There has been more business done privately, but the public sales on Wednesday passed off steadily at full prices. 4,900 bales chiefly sold at 12*l* 15s to 22*l* per ton.

Hemp.—Some contracts have been made in Manilla, by private contract, at full prices, and there are now few sellers unless upon higher terms. 560 bales, by auction, were taken in at 20*l* 10s to 24*l*. White bought in at 34*l*. East India Sunn sold at 26*l* 5s to 28*l* per ton. Petersburg clean advanced to 35*l* per ton this morning.

Linseed.—An active demand prevails, and prices still tend upwards. Calcutta has sold freely for arrival at 60s to 61s. The last sales of Taganrog cargoes were at 61s delivered; 55s for spring shipment. On the spot, transactions are limited.

Oils.—Olive has been firm at the recent advance. Fish oils are quiet. Fine sperm nominal, at 89*l* to 90*l* per tun. Linseed oil is very active, 36s being paid, and 35s 6d for delivery this month. Rape in limited demand: refined, 46s 6d to 47s; brown, 43s to 43s 6d per cwt. Fine palm is scarce, and worth 45s 6d to 46s. Cocoa-nut has been much firmer: Cochin, 50s 6d to 51s; Ceylon, 49s 6d to 50s per cwt.

Turpentine.—American spirits has sold at 73s to 73s 6d; French, at 70s per cwt. No sales reported in rough.

Tallow.—The trade generally have confined their operations to immediate requirements during this week. Yesterday the market was steady: 1st sort Petersburg Y.C., 52s; to the end of the year, 52s to 52s 6d; for delivery in the first three months of 1862, 53s; old Y.C., 51s to 51s 6d per cwt.

Particulars of Tallow.—Monday, November 11.

POSTSCRIPT.

Friday Evening.

Sugar.—The market closes flatly. 2,025 casks West India have sold for the week. By auction, 850 casks were mostly bought in. 585 bags native Madras went at 31s to 32s 6d. 1,095 bags good yellow Cossipore Bengal partly sold at 44s 6d per cwt.

Coffee.—358 casks 459 barrels plantation, 206 bags 43 casks native Ceylon, 550 cases 1,641 bags Neilgherry went off at full prices.

Rice.—3,000 bags new Rangoon have found buyers at 11s 3d. 1,000 tons, spring shipment, at 11s to 11s 3d per cwt.

Tea.—The sales to-day comprised 6,681 packages, and of these 3,771 found buyers. The prices obtained for greens show some irregularity, but generally a decline of 1d per lb must be noted.

Spices.—45 cases brown nutmegs went at 2d advance: brown, 1s 2d to 2s; fine, 3s 8d. 16 cases mace, 1s to 1s 4d, being also dearer. Of 1,776 bags Singapore black pepper, a few lots sold at 4d, the remainder being taken in. 102 bags Singapore white realised 6d to 6⅛d per lb.

Saltpetre.—600 bags Bengal, refraction 5 to 2¾, sold privately at 36s. By auction, 1,043 bags were taken in: refraction 3¾, 37s. 564 bags Bombay, refraction 38¾ to 28¼, sold at 32s 6d per cwt.

Safflower.—146 bales Bengal went 10s dearer, from 6*l* 2s 6d to 10*l* 2s 6d per cwt.

Rubber.—East India sold at 1s 2¼d to 1s 2½d per lb.

Tallow.—All kinds were unaltered to-day.

ADDITIONAL NOTICES.

Green Fruit.—Market well supplied, and fair demand for all kinds. The first cargo of Fayal oranges has arrived per Hortense, *via* Bristol, a portion of which sent per railway to London, sold by Keeling and Hunt at public sale, went at good prices. Messina lemons lower, the stock being heavier than is usual at this period of the year. Barcelona nuts in good demand. Black Spanish neglected. Para scarce. Chesnuts advanced 5s per barrel. More inquiry for Almeira grapes of good quality.

Dry Fruit.—The currant trade is very dull. Dealers cannot be induced to make offers, even at lower rates. Valentias have attracted a little attention by some forced sales of out-of-condition parcels at 36s to 40s, but red Smyrnas at 38s to 40s are considered preferable, and sell accordingly. Other articles in fruit attract attention, and are selling freely at former rates.

English Wool.—There is not any alteration in the English wool trade since last week.

Colonial Wool.—Sales progress without much change, except greasy Cape, which is a shade easier.

Flax.—Market unaltered.

Hemp.—Market very firm, and but few sellers. The article is well held, and the stock being moderate, with an expected good demand,

higher prices are confidently looked for. Nothing further will be shipped from Petersburg this season, the navigation being quite closed.

COTTON.—Sales of cotton, from Friday, 8th November, to Thursday, 14th Nov. inclusive:—6,100 bales Surat, at 10d to 10½d and 10⅝d for good fair to good sawginned Dharwar; 8⅝d to 9½d for good fair sawginned Broach; 9½d for good fair to fully good fair Broach; 8d to 8⅝d for fully fair to good fair Dhollera; 7½d to 8½d for very middling to good Oomrawatty; 7⅝d for middling fair Mangarole; 7d to 7½d for middling to fully fair Compta: 3,490 bales Tinnevelly, at 7½d to 8½d and 9d for middling to good: 500 bales Western Madras, at 7½d to 7½d for good fair—total, 10,000 bales. An active and general demand has been experienced throughout the week, and a large business transacted at daily advancing prices, particularly the better sorts of Tinnevelly, which have advanced ⅜d per lb. Sawginned Dharwar is also about ⅛d per lb dearer, and all other kinds of Surat ¼d to ½d per lb. Western Madras has been much sought after, and is ½d per lb dearer. Altogether the market closes with great firmness, 38 bales Surat, sea-damaged and all faults, are advertised for public sale on Thursday, the 21st inst. The following sales have been made for arrival:—1,000 bales Dhollera, at 8d for guaranteed middling fair: 500 bales Oomrawatty, at 7½d for fair: 2,000 bales Tinnevelly, at 8⅛d to 8½d for guaranteed good fair: 500 bales Western, at 7½d for fair.

IMPORTS AND STOCK OF EAST INDIA COTTON IN LONDON.

	Surat. bales.	Madras. bales.	Total. bales.
Imports, 1st Jan. to 14th Nov.	88,418	34,896	123,314
Stock, 14th Nov., 1861	43,397	18,014	61,411
— — 1860	14,592	19,418	34,010

SILK.—No alteration whatever in the market. Business very quiet.

TOBACCO.—The market continues very firm, and for some descriptions holders are unwilling sellers at present quotations. Further sales have been made for exportation, and a few small lots taken for home trade.

LEATHER AND HIDES.—The leather trade remains unaltered since last week. The supplies and the demand continue limited; and the articles most wanted are still good heavy crop hides; English butts 24 lbs and upwards, prime shaved hides, good kips, and best heavy calf-skins. Prices are stationary.

METALS.—Metals keep steady at last week's rate of business. Copper is very firm at quotations, and a further advance in prices is pretty currently reckoned upon. Iron is a little firmer, and prospects altogether are rather brighter at the moment. Tin is firm, and some considerable transactions are reported in foreign. Lead keeps steady. Spelter is rather lower, and neglected. Tin plates have been in good demand at better rates.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	55	9
Fat by ditto	2	10
Yellow Russian	53	6
Melted stuff	40	6
Rough ditto	23	6
Greaves	18	0
Good dregs	7	0

Imports this week 1,599 casks.

PROVISIONS.

Bacon market, this week, ruling lower, prices ranging from 64s to 66s 6d, with a still downward tendency. Friesland in very bad demand. Quality worse than previous years; consequently importers are ordering very small quantities of any. Irish butter in better demand, at prices ranging from 110s to 112s f.o.b. for finest parcels. Very little doing in other provisions.

METROPOLITAN CATTLE MARKET.

MONDAY, Nov. 11.—The total imports of foreign stock into London, last week, amounted to 12,755 head. In the corresponding period in 1860, we received 6,824; in 1859, 6,294; in 1858, 7,576; in 1857, 4,374; in 1856, 6,367; and in 1855, 7,732 head.

There was a fair average supply of foreign stock on offer here to-day, but its general quality was very middling. With home-fed beasts we were fairly supplied, and there was a good arrival from Ireland. The attendance of buyers was tolerably numerous, and all good and fine breeds moved off steadily, at, in some instances, an advance in the quotations, compared with Monday last, of 2 per 8 lbs, the primest Scots and crosses having realised 5s 2d per 8 lbs; otherwise the beef trade was in a sluggish state on former terms. From Lincolnshire, Leicestershire, and Northamptonshire we received about 2,500 Shorthorns, &c.; from other parts of England, 500 various breeds; from Scotland, 80 Scots and crosses; and from Ireland, 330 oxen and heifers. There was rather a limited show of home-bred sheep, chiefly in middling condition. For all prime breeds the demand ruled steady, at very full prices, the best old Downs having realised 5s 8d per 8 lbs, whilst other breeds moved off slowly, but at quite last week's currency. Calves, the supply of which was only moderate, were in good request, at very full prices, viz., 4s 4d to 5s 4d per 8 lbs.

SUPPLIES.

	Nov. 12, 1860.	Nov. 12, 1861.
Beasts	5730	6250
Sheep	23950	22890
Calves	263	140
Pigs	600	410

THURSDAY, Nov. 14.—To-day's market was fairly supplied with beasts as to number, but their general quality was inferior. All kinds moved off slowly; nevertheless, Monday's prices were supported. The show of sheep was only moderate, and the mutton trade ruled inactive, at previous currencies. The best old Downs realised 5s 8d per 8 lbs. Although very few calves were on offer, the veal trade was heavy, at per money. Pigs were a dull inquiry, and late rates were barely maintained. In milch cows very little was doing.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	2	10	3	2	Prime Southdown sheep	5	4	5	8
Second quality ditto	3	4	4	0	Large coarse calves	4	2	4	8
Prime large oxen	4	2	4	8	Prime small ditto	4	10	5	2
Prime Scots, &c.	4	10	5	2	Large hogs	4	0	4	6
Coarse and inferior sheep	3	2	3	6	Small porkers	4	8	5	2
Second quality ditto	3	8	4	4	Suckling calves, each	21	0	31	0
Prime coarse-woolled do.	4	6	5	2	Quarter-old store pigs	22	0	30	0

NEWGATE AND LEADENHALL

FRIDAY, Nov. 15.—The supplies of meat are moderately extensive. On the whole the demand rules steady, and prices are fairly supported.

Per 8 lbs by the carcase.

	s	d	s	d		s	d	s	d
Inferior beef	2	8	3	2	Middling mutton	3	10	4	2
Middling ditto	3	4	3	6	Prime ditto	4	4	4	6
Prime large ditto	3	8	3	10	Veal	4	0	4	8
Prime small ditto	4	0	4	2	Small pork	4	10	5	2
Large Pork	3	8	4	8	Lamb	0	0	0	0
Inferior mutton	3	2	3	8					

POTATO MARKET.

SOUTHWARK WATERSIDE, Monday, Nov. 11.—During the past week the arrivals, both coastwise and by rail, have been more plentiful. Trade much the same. The following are this day's quotations:—Kent and Essex Regents, 110s to 130s; Yorkshire ditto, 100s to 125s; Lincolnshire ditto, 90s to 110s; Scotch ditto, 60s to 110s; French whites, 100s to 110s per ton.

FRIDAY, Nov. 15.—The supplies of potatoes are moderate, and the trade generally rules steady, at previous quotations.

HOP MARKET.

BOROUGH, Monday, Nov. 11.—We continue to have an active demand for every sort of the new growth of hops, and fine samples realise an advance of 5s per cwt. We have more inquiry for yearlings, and good old hops have attracted more attention.

FRIDAY, Nov. 15.—The market remains without material change. Good and fine parcels of hops command a steady sale at full prices, but inferior qualities move off somewhat slowly, at late rates. Large quantities of foreign hops continue to arrive. New Mid and East Kents, 180s to 225s; New Weald of Kents, 147s to 185s; New Sussex, 185s to 135s; Belgian, 110s to 120s; Bavarian, 140s to 160s per cwt.

HAY MARKETS—THURSDAY.

SMITHFIELD.—Meadow hay, 2*l* 0s to 5*l* 0s; clover ditto, 3*l* 10s to 5*l* 15s; and straw, 1*l* 8s to 1*l* 16s per load. A fair demand.

CUMBERLAND.—Meadow hay, 2*l* 5s to 5*l* 0s; clover, 3*l* 10s to 5*l* 15s; and straw, 1*l* 8s to 1*l* 16s per load. Trade dull.

WHITECHAPEL.—Meadow hay, 2*l* 0s to 5*l* 0s; clover, 3*l* 10s to 6*l* 0s; and straw, 1*l* 8s to 1*l* 16s per load. Supply good.

COAL MARKET.

FRIDAY, Nov. 15.—Wall's-end:—Tees 19s 9d—Trimdon Hartlepool 19s 3d—Hartlepool 19s 6d—South Kelloe 19s 6d—Heugh Hall 19s—Kepier Grange 19s 3d—Gosforth 17s 9d—Hunwick 14s 6d—Carr's Hartley 16s 6d—Tanfield Moor Butes 13s—Buddle's Hartley 16s 6d—Davidson's Hartley 16s 6d—Howard's Hartley 16s 6d. 50 ships at market.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Nov. 15.—There is a moderate amount of business doing here, principally for export to the States, and prices of all kinds suitable for that quarter are hardening, as stocks of them are very much reduced.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Nov. 15.—The market has been moderately attended, and there has been very little done in wheat and flour since Tuesday, and prices remain as then quoted. Oats and oatmeal rather cheaper. Beans and peas unchanged. Indian corn unchanged.

METALS.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Nov. 15.—The business during the past week in manufactured iron has been to a moderate extent, with little or no change to note in prices. The transactions in Scotch pig iron have been very limited, and at about previous quotations. The copper market is remarkably dull, but prices are well maintained. A good inquiry for lead, which is slightly higher. Tin plates are also in better demand.

The Gazette.

TUESDAY, Nov. 12.

BANKRUPTS.

H. Shalders, Queen Margaret's grove, Stoke Newington green, auctioneer.
S. Bell, Blossoms place, Holloway, tailor.
F. Sponheimer, New street, Lion street, New Kent road, journeyman baker.

EPITOME OF RAILWAY NEWS.

TRAFFIC RECEIPTS.—The traffic receipts of railways in the United Kingdom for the week ending the 2nd of November amounted to 540,945*l* and for the corresponding week of last year to 537,530*l*, showing an increase of 3,415*l*. The gross receipts of the eight railways having their termini in the metropolis amounted to 248,412*l*, and for the corresponding week of 1860 to 247,108*l*, showing an increase of 1,304*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, Nov. 11.—Railway stocks showed increased strength to-day, owing to the ease in the money market and to repurchases by provincial speculators for the fall. Midland and Lancashire and Yorkshire were especially buoyant, and closed at a respective improvement of ⅞ and 1¼ per cent. London and North-Western, Great Western, and South-Eastern also advanced. The closing prices were not fully as good as at one period of the day. In the colonial market, Indian guaranteed stocks were again in request at an occasional improvement. Cape Town, Great Western of Canada, and Grand Trunk were also higher, the latter closing at 20 to ½. Foreign descriptions were firm, especially French. Lombardo-Venetian advanced in the morning to 1⅛ to ¼ premium, but after official hours relapsed to 1⅜. In American securities a rise occurred in United States Five per Cents. and Erie and ordinary preference shares, and a decline in Illinois Central. There was not much doing in mines, and the principal feature was a renewed improvement in United Mexican.

TUESDAY, Nov. 12.—In the railway market to-day the principal feature was a further demand for Midland and Lancashire and Yorkshire stocks, which continued after official hours, the final prices being the highest of the day. The former advanced 1½ per cent., and the latter ¾. London and North-Western, South-Western, and Caledonian also improved, while Eastern Counties showed a decline. In the colonial market, Great Western of Canada shares were firm, at 10¼ to ⅜. East Indian, on the other hand, was rather dull, at 102½ to 103, on the issue of the new stock for 1,600,000*l*. Foreign descriptions were steady, Great Luxembourg showing an advance. Lombardo-Venetian closed without change at 1⅜ pm. Cape of Good Hope debentures were quoted higher. No change of importance occurred in American securities. British mines were rather dull, and in some cases a reduction took place. In foreign adventures, there was a rise in Scottish Australian mining.

WEDNESDAY, Nov. 13.—The railway market opened firmly, but subsequently relapsed, and after several fluctuations closed rather flatter than yesterday. The preparations for the approaching settlement were commenced this morning, and showed a limited supply of some of the leading stocks, especially Midland and Lancashire and Yorkshire. Both these descriptions, however, together with Great Western, left off lower than last evening. London and North-Western improved. After the official close the market showed a more favourable tendency than in the previous part of the day. In colonial descriptions, Buffalo and Lake Huron shares improved. Grand Trunk of Canada closed at 20 to ½, and East Indian at 102½ to 103. The principal feature in the foreign market was a moderate demand for Sambre and Meuse. Lombardo-Venetian were again dull, closing at 1¼ to ⅜ prem. American securities were steady, and showed little change. Mines were also fully supported, United Mexican exhibiting a renewed advance.

THURSDAY, Nov. 14.—The railway market generally ruled firm, owing to the advance in the funds. Midland, however, was slightly lower, the traffic return being less favourable than had been expected. Berwick was also rather flat. Great Western, Great Northern, and South Western improved. At the close of the settlement to-day, there was a rather better supply of Lancashire and Yorkshire. Speculation in this department continued restrained by the apprehended stagnation in trade in the winter. In the colonial market, an improvement took place in Great Western of Canada and Grand Trunk. There was also a good demand for Indian guaranteed stocks. Foreign descriptions were firm, Sambre and Meuse and Lombardo-Venetian especially showing an advance. Cape of Good Hope debentures were quoted higher. No material change occurred in American securities. In mines, there was another rise in United Mexican. St John del Rey and Port Phillip and Colonial also improved.

FRIDAY, Nov. 15.—In the railway share market to-day there was a decline of ¼ per cent. in Great Western and Lancashire and Yorkshire stocks, and a slight improvement in Midland. Business was quiet, this being settling day. Lombardo-Venetian Railway shares were rather flatter at 1⅜ to 1½ prem. Sambre and Meuse continued in demand.

A WELCOME ANNOUNCEMENT.

E. MOSES AND SON beg respectfully to acquaint the public that they have made preparations, on an unprecedentedly large scale, for the Autumn and Winter Seasons. Their stock of OVERCOATS comprises every modern style in all kinds of seasonable and serviceable materials, with the latest improvements in workmanship. The Eversley and Shelburne overcoats are particularly recommended.

Their general stock includes every description of attire for all classes, all ages, and all occupations; the articles are too numerous to particularise, but may be gathered from their several trades of—

READY-MADE AND BESPOKE TAILORS, HABIT MAKERS, WOOLLEN DRAPERS, HATTERS, HOSIERS, BOOT AND SHOE MAKERS, AND GENERAL OUTFITTERS.

Their BESPOKE CLOTHING DEPARTMENT is too important a branch of their business to be passed over without a special notice. It offers a perfect fit, combined with the most fashionable and comfortable styles, and the most elegant workmanship.

E. MOSES and SON need scarcely remind the public that in every department of all their establishments the Highest Degree of Excellence is associated with Prices the Most Moderate.

Any article not approved of will be exchanged or the money returned.

New Fashion Plate for the present season, with rules for self-measurement and lists of prices post free.

E. MOSES and SON'S establishments are closed every Friday evening at sunset till Saturday evening at sunset, when business is resumed until Eleven o'clock.

E. MOSES and SON.
London Houses.
City Establishment.
154, 155, 156, 157, Minories; 83, 84, 85, 86, Aldgate.
Oxford street Branch.
506, 507, 508, New Oxford street; 1, 2, 3, Hart street.
Tottenham Court road Branch.

Country Establishments.
Sheffield and Bradford, Yorkshire.

N.B.—Our Celebrated "INDISPENSABLE SUIT," adapted equally for walking, riding, travelling, or business, may be had in a large variety of seasonable and fashionable materials, from 30s to 70s.

TEETH.—REGISTERED PNEUMATIC VENTILATING PALATE.—Discovery of a new principle in dentistry, and great reduction in price.—Mr LEWIN MOSELY, 30 Berners street, W., established 25 years, offers for inspection Specimens of all the latest inventions in ARTIFICIAL TEETH. His PNEUMATIC VENTILATING PALATE is recognised as the best combination of improvements submitted to the medical profession, supplying all dental deficiencies without extraction of stumps or any painful operation. Sharp edges, wires, springs, ligatures, and all metals, especially avoided, rendering impossible unpleasant secretions and vitiated breath (hitherto causes of general complaint). This Palate may be added to teeth in wear, and defies competition for cheapness and durability. Consultation and every information free. Success guaranteed in all cases by Mr Lewin Mosely, 30 Berners street, Oxford street, W.

JOZEAU'S COPAHINE, or SACCHARATED CAPSULES.—Copaiba and Cubebs are, doubtless, the best remedies, but these drugs are of a repulsive taste and odour, and occasion colicky pains, nausea, and gastric disturbance. M. Jozeau has succeeded in rendering these valuable therapeutic agents perfectly innocuous by increasing, in in his Copahine, all the curative properties. This preparation has been adopted by the Paris Academy of Medicine, after more than a thousand trials in Paris and the different London hospitals, viz., St Thomas's, Guy's, and St Bartholomew's, under the care of Messrs Lloyd, Roland, and Legros Clark; LANCET, Nov. 6, and Dec. 10, 1857. The Copahine, which is in form of a pretty pink sugar plum, effects a cure in about six days, either in recent or chronic diseases. 100 capsules, 4s 6d; post free, 5s 2d. Post-office order required; at G. Jozeau's, French Chemist, 49 Haymarket, London; 22 Rue St Quentin, Paris; and all the most important Chemists.

FORD'S FLANNEL SHIRTS.—Patterns of all the newest designs in fancy wove and printed flannels sent per post free.
RICHARD FORD and CO., Patentees, 38 Poultry, London.

FORD'S EUREKA SHIRTS, known from Cornhill to China, for the last ten years, as the acme of perfection for fit and quality. Where difficulty occurs in procuring Ford's Eureka Shirts, send to the Patentees.
RICHARD FORD and CO., 38 Poultry, London, E.C.

"MIMEMA."—Her Majesty's Royal Letters Patent have been granted to Richard Ford and Co., of 38 Poultry, London, for the Mimema, or Demi-Shirt, which is intended to be worn over an outside flannel shirt, giving the appearance of dress at any time without the necessity of changing the flannel shirt, and thus preventing taking cold. The Mimema is made of long-cloth, with plain and fancy linen fronts and wrists, and being close fitting, not the slightest incumbrance is experienced by the wearer. An illustrated price list, with instructions for measurement, sent free on application. Sold by all hosiers, drapers, &c., and wholesale and retail by the Patentees, RICHARD FORD and CO., 38 Poultry, London, E.C.

GLENFIELD PATENT STARCH, USED IN THE ROYAL LAUNDRY.
The Ladies are respectfully informed that this Starch is EXCLUSIVELY USED in the ROYAL LAUNDRY, and Her Majesty's Laundress says, that although she has tried Wheaten, Rice, and other Powder Starches, she has found none of them equal to the GLENFIELD which is the FINEST STARCH SHE EVER USED.

WHEN YOU ASK FOR
GLENFIELD PATENT STARCH,
see that you get it, as inferior kinds are often substituted
WOTHERSPOON and CO., Glasgow and London.

DEANE'S TWO-HOLE BLACK PENS which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped
"G. and J. Deane, London bridge,"
and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed
"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

FRAMPTON'S PILL OF HEALTH, Price 1s 1½d and 2s 9d per box
This excellent Family Pill is a medicine of long-tried efficacy for purifying the blood, and correcting all disorders of the stomach and bowels. Two or three doses will convince the afflicted of its salutary effects. The stomach will speedily regain its strength; a healthy action of the liver, bowels, and kidneys will rapidly take place; and renewed health will be the quick result of taking this medicine, according to the directions accompanying each box.
Persons of a Full Habit, who are subject to headache, giddiness, drowsiness, and singing in the ears, arising from too great a flow of blood to the head, should never be without them, as many dangerous symptoms will be entirely carried off by their timely use, and for elderly people, where an occasional aperient is required, nothing can be better adapted.
These Pills require no restraint of diet or confinement during their use; and in consequence of the great and increasing demand, the Proprietor has obtained permission from Her Majesty's Commissioners to have the name and address of "Thomas Prout, 229 Strand, London," impressed upon the Government stamp affixed to each box. Sold by all venders of medicine.

HOLLOWAY'S OINTMENT AND PILLS.—Visible or Invisible Ailments.—In all outward diseases this fine Ointment will be found soothing, cooling, and curative. It speedily allays all inflammation, and reduces to a healthy condition all wounds, sores, ulcers, and sprains. It discharges all irritating matters and stimulates the vessels to wholesome action. When this Ointment is rubbed on the skin over any organ afflicted by disease, it exercises a corresponding recuperative power, and in conjunction with Holloway's Pills rarely fails to banish any internal disorder, be its origin when or where it may. Whilst using these purifying preparations the tongue cleans, the appetite improves, chills and flushes depart, and the complexion becomes clear, whilst the spirits attain an elevation consonant only with health.

CURE OF HOARSENESS AND SORE THROAT by DR LOCOCK'S PULMONIC WAFERS.—"James street, Covent garden.—Gentlemen,—I have been suffering from a severe cold and sore throat for some time—indeed, was so bad that I could not speak. I tried all the usual remedies, but without obtaining any relief. I at last tried a 1s 1½d box of Dr Locock's Wafers, which I am happy to say has quite cured me, and restored my voice.—M. GIDDY." Dr Locock's Wafers give instant relief and a rapid cure of asthma, coughs, and all disorders of the breath and lungs. They have a pleasant taste. Price 1s 1½d, 2s 9d, and 11s per box. Sold by all druggists.
CAUTION.
The public is cautioned against purchasing any (so-called) "Pulmonic" Medicine, "Locock's Pills," "Lotion," "Bark," "Tooth Powders," or any such catch-penny things, under the belief that they are connected with "DR LOCOCK'S WAFERS."

PETROLEUM FOR EXPORT.—A large Supply in Yard, in prime shipping order, on consignment, from the principal Wells in the United States, for Sale on the most favourable terms. Shipping facilities direct from the Yards.—SCHIEFFELIN BROTHERS and CO., 170 and 172 WILLIAM STREET, NEW YORK.

THE FRENCH AND GERMAN PROTESTANT COLLEGE, Netherton House, Clapham, Surrey, combines the comforts of an English home with the advantages of a Continental Education. The French and German Languages, so indispensable to a good education, are taught by resident masters. They give lessons daily. The course of instruction adopted secures for young gentlemen a sound English, Classical, and Mathematical Education, combined with Drawing, History, Geography, and Modern Science. Pupils prepared for the military, naval, merchant, and civil service examinations. Terms, inclusive, from thirty to fifty guineas per annum, according to age and requirements. A difference will be made for two Pupils from the same family. For references and prospectuses apply to Monsieur A. de Chastelain, as above.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

ELASTIC STOCKINGS, KNEE CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price, 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.

WHITE, MANUFACTURER, 228 Piccadilly, London.

A BOON TO NERVOUS SUFFERERS.—Twenty Thousand Copies of a Medical Book for gratuitous circulation. HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., who has devoted fifteen years to the study and treatment of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, will send free, for the benefit of Nervous Sufferers, a copy of the New Medical Guide, containing his highly successful mode of treatment, with necessary instructions, by which sufferers may obtain a cure. Post free on receipt of a stamped directed envelope. Address Dr Henry Smith, 8 Burton crescent, Tavistock square, London, W.C.

DR MARSTON'S LECTURES—FREE ISSUE.—The following Lectures are ISSUED GRATUITOUSLY by the Professors of the Royal Institute of Anatomy and Science, 369 Oxford street, London, Firstly, as a mark of esteem to their distinguished colleague, Dr MARSTON, M.R.C.S., L.S.A., and Secondly, from a conscientious belief that the Lectures will do a vast amount of good by enlightening the public upon subjects of the highest importance to their moral welfare and physical health, ignorance of which has to the present day been a most fruitful cause of human suffering and misery.

No. I.—NERVOUS DEBILITY (the result of youthful error), loss of memory, shortness of breath, dimness of sight, exhaustion, and general incapacity. Addressed specially to Young Men.

No. II.—MARRIAGE: Its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who desire Children.

No. III.—THE BRAHMIN'S ELIXIR OF LIFE: Its History—Secret Remedies of the Hindoos no Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Reinvigorator of the Impaired Functions, and in all Cases of Nervous Debility.

DINNEFORD'S PURE FLUID MAGNESIA has been, during twenty-five years, emphatically sanctioned by the Medical Profession, and universally accepted by the Public, as the Best Remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion, and as a Mild Aperient for delicate constitutions, more especially for Ladies and Children. Combined with the Acidulated Lemon Syrup, it forms an agreeable Effervescing Draught, in which its aperient qualities are much increased. During hot seasons and in hot climates, the regular use of this simple and elegant remedy has been found highly beneficial. Manufactured (with the utmost attention to strength and purity) by DINNEFORD and CO., 172 New Bond street, London; and sold by all respectable chemists throughout the Empire.

DR CURTIS'S MEDICAL WORK "MANHOOD," An Essay on Nervous and Generative Diseases.

The 140th thousand, with numerous plates, in a sealed envelope, price 1s, or post paid, by the Author, for twelve stamps.

MANHOOD: THE CAUSE AND CURE of PREMATURE DECLINE in MAN, with Plain Directions for Perfect Restoration to Health and Vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, the result of twenty-five years' successful practice. By Dr J. L. CURTIS, 15 Albemarle street, Piccadilly, London. Consultations, Ten till Three and Six till Eight.

REVIEWS OF THE WORK.

"We feel no hesitation in saying that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a parent, preceptor, or clergyman."—SUN, evening paper.

"Dr Curtis has conferred a great boon by publishing this little work, in which is described the sources of those diseases which produce decline in youth, or more frequently premature old age."—DAILY TELEGRAPH, March 27, 1858.

N.B. The author of the above Medical Treatise may be consulted, as usual, either by letter or personally, at his residence. The efficacy and harmless nature of the remedies employed by Dr Curtis having been demonstrated by the most complete success during a practice extending over a period of 20 years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

Published by Allen, 20 Warwick lane, Paternoster row; Mann, 39 Cornhill; and free from the Author for 12 stamps.

EASTON'S PATENT BOILER FLUID effectually removes and prevents incrustation in steam boilers (land and marine), without injury to the metal, with great saving in fuel, and with less liability to accident from explosion. It is now generally used by the principal steam-packet companies of London, Liverpool, Hull, Southampton; by H.M. steam store-ships, Woolwich Arsenal, by the Honourable Corporation of Trinity House, the War Department, and India Store Department, at Bombay, Calcutta, and Kurrachee, and by engineers and manufacturers throughout the country.

Testimonials from eminent engineers, boiler-makers, millwrights, manufacturers, and steam-boat proprietors, with full particulars, will be forwarded on application to P. S. EASTON and G. SPRINGFIELD, sole manufacturers and patentees, 37, 38, and 39 Wapping wall, London, E.; or of their agents in the principal towns of Great Britain.

THE GREAT FIRE.—Destructive Fire at the Jarrow Docks Station, on the North-Eastern Railway.—"Collector's office, Tyne Dock, South Shields, 28th Jan., 1861. Gentlemen,—In reply to your favour of the 25th inst., respecting the state and contents of one of your Safes after the fire at this office on the 31st ult., I have to inform you that it was subjected to a very hot fire for three or four hours, and must at one time have been nearly red hot, as the workmen were not able to touch it for two or three hours after the fire was extinguished. On the Safe being opened, the books and cash were found to be in good condition. The cash boxes contained both notes and cheques, the whole of which were quite safe. I am, gentlemen, yours respectfully, R. THURRON. Messrs Milner and Son, Phœnix Safe Works, Liverpool, and 47A Moorgate street, City, London." Note.—Another party says, "I have seen the Safe, and it has had a regular roasting. There was a large amount in bank notes and several bags of gold in the drawers, and the principal books above. Everything else in the building was entirely destroyed; nothing left but the bare walls."

DR DE JONGH'S (Knight of the Order of Leopold of Belgium)

LIGHT-BROWN COD LIVER OIL has afforded immediate relief, arrested disease, and restored health in countless instances where other kinds of Cod Liver Oil had been long and copiously administered with little or no benefit.

CONSUMPTION and DISEASES of the CHEST.

Hospital, dispensary, and private practice, all furnish innumerable cases in which Dr de Jongh's Cod Liver Oil, containing peculiar curative principles which no other Oil possesses, has been administered with the happiest results in Consumption and Diseases of the Chest. The distinguished Physician, Dr Hitchman, author of "On Consumption and its Successful Treatment," observes—"Having extensively prescribed Dr de Jongh's Light-Brown Cod Liver Oil for a long series of years in cases of Consumption, I deem it but an act of justice to record my emphatic testimony in favour of its superior merits as a preventive of Emaciation, and generally as an excellent restorative in Debility and Diseases of the Chest."

ASTHMA, BRONCHITIS, COUGHS.

The effects of Dr de Jongh's Oil have been singularly beneficial in the treatment of Asthma, Chronic Bronchitis, Dry Cough, and Humid or Winter Cough. Arthur Cridland, Esq., an eminent Surgeon, in bearing testimony to its efficacy in his own case of severe bronchial and laryngeal irritation, observes—"After taking Dr de Jongh's Oil for a few days, its good effects commenced; I regained my usual health and strength, and entirely lost the laryngeal irritation, which was of a most harassing and fearfully distressing character. It is therefore with much pleasure I beg to add my testimony to the excellent results attendant on Dr de Jongh's Oil."

Dr de Jongh's Light Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; capsuled, and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists.

SOLE CONSIGNEES:
ANSAR, HARFORD, and CO., 77 STRAND, London, W.C.

CAUTION.—Beware of Proposed Substitutions.

DR KAHN ON MARRIAGE.—A new and entirely re-written edition (the forty-seventh of this celebrated treatise), with illustrations, engravings, &c., is now ready.

The object of the work is not to maintain any particular hypothesis, but to enable every one to understand for himself the structure and functions of the organs concerned in the fulfilment of the physical obligations of the married state; to acquaint him with the consequences arising from excesses; to prevent unnecessary misapprehension from unfounded fears, and to indicate, when those fears are well founded, the means of speedy relief. The work is not crowded with the technicalities of ordinary professional books, nor does it present the crudeness which characterises the so-called "popular works" on the subject.

Price One Shilling, free by post for thirteen stamps, or in a sealed envelope twenty stamps, either from the publisher, J. Allen, 20 Warwick lane; or from the author's address, 17 Harley street, Cavendish square, London, where he may be consulted daily.

It is also sold by the Patentees, ground into paint, each cask stamped "HUBBUCK, LONDON, PATENT," to counterfeit which is forgery.

Extract from the Report of NATHAN MERCER, Esq., F.C.S.
7 Church street, Liverpool, April 6th, 1859.

On Saturday I visited the iron ship "William Fairbairn," for the purpose of ascertaining whether or no her plates had been affected by the red lead with which she was coated previous to her late voyage to Calcutta. She was in the hands of the scrapers, and showed the great extent to which the iron had been corroded, patches of rust protruding through the paint, and being thickly spread over the unscraped portions. The red lead coating was covered with blisters, from each of which, on being opened, a clear fluid escaped, and left exposed on the surface of the iron a number of brilliantly shining crystals of metallic lead, and that they were formed at the expense of the iron, was evident from the corroded and pitted appearance of the plate beneath every blister. The fluid from the blisters is produced by the combination of the chlorine of the sea-water with the iron of the ship, showing that the "sweat," so well known to every person interested in iron ships, is not salt water, but a solution of chloride of iron.

On those portions which had been scraped, this "sweat" was exuding from every pore; and on looking along the surface, myriads of glittering particles of lead were seen.

The injurious effects produced by red lead were unmistakeable and self-evident.

Greenock, 7th August, 1859.

GENTLEMEN,—My object in writing to you, is to call attention to the state of the frames and plating of the iron ship "Thomas Hamlin." This vessel, when built eight years ago, was coated inside and outside with your Zinc Paint; the inside coating has never been renewed.

From the reports on other ships of even less age, I was led to fear that both the plates and rivet heads might be a good deal destroyed, the ship having had frequently sugar cargoes home from India, and molasses from the West Indies.

When the ship was opened fore and aft for the inspection of Lloyds' surveyors in London, my pleasure was not less than the surprise of those gentlemen, Messrs Ritchie and Light, to find that both the frames, plates, and rivet heads were as good as the day on which they were coated when the ship was building; in fact, to use the expressive words of the surveyor, nothing could be better.

The iron of the plates, rivets, and frames, were no doubt good originally, but the high state of preservation I attribute to having had them coated, before any red oxide had formed on them, with your Zinc Paint.—I am, Gentlemen yours very truly, JAMES HAMLIN.

Messrs Hubbuck and Son, 24 Lime street, Fenchurch street.

Mr James Gorton, Manchester.

SECRETARY—Mr John J. Matthey.

Temporary offices—152 Gresham house, Old Broad street, E.C.

The promoters of the Venezuela Cotton Company (Limited) have secured a tract of land, consisting of about 236,400 acres of the well-known Bolivar Estate, considered to be one of the richest districts in South America for the growth of cotton, healthy in climate, open to water carriage, and within seventeen days' communication with England.

The Directors have received a report from Mr Linden, director of the Zoological Gardens at Brussels, and also director of the Botanical Section of the Jardin d'Acclimitation at Paris, bearing the strongest testimony to the advantages which the estate offers for the cultivation of cotton. Mr Linden's exploration of Venezuela extended over a period of three years, having been intrusted by the King of the Belgians with a scientific mission in various parts, extra and intra tropical of America. He says that the cotton produced in Venezuela is "equal, if not superior, to that grown in the United States," and that "the district offers all desirable guarantee for the success of the enterprise, fecundity of soil, natural irrigation, healthy climate, and neighbouring population to supply labour."

Mr Linden's report, with further particulars, will be found at length in the prospectus, which can be had on application to the Secretary or Brokers, to either of whom also application for shares may be made.

The promoters of the Company have stipulated to allow such a portion of the purchase money to be invested in Government securities, in the names of trustees, as will secure a minimum dividend of 5 per cent. for the first year on the capital paid up, to meet the contingency of revenue, from the produce within that period not being sufficient to pay that amount.

MR LEWIS AND SON, 113 Strand.—The Royal Lewisian Systems of Writing, Arithmetic, Bookkeeping, and Shorthand, as taught for upwards of fifty years by Mr Lewis, the real inventor and first teacher of these world-renowned and only infallible systems, insures perfection in any of the above branches after a few easy and interesting lessons Persons unable to take the lessons may obtain the inventor's works for self-instruction at his only institution, 113 Strand.

HARVEY'S SAUCE.—CAUTION.—The admirers of this celebrated Sauce are particularly requested to observe that each bottle bears the well-known label, signed "Elizabeth Lazenby." This label is protected by perpetual injunction in Chancery of the 9th July, 1858, and without it none can be genuine.

E. LAZENBY and SON, of 6 Edwards street, Portman square, London, as sole proprietors of the receipt for Harvey's Sauce, are compelled to give this caution, from the fact that their labels are closely imitated with a view to deceive purchasers.

Sold by all respectable grocers, druggists, and oilmen.

DENT, CHRONOMETER, Watch, and Clock Maker to the Queen and Prince Consort, and Maker of the Great Clock for the Houses of Parliament, invites attention to the superior workmanship and elegance of design of his extensive Stock of Watches and Drawing-room Clocks.

THE MADRAS IRRIGATION AND CANAL COMPANY.

Notice is hereby given, that the Fifth Ordinary General Meeting of the Shareholders of the Madras Irrigation and Canal Company will be held at the London Tavern, in Bishopsgate street, in the City of London, on Saturday, the 30th day of November instant, at One o'clock precisely.

The transfer books of the Company will be closed from the 20th to the 30th instant, both days inclusive.—By order of the Board of Directors,

JOHN WESTWOOD, Secretary.

27 Cannon street, London, E.C., November 8th, 1861.

GREAT NORTH OF SCOTLAND RAILWAY COMPANY.

ISSUE OF "NEW" PREFERENCE SHARES.

The Directors of this Company are prepared to receive applications for portions of a further issue of "New Shares," of £10 each, created under the powers of the "Great North of Scotland Railway Consolidation Act, 1859."

These shares bear a fixed dividend, at the rate of 4½ per cent. per annum, payable half-yearly, said fixed dividend ranking, pari passu, with the existing 5 per Cent. Preference Shares of the Company, the whole being amply secured by a Surplus Annual Income, now amounting, after payment of debenture interest and working expenses, to about £50,000.

The last half-yearly dividend on the Company's original shares was at the rate of 7 per cent. per annum.

Application may be made to the Secretary, at Aberdeen; or through an agent or broker.—By order,

ROBERT MILNE, Secretary.

Company's offices, Aberdeen, November, 1861.

THE EAST INDIAN RAILWAY COMPANY requires 100 Tons of GALVANISED ANNEALED IRON WIRE, and the Directors will be prepared to receive Tenders for the same on or before 12 o'clock at noon, on Thursday, the 21st day of November instant.

Specifications and Forms of Tender, upon which only tenders will be received, can be seen upon application at the Company's offices, Alderman's walk, New Broad street, London.

The Directors do not bind themselves to accept the lowest or any tender.—By order of the Board,

D. I. NOAD, Secretary.

East Indian Railway House, Alderman walk, New Broad street, Oct. 24, 1861.

MADRAS RAILWAY COMPANY.—Notice is hereby given, that the Ninth Half-yearly General Meeting of the Madras Railway Company, will be held at the London Tavern, Bishopsgate street London, on Friday, the 22nd day of November inst., at One o'clock precisely, for the purpose of receiving and considering a Report from the Directors of creating new capital, and for the transaction of the general business of the Company.

The Transfer Books of the Company will be closed from the 15th to the 22nd inst., both days inclusive.

Deeds of Transfer are not received at the offices of the Company while the books are closed.—By order of the Board, JAMES WALKER, Managing Director.

33 New Broad street, London, E.C., Nov. 3, 1861.

MADRAS RAILWAY COMPANY.—The Directors are prepared to comply with applications for Debentures at par, in sums of not less than £50 each, bearing interest at 5 per cent. per annum, payment of interest and principal being guaranteed by Her Majesty's Secretary of State for India in Council. The interest is payable by coupon half-yearly at the Union Bank of London. The Debentures are of the two following descriptions:—

1st. For a term of 5 years from the 1st of January last, transferable by endorsement without stamp, and renewable at the option of the holder for a second term of 5 years at the same rate of interest of 5 per cent.

2nd. For a term of 4 or 5 years, and convertible at the option of the holder into capital stock of the Company, bearing 5 per cent. interest, guaranteed by the contract with the East India Company.

Forms of application may be obtained at this office.

JAMES WALKER, Managing Director.

Company's offices, No. 33 New Broad street, London, E.C., April 30, 1861.

NEW ZEALAND (AUCKLAND HARBOUR LOAN).—The Union Bank of Australia, being empowered by the Superintendent of the Province of Auckland, under authority of Act of the General Assembly of New Zealand, intituled "The Auckland Harbour Debenture Act, 1860," to negotiate a Loan of £25,000, by the issue of debentures in terms of the said Act;—Notice is hereby given, that the Board of Directors are prepared to receive up to Monday, the 18th November instant, at 2 o'clock precisely, sealed Tenders, in writing, of parties who may forward the same, addressed "Tenders for Auckland Harbour Debentures, under Act 1860," or attend in person therewith. Such tenders will then be opened in the presence of all so attending, and read publicly, and the purchasers be forthwith declared, provided the price be not under the minimum fixed by the Superintendent of the Province of Auckland, which will be placed on the table under seal.

These Debentures of £100 each, with Coupons attached, will become due on 1st January, 1876, and bear interest at the rate of 7 per cent. per annum from the 1st day of July, 1861, both principal and interest to be payable by arrangement, at the option of the bearer, either in London, Melbourne, Sydney, or Auckland.

The official documents and acts authorising the raising of this Loan can be seen at the Bank daily, between the hours of 1 and 3, by parties desirous of tendering.

Payment for the amounts that may be allotted will be required as follows:—

£10 per centum on the purchaser being declared; and the balance on the 16th December next.

H. W. D. SAUNDERS, Sec.

No. 38 Old Broad street, London, E.C., Nov. 1, 1861.

NORTH POOL MINE.—

This SHARE LIST will be CLOSED after 2nd DECEMBER, and SHARES will be ALLOTTED from PRIORITY of APPLICATION.

NORTH POOL COPPER MINING COMPANY.

To be incorporated under the statutes limiting shareholders' liability to the amount subscribed.

Capital £24,000, in 6,000 shares of £4 each. Deposit, 2s 6d per share on application, and 2s 6d per share on allotment. The remainder by quarterly instalments of 5s per share, as required for working the mine, of which due notice will be given.

Directors to be chosen by shareholders at the first meeting.

BANKERS—Messrs Bolitho, Sons, and Co., Penzance, Cornwall.

SOLICITOR—F. W. Snell, Esq., 1 George street, Mansion House, London, E.C.

AUDITORS—Messrs Cooper Brothers, and Co., 13 George street, Mansion House, London.

MANAGING AGENT—Capt Thomas Faull, late Manager of Linares and other home and foreign mines, now of Camborne, Cornwall.

ENGINEERS—Messrs Mitchell and Jenkin, Redruth, Cornwall.

SECRETARY—J. S. Phillips, 12 St Michael's alley, Cornhill, London.

Offices—7 George yard, Lombard street, London, E.C.

A grant to work the extensive sett called *North Pool*, Illogan, Cornwall, has been obtained, at £20 per annum minimum rent, and 1-18th maximum dues.

The geological position of North Pool is unsurpassed by any mine in the kingdom, being situated about *half* a mile north of, and parallel to the celebrated granite hill Carn Brea, around which six square miles have produced at least £6,000,000 sterling profits, by the comparatively small outlay of about £600,000, and more mineral wealth than has been returned by all the other mines of Devon and Cornwall by tenfold outlay.

It is a very extensive sett, Cook's Kitchen (and other mines) being only about one-fourth as long on the lodes, although it has been at work upwards of 200 years, and even now about to become a rich tin mine in depth.

Its immediate neighbours are, on the north and east, the Tolguses; southward, Wheal Agar, East Pool, Carn Brea, and Tincroft; and westward, the Croftys, Setons, and North Roskear Mines.

North Pool has been worked once, but only to a very limited extent (£61,450 profits were made in eight years, at a cost of only £8,180, in about 100 fms long, and above the 80 fm. level), whereas several of the best mines of this district have been re-worked twice and thrice most profitably, to the depth of from 200 to 360 fms.; and still continue very rich and promising, although much less so for the ground first wrought therein.

The promoters consider the old mine a good speculation in depth; but as at least 19-20ths of this lode in such a long sett is quite unexplored at a fair mineral depth, and moreover, four side lodes, almost entirely unworked, they confidently believe it to be an unusually valuable property, and eminently deserving attention and trial.

Two good engines—a 70-inch for pumping, and a 28-inch for winding and crushing—will be amply sufficient to work the engine and side lodes to a proper depth, and long before this capital is fairly expended good results will, in all probability, be attained.

Much work has been executed that will speed progress, such as roads, floors, and well-timbered shafts, at a cost of many thousand pounds, which are immediately available for future operations; and the Hayle and Portreath Railway passing through the mine will greatly facilitate the transit of materials and minerals.

The limited liability has been adopted, as a guarantee of good faith to the large portion of the public who prefer it to the unlimited (and sometimes abused) Cost-book System; and to counteract the greatest evil of the former £24,000 is intentionally more than sufficient.

All money will be drawn from the bank by cheques signed by two or more directors and the secretary.

The promoters agree to accept 300 fully paid-up shares (as a guarantee of their confidence), and 2s 6d per share cash, for the sett, and which shall clear all the preliminary expenses of incorporation, travelling, reporting, mapping, printing, law costs, advertising, and broker's commission, with grants and leases.

Reports with sections and plans of the sett and neighbouring mines were published in the MINING JOURNAL of Oct. 5, 1861, from which the most sceptical will see and allow its merits, and that no more has been stated than plain statistical facts will most amply verify.

Applications for prospectuses and form of order for shares to be addressed to the secretary.

EXTRACTS FROM REPORTS.

W. Bowden, Manager of Camborn Vean, and late Agent at North Pool Mine.

Sept. 10, 1861.—I have been engaged in North Pool Mine upwards of eleven years, during which period it made £61,000 profit from the adit to the 72, having an almost continuous bunch of copper ore for about 100 fms in length. I should more particularly call the attention of those embarking in this speculation to the western part of this sett, on the engine and side lodes, which part was totally neglected by the late workers. The stratum and indications, as far as seen, are precisely similar to the old mine, where such large deposits of ore existed; and I, therefore, see no reason why you may not have as good a mine here as the old party had further east. This sett lies on the same run of lodes as the Tolguses on the east and Setons on the west, and being in such a good locality is a speculation rarely to be met with. In conclusion, I may say that as only about 200 fms long have been explored at a fair mining depth, and that as the sett is 900 fms long, and contains five lodes, exceedingly little has been worked for this rich district; therefore it is highly probable that many other bunches of ore may be discovered, that will, I have no doubt, lead to large profits; and I can highly recommend it to the mining community.

J. Daw, Manager of Corn Brea Mines, &c.

Sept. 12, 1861.—I beg to hand you my report of North Pool Mine. This mine is situated in the parish of Illogan, and is bounded on the east by South Tolgus, which is on the same run of lodes, and has given great profit to the adventurers—on the west by North Crofty and Wheal Seton. The sett is very extensive, it being about 900 fms long and 200 fms wide, with four or five parallel lodes, traversing its entire length. These are intersected by cross courses and elvans, with patches of iron or greenstone. About 500 fms east of the western boundary a shaft is sunk through the great north lode at 12 fms below the surface, where it is large, and spotted throughout with copper ore. Looking at the situation of this mine, I consider it to be more than an ordinary speculation, having such a long piece of unexplored ground in this highly mineralised district, and on lodes which have been so productive in the mines to the east and west, so I think it well worthy the attention of capitalists.

J. Vivian, Manager of North Roskear, North Crofty, &c.

Sept. 11, 1861.—In reply to yours of yesterday, I am well acquainted with the district of North Pool Mine, and believe it to be a first-rate piece of mining ground.

W. Pascoe, Manager of South Frances, &c.

July 25, 1861.—In reply to your kind favour of the 22nd inst., respecting the above mine, I beg to say that I know but little about the old workings, but I believe with you that there is an extensive piece of untried ground to the north and west of the old mine, which, in such a good locality, ought to be tried. I think you very fortunate to get the setts, and wish you every success in the undertaking.

W. H. Reynolds, Manager of Great Retallack, Wheal Unity, &c., of Messrs Watson and Cuell's firm.

Sept. 3, 1861.—I am glad to find that you have secured the sett of North Pool Mine, and I know of no ground in the district lying idle that is so deserving of attention. It is an extensive sett, being about 900 fms. long by 200 fms. wide, and traversed by at least five lodes, some of which I suppose to be those of South and Old Tolgus on the east, and the Setons on the west. The most important feature, however, is that there is upwards of half a mile of unexplored ground between the late workings and the Seton Mines; and, judging from the general productiveness of these lodes, it is highly probable that in this ground valuable discoveries may be made. When we look at the very rich locality in which this mine is situated, and the immense returns made from so small a portion of the sett, it certainly does appear that the prospects of the speculation are unusually good.

G. Rickard, Manager of Great Onslow Consols.

Sept. 26, 1861.—I have considered the feasibility of North Pool sett as a speculation for further working, and, taking into consideration the fact that very extensive and profitable mines have been, or are being, worked at both ends of the property, the recent richness of the mine itself, the rich locality, and great extent of unexplored ground in the sett, there do not appear to me any sound reasons why the unexplored portions of the engine lode, as well as any parallel lodes, may not prove profitably *productive*; and I consider if these lodes are properly worked there is a very fair chance of success.

M. Edwards, late Manager of Wheal Kitty, &c.

Sept. 3, 1861.—The extensive and valuable mining property of North Pool is situated in the parish of Illogan, and is closely surrounded on the south, east and west by some of the most productive and profitable mines in Cornwall. These lodes, however, run the entire length of the sett, and as there is a large amount of unexplored ground in the western part of it, I would strongly recommend you to commence operations there, open on the lodes, and give it a vigorous and spirited trial. For this purpose only a moderate amount of capital will be required, which in my opinion will not fail, if judiciously laid out, to make a lasting and profitable mine.

An early application should be made to secure shares, which are being rapidly taken up.

ORIENTAL GENERAL CARRIERS.

THE ORIENTAL INLAND STEAM COMPANY (LIMITED), under subsidy from the Indian Government.

Capital £500,000.

This Company acts as general carriers both by land and water, and as general forwarding agents throughout the East. They receive goods in England for transmission to different points of India, whether on the Coast or in the Interior; they convey goods by railway, by steamboat or other available means, from one part of India to another; and they receive goods at the different stations in India, for transmission to England. They forward both by the Cape and Overland routes, as shippers may desire; and parcels or merchandise intrusted to them, whether in India or in England, will be conveyed to their destinations at the lowest possible charge, without further trouble to the shipper or consignee, without the present risks of detention, and without requiring the intervention of any other agency.

For tariff of rates, and all other necessary information, apply at the Company's offices, 9 Billiter street, London, or 2 Queen's terrace, Southampton, or to the Company's Agents at the different stations in the East. A number of these Agencies have been already established and the others are being formed as rapidly as possible.

The following are some of the existing or proposed stations:—

Agra.	Ferozepore.	Moultan
Ahmednuggur.	Futteyghur.	Neemuch.
Allyghur.	Fyzabad.	Nynee Tall.
Allahabad.	Ghazeepore.	Patna.
Assam.	Gwalior.	Peshawur.
Attock.	Hydrabad (Scinde)	Poonah.
Baroda.	Kurrachee.	Rajmahal.
Bareilly.	Lahore.	Rawul Pindee.
Benares.	Landour.	Sattara.
Bombay.	Loodheana.	Sehwan.
Calcutta.	Lucknow.	Shikarpore.
Cawnpore.	Mahabuleshwur.	Simla.
Commercolly.	Meerut.	Sukkur.
Dacca.	Mirzapore.	Tatta.
Delhi.	Moorshedabad.	Umritsur.

The arrangement for the Madras Presidency are not matured, but will be announced when completed.

UNIVERSAL PRIVATE TELEGRAPH COMPANY.

Incorporated by Act of Parliament 24 and 25 Vict. (Royal Assent, 7th June, 1861), by which Shareholders are exempt from all liability beyond the amount of their Shares.

Professor Wheatstone's Patent.

Capital £100,000, in 4,000 shares of £25 each.

DIRECTORS.

David Salomons, Esq., Alderman, M.P., Chairman.
John Henry Dillon, Esq., Deputy-Chairman.
Lord Claud Hamilton, M.P.
Joseph Cary, Esq.
William Fairbairn, Esq., C.E., F.R.S.
Dr Edward Frankland, F.R.S.

Charles Wheatstone, Esq., F.R.S.

ENGINEER.

Thomas Page, Esq., C.E., Middle Scotland yard.

ELECTRICAL ENGINEER.—Nathaniel J. Holmes, Esq.

BANKERS.

Union Bank of London (Temple Bar Branch).

The Universal Private Telegraph Company erect and maintain private telegraphic wires (Wheatstone's patent) at a fixed annual rental, and provide the instruments necessary to work them.

Their system has been for some time in successful operation in London, and is in general use by the daily Press, Mr Reuter's establishments, the City of London police, the docks, and numerous mercantile firms.

The original estimate of the directors, "That a minimum net dividend of £10 per cent. might fairly be looked for," has been more than realised. The company having recently extended their operations to Glasgow and Manchester with the most satisfactory result, and being in the constant receipt of applications from new renters, are now prepared to make a further issue of 1,200 shares of £25 each (first call £3 per share), applications for which are to be made to Mr Geo. E. Seymour, 38 Throgmorton street, E.C., the broker to the Company, on or before the 30th November instant.—By order,

LEWIS C. HERTSLET, Secretary.

Universal Private Telegraph Company's Offices, 448 West Strand.

THE INDIAN CARRYING COMPANY, LIMITED.

TEMPORARY OFFICES—No. 62 Moorgate street, E.C.

Capital £100,000, in 50,000 shares of £2 each, with power to increase.

First issue, 25,000 shares.

Deposit 10s per share on application, and 10s on allotment.

Registered under "The Joint Stock Companies Act," with Limited Liability.

CHAIRMAN—Sir Macdonald Stephenson, Director of the East Indian Railway Company.

DIRECTORS.

J. G. Frith, Esq., Deputy-Chairman of the Great Indian Peninsula Railway Company.
P. D. Hadow, Esq., Deputy-Chairman of the Peninsular and Oriental Steam Navigation Company.
Wm. Hartridge, Esq., Deputy-Chairman of the Bombay, Baroda, and Central India Railway Company.
J. F. Leith, Esq., Chairman of the Eastern Bengal Railway Company.
George Norton, Esq., Director of the Great Southern of India Railway Company.
John Stewart, Esq., late of Bombay.

Messrs Robert and James Sutton, 22 Royal Exchange.

BANKERS.

The London and County Bank, 21 Lombard street.

SECRETARY—Walter Thompson, Esq.

TEMPORARY OFFICES—62 Moorgate street.

ABRIDGED PROSPECTUS.

The object of this undertaking is to provide means of transport at the termini and intermediate stations along the lines of the Indian railways and steamers, similar to the establishments of Messrs Pickford and Co. and others engaged in connection with the various lines of railways in Great Britain, collecting for despatch by rail, and distributing on its arrival, the enormous amount of merchandise and produce conveyed upon these lines, for which the existing primitive native means of conveyance by bullock hackery are totally inadequate, and the native carriers possessing neither the capital, skill, nor enterprise required to organise the system necessary for the purpose.

Messrs Pickford and Co. have liberally placed at the Board's disposal all the valuable information which their long and successful experience enables them to supply, and have otherwise rendered to the Company and promised to continue all the assistance in their power.

Estimates, carefully prepared, based on a comparison of the outgoings and returns of similar establishments in England, with the present Indian rates, after making due allowance for the additional expense of European superintendence and improved stock, and liberal deductions on account of depreciations and renewals, show a profit fully equal to 25 per cent. upon the capital employed. These estimates have been made upon the safe principle of calculating the expenditure in excess of what is anticipated, and the returns at the lowest existing scale of charges; and they are based upon the assumption that only about 104,000 tons are carried annually by the Company at all their stations, while the export trade of Calcutta alone, for one year, exceeded 725,000 tons.

A deposit of 10s per share must be made on application, and 10s on allotment. If no allotment is made, the deposit will be returned without deduction.

Payments may be made at the Head Office of the London and County Bank, or at any of its branches.

Full Prospectuses and Forms of Application may be obtained of the brokers, and at the offices of the Company, 62 Moorgate street.

LONDON AND SOUTH AFRICAN BANK.

Incorporated by Royal Charter.

Drafts and Letters of Credit issued on Cape Town, Port Elizabeth, and Graham's Town, Cape of Good Hope. Bills negociated, and sent for collection. Every description of Banking business undertaken, either with the Cape of Good Hope, or with other places having mercantile relations therewith. Deposits, at interest, received for fixed periods, on terms to be ascertained at the office, No 10 King William street, London E. C.—By order of the Court,

JOHN HENRY ETHERIDGE, Manager.

BANK OF AUSTRALASIA

(Incorporated by Royal Charter, 1835), No. 4 Threadneedle street, London.

Paid-up Capital £900,000, with power to increase to £1,200,000. Guaranteed Fund £200,000.

Applications to be made at the office of the Corporation, No. 4 Threadneedle street, London.—By order of the Court, WILLIAM MILLIKEN, Secretary.

CHARTERED MERCANTILE BANK

of INDIA, LONDON, and CHINA.

Incorporated by Royal Charter.

Paid-up capital, £500,000. Reserve fund, £50,000.

The Bank negotiates and collects Bills and grant Drafts payable at Bombay, Calcutta, Madras, Colombo, Kandy, Singapore, Penang, Hong Kong, Shanghai, and Mauritius; issues Letters of Credit and Circular Notes for the use of Travellers by the Overland route, terms for which can be ascertained at the Head office in London.

The Bank will effect the purchase or sale of Indian Securities; undertakes the safe custody of same, and the receipt of Interest, Dividends, Pay, Pensions, and other Moneys, for remittance through the Bank or otherwise.

The Bank receives Money on Deposit, on which Interest will be allowed according to the length of time deposited. Particulars as to rates can be ascertained at the Head office, 52 Threadneedle street, London.

Office hours from 10 a.m. to 3 p.m.; Saturdays from 10 a.m. to 2 p.m.

52 Threadneedle street, London, E.C.

ORIENTAL BANK CORPORATION.

Incorporated by Royal Charter, 30th Aug., 1851.

Paid-up capital, £1,260,000; reserved fund, £252,000.

The Corporation grant Drafts, and negotiate or collect Bills payable at Bombay, Calcutta, Madras, Ceylon, Hongkong, Singapore, Mauritius, Melbourne, and Sydney, on terms which may be ascertained at their office. They also issue Circular Notes and Letters of Credit for the use of Travellers by the Overland Route. They undertake the agency of parties connected with India, the purchase and sale of Indian Securities, the safe custody of Indian Government Paper, the receipt of Interest, Dividends, Pay, Pensions, &c., and the effecting of remittances between the above-named dependencies.

They also receive deposits of £100 and upwards, repayable on a notice of 10 days, and allow interest thereon at 1 per cent. below the Bank of England minimum rate of discount, not falling below 2 per cent. nor rising above 5 per cent. Deposits subject to longer notices of repayment bear higher rates which may be ascertained at their office.

Office hours 10 to 3. Saturdays, 10 to 2.

Threadneedle street, London, March 23, 1860.

BANK OF NEW SOUTH WALES

(Established 1817, Incorporated by Act of the Colonial Legislature in 1850, and confirmed by Her Majesty in Council), 37 Cannon street, City. Capital, £750,000. Reserve Fund, £212,500.

The Board of Directors GRANT LETTERS of CREDIT, payable on demand, and BILLS of EXCHANGE, at 30 days' sight, on the undermentioned Establishments of the Corporation.

James Morrish, Esq. (Jeffery, Morrish, and Co.), London and Liverpool.

Francis Nash, Esq. (Nash, Hicks, and Nash), Director of the London Corn Exchange.

W. Gordon Thompson, Esq., Deputy-Chairman of the South-Eastern Railway.

Charles Whetham, Esq. (S. Whetham and Sons), Director of the Scottish Australian Investment Company.

With power to add to their number.

BANKERS—The City Bank, Threadneedle street.

AUDITORS.

James Kennedy Arthur, Esq., 18 Somerset street, Portman square.

Arthur Cooper, Esq., Public Accountant, 13 George street, Mansion House.

Frederick Maynard, Esq., Public Accountant, 19 Bread street.

SOLICITORS—Messrs Davidson, Bradbury, and Hardwick, 22 Basinghall street.

BROKERS—Messrs Bragg and Stockdale, 6 Throgmorton street.

SECRETARY pro tem.—Samuel Stockton, Esq.

Temporary Offices—St Michael's House, St Michael's alley, Cornhill.

The universal success of all respectably conducted banks recommends their shares as a most profitable investment; and now that Parliament has made the principle of limited liability applicable to banking companies, the danger which formerly attached to their shareholders on account of their unlimited liability may be avoided by registration under those acts.

Notwithstanding the great difficulties which must attend the change from unlimited to limited liability, in respect to banks already established, two important banking companies have availed themselves of the privilege, and in both instances the good effect of the step is evidenced by an increase in the amount of deposits, and by an improved value and marketability of the shares. The present undertaking, therefore, will be incorporated with limited liability, but an ample portion of the capital will be uncalled to secure the confidence of customers.

The business ordinarily conducted by a bank is well known to the public. It is sufficient, therefore, to say that all the operations ordinarily or legitimately pertaining to a Joint Stock Bank will be comprised within the transactions of The Mercantile Bank, Limited.

The following brief recapitulation of published results, as regards the undermentioned Joint Stock Banks, presents data for an opinion as to the profits and advantages which may be expected to accrue to the shareholders of The Mercantile Bank, Limited.

	Capital.	Current and Deposit Accounts.	Amount paid up per share.	Present price of shares.	Dividends.
	£	£	£	£	Per Cnt.
London and Westminster	1,000,000	14,821,650	20	72	20
London Joint Stock	600,000	11,425,037	10	34	25
Union	600,000	10,415,020	10	28	10
London and County	500,000	5,973,348	20	39	10
City	300,000	2,840,346	50	75	9
Bank of London	300,000	1,684,129	50	64	5

In order to show the enormous increase in the banking operations of the metropolis, and consequently the opening which now exists for a new joint stock bank, it is only necessary to state the fact that the current and deposit accounts of the above-named banks have increased £6,370,714 during the last year.

The capital of The Mercantile Bank, Limited, will be £1,000,000, in 10,000 shares of £100 each; and it is proposed that not more than £30 per share shall be called up, and that the calls shall be at intervals of at least three months; the Directors reserving the right to commence business prior to the whole of the capital being subscribed.

Applications for shares must be made in the form annexed to the Prospectus. The deposit of £2 per share must be paid to the Company's bankers, for which a receipt will be given. If no allotment be made, the deposit money will be returned in full; and if a less number be allotted than is applied for, the surplus will be used towards the payment on allotment.

Prospectuses, and Forms of Application for Shares, may be obtained at the temporary offices, and of the brokers.

ENGLISH, SCOTTISH, AND AUSTRALIAN CHARTERED BANK.

Capital paid up, 500,000*l.*

LETTERS OF CREDIT ON THE BRANCHES are GRANTED on the most favourable terms. Bills on the Australian Colonies negotiated and sent for collection.—By order of the Court,

73 Cornhill, E.C. HENRY MOULES, Secretary.

CHARTERED BANK OF INDIA,

AUSTRALIA, and CHINA.

Head Office—20 Threadneedle street, London.

Incorporated by Royal Charter.

Paid-up Capital, £644,000.

With Agencies and Branches at Bombay, Calcutta, Singapore, Hong Kong, and Shanghai.

The Corporation buy and sell Bills of Exchange payable at the above-named places; issue Letters of Credit; undertake the Purchase and Sale of Indian Government and other Securities; and receive Deposits at Interest, the terms for which at present are, with six months' notice, 4 per cent. per annum; with twelve months' notice, 5 per cent. per annum.

NATIONAL DISCOUNT COMPANY

(LIMITED), 33 Cornhill, London. Subscribed Capital, £2,000,000. Paid up, £385,345.

Approved mercantile bills discounted for parties properly introduced.

Money received at interest on deposit, repayable on call or at fixed periods.—By order of the Board,

RICHARD PRICE, Secretary.

Cornhill, November, 1861.

THE TRUST AND LOAN COMPANY of UPPER CANADA.

Notice is hereby given, that an Extraordinary General Meeting of Shareholders in this Company will be held on Friday, the 29th inst., at 1 o'clock p.m., at the offices, 65 Moorgate street, for the purpose of declaring a dividend on the capital stock of the Company.

The transfer books will be closed on the 19th inst., and reopened on Thursday, the 12th December, on which day the dividend will be paid.—By order,

F. FEARON, Secretary.

65 Moorgate street, 15th November, 1861.

THE TRUST AND LOAN COMPANY of UPPER CANADA.

Incorporated by Royal Charter. Capital £1,000,000.

DIRECTORS.

The Right Hon. Edward Pleydell Bouverie, M.P., President.

William Chapman, Esq., Deputy Chairman.

James Hutchinson, Esq. | William G. Thomson, Esq.

Charles Morrison, Esq. | T. M. Weguelin, Esq., M.P.

BANKERS—Messrs Glyn, Mills, and Co.

The Directors are prepared to grant Debentures for loans of sums of £100 and upwards, for periods of 3, 5, 7, or 10 years.

Any information required can be obtained on application to the Secretary. FRED. FEARON, Secretary.

PARIS LAND COMPANY (Limited).

Notice is hereby given, that the List of Applicants for Shares will be closed on Wednesday, the 20th November *instant*, after which date no application for shares will be entertained.—By order,

H. NESBITT, Secretary.

85 Gresham House, Nov. 12, 1861.

SIX PER CENT. DEBENTURES.

CANADA LANDED CREDIT COMPANY.

The Directors are prepared to comply with all applications for their Debentures at par. They are issued in sums of £50, £100, £500, and £1,000, for periods of five, seven, and ten years, bearing interest at 6 per cent. per annum, both principal and interest being made payable in London.

The amount received is invested in mortgages of freehold land of very ample value, the Company by its charter being in every case first mortgagee.

Individuals and public institutions, who usually lend on mortgage, are offered a higher class security than is afforded by the old mortgage system.

The interest is payable by coupons, on the 1st January and 1st July, at the banking house of Messrs Smith, Payne, and Smiths, 1 Lombard street, London, and the same is receivable through any of the country banks.

The last half-yearly statement and the Debentures may be had at the Company's brokers, Messrs Brunton and Son, Auction Mart chambers, Bartholomew lane, London, E.C.

LOANS ON DEBENTURES

GUARANTEED by the SECRETARY of STATE for INDIA.

The Directors of the MADRAS RAILWAY COMPANY are prepared to issue Debentures as under at par, in sums of not less than £50 each, bearing interest at 5 per cent. per annum, payment of interest and principal being guaranteed by Her Majesty's Secretary of State for India in Council.

The interest is payable by coupon, half-yearly, at the Union Bank of London.

1. For a term of 5 years from the 1st of January last, transferable by endorsement without stamp, and renewable at the option of the holder for a second term of 5 years, at the same rate of interest.

2. For a term of 5 years from the above date, convertible at the option of the holder into Capital Stock of the Company, bearing 5 per cent. interest, and with the option also of renewal for a second term of 5 years at the same rate of interest.

Forms of application may be obtained at this office.

JAMES WALKER, Managing Director.

Company's offices, 33 New Broad street, London, E.C., November 8, 1861.

COMPLETION OF

THE ENGLISH CYCLOPÆDIA.
Conducted by CHARLES KNIGHT.

The English Cyclopædia is published in Four Divisions, each Division being complete in itself.
THE CYCLOPÆDIA OF GEOGRAPHY.
THE CYCLOPÆDIA OF BIOGRAPHY.
THE CYCLOPÆDIA OF NATURAL HISTORY.
THE CYCLOPÆDIA OF ARTS AND SCIENCES.
Each Division of the English Cyclopædia is sold as a separate work.

Geography, 4 Vols., £2 2s, or 2 Vols., half morocco, £2 10s.

Biography, 6 Vols., £3, or 3 Vols., half morocco, £3 12s.

Natural History, 4 Vols., £2 2s, or 2 Vols., half morocco, £2 10s.

Arts and Sciences, 8 Vols., £4 16s, or 4 Vols., half morocco, £5 12s.

*** For full details, see prospectus, which may be had from the publishers, or through any bookseller.

From the SATURDAY REVIEW, Sept. 28, 1861.

"Upon the whole, then, we are able to speak very favourably of this new Cyclopædia. Its great recommendation is not its comparative cheapness (though the cost only averages about half a guinea a volume), but its originality, completeness, and general trustworthiness. We may express a hope that its enterprising publisher will have no reason to regret his considerable venture. He is not likely, we think, to have to complain of want of patronage, if it is sufficiently remembered that any one of his four great Divisions may be purchased separately as a work complete in itself. Few may be able to afford the whole series; but there are many who will be glad to procure, for example, a Biographical Dictionary, while others will require, for their peculiar tastes or studies, the Geographical Cyclopædia, or those of the Arts and Sciences, or of Natural History."

Bradbury and Evans, 11 Bouverie street, Fleet street, E. C.

The Government have agreed to transfer the line, stations, and property of the Red Sea and India Telegraph Company to the new company on the following term:—

1st. That the cables, land lines, instruments, stations, concessions, &c., belonging to the old Company, shall be made over to the new Company, free from charge.

2nd. That the new Company shall use their best endeavours to repair the line and to work it when completed, beginning with the line between Aden and Kurrachee; and are to have possession as soon as two-thirds of the capital is subscribed, and one-third paid up, and a suitable vessel despatched with not less than 200 miles of new cable on board.

3rd. That the new Company shall be entitled to a clear dividend out of the profits to 25 per cent. per annum on the money paid up; and the Government is to have the power to repurchase the line on repaying the capital expended at the expiration of 30 years.

4th. That any surplus profits shall be applied to reimburse the Government for the interest they have paid and will have to pay annually upon the original capital expended; after which any further profits which may accrue will be applied to the creation of a reserve fund.

5th. The accounts of the Company will be audited at the Treasury half-yearly. After the restoration of the line, any outlay of capital to be subject to the approval of Government; and the Government is to have the right (subject to arbitration) of disallowing working expenditure which they may consider excessive.

6th. In the event of the failure of the Company to restore or maintain the line in working order, the Government are to have the power of taking it into their hands again on repaying the capital actually expended by the new Company. Should the Government not exercise this right, the Company are to be at liberty to dispose of the property to reimburse their outlay; the balance, after defraying the actual expenditure, to be handed over to the Government. Failure is to be defined to be the non-working of the line from end to end after reasonable allowance of time for restoration.

7th. All differences between the Government and the Company to be decided by arbitration.

8th. This arrangement presupposes the concurrence of the shareholders of the old Company in the terms proposed to them by Her Majesty's Government; any parliamentary powers necessary to give effect to these arrangements are to be obtained by Her Majesty's Government.

Forms of application for shares and information may be obtained at the offices, or from the Company's brokers, Messrs Knight and Coleman, No. 1 Royal Exchange buildings.

TELEGRAPH TO INDIA COMPANY (Limited).

Notice is hereby given, that the Red Sea and India Telegraph Company having indicated their acceptance of the terms proposed to them by Her Majesty's Government, by a Resolution passed at the General Meeting on the 5th instant, and the Lords Commissioners of Her Majesty's Treasury having acceded to the terms of the Resolution, subject to the fulfilment by the new Company of the preliminary conditions imposed by the Government, viz., "that two-thirds of the capital should be subscribed and one-third paid up," the Board of Directors of this Company will proceed, to the Final Allotment of the Shares, on Thursday next, the 21st instant. Upwards of two-thirds of the shares having been already appropriated, the Board are prepared up to, and inclusive of, the 20th inst., to receive applications for the remainder.

Forms of application may be obtained at the offices of the Company; or at the brokers', Messrs Knight and Coleman, No. 1 Royal Exchange buildings, E.C.—By order of the Board, C. L. PEEL, Secretary.

FOR SALE.—THE ECONOMIST, bound in 2 volumes, from No. 1, Sept. 3, 1843, to No. 55, Sept. 14, 1844.—Apply to A. B., 18 Exeter street, Strand.

FOR SALE.—THE ECONOMIST, from its commencement in 1843 to the present date, complete, and in good condition. The last 14 years unbound.—Address S. H., care Mr Sloper, stationer, 47 Holborn hill, E.C.

TO BE LET, A BED ROOM, Furnished, for a single gentleman, in a most respectable neighbourhood. Terms moderate.—Apply at 6 Augustus square, Regent's Park, five minutes' walk from the Hampstead road, and close to Cumberland market.

TAYLOR, WATT AND CO.,
Merchants, Auctioneers, Commission Land and Estate Agents, Wanganui, Province of Wellington, New Zealand.
London Agent:—BERNARD LEWIS, WINE and COLONIAL MERCHANT, St Michael's House, Cornhill.
Wanganui, 4th July, 1861.
No charge for storage on goods consigned for sale.

DOUCEUR—£300.—A Gentleman will give £300 to obtain for his Son a Clerkship in a high-class Bank, or approved Assurance Office.—Address F. G., at Messrs Davies and Co., Advertising Agents, 1 Finch lane, Cornhill.

A GENTLEMAN THOROUGHLY conversant with bookkeeping by double entry, German, and the usual routine of an office, seeks employment.—Address M.F., Mr Bell's, 45 Torriano terrace, Kentish town, N. W.

TO MERCHANTS, &c.—Wanted, an engagement as Corresponding Clerk in a mercantile house, or as Secretary to a private gentleman or public company, where the advertiser's thorough knowledge of the English, French, and Spanish languages would be available.—Address Navigator, Post Office, Moorgate street.

TO PARENTS AND GUARDIANS.—There is a Vacancy in the Office of a General Merchant and Agent for a well-educated Young Gentleman. He would be thoroughly initiated in the different branches of the City business. Correspondence in English, French, German, and Swedish. A moderate premium required.—Address Messrs A. Wrampe and Co., 53 Great Tower street, E.C.

PARTNERSHIP.—A GENTLEMAN, with from £4,500 to £5,000 at command, can find an excellent investment for his money, and employment in an old-established Wine Business in the City.—Letters to be addressed to A. D., at Messrs Chilton, Burton, Leats, and Hart, Chancery lane.

PARTNERSHIP.—Engineering Business.—A gentleman of active business habits, with from £15,000 to £25,000, can be admitted a partner (in the place of the senior partner deceased) in one of the oldest and most celebrated engineering establisments in Lancashire. The concern receives a large amount of Government and foreign orders, and has also a first-class home connection. The opportunity to enter such a firm seldom occurs, and the terms offered to the new partner are very liberal.—Apply to Mr David Chadwick, 75 King street, Manchester.

WANTED, BY A RESPECTABLE Young Man accustomed to business, a Junior Clerkship in a bank, insurance, merchant's, or other old-established office. Security if required. Good references.—Address A. B., 5 Beaumont street, Mile End road, E.

WANTED, BY THE ADVERTISER, a situation as Assistant Bookkeeper, Correspondent, or General Clerk (in town or country); has been for some years employed in the offices of large manufacturers in the hardware trades, and is conversant with the routine of counting house duties; would have no objection to travel. Satisfactory references.—Address Alpha, 2 Percy street, Bedford square, W.C.

WANTED, BY AN OLD AND respectable firm in the South American trade, a Partner with £10,000 to £15,000, to take the place of one retiring. The firm is one of over 30 years' standing, and has a highly respectable connection. There are three houses, one in England, and two abroad. Principals only will be treated with, and all communications will be considered confidential.—Address to T. K. Hassall, Esq., Solicitor, Old Churchyard, Liverpool.

WANTED, AN INVESTOR.—An eligible opportunity now offers to a gentleman, having the command of from £5,000 to £10,000, to join in an established first class monetary undertaking of a highly remunerative character, and which embraces no liability. The Investor may either join in the management, associated with parties of well known position, or retain a sleeping share. The advance will be covered by ample realisable security, while a bonus for the same of 25 per cent. would be guaranteed in the first year, besides a profitable share in the undertaking, estimated to realise from 12 to 20 per cent. on the capital invested. Unexceptionable references exchanged.—Apply per letter to Messrs Clarke and Solly, Accountants, 62 Moorgate street, E.C.

GEORGE SMITH, Wine Merchant, 86 Great Tower street, 9 and 10 Great Tower street, and 1 St Dunstan's hill, E.C., and 17 and 18 Park road, Greenwich, S.E. Established 1785. A large and valuable stock of old bottled Ports, of various shippers and vintages, accumulated during the last forty years, including a bin fourteen years in bottle, of eight hundred and fifty dozen, bottled by the late Mr Fenwick, of the firm of Messrs Ruck, Fenwick, and Ruck, known to the trade as his celebrated "Six Vintage" Wine, dry, full of "beeswing," of immense flavour, delicacy, and bouquet. Samples forwarded on payment.

Instituted 1824.

SCOTTISH UNION FIRE AND LIFE INSURANCE COMPANY.

London offices, 37 Cornhill; Edinburgh, and Dublin.

BANKERS—The London and County Bank.

SOLICITORS—Messrs Marten, Thomas, and Hollams, Mincing lane.

The Directors are prepared to accept proposals for Fire Insurance on all descriptions of property.

The Tariff for London Mercantile Business has been adjusted on the principle of classification; adopting the plan that each class of goods should be charged a premium proportionate to the risk.

The Directors, in deciding upon this tariff, have endeavoured faithfully to fulfil the wishes of the Commercial community expressed at the influential meeting held at the Mansion House on the 25th July last, and trust they will be supported by the public to enable them to carry out this system with success.

Ordinary Insurances taken at the usual rates.

A commission will be allowed to solicitors and agents introducing business.

Forms of proposal and all information can be obtained at the temporary offices of the Company, 34 Gracechurch street, E.C.

THE NATIONAL MARINE INSURANCE COMPANY.

To be incorporated under the Joint Stock Companies Acts, and to be conducted on the principle of limited liability.

Capital £1,000,000, in 50,000 shares of £20 each, with power to increase to £2,000,000 by the issue of additional shares.

Deposit on application, 10s per share, and a further payment on allotment of £1 10s, making £2 per share, beyond which it is believed no further call will be necessary.

CHAIRMAN.

William Howard, Esq., Chairman of the Chartered Mercantile Bank of India, London, and China, London.

DIRECTORS.

Thomas Bewley, Esq. (Thomas Bewley and Co.), merchant, Dublin.

T. W. Bradley, Esq. (T. W. Bradley and Co.), merchant, London.

Robert McEwen, Esq., Manchester.

Temporary Offices—Adelaide chambers, 52 Gracechurch street, London.

PROSPECTUS.

This Company has been established for the purpose of affording, by the combination of the greatest despatch with the closest economy, additional security to the widely extended and continually increasing commerce of the principal seaports of Great Britain and Ireland.

So great has been this increase of trade during the last thirty years, that the present means of insuring the vast amount of property constantly afloat and in transit from one port to another (against sea risks) are inadequate for the security and convenience of the commercial world.

The public are daily becoming more and more alive to the advantages afforded by well-managed and bona fide joint stock insurance companies; and the policies of such companies, affording, as they do, greater security and greater facilities for speedy settlement, are now almost universally preferred to those of individual underwriters.

The success of the companies hitherto formed for marine insurance is patent to every one. The shares of those now in operation are, for the most part, at a considerable premium, ranging, in some cases, as high (according to the Stock Exchange list) as 700 per cent. The Indemnity Mutual Company's shares for instance, with £5, 13s 6d paid, now realise about £150. The Marine, £15 paid, worth about £90.

The following extracts from returns by the Board of Trade will give an idea of the constantly increasing importance of the ocean carrying trade:—

VALUE of Exports, being the Produce and Manufactures of the United Kingdom.

	£
In 1834	41,649,191
In 1844	58,584,292
In 1854	97,184,726
In 1860	135,842,867

This table exhibits an average annual increase in our export trade, for the last five years, of between six and seven millions sterling.

With regard to imports, it appears that the value of the principal articles imported into this country, in the year 1860, was £210,648,643.

To this let us add (as far as we can ascertain) the value of the foreign and colonial produce exported from this country. In 1854 it was £18 648,978; and in 1858, £24,174,023, exhibiting an increase of upwards of a million a year.

The Custom House returns of the shipping cleared out with cargoes from the ports of the United Kingdom in the foreign and colonial trade are as under:—

In 1834	2,185,099 tons
In 1844	5,297,168 tons
In 1854	9,507,721 tons
In 1861 (first nine months)	8,638,451 tons

showing a steady augmentation of about five hundred per cent. in the last quarter of a century.

The coasting trade still further enlarges the field of enterprise to Marine Insurance Companies. In 1834 it amounted to 10,334,249 tons, and although much of this traffic has been necessarily diverted therefrom by our railway system, yet, in 1860, it had grown to 17,014,399 tons, and for the first nine months of 1861 to 12,959,865 tons.

The discoveries of gold in California and in our Australian colonies have also opened a new source of business to marine offices. Official returns of the bullion trade prove that, independently of what passes to and from by private hand, the large sum of £170,393,989 has entered and left the ports of the United Kingdom during the last three years.

The best and safest means of effecting marine insurance have not therefore kept pace with the demands of the public, and to assist in giving security and facility to insurers living in all parts of the country, the National Marine Insurance Company has been established, and arrangements will be made whereby every port of importance shall be provided with the means of effecting marine insurance hitherto attainable only in London.

Dublin and Glasgow especially have no marine insurance companies, and it is notoribus that the number of individual underwriters in those great trading marts is totally incommensurate with the large amount of ocean and coasting insurances which are constantly required to be effected there, thus showing there is ample scope for the establishment of another marine insurance company.

It is also intended to appoint competent representatives (under sufficient restrictions) at the different trading ports in the East Indies, China, Japan, and Australia; the number of insurance companies being quite inadequate to the requirements of the now greatly extended trade with and between those countries, and presenting a wide field for the operations of a marine insurance company.

The policies will, in accordance with the practice of other joint stock marine insurance companies, be so drawn up as to limit the liability of each shareholder to the amount of his shares.

The staff of officers to be selected by the directors will be composed of gentlemen thoroughly competent to discharge their respective duties.

Applications for shares must be accompanied with a banker's receipt for the deposit of 10s per share. No application will be entertained on which such deposit has not been paid, and in the event of no allotment being made, it will be returned without deduction.

Applications may be forwarded, as per annexed form, to the Secretary, and through any of the bankers or brokers to the company, from whom copies of the prospectus and forms of application may be obtained.

London, November, 1861.

FORM OF APPLICATION FOR SHARES.

To the Directors of the National Marine Insurance Company.

Gentlemen,—Having paid to your bankers the sum of £ , I hereby request that you will allot me shares of £20 each in the National Marine Insurance Company, and I hereby agree to accept such shares, or any smaller number that may be allotted to me, to pay the remaining £1 10s on the shares so allotted, and to sign the deed of settlement when required.—I am, Gentlemen,

Name in full .....
Address in full .....
Date .....

Received, the day of , 1861, on account of the directors of the National Marine Insurance Company, from the sum of , being the deposit made in accordance with the terms of the prospectus on an application for an allotment of shares in the undertaking.

£—— ——, bankers.

Empowered by Act of Parliament. 3 Wm. IV.

THE ECONOMIC LIFE ASSURANCE SOCIETY, 6 New Bridge street, Blackfriars, London.

Established 1823.

DIRECTORS.

Robert Biddulph, Esq., Chairman.
William Routh, Esq., Deputy Chairman.

Alfred K. Barber, Esq.	Rear-Admiral Robert Gordon.
Henry Barnett, Esq.	
The Rt. Hon. E. Pleydell Bouverie, M.P.	Charles Morris, Esq.
	George Kettilby Rickards, Esq.
Edward Charrington, Esq.	
Pascoe Charles Glyn, Esq.	Augustus Keppel Stephenson, Esq.
Sir Alex. Duff Gordon, Bart.	

ACTUARY.—James John Downes, Esq., F.R.A.S.

SECRETARY.—Alexander Macdonald, Esq.

The Society offers the following Advantages:—

The lowest rates of Premium on the Mutual System.

The whole of the Profits divided every Fifth Year.

Reversionary Bonuses have been added to Policies to the extent of ..... £ 1,365,000

The last Bonus, declared in 1859, which averaged £65 per cent. on the Premiums paid, amounted to 475,000

8,471 Policies are now in force, yielding an annual income of £189,000, assuring the sum of £6,685,[illegible] which, with £610,827 Bonus additions, makes a total Liability of £7,308,399.

The Invested Capital is £1,911,505, producing upwards of £74,000, thus making the present Annual Income of the Society £263,000.

Service in the Militia, Yeomanry, or Volunteer Corps will not affect the validity of Policies.

Prospectuses and further particulars may be obtained on application to

ALEXANDER MACDONALD, Secretary.

The Political Economist.

THE FINANCES OF FRANCE.

As far as we can learn, the best authorities upon matters of French finance are unanimous and consistent upon one point of incomparable political importance. The Emperor is beyond all doubt or question alarmed and anxious as to the state of the finances. The substitution of M. Fould for the far less known financier who preceded him, is one of those acts which, sudden in appearance and carefully meditated in reality, are characteristic of the genius of Louis Napoleon. It resembles the *coup d'état* of ten years ago, and the peace of Villafranca which we remember so freshly. It is a special intervention of the Emperor's own—independent of his ordinary advisers, and subversive of the previous condition of affairs. He doubtless knows his position better than any one else knows it. He knows that he *is* surrounded by courtiers, male and female, interested in every species of expense, insensible for the most part to the common restraints of ordinary probity, intent on making a fortune out of the Empire while it lasts. He knows that while they gain by indiscriminate and lavish outlay, he loses. He knows that they are spending his money. He knows that the prosperity, if not the permanence of the present *régime*, is imperilled by an expense from much of which he derives but little advantage, and from which France derives still less. He has, therefore, determined on a financial *coup d'état*. In clear opposition to the pronounced opinion of the predatory *entourage*, he has chosen to give the popular element in the French constitution, such as it is, a much greater degree of power and control over the expenditure of the Government than it ever enjoyed before. And this he has done deliberately. The memoir of M. Fould is dated on the 29th September; the decree by which the Emperor appointed him is dated the 14th November. During the interval he *plotted* a reform.

What, then, is the state of present circumstances and what the train of past events which have induced the Emperor to adopt this peculiar and most remarkable course? No questions can have, upon many grounds, more vital European interest than these:—What is the true condition of the French finances, and what is the real cure for the evils?—for it is now notorious that there are great evils in that condition.

A very curious misapprehension has arisen in England. It has been frequently asserted and often believed during the past week that there was a deficit of 40,000,000*l* *this year* in the finances of the French Empire, and much conjecture has been wasted upon the manner in which M. Fould would fill up a yearly vacuum so enormous. The truth is, that this vast amount has been, as M. Fould observes, for a considerable period a source of anxiety to French financiers. When there is a deficit in the finances of any country, that deficit must be provided for. In France, a deficit is provided for by an addition to the unfunded debt, which is partly in the hands of individuals, and partly lent by the Savings Banks and other moneyed persons and funds, under the supreme direction and control of Government. The Committee of the Legislative Body, in May last, traced the recent history of this subject as follows:—"The floating debt, in which the "accumulated deficits are the principal element, had arrived "at 38,860,000*l* on the 1st January, 1857, including "3,200,000*l* incident to the conversion of the 5 per Cents. "Two laws, one of the 9th June, the other of the 17th June, "authorised the conversion of 8,640,000*l*, which was effected "without recourse to the general market. Besides this, a "repayment of 200,000*l* is made annually to the Bank "of France for the loans which it made to the State in "1848." "In consequence of these measures the accumu-"lated deficits were reduced in April, 1857, to 29,560,000*l*." When we take into account the facts which were not fully known when this report was written, but which M. Fould now explains to us, we shall not wonder that the "accu-"mulated deficits"—the outstanding bills caused by continual excess of income over expenditure—must at the end of this year amount to forty millions. There is not, however, anything very dangerous in this large aggregate. It has long existed, and has long been of great magnitude. It constitutes, as we see, part of the public debt which has already been borrowed, and which, should payment be demanded, can without doubt be reborrowed, if necessary, on terms more or less advantageous. The credit of France is still excellent; the *Rentes* rose at the news of the appointment of M. Fould; and the amount of floating obligations, though an important element in national finance, is no source of bankruptcy or of ruin.

The really important fact which M. Fould first officially announced, and which has been very unfortunately thrown into the shade by the popular exaggeration as to the existing deficit, is this:—During the whole Imperial *regime*, and without reference to the extraordinary expenditure of the Crimean war, France has been spending, upon an average, *six millions per annum more than her income*. The ordinary items of French income and expenditure are included in a Budget in principle similar to our own; and for the present purpose, though it does not appear to be precisely true, we may assume that the ordinary income is adequate to the ordinary expenditure,—in other words, that the income provided by the Legislature is adequate to the expenditure sanctioned by the Legislature. The Emperor now has, however, and the Government of Louis Philippe had also formerly, the power of "opening "extraordinary credits"—in plain English, of spending unvoted money for objects not only not sanctioned, but not even considered by the Legislative Body. The Emperor has exercised this power in time of European peace, and, omitting all reference to the Crimean war, the outlay so authorised was as follows:—

	£
From 1852 to 1858 the extraordinary credits were	42,000,000
In 1859 the extraordinary credits were	3,320,000
In 1860 — — —	4,600,000
In 1861	

which is nearly at the rate of six millions a year for the ten years. Of the expenditure of this vast sum we have no account, but the bulk of it appears to have been spent on the public works, which strike every one's attention in new France, and on the army and navy; and some portion of it has, it may be not unfairly supposed, travelled somehow or another into the keeping of the disreputable and dishonest assemblage of satellites and courtiers who fawn on and dishonour the second Empire.

But how, it will be asked, has this vast outlay been provided for? M. Fould tells us in part, but not completely. The following extraordinary sums have been, it would appear, at the disposal of the Government:—

	£
Surplus of the Crimean loans in stock	26,680,000
Augmented capital of Bank of France lent to the Government	4,000,000
Loan from the Military Fund	5,400,000
Thirty years' bonds, issued this year	5,280,000
	40,760,000

leaving about seventeen millions unaccounted for, which are doubtless included in the general aggregate of the floating debt, of which no distinct statement is at present given to us, and in which all the above items, save the surplus of the Crimean loans, are strictly and properly included.

The financial position of France is, then, for practical purposes, clear. She is expending six millions a year more than her income, and has, by a long continuance of so doing, accumulated floating obligations which M. Fould tells us are *at least* forty millions, and are probably somewhat greater. What, then, is to be done? How is the past accumulation to be cleared away? And how is the future to be freed from the errors of the past?

The principal attention has been attracted to the lesser difficulty. The past accumulation, as we just now observed, can, if needful, be remedied by a loan; and, without access to more information than has yet been vouchsafed to us, we cannot even conjecture the amount of the loan, or even be quite confident that a loan is necessary. We are not told the exact amount of the present floating debt,—how much of it is in the hands of the public,—how much of it is in a form enabling the creditor either now or soon to call for payment,—how much of it is in the hands of public bodies—that is, substantially of the State itself. If we knew these items, we could compare them with the present state of the money market in Paris, and at least endeavour to decide how large a portion of this floating debt it would be possible to retain in its present state and how much it would be necessary to fund. But until we know with accuracy what is the amount of debt, and the sort of debt with which M. Fould is now burdened, it is only wasting our time to consider what course he will find it necessary or expedient to take with regard to it.

Probably, however, he will have recourse to a loan of some magnitude. It is the continued accumulation of the unfunded debt which has occasioned the present crisis; and it is, therefore, to be presumed that one of the first effects of the financial *coup d'état* will be an attempt, more or less extensive, to reduce it. It is certain, too, that the Government have not much cash in hand; the public deposits are very little more than 2,000,000*l* now, against upwards of 5,000,000*l* this time last year; and the payment of the dividends is approaching. The ordinary course would be in this country to borrow from the Bank of England upon deficiency bills, if the public moneys were insufficient to meet the demands of the public creditors; but, in the present circumstances of the Bank of France, a large loan to the Government, though doubtless possible, would not be financially convenient. Her private deposits and her reserve of bullion are very much less than they were at the corresponding period of last year, and her discounts are greater. The comparative poverty of the Bank may, therefore, add its weight to the perplexities of the Government, and induce it to ask aid from the open money market, which would otherwise have been unnecessary.

We need not, however, again observe that a loan for funding Exchequer bills is a comparatively easy operation. It takes no more money from the public. The Government borrows in one kind of security to pay off the holders of [illegible] but the debtor entire aggregate of its creditors is unchanged. At a price, every Government in tolerable credit can easily attain this result as often as it desires.

The true difficulty is that of the future, and a greater was, perhaps, never encountered by a financier or statesman. How can six millions a year be economised in the expenditure of France? Let us consider all the attendant circumstances with care. The French have the most expensive taste which is possible for a nation. They like a *showy* foreign policy. They like to be umpires in every quarrel, participants in every quarrel, gainers by every collision. They like to be, not only the first nation on the Continent, but the most active nation. Their heart swells with pride at the permeating influence of their ever restless power. They wish to be thought, to think themselves, and to be, masters of the destinies of Europe. Nor does their ambition end there. They wish for influence and power in very distant parts of the world. Even now, it is said the bearing of the French Ambassador at Washington is so haughty, so unconciliating, and so presumptuous, that close observers believe that the object of France is to pick a quarrel of detail with the United States, and give themselves a legal excuse for breaking the blockade. There has scarcely been a great international conflict between civilised States for two centuries in which the French have not wished to take part; and in most of such conflicts it has actually taken a very great part.

It is this ambition which is the primary cause of the great French armaments, and through them of the great French expenditure. While that ambition remains, it will be very difficult for any Government to be reasonable and moderate in money or in arms.

And peculiar difficulties stand in the path of the present Government. The Empire may be "peace," but it is at least restless peace. The Emperor has conciliated the French by ministering to their ambition. His policy, be it what it may, is not an insignificant policy: during his reign France has counted for much in the councils of Europe—perhaps for more than she before ever counted—perhaps for more than any other contemporary Power. Is he to give up this high position? Is he to commence a new policy *in formâ pauperis*? Is he to say, 'I would be great, but I have no longer funds; 'I would intervene, but I have no longer adequate power, I 'have no longer what used to be the army of the Empire?'

Nor is this all. The domestic policy of the Emperor is as costly as his foreign policy. He has spent prodigious sums on conspicuous and important public works, on edifices and structures by which the name of Napoleon III. will be long remembered—the rare merit of which he perhaps hopes will mitigate the judgment of posterity on the intellectual mediocrity which marks the literature, the statesmen, and the society of the second Empire. Is he to give up all these? Is he to be thrifty in great undertakings, and stingy in the employment of labour?

And though at times he much dislikes, or at any rate acutely feels, the inconvenience which arises from the unrespected (or the disreputable) character of his habitual associates; yet, after all, they *are* his associates, and he can hardly change them. His court is what it is,—what ten years of daily intrigue and incessant prodigality have made it. He cannot now attract to himself a different society by mere will, even if he were disposed to do so. The *Tuileries* has taken its tone, and it would take years to change it or to reform it. And how, with such an *entourage*, is parsimony to be preached? How many of his chosen friends would he, who knows them better than any one else, like to trust with money that was to be saved?

The *present moment*, too, is one of the most difficult for a reduction of expenditure. The cessation of the exports from France to America has thrown one great section of the population out of employment; and the cessation of the imports of American cotton into France will throw out of employment another section. Will it be easy, at this moment, to throw new hands upon the labour market by a rapid reduction of the army, and by a sudden cessation of public works? Would not such a measure, at least in part, defeat its own end? There is no poor law in France. At occasional crises the Government must intervene, and maintain the sufferers in one way or another out of the taxation.

unusually scanty, the Government dismiss many of its *employés* may it not have to draw upon its own resources to maintain them in idleness? May it not lose the benefit of their labour, and yet be burdened with the cost of their support?

In any other country but France, and with any other Government than that of the Emperor, it might be possible to restore the financial equilibrium by increasing the taxation. The land of France is heavily burdened, but its moneyed wealth is comparatively untaxed. An income tax of a few pence in the pound would do all which is required. But all competent observers say that the French would not endure such an impost, and that the Imperial Government, which has studiously ingratiated itself with the industrial and trading classes, is the last Government which would contemplate imposing it. And, so far as we are aware, no other suggestion for raising the required amount by taxation has ever been made. Under her present taxation France pays 72,000,000*l.* Would she consent to pay any more in any form?

To sum up this long discussion in a single sentence, France and the Emperor have for years chosen a most costly policy abroad and at home, and have determined not to pay the cost of it. The Emperor, at least, is now alarmed. But which horn of the clear dilemma will he choose? Will he abandon the policy, or will he defray its costs? Equal difficulties stand in the way of either. The danger is, that after all the warnings of the past, and notwithstanding the excellence of the Emperor's present intentions, events in no long time may creep back into their natural channel. A loan may clear the money market of the present superabundance of floating obligations, and a few more may be issued on occasion to supply their place. After a period of sincere and earnest penitence, the old and easy track of prodigality may be travelled once again. We should be loth to think so, but we cannot fail to see the evident obstacles which impede every other result.

INDEFINITENESS OF FEDERAL HOPES.

It would contribute much to raise our estimate of the capacity of Federal politicians, and to create sympathy for Federal designs in this country, if any of their statesmen would or could satisfy us that they have any well-defined and feasible hopes and prospects whatever. They talk, indeed, in very comprehensive language and in very excited tones about "conquering the South" and "restoring the Union"; but none of them deign to explain what they intend to do with the South when they *have* conquered it, or in what way the conquest of it *will* restore the Union. We have questioned many, we have heard some speeches, and have read several articles; but we never yet met either a Northerner, or an advocate of Northerners, who seemed to have asked himself the question, or even to have contemplated the problem: "Granting that you gain the victory, that you prove "your superiority in the field, that you compel your antagonists to acknowledge their defeat and sue for peace,—"*what will you do then?* How will you piece the shattered "vase? How will you sew up the gaping wound? How "will you appease the fierce passions which led to the "severance, and the still fiercer ones generated by the strife? "How, in a word, do you propose to reconstitute yourselves?" It is the absence of any rational answer to these inquiries, the impossibility, so far as we can see, of any rational answer being even imagined, that makes Englishmen look so deprecatingly on the continuance of the war;—and it is the apparent unconsciousness of Northern statesmen that there are any such inquiries to answer, which spreads far and wide among us the conviction that not one of them has yet so far calmed his passions or purged his vision as to be able, even in thought, to grasp the true position of his country and the true nature of the crisis.

There are two ways of dealing with rebels who have been subdued. You may coerce them, or you may conciliate them. You may *keep* them down by the same forcible means by which you have *put* them down; or you may pacify and disarm them by granting them what they rose in rebellion to extort. Can the North adopt either of these plans in reference to the subjugated South? Clearly not.

The case of the Americans is, so far as we remember, unique in history. If the North succeed, and proceed to reannex the conquered Slave States, under what Government, under what Constitution, will they reannex them? They must either hold them as dependents, by military force and by centrally appointed Governors, or they must readmit them, or rather force them back into the Union, under the old Republican Institutions, modified or unmodified, as the case may be. To hold by military force and to govern as subdued dependents six millions of men, of the same race as themselves, yet fiercer in their passions, and accustomed to the almost lawless freedom of democracy,—even if these six millions were less united in feeling than they are—is, to every sane mind, an obviously wild and impracticable scheme. To entertain it seriously, when the excitement of actual conflict was over, would indicate not so much incapacity as downright unsoundness. The Southerners are passionate, warlike, accustomed to domineer, and reckless enough as to personal danger,—bearing little and exacting much. They are antipathic to the Northerners; they hate them bitterly and they despise them heartily—very irrationally no doubt, but that is not the question. Their feelings of animosity will, we may be certain, have been enormously aggravated by the sufferings of the war, by the exacerbation of conflict, by the mortification of defeat. We ask the Federal politicians calmly to consider what army of occupation would suffice to keep down such a people, and how such an army could be paid?

On the other hand, supposing that, the victory once achieved and the South compelled to acknowledge their defeat an renounce their projects of independence, the Seceding States were to rescind all their secession ordinances and to re-enter the Union as before. What sort of a Union would it be? And how would the Government at Washington work? The State Sovereignty would exist still; the Southern representatives would constitute two-fifths of one House of Congress and three-sevenths of the other;—on every question that arose (and such questions would be often most critical ones) the contending forces of slave and free members would be ranged on opposite sides, not to consult as fellow-legislators but to fight as bitter enemies;—in a short time the whole machine of Government would be at a stand, and the Republic would be more thoroughly and hopelessly paralysed than it could be by any disruption, however complete or however wide. The truth is, that the long habit and the deep ingraining of democratic institutions and ideas among all classes of Americans, will render the forcible reannexation of the Secessionists impossible. If they come back as dependents, it will be impossible to govern them. If they come back as fellow-citizens, it will be impossible to work with them.

But it may be suggested on behalf of the Northerners, that a war so successful as completely to subdue the South, will so establish the superiority of the Free States, that they may hold the Slave States, as a Republic indeed, and governed by their own institutions and their own officials, but still as a subordinate Republic; having votes, but being always outvoted; being fellow-citizens, but fellow-citizens always in a minority, and therefore always powerless; enjoying civil rights and civil freedom, but of a less extended character than those assigned to their loyal compatriots. How such a position of inferiority would be acquiesced in, and in what way the ceaseless internecine strife and bitterness which such an anomaly must generate would differ from or be preferable to avowed civil war,—no one has attempted to explain. The very object of the vehement attempts to restore the Union is to preserve the power and greatness of the nation:—in what fashion either this power or this greatness could be secured by the formation of a dual Republic, of which the time and strength of one half was occupied in enforcing its supremacy over the other half,—we are at a loss even to imagine.

The only approach we have seen to a valid and weighty explanation of the intentions of the North in persisting in their determination thoroughly to subjugate the South, has been suggested for them rather than by them. They design (it is said)—and it will be well worth their while—to incur any necessary cost in time, men, and treasure, in order to obtain such decisive and overwhelming success as to *enable them to dictate the terms of separation*;—ultimate separation being, by this explanation, assumed as inevitable. If this were really the plan and hope entertained by the Federal

leaders, it would be intelligible and reasonable, if not quite defensible or wise. There can be no doubt that on the terms of separation will depend much of the future power and prosperity of the North; and there can be no doubt, either, that these terms will be singularly difficult of adjustment, unless one of the belligerents shall have so effectually defeated and exhausted the other as to frame the treaty pretty much according to its own wishes and ideas. It will make an enormous difference whether the boundary line be drawn to the North or to the South of Virginia—in latitude 36 degrees 30 minutes, or in latitude 39 degrees 50 minutes. It will make an enormous difference whether the Federal debt be equitably adjusted between the two parties, and whether the Southern Confederation pay back the purchase-money of Florida and Louisiana. It will make an enormous difference whether the guarantees obtained for the free navigation of the Mississippi be complete and adequate, or the reverse. If the result of the conflict be a nearly equal balance of success and failure between the two belligerents, then there is every reason to fear that the negotiations for peace would be as protracted and envenomed as the war itself. If, on the contrary, the North has been able to make good an incontestable superiority of strength and preponderance of victories, then the whole debate may be settled in a week. For such overwhelming preponderance, therefore, if apparently within reach, the Federalists may reasonably enough fight;—and if they would avow this to be their real object, they would command much more sympathy in England than they have yet obtained. Even then, however, it would become a question whether a plain manifesto issued at once, and setting forth the terms on which they mean to insist, would not be far more likely to contribute to their success than their present announcement of a scheme at once intolerable and unattainable. The Southerners will fight as one man, and probably to the last gasp, in order to avoid conquest and re-absorption; but it is by no means certain that they would do so for the sake of a more favourable boundary or a less onerous proportion of the debt.

THE ALLEGED INSUFFICIENCY AND THE REAL SUFFICIENCY OF THE GUARANTEE GIVEN BY THE INDIAN GOVERNMENT TO THE INDIAN RAILWAYS.

THERE has been of late very much discussion in certain circles as to the precise nature of the guarantee which the Government of India gives to the capital invested in Indian railways, and an impression has been propagated that it is encumbered with intricacy and difficulty, and not to be relied on. No impression can be more unfounded. The guarantee is perfectly to be relied upon; and there is nothing in its nature which will for a moment puzzle any man of business who may apply his mind to its consideration.

There are two classes of persons interested in railway property—the holders of debentures and the shareholders, and the position of the two is in all railways very different. What the debenture-holders wish for is a certain income. They do not desire great profit; they do not wish to derive extraordinary advantage if the undertaking prove very profitable They are only anxious for a fixed income regularly paid and free from all risk. Accordingly, in the Indian railways their debentures are countersigned by the Secretary of State with the words "Principal and interest guaranteed." So long, therefore, as the revenues of India are in existence, those revenues are liable upon that contract. The certainty and fixity which debenture-holders desire, is as clearly given to them as it can be.

The position of shareholders in a railway is different. They are the persons primarily interested in the undertaking; they are the persons who make it, who work it, who maintain it. They, in all ordinary cases, do this without the guarantee of any third party, because they consider it likely to prove profitable. They engage in the undertaking in the hope, not of a fixed income which can never be greater, but of unfixed profits, which may be very great if the undertaking is well-managed and successful, and will certainly be very small if it is ill-managed and unfortunate. When Indian railways were originally constructed, an application was made to the Government to give to the shareholders an absolute guarantee for their capital and for a fixed interest upon it. But the Court of Directors, who were then the parties primarily responsible in such matters, very decidedly and very wisely refused to do so. They said to the shareholders: 'You are the persons who are going to construct, maintain, 'and manage this railway. It will never yield a penny unless 'your income is dependent upon its success. It would be 'better that we should make the railway ourselves than that 'we should hand it over to you, unless you will derive some 'advantage if it is very profitable, and will suffer some loss 'if it is unprofitable. Government work is bad, but 'it is not so bad as the work of guaranteed subordinates who incur no pecuniary risk of their own, and 'are absolutely unchecked by the consciousness of a 'responsibility to public opinion.' On the other hand, it was alleged with equal truth by the promoters of the Indian railways: 'Unless the Indian Government does some-'thing, Indian railways will not be made for very many 'years. For the improvement of the country, and for a 'variety of great political purposes, it is very desirable that 'railways should be constructed at once. But the field is 'too uncertain to allure capitalists, unless the Government, 'upon whom in India everything else depends, will take 'some part of the risk of the enterprise, and secure private 'persons against the ruinous losses to which otherwise they 'are exposed.'

The present guarantee was framed to meet both these difficulties,—to give the shareholders a reasonable interest in the success or the failure of *their own* undertaking, and at the same time to provide a security so satisfactory as would induce capitalists to embark in the enterprise.

It provides that the Government will pay during ninety-years a *fixed* rate of interest, say 5 per cent., upon all sums invested in the construction of the railway, including the original cost of engines, carriages, and primary incidentals of every kind,—upon all sums properly chargeable at the starting of the railway to its capital account,—and upon such other necessary sums as, with the sanction of the Indian Government, should be added to that account from time to time. This fixed interest was to run from the day on which the money was paid into the Bank of England, and long before, therefore, any profits from the railway could ordinarily have accrued.

The practical consequences of this contract are extremely plain. If the railway yielded as much as 5 per cent. on the specified capital, it would have no effect whatever; but if the profits of the railway should be reduced below that 5 per cent.,—if, for example, they fell to 2½ per cent., the Government would have to pay the other 2½ per cent. If the working expenses and the receipts exactly balanced one another, and the natural profits of the railway were precisely *nil*, the Government would be bound to pay the entire 5 per cent.

Of itself, however, this security was plainly not satisfactory. The working expenses might easily amount to very much more than the receipts; and, in that case, the Government 5 per cent. might be swallowed up in defraying necessary outlay, and might never be available for a dividend. The Government, by the contract, are only bound to pay 5 per cent. on a certain capital, and if the loss by working the railway were to be greater than such 5 per cent., the loss would fall upon the Company.

To meet this extreme disaster, a supplementary remedy was provided. At any time during the 99 years embraced by the contract, the Railway Company can, on giving six months' notice in writing, surrender the railway and its appendages to the Indian Government, and the Indian Government will, at the expiration of the notice, be bound to repay all the capital invested in the railway, and to indemnify the Company against all debts and liabilities that they may have incurred in the course of the undertaking. Practically, therefore, the matter may be explained in two sentences. So long as there is no loss by working the railway, the Company is guaranteed 5 per cent.; and as soon as there is a loss, they may abandon their undertaking and receive back their capital.

It has been erroneously imagined that, in case of such a surrender, the Government could deduct from the sum repaid to the Company any sum previously paid by way of interest. But this is a complete error. The Government are bound to repay the *entire* capital. The only stipulation

made for repayment of interest is a very liberal one on the part of the Government when all the circumstances of the case are considered. The Government begins to pay interest as soon as the money is deposited in the Bank of England, and, therefore, long before any profit can have been realised by it in India. The Government are, therefore, sure to be, and in matter of fact have been and are, largely under advance to the Railway Companies. It would, therefore, not have been unreasonable for the Government to have stipulated that as soon as the railway was opened for traffic, and as soon as its earnings amounted to more than 5 per cent. upon the capital, the whole of such excess should be applied in repayment of previous advances. It would have been equitable to say: 'We pay 5 per cent. on the 'capital before it earns a penny, and the capital shall 'never yield more than 5 per cent. till all our advances are 'repaid.' The Government, however, have not been so strict. They have stipulated that only *half* of the excess over the guaranteed 5 per cent. should be applied to the liquidation of their claim for interest advanced, and the other half will be available for a dividend. Thus, if the railway yield 7 per cent. on its capital, the shareholders will receive 6 per cent. and the Government 1 per cent. until all advances made by the Government are repaid. After that the shareholders would receive the whole 7 per cent. Considering that the Government have absolutely no other fund from which their advances can ever be repaid, and that if the Company choose to exercise their option of surrendering the line the Government may lose all claim upon the Company for those advances, the concession of more than 5 per cent. to the Company, while such claims, so peculiar and so important, are outstanding, seems even extravagantly liberal. The very arrangement which has been cited as injurious to the shareholders, is in reality unduly favourable to them.

In truth, the only vestige of risk which the shareholders in Indian railways incur is the risk of sudden casualty. If by any unforeseen and unpreventible accident their railway were destroyed or rendered useless, it does not appear that the shareholders would have a claim on the Indian Government either for their interest or their principal. They have no claim for their principal, because they cannot comply with the essential preliminary condition—they cannot surrender the railway to the Government "in good working order." On the other hand, if they claim the payment of their guaranteed interest, the Government may require them to perform their part of the contract, viz., to work the railway in a satisfactory and efficient manner, and to afford Government the use of it at the times and on the terms agreed upon. On the same grounds, if the railway were captured by rebels and taken out of the control of the Company, it might become a question whether the guaranteed interest should be paid. The Company would clearly not be working the line, and it might be said that, therefore, they had no valid claim for it. Neither could they surrender a railway which had passed out of their control.

These, however, are very far-fetched risks, which we notice only to give our readers a comprehensive view of the entire subject, and that we may not be accused of having disguised anything. Practically, they are of very trifling magnitude. Sudden casualties, sufficient to destroy a railway, do not happen often enough to be worth considering. And of the contingency of rebellion, it may justly be said that the Government was itself to blame in not preserving the peace of its dominions, and that it cannot take advantage of its own default, but must pay the guaranteed interest to the Company according to the contract. There is not, therefore, the slightest risk which any man of business would consider for an instant as to the security of the capital embarked in Indian railways. The shareholders can when they please require it to be repaid to them by the Government; and if, in any improbable event, they should no longer receive an adequate interest, they would apply the remedy and exercise that power.

For the sake of theoretical completeness, it should also be mentioned that the Indian Government have the power of purchasing the railway at the expiration either of twenty-five or of fifty years, at the mean market price of such shares or stock during the preceding three years in London. If, therefore, such mean price should be less than par, the shareholders would lose a certain portion of their capital. But against this risk, also, they can effectually protect themselves by a timely surrender of their line.

Substantially, therefore, the guarantee of the Indian Government upon the capital embarked in the Indian railways may be pronounced perfect and sufficient. It secures, if only proper care is taken by the shareholders, the return of the principal invested, and, unless the shareholders themselves please, they need never be content with less than the stipulated interest.

AMERICA.

(FROM OUR SPECIAL AMERICAN CORRESPONDENT.)

NEW YORK, Nov. 2, 1861.

Space did not permit me to finish in my last letter the report of information derived from the Southern friends already quoted. I have this week seen two gentlemen (British subjects) from Georgia, and discussed with them many of the points reported on by the others. In most repects there is remarkable unanimity. With regard to the cotton crop, however, the Georgians' report is, as I expected, less unfavourable, except in regard to the area cultivated. They estimate the decrease in that State at 25 per cent. as compared with the previous year. But the rain has not been so heavy or long-continued as further West and South, and the sandy soil of that State absorbs it quickly. They cannot answer for the other Atlantic States, but should they all do so well as Georgia, the whole crop might, I think, with average care in picking, run up to the larger of the figures given. Still it must be remembered that with the small inducement now existing for close picking, the deficiency of bagging and ropes, and perhaps the absence of some of the hands for military objects, it is hardly to be expected that the crop will be as closely picked or carefully saved as usual.

To my question as to where the suffering we hear of is chiefly visible, some replied that it is not visible at all, and others that it is only amongst merchants like themselves whose business is entirely stopped, and many of whom are now forced either to go to the war, or to wear their old clothes and go in debt for their board. There is a liberal spirit abroad, and all who *have* seem willing to help to the extent of their ability those who have not. No pauperism is seen. The "white trash" are no poorer than they always are, though they have to deny themselves some little luxuries like tea and coffee. They have in most cases a piece of land on which they grow corn and pork enough for their own consumption, and many of them usually wear homespun clothing.

The following are a few of the wholesale prices now current at the South:—Coffee, 40c to 60c per lb; pork formerly 15 dols, now 50 dols per barrel; flour, 7 dols to 9 dols per barrel; corn, from 40c per bushel in parts of the country to 80c or 90c at New Orleans; blankets, 50 to 100 per cent. over the usual prices; boots, 100 to 200 per cent.; quinine, 10 dols per oz. Cotton—No market for new. A little old sells for home consumption at 9c, 10c, and 11c, at different places.

Nowhere is there any Union sentiment visible. If it exists it does not show, but, on the contrary, all now seem devoted to the cause of Secession—even those who agitated and voted against it so long as it was undecided. Their friends say that the Secession ordinance was in every instance coming under their knowledge submitted to the people, and that the contrary which is so often alleged is a Northern fabrication. They all scout as perfectly absurd the idea which Mr Russell seems to have adopted so readily, that the cotton trade will be reopened by the seizure of some of the ports. Any one dealing with the Northern invaders would be subject to the heaviest penalties—not improbably death itself; and if an invading force should reach the plantations, they have no doubt that a match would be put to the cotton before it would be allowed to fall into its hands. Nor is there any more prospect of the Federal Government than the Confederate allowing trade to be opened with the States in rebellion. Indeed, the blockade is their most effective weapon as they very well know. Their chief hope of success now seems to be in the impoverishment of the South through the stoppage of trade.

With regard to funds for paying for supplies purchased in Europe, it is said that the Confederate Government placed 4,000,000 dols in England at the commencement of hostilities, and that there is now a very large sum standing in Liverpool to the credit of Southern shippers of cotton.

As to the tariff, there is a strong feeling in favour of doing away with custom houses entirely, and supporting the Government by direct taxation.

In reply to my question, as to what the Southern people are fighting for, or think they are fighting for, the answers were—against Northern oppression—against emancipation ideas in the abstract—fighting out the irrepressible conflict, and to thrash the Yankees whom they so bitterly hate,—and with the grand idea of an enormous direct trade with all parts of the world, untrammelled alike by Northern custom houses and Northern commission agents, who they think live by preying upon them. As to fighting for liberty to take slavery into the territories, that is now never heard of. Cotton would not pay there as it does in Mississippi, Louisiana,

nd Texas, where there is still an unlimited extent of land untilled. The political contest upon this subject was fought mainly for the sake of the senators to be created, so as to retain the balance of power at Washington. It was a convenient cry for ambitious politicians, both North and South; but there was little of real *anti*-slavery or *pro*-slavery feeling about it. On whichever side the victory might remain in that struggle, there would not for generations to come be a slave the less or a slave the more. Leading Southerners understand this well enough; but no better rallying cry could be found than this territoral issue raised by the Republican party, and so they took it up with alacrity. On the tariff, or direct trade questions, they could never have called forth the same unanimity of sentiment or intensity of feeling as upon this territorial contest. It was easy to make it appear that this was a deliberate attempt on the part of the North to plunder the South of her interest in territories bought by joint funds or even by joint sacrifices, and to point to this as only the first step in the work of abolition.

There is still a strong feeling at the South that the absolute need of cotton will induce England and France to interfere and raise the blockade,—but even if not, they are determined, if it cost years of war and consequent suffering, never to give way. They have from the first had a most thorough confidence in their ability to whip the North, and it is only natural that this should have become still stronger from the results of the first six months of war. The general sentiment now is that the war should be carried into the Free States, and snug winter quarters be secured in Baltimore, Philadelphia, Cincinnati, &c.; but their leaders have probably enough of discretion not to throw over to their enemies the moral and material advantages of fighting upon their own soil, for the defence of their own homesteads.

NEW YORK, Nov. 6, 1861.

The Confederate Government have recently despatched two of their most talented men to represent them at London and Paris, and doubtless to exert all their influence to procure the recognition of their Government, if not the raising of the blockade. As a counterpoise to their influence, the Federal Government have determined to despatch by the steamer Arago, to sail for Southampton on 9th inst., Mr Thurlow Weed, the principal founder of the Republican party, and the most powerful politician in the North, but who, though he might command the highest offices in the State, has always abstained from office, preferring to pull the wires from behind the scenes. He is the man in the box of the political Punch and Judy, and has, it is said, many of the leading public men of his party as completely under his control as the said unseen man has the said Punch. He has been called the "Kingmaker" in this his State, from his success in electing governors, senators, &c.; and he had well nigh succeeded in nominating Seward, who was one of his governors, President at the last election, but seeing that the opposition was too strong, I believe he at once adopted Lincoln and secured the nomination to him. His ostensible position is merely that of editor of the *Albany Evening Journal*, Albany being the political capital of this State and the residence of the Governor. These details may be interesting as he is so soon to be among you. The appointment, and Mr Weed's acceptance of it, show the great importance attributed by Government to the mission of Messrs Mason and Slidell, and their anxiety to counteract the efforts of those gentlemen. No doubt both sides will have a patient hearing from Lord John Russell; but after the declarations made by him at Newcastle-on-Tyne, the sentiments expressed by Earl de Grey and others, and the manly and honest attitude upon this question assumed by such influential journals as the *Economist*, *Times*, and *Manchester Guardian*, it appears to me that this Government has little cause for anxiety on the point either of recognition or interference with the blockade so long as it is maintained effectually—and they surely do not intend to demand a recognition of it if it be proved ineffective. The press here seems generally gratified and rather surprised that, on the threshold of most severe sufferings by the manufacturing interest, such organs of theirs as the *Economist* and *Guardian* should, in deference to a higher law than pecuniary interest, discountenance interference with the blockade.

I am enabled to give you the following exact statement of the present position of the 7.30 per cent. loan account between the subscribers and the Secretary of the Treasury:—

	millions.	
Amount already taken of the 150,000,000 dols loan		100
Of which, by public	millions	39
By all banks, already paid up		21
By ditto, placed to credit of Government, but not yet drawn for		40
		100

As regards New York alone, the statement is as follows:—

	millions	
Amount already taken		70
Of which, by public	millions	27
By New York banks already paid up		15
By ditto, placed at credit of Government, but not yet drawn out		28
		70

From the above, it is apparent that Mr Chase has at command the sum of 40,000,000 dols, besides a sum of 9,082,000 dols in specie lying in the New York Sub-Treasury, and no doubt considerable balances in the other treasuries, to meet the expenses of the Government from now till 1st December, when the third 50,000,000 dols is to be issued. The financial position of the Government is thus remarkably easy. Their floating liabilities, however, are understood to be very heavy, the payment of accounts being often delayed for months, owing probably to the pressure of work upon the department in examining, checking, and paying.

It is interesting to observe the effect which the financial operations of the Government have had upon the New York money market, or rather upon the position of the banks. It is shown clearly by the following table, commencing on 17th August, two days before the taking of the first fifty millions:—

Week ending	Specie in Banks. dols	Specie in Sub-Treasury. dols	Total Specie in Banks and Sub-Treasury. dols	Banks' ratio of coin to liabilities. dols
Aug. 17	49,783,990	4,80,289.39	54,124,229.30	49.45
Aug. 24	47,149,481	6,09,361.91	54,056,842.91	37.12
Aug. 31	45,098,113	8,51,608.01	53,949,721.01	34.99
Sept. 7	41,887,230	13,94,909.76	54,982,139.76	34.06
Sept. 14	37,529,412	14,93,222.82	51,822,634.82	32.48
Sept. 21	36,806,177	15,541,307.03	52,347,484.03	34.07
Sept. 28	38,128,326	13,103,484.19	51,231,810.19	36.24
Oct. 5	39,809,901	10,629,098.00	50,438,999.00	30.82
Oct. 12	41,139,606	10,802,600.00	51,942,409.00	29.83
Oct. 19	42,282,884	4,741,060.74	47,023,944.74	31.82
Oct. 26	42,260,616	7,330,763.24	49,591,379.24	32.48
Nov. 2	41,271,080	9,082,035.00	50,353,115.00	32.63
Excluding Government loan				45.65

It will be noticed that, notwithstanding payments by the public and the banks of this city amounting to 42,000,000 dols, the whole of which has been paid in to the Sub-Treasury in gold, the decline in the specie held by the banks has been only 8 512,000 dols, and opposite this there is an increase of 5,302,000 dols in the amount lying in the Sub-Treasury. In the meantime, however, four to five millions of dollars have been received from California and a few thousands have come from Europe, which have also gone into circulation. There is probably, therefore, about 8,000,000 dols more coin in the hands of the people since the date when the first instalment of the loan was taken. Subscriptions to the loan from the public have not been coming in for some days past as fast as previously. Probably the public are waiting either for a battle on the Potomac, or for the landing of the great Southern expedition.

The revival of business under the large Government expenditure has made serious inroads on the stocks of dry goods in the hands of the retailer, the wholesale jobber, and the importer. The importers' stocks, particularly those in bond, are the last to feel the improvement, as the dealers are naturally desirous to sell out their old stocks before buying more. Yet the bonded stocks exhibit the increased activity very conspicuously. The great decline in business occurred in April, in consequence of the fall of Fort Sumpter. The value of dry goods entered for consumption ex ship and ex warehouse fell from 9,049,000 dols in March to 2,546,000 dols in April, and to an average of 1,362,000 dols for the months of May, June, July, and August. For September and October, however, they have run up to an average of 3,041,000 dols for each month, or considerably more than double the consumptive demand of each of the previous four months. The bonded stock must now, however, be very small, for while it increased from April till August by 2,747,000 dols, it has since been reduced by 2,008,000 dols. From these indications, and many others not demonstrable in figures, I look for a steady revival of the import trade in nearly all kinds of goods. There are, however, several reasons why no *very great* activity is likely to be manifested for some time to come. One of these is, the opportunity the war times give to Paterfamilias to insist upon the most rigid economy being practised in all respects. There will be fewer silk dresses, laces, and jewellery for his daughters. Propositions of new carpets, curtains, and the like, will not be thought of, and he may take an extra season out of his own stock of clothes, or fancy that he will till he finds that he has been more frightened than hurt, and that war money is coming into his hands one way and another, and making up to him any loss his regular trade has sustained. Then he will launch out again as of old, but till that period his custom is partly lost to the accustomed shops. What is, perhaps, an equally strong check upon the revival of business, is the disorganised state of credit. There are, perhaps, not twenty shopkeepers and dealers in the three miles of Broadway who met their payments with punctuality during the recent crisis with its almost total suspension of business; and, even now, neither do bankers know who they can safely enable to import, nor do importers know what dealers they can trust. Much business is now done upon an exclusively cash basis, which does not promote a large trade, and I am told by ladies that the scarcity of goods, particularly in anything new or fashionable, is such as they have never witnessed. All these facts point to an enormous business when the wheels of trade again get fairly in motion. And before we are very far into that improvement, the gold which is now coming from Europe will, no doubt, make the return trip. So certain is this to be the case before very long, that it seems a pity that double freight, double insurance, and loss of interest should be incurred.

We are in hourly expectation of news of the landing of the Southern expedition.

Agriculture.

FARM LEASES.

We have always urged the simplification of farm leases as affording the best means of rendering such contracts most beneficial to the parties, the landlord and the tenant, as well as to the public, all alike interested in promoting the largest production from the soil. Amongst other restrictions commonly found in such leases, we have recommended the abandonment of the restriction on assignment without the consent of the landlord. And should an unconditional abandonment of that restriction be thought too great a step in the direction of free industry to be taken at once, we have suggested that the tenant should be at liberty to assign his term on showing the intended assignee to be a person of substance. Practically, farmers only desire to assign the leases of their farms under special circumstances, such as inability from loss of property or health to carry on the farming business, or on the occasion of a tenant's death, or his diversion of his capital to another business. In case of a tenant-farmer's death, it is extremely unjust that his representatives should be prevented from disposing of the lease of his farm, on which he has invested much capital with the expectation of working out the whole term. Freedom from restriction on assignment, as well as from other restrictions, does unquestionably promote the investment of capital in husbandry, as will assuredly be more and more recognised as true commercial principles make their way into the management of landed property.

Nor does the landholder suffer anything from abandoning the restriction on assignment. He still has the security afforded by his original tenant's covenants, which will bind his property—should he be dead—although, under the Act we lately referred to, his executors may have been relieved from any personal liability from having distributed his effects. If the tenant is not a person of property, then the landlord gains nothing by preventing assignment; if he be, he or his property will remain liable. And inasmuch as on an assignment the assignee always covenants to perform the stipulations of the lease, the landlord, in effect, gets the benefit of a new person and *his* property liable to perform the obligations of the lease. The bugbear which haunts the landlord's mind seems to be that a tenant-farmer may assign a lease to a man of straw after having dilapidated the farm; but unless the tenant be a man of straw—as is too often the case under the present system—he will gain nothing by such an assignment of his lease, as he must answer for the due performance of all its obligations.

We have been led to make these remarks by a second communication from our respected correspondent, Mr Mewburn, who seems to have somewhat misapprehended our former reference to the Act relieving executors (*i.e.*, personally) from liability in respect of the rents and covenants of their testator's leases. Of course, the assignment of a restricted lease must be made with the assent of the lessor to come within the provision of relief, for otherwise it would be no assignment at all, but a forfeiture. His remarks on the construction of that Act would lead us somewhat beyond the scope of our agricultural column. But he evidently regards the restriction on assignment as tending to promote good husbandry, a point on which we take issue. He says:—

> The restrictive power is imposed to prevent the deterioration of the farm by the bad or improper cultivation of it, owing to the want of capital; rarely does it arise from any other cause. And is not *the public* interested in the good cultivation of land? Does the landlord *only* derive the benefit of it? The converse of the proposition will at once show how much the public are interested in good farming, and how much it is injured or affected by bad. And can you point out any better mode of securing or enforcing the former than by the restrictive power I contend for?
>
> I have retired from the profession of the law, in which I practised in Darlington *fifty-two years*; and, although my practice was *very extensive* and general, I do not recollect having, in that long period, prepared more than *five agricultural leases*. A great part of that period was, you will recollect, when corn was at a great price, and cattle of every description also; and, let me add, when there was no dread or apprehension of free trade in corn.

It is a striking fact that during the long period of fifty-two years a solicitor so eminent and so extensively engaged as Mr Mewburn should have prepared no more than five agricultural leases. It indicates that the period over which this experience has extended was one in which English husbandry may truly be said to have been in an abnormal condition. All that has passed away, and all interferences or restrictions on the business of agriculture—save such as from past habits are imposed and submitted to by the contracting parties—are gone for ever. Relieved from the impediments of protection, and relying on their own intelligence, farmers of capital demand, and the public interest requires, that the business of husbandry should not be uselessly hampered and obstructed. If restrictions are required to protect the landlord's interest from injury through the tenant's want of capital, the remedy is not to accept a tenant who has not sufficient capital to farm properly. Let the tenant have sufficient, and the landlord may safely grant a rational and unrestricted lease; but if the tenant has not sufficient capital, all the restrictions ever imagined will not prevent him from reducing the farm to a very low state of productiveness. Our complaint with the management of English estates is, that it deters men of capital from the business of husbandry, rather than attracts them to it.

Literature.

[Owing to the pressure of other matter we are again obliged to omit our ordinary literary notices this week, but we are making arrangements to give hereafter an occasional literary supplement when the demands upon our columns may be unusually large.]

Foreign Correspondence.

(FROM OUR OWN CORRESPONDENT.)

PARIS, Thursday Evening.

The Bank of France has this day reduced its rate of discount from 6 to 5 per cent. The reduction was expected from the beginning of the week, owing to the metallic reserve having increased. The augmentation is, it is said, sufficient to carry up the reserve to about 300,000,000f.

Although M. Fould, in his report to the Emperor, gave a deplorable account of the financial situation, he did not indicate any other remedy for it than that of putting an end to His Majesty's power of decreeing "extraordinary and supplementary credits" without asking the permission of the Legislative Body—a mere pack of His Majesty's own nominees. But though this nostrum (if acted on) may possess a certain degree of efficacy as regards the future, it is of no effect whatever as regards the present. And for the present what is to be done? On this point M. Fould has thus far vouchsafed no explanation. 'He has, however, authorised the semi-official organ of the Government to notify that he contemplates, 1, a reduction in the army; 2, a tax on chemical matches; 3, a tax on pianos; 4, a tax on tradesmen's bills; 5, an increase in the stamp duties. The first measure is indispensable, but of the length to which it is to go nothing is told. I have heard, indeed, that M. Fould means to reduce the army budget by at least 4,000,000*l* sterling; but such a small diminution would not be of very much value in such a crisis as the present. And the reduction he proposes is only to be in the number of men, not in that of regiments or officers, so that it would present no security to European nations against aggressive designs of France, inasmuch as under the military system of this country men who are allowed to leave their regiments to-day may be got back to-morrow. Moreover, a reduction in the army without a corresponding one in the navy is of no sort of consequence to the maritime Powers, especially to England; and of a reduction in the navy nothing is said. As to the projected taxes, they do not, I grant, show much financial ability. The tax on chemical matches is indeed expected, I am told, to produce about 800,000*l* English; but it will be difficult to collect and vexatious to the public. Fould's friends say, indeed, that in order to render the collection of the tax easy, he will only allow chemical matches to be made of white phosphorus, to light which will necessitate the employment of a peculiar species of sand-paper, which paper is to be made and sold exclusively by the Government; but a moment's reflection will satisfy any one that the prevention of fraud in such an article will be difficult, if not impossible. Of the folly, absurdity, and injustice of imposing a tax on pianos, nothing need be said; the idea of such an impost has been started in England more than once, and has always been scouted by her ablest financiers. Every material of which a piano is composed is taxed already; and a new impost would therefore have no other effect than to lessen the production, and so injure workmen, and to diminish the scanty earnings of an interesting class of the community—private teachers of music. Better far put new taxes on women's dress, on jewellery, on books, on a hundred other articles, than on these instruments. The tax on tradesmen's bills would be a vexatious one, and liable to be eluded on a large scale. As to the proposed augmentation of the stamp duty, the wisdom of it may be doubted, inasmuch as experience has proved that moderate duties are infinitely more profitable than large ones. On the whole, then, M. Fould's plans, so far as they are known by the revelations of the semi-official press, are not, to use a French phrase, "up to the height of the situation",—are not in accordance with the teachings of modern science,—are not worthy of his reputation as a financier. How a Peel or a Wilson, for example, would have scorned such petty expedients!

In addition to the preceding, M. Fould, as you were informed in my last, is said to have in contemplation various projects calculated to give activity to financial enterprise. The abolition of payment for admission to the Bourse seems decidedly one of them, and the measure will, it is said, take effect from the 1st January next. It will have the effect of causing the money market, as of old, to be attended by a crowd of petty speculators, and their demands will, of course, on certain occasions, cause a rise in the value of *rente* and other securities; but these small folk

are subject to panics, in which they sell right and left for anything they can get, so causing heavy falls. However, the rises and falls which their *engouements* and *paniques* occasion, are the very things the great speculators require. To the removal of the tax on the sale of shares and bonds, no objection can be made; the impost is not very productive, and is annoying.

Notwithstanding the present is certainly a time for economy, one hears, unfortunately, that the new Minister contemplates making—not probably of his own free choice, but in obedience to orders *d'en haut*—various augmentations in the public expenditure; as, for example, the fixing of the allowance to members of the Legislative Body at the huge sum of 15,000f (600*l*) each per annum; perhaps also an increase of pay to the Senators; and the grant to the Imperial Prince, child though he is, of several millions (francs) to enable him to maintain in becoming splendour the "civil and military household" which is about to be formed for him.

On the subject of a loan, it is not possible to speak positively. M. Fould himself has caused some surprise by saying that he hopes to be able to do without one; but an off-hand expression like this is probably not to be regarded as giving his serious opinion. The great majority of financial men and of the leading politicians certainly think that the deficit is so great that no reasonable expectation can be entertained of making it up by savings out of revenue, and that, therefore, a loan had better be raised.

Either by a misprint or a slip of the pen, M. Fould was stated in my last to have represented the supplementary and extraordinary credits under the Empire at 96,000,000*l* in English: they were really 111,920,000*l*—namely, 96,000,000*l* up to the end of 1858, the remainder for the last three years.

The French Government sent a commission to what is called the International Fishing Exhibition—that is, of all instruments and articles employed in fishing—recently held at Amsterdam. The commission has presented a report, and the principal point in it is a strong recommendation of nets made of cotton, in preference to those heretofore employed. Cotton nets, it appears, are lighter, cheaper, of greater durability than others, and enable larger quantities of fish to be taken. With such qualities they can hardly fail to come into general use; and the Dutch, for their part, are represented to be employing them extensively. It was in Scotland, it appears, that these nets were first made, and that the principal manufacture of them now exists.

The following details relative to cotton at Havre are of interest:—

Years.	Stock on Jan. 1. bales.	Arrivals in 10 months. bales.	Sales in 10 months. bales.	Stock on Oct. 31. bales.
1861	105,020	544,040	491,075	157,985
1860	45,130	556,000	477,480	123,650
1859	136,690	302,400	398,890	40,200
1858	82,600	359,722	399,022	43,300
1857	46,800	384,470	360,340	70,930

The prices per 50 kilogs (nearly two cwts) on Oct. 31 were as follows:—(It must be borne in mind that from the 7th May, 1860, cotton brought from countries out of Europe by French vessels, or by vessels of foreign countries assimilated to French, has been free of duty.)

	1861.	1860.	1859.	1858.	1857.
	f f	f f	f f	f f	f f
New Orleans	138 to 170	78 to 120	90 to 134	95 to 130	106 to 135
Mobile	137 160	77 106	89 116	95 117	106 122
Georgia	136 155	76 104	88 113	94 115	105 120
Georgia, L. S.	125 475	105 400	115 400	115 375	140 500
Pernambuco	107 168	70 120	88 137	92 133	117 147
Martinique and Guadeloupe	113 153	66 100	90 114	92 110	116 120
Hayti	117 127	66 77	84 92	75 85	97 108

The Customs returns have been published to-day. The total amount of import duties in the first ten months of the present year were 100,627,000f; in the same period last year they were 110,873,000f; and in that of the year before 157,680,000f. From want of room I postpone to next week the detail of the imports and exports.

The following is an account of the import and export of flour and grain from the 1st to the 10th of the present month:—

Designation.	Importation. General Commerce. quintals*	Importation. Special Commerce. quintals	Exportation. General Commerce. quintals	Exportation. Special Commerce. quintals
Flour	94,988	98,207	3,163	3,163
Wheat, spelt, &c.	454,240	647,430	2,757	1,491
Rye	6,732	6,732	3,400	3,400
Barley	16,354	17,431	913	913
Maize	9,893	9,129	3,388	38
Oats	7,639	19,539	174	174
Pulse and other grain	2,959	6,459	1,068	1,068
Total	593,505	795,927	14,863	10,247
From 1st Jan., 1861, to 31st Oct.	8,184,955	7,541,640	1,220,496	872,111
Total, 11th Nov.	8,778,460	8,337,567	1,235,359	882,358

* The quintal is very nearly 2 cwts.

"General Commerce" means, in imports, the total quantities brought in, and "Special Commerce," the portion thereof taken out of bond for consumption. In exports, "General Commerce" signifies foreign and French grain and flour, and "Special Commerce" the part thereof which is exclusively of French production.

The following is an account of the week's quotations of the Bourse; to-day there has been a slight reaction in prices:—

	Thursday, Nov. 14. f c	Thursday, Nov. 21. f c
Threes	69 40	69 90
Bank of France	2940 0	2930 0

Do. do. 100f, 3 —	92 50	91 25
Do. do. 500f, 4 —	480 0	481 25
Do. do. 500f, 3 —	456 25	458 75

Annexed is the weekly account of the markets:—

FLOUR.—Business at *Paris*, during the last week, has been more active, and price have risen. Yesterday, the quotation was at 80 to 86f the sack of 159 kilogs. In the four marks, the current month was offered at 84f 75c, December 85f 75c, and the four first months of next year 88f. After business hours, however, there was a decline.

WHEAT.—At *Paris*, yesterday, though offers were much larger than last week, prices rose 1f 26c to 1f 50c on first qualities. Wheat from Lorraine was offered and taken at 46f. Centre and Allier, offered at 42f, 43f 50c, and 44f 50c, found likewise buyers Farmers kept their prices between 44f and 47f. Some of them asked even 48f. In foreign, white American, English, and Dantzic were offered at 47f 50c, and taken at 47f. Red wheat from the same countries obtained only 44f 50c, 45f, and 45f 50c. Spring America was offered at 40f 55c, 41f, and 41f 50c; Hungarian, 42f and 41f 50c. Of the provincial markets, 46 present a rise of from 10c to 40c, 36 a decline of from 5c to 75c, 19 were reported firm, 35 without change, and 13 calm.

COTTON.—At *Havre*, in the week ending Friday, business was active, and prices again rose. The sales were 15,339 bales, and the arrivals 1,272. The closing prices were 3f higher for very low qualities; 2f to 3f for low; 3f to 4f for very ordinary; 3f for ordinary and other sorts. Consequently very low New Orleans was at 144f the 50 kilogs; low ditto, 154f; and very ordinary, 162f. The stock, on Friday, was 155,375 bales, against 107,950 at the same date in 1860, and 16,500 in 1859. This week, business has been very calm, and prices irregular, with a downward tendency.

COFFEE.—At *Havre*, last week, business was very animated, and prices improved. The sales were 165 sacks Hayti Port-au-Prince, disposable, at 89f to 91f the 50 kilogs in bond; 100 Gonaives, 92f 50c; 450 Rio, not washed, disposable, 75f to 81f; 8,815 ditto, for delivery, 75f to 81f; 1,000 Santos, damaged, 78f 50c; 44 Porto Rico, 95f; 50 Laguayra, 92f; 570 Ceylon, *trie*, 112f to 113f duty paid; 1,994 Java, 119f ditto; 600 Macassar, 111f to 112f; 300 Manilla, 113f 50c to 114f; 657 bales Reunion, 70f duty paid. The arrivals were about 3,700 sacks. This week, business has been calm: Hayti at 90f; Cape, 94f; Ceylon, 112f. At *Nantes*, last week, no business. This week, some sales have been made in Reunion at 147f 75c. At *Bordeaux*, last week, the sales were 500 sacks Guayra, *non grage*, at 87f 50c to 88f; 240 ditto, 70f; 1,350 Mysore, disposable, 115f to 115f 50c; 22 casks French West India, 145f; 350 Salem, 129f; 1,860 Java, of which a part at 116f 50c; 1,545 Mangalore, 115f; 250 Rio, washed, 104f. This week, Mysore has been at 116f; Salem, 128f 50c; and Guayra, *trie*, 70f. At *Marseilles*, last week, the sales were 1,000 Rio at 77f; 1,000 ditto, 72f; 200 Malabar, 87f; 150 Guayra, 90f; 175 bales Mocha, *trie*, 115f; 1,800 Rio, 64f to 78f; 500 ditto, 65f to 80f. By auction, 248 East India, damaged, and 144 Rio, ditto, were disposed of. This week, no business.

SUGAR.—At *Havre*, in the week ending Friday, business was regular. Prices were firm. 760 casks French West India, disposable or for delivery, went at 45f 50c to 46f the 50 kilogs duty paid; 354 ditto "usine," 49f 50c to 53f; 41 Porto Rico, 48f; 1,585 sacks Pernambuco, 24f 50c to 25f in bond; 722 ditto and Rio, 27f 50c in bond. The arrivals were 1,485 sacks. This week, French West India has been at 46f 50c to 47f 50c; Reunion, 46f to 49f; Havana, 33f 30c, 32f 25c, and 31f 25c; Cuba, 46f. By auction, Havana damaged has been at 26f to 32f. Some Porto Rico has also been disposed of. At *Nantes*, last week, the sales were 760 casks French West India, disposable or for delivery, at 45f 50c to 46f duty paid; 354 ditto, 49f 50c to 53f; 41 Porto Rico, 48f duty paid; 1,585 Pernambuco, 24f to 25f 50c; 722 sacks ditto and Rio, 27f 60c in bond: 800 casks Havana damaged were also disposed of; 57 sacks Reunion, 53f; 250 casks French West India, 50f; 19 ditto, 45f 50c to 45f 75c; 1,750 Havana, 34f. This week, French West India has been at 43f 75c to 48f. At *Bordeaux*, last week, the sales were 210 casks French West India, 46f; 2,400 bales Reunion, for delivery, 50f 50c; 460 Santiago, 45f 25c to 48f; 500 Mauritius, 54f 25c. This week, French West India has been at 46f 75c to 47f and 48f 25c. At *Marseilles*, last week, the business in French colonial sugar consisted of the sale of about 400 casks Reunion. The sales of foreign sugar were much more considerable, and consisted of Havana and Pernambuco. Some hundred casks of Havana damaged were also disposed of.

INDIGO.—In the week ending Friday, business at *Havre* was more animated, 115 chests Bengal having been sold, the greater part at 3f above the last estimates. The arrivals were only of 20 chests. This week, 8 chests Bengal have been sold at 13f 40c the ½ kilog. At *Bor-*

deaux, last week, the sales consisted of 32 chests Madras, 12 ditto Velore, 30 ditto Kurpah, and 81 Bengal. Kurpah was sold 4f 25c above the last estimates, and Bengal 4f 75c. This week, no business.

HIDES.—At *Havre*, in the week ending Friday, the sales were 10,400 La Plata dry, at 102f 80c to 137f 50c the 50 kilogs; 3,850 ditto, salted saladeros ox, 72f to 73f; 750 Rio Grande salted, 66f to 70f; 2,355 Porto Cabello dry, 85f; 100 New York salted, 50f. The arrivals were 4,487. This week, Rio Janeiro salted have been 55f; Buenos Ayres dry, 105f; ditto, green saladeros, 72f for ox.

WOOL.—At *Havre*, in the week ending Friday, the sales consisted only of 33 bales Buenos Ayres, not washed, part at 1f 60c the kilog, part at prices kept secret; 7 bales Russia, washed, at 7f 95c. The arrivals were 19 bales. This week, Buenos Ayres, not washed, has been at 1f 25c. 1f 62½c, 1f 47½c, 1f 35c, 1f 50c, 1f 65c, 1f 70c, 1f 20c; Monte Video, not washed, have been at 2f 10c, 2f 7½c, 2f 5c, 2f, 1f 95c, 1f 85c, 1f 67½c 1f 30c to 1f 32c; Chili, not washed, 1f 95c; Entre Rios ditto, 1f 50c; Buenos Ayres, washed, at 3f. Sheepskin, not washed, have been at 1f 45c, 1f 10c and 97½c; lambskin at 1f 5c.

TALLOW.—In the week ending Friday, at *Havre*, the sales were 14 casks New York, at 65f the 50 kilogs; 10 ditto, 66f; 28 casks Buenos Ayres at prices kept secret. The arrivals were 5 casks. This week, no business. At *Paris*, yesterday, the sales were at 130f the 100 kilogs.

SPIRITS.—At *Paris*, yesterday, 3-6 of 90 deg., first quality, was at 81f to 80f the hectolitre; Montpellier dispossible, of 86 deg., 110f. At *Bordeaux*, the day before yesterday, Languedoc was at 105f; and beetroot, first quality, at 90f.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

As regards prices, the trade for English wheat at Mark lane, this morning, was decidedly firm; but the demand, notwithstanding that the show of samples was very limited, ruled inactive. Foreign wheat was by no means extensively dealt in; nevertheless, the quotations were supported. The finest descriptions of barley moved off slowly, on former terms. Other kinds, however, were saleable only at lower rates. Good and fine oats were in fair request, and their value was steadily maintained; but inferior qualities—owing to the large importation, chiefly from Archangel—were 6d per quarter cheaper. Beans and peas realised former prices, the supply on offer being small. In nearly all kinds of flour sales progressed slowly, yet no change took place in the currencies, compared with Monday. This week's imports amount to 19,890 quarters of wheat, 6,380 barley, 51,410 oats, 40 sacks and 4,850 barrels of flour.

At Liverpool, this morning, both wheat and flour were in limited request, at Tuesday's prices. Maize was a slow sale, on former terms.

Owing to less favourable advices from the consuming markets, the wheat trade of Alexandria for the week ending November 12 was in a most inactive state, and sales could only be effected by submitting to lower prices. Beans were fully as dear. Annexed were the sales:—Saide wheat, private trade produce, 28,815 qrs, 32s to 33s; Beheireh wheat, private trade produce, 14,130 qrs, 30s 8d to 31s 6d; ditto, white, 2,870 qrs, 31s 9d to 32s 6d; Saide beans, private trade produce, 4,710 qrs, 27s 2d to 27s 8d; Beheireh beans, 425 qrs, 25s 6d to 26s; barley, 4,460 qrs, 20s to 21s; lentils, 135 qrs, 26s 6d to 27s; peas, 16 qrs, 25s; linseed, 670 qrs, 43s to 48s 6d per quarter, free on board. Freights—Beans to the United Kingdom for orders, 6s 9d to 7s, and other descriptions in proportion; to a direct port, 6s to 6s 3d. By steamer to Liverpool the rate for grain has receded to 6s 9d per quarter.

In the early part of the week, the Liverpool cotton market was seized with a sort of panic from the American reports of the North being inclined to accept the intervention of foreign Powers. This feeling, however, disappeared on receipt of the last news from America, dispelling any prospect of a compromise. The market nevertheless has remained rather dull, and in consequence of several speculators being compelled to force sales, a decline of about ⅛d to ¼d from the highest point of the past week has taken place. The total sales of the week amount to 44,000 bales, including 17,000 bales to spinners, 20,000 on speculation, and 7,000 for export. To-day, 5,000 bales have been sold, with a steady market.

The shipments of cotton from Bombay for the month of September, and for the nine months ending Sept. 30, were as follows:—

	Great Britain. bales.	Cowes, &c., for Orders. bales.	Foreign Europe. bales.	China, &c. bales.	Total. bales.

Freight to London, 2*l*; to Liverpool, 2*l* to 2*l* 2s 6d per ton.

Messrs Briggs and Co., of Alexandria, thus write in reference to the cotton trade of that port for the week ending Nov. 12:—A considerable reduction was made on the 5th in the price of cotton, and it finally reached a difference of about 1½d per lb. On Sunday, some of the Greek houses purchased freely, but without much affecting the value. The railway is now again working throughout the line, and large arrivals of cotton are looked for, which, at present prices, will require a great outlay of ready money. This in itself acts as a check upon speculators, and coupled with it are the high rates of freight by steamers. The operations of the week are as follow, the quotations we note being not so much the prices paid, but those at present prevailing:—778 bales fully good fair, 11⅛d to 11⅛d; 1,991 bales good, 11⅛d to 11⅜d; and 1,748 bales fine, 11⅜d to 12⅛d per lb, making a total of 4,517 bales of the new crop. Of old cotton, 45 bales have been disposed of from 7d to 10½d per lb. Freights by steamers are at 1d per lb, and may go higher.

The public sales of tea, held this week, have gone off steadily, and prices have been fairly maintained. The private contract market has ruled somewhat inactive, at late rates.

Good and fine qualities of raw sugar have changed hands to a moderate extent, at full quotations; but inferior samples have been much neglected. In refined goods, a limited business has been transacted, on former terms.

EXPORTS of Sugars from Havana and Matanzas from Jan. 1 to Oct. 25:—

	1861. Boxes Sugar. Havana.	Matanzas.	1860. Boxes Sugar. Havana.	Matanzas.
To United States	123,290	148,961	241,152	230,708

Total	966,847	406,280	838,993	396,330

Nearly all descriptions of coffee have been in steady request, and prices, generally, have been well supported. Cocoa has ruled firm in value, owing to the announcement of a Navy contract for 200 tons.

No quotable change has taken place in the value of rice; but the transactions in all qualities have been much restricted. The market for dry fruit has continued depressed.

The inquiry for rum has been far from active, notwithstanding that a Government contract is announced for 50,000 gallons. In prices, no alteration has been observed. Brandy is still dull.

The public sales of colonial wool have been progressing with increased heaviness. The fall in Sydney and scoured Port Philip wools, compared with last auctions, is now 2d—in other descriptions from ½d to 1½d per lb. Privately, more business has been done in English wool, at an advance of ½d to 1d per lb. Hemp moves off steadily, at 34*l* for clean Russian.

Scotch pig iron has ruled heavy, and the quotation, cash, mixed numbers, is now 49s 4½d to 49s 6d per ton. Copper and tin are very firm, and prices are on the advance.

Linseed oil has sold steadily, at 35s 9d to 36s per cwt on the spot. In other respects, the oil trade has been steady, but far from active, at about previous rates. American spirits of turpentine are quoted at 72s to 72s 6d per cwt.

The receipts and exports of naval stores at New York, from Jan. 1 to Nov. 4, were as follows:—

	Receipts. bbls 1861.	bbls 1860.	Exports. bbls 1861.	bbls 1860.
Turpentine	32,139	52,301	19,465	47,079
Spirits of turpentine	46,824	138,426	20,133	63,179
Rosin	192,648	579,572	204,121	455,212
Tar	48,919	46,527	25,792	25,569

The tallow market has been very inactive. P.Y.C. is quoted at 51s 9d per cwt on the spot; and at 52s for January to March delivery. Town tallow, 53s net cash.

"The week opens," observes the New York *Shipping List* of the 6th inst., "with considerable buoyancy in some departments of general trade, but taken altogether the volume of business is small for the season. The more active movement in money matters,

previously chronicled, continues to be the most conspicuous feature, and capital is freely changing hands at the rates quoted below:—

	Per cent. per annum.
Loans on call, stock securities	5 to 6
Do. bond and mortgage	6 7
Prime endorsed bills, 60 to 90 days	6 7
Do. 4 to 6 months	8 9
First-class single signatures	7 ...
Other good bills	... ...

The Bank statement of this week, compared with the report of the previous week, shows the following result:—

COTTON.

NEW YORK, Nov. 6.—The speculative demand which was beginning to manifest itself at the date of our previous writing has been stimulated by the favourable European advices, under which the market has been excited, and prices have advanced two cents per pound, to which we conform our quotations. The stock is estimated about 20,000 bales, of which only a small proportion is offered, many of the holders refusing to sell except at a still further advance. The sales comprise 5,500 bales, closing very firm. We quote:—

NEW YORK CLASSIFICATION.

	Upland.	Florida.	Mobile.	New Orleans and Texas.
	c	c	c	c

Middling	24⅛	24⅛	24⅛	25
Good middling	25	25½	25½	26
Middling fair	...	...	...	...

The arrivals have been from Liverpool, 548; Port-au-Prince, 339 bales. Total import since 1st inst., 887 bales; total import since 1st September, 9,011 bales. Export from 1st to 5th November, 1861, none, against 5,414 bales in 1860. Export from Jan. 1 to Oct. 31, 1861, 156,305 bales; against 160,155 bales in 1860.

NEW YORK, Nov. 8.—Our market is very firm, and prices are on the advance. Midland Upland cotton is quoted at 24c per lb.

A fair amount of business was done in cotton in the early part of the week, but in the latter half the market has been extremely inactive. The chief demand continues to be for Surat cotton, and American are comparatively neglected. Sales in the latter have been made at irregular prices in isolated cases and small quantities, and business has been done at a decline of ⅛d to ¼d per lb in middlings, and fully ¼d per lb in lower grades. Holders generally are quite firm. Long-stapled kinds are without alteration, but in restricted demand. East India are slightly irregular in price, and on the whole easier. The sales to-day are 6,000 bales. The market is quiet, but holders indisposed to sell. The reported export amounts to 6,690 bales, consisting of 1,570 American and 5,120 East India.

MARKETS IN THE MANUFACTURING DISTRICTS.

Both for home use and export, the demand for goods in the manufacturing districts, this week, has been on a limited scale. In prices, no quotable change has taken place, and dealers, generally, exhibit great caution in their operations. There has been an improved sale for iron, at full quotations, and the value of coals has an upward tendency.

MANCHESTER, Nov. 21.—We have had a very inactive market this week, but some inquiry has revived to-day, in consequence of news from India to 2nd inst. telegraphing the important revulsion of feeling and increase of business which had there ensued from the critical state and prospects at home six weeks ago. Since that time prices with us have been gradually advancing, and even this week there has been a quiet degree of hardening, though the large transactions of last week have partially supplied present wants. A main item in the daily sales is now the resale of goods bought at various lower points in the late rise, the quantity of which forms a very material fund in reserve, manufacturers' stocks being, as a rule, not large, considering the inevitable curtailment of production before them.

BRADFORD.—The animation in lustre wools noted for several weeks past is still the prevailing feature of our market. Prices must again be quoted as unmistakeably firmer. Down wools continue unaltered. Noils and shorts are taken off as produced, rates being very firm. There is considerable activity in lustre yarns, and the spinners of that class are very active. Other sorts are comparatively neglected. Pieces—The home merchants are now placing their orders for the spring, and manufacturers are thus becoming more generally engaged.

ROCHDALE.—The wool and flannel markets have both been of a quiet character, and only a very moderate amount of business was done. Generally speaking, prices of both wools and goods are steady.

LEEDS.—In the coloured market there has been a moderately good business transacted. A considerable quantity of Batley goods, sealskins, and other makes suitable for the winter season, were disposed of. In the White Hall the business was almost entirely confined to sorting up in heavy goods, Witneys, beavers, &c.

LEICESTER.—There is a fair business doing at the warehouses in useful goods, and business generally continues in a very satisfactory state.

NOTTINGHAM.—There has been very little doing this week in the lace trade. There is not much doing in silk goods, most departments being dull.

BELFAST.—The breadth of surface at present occupied by goods in process of finish at the different bleachfields in this and the next county is exceedingly large. Compared, however, with the extent of business done for the first half of November, 1859, the present condition of the trade must be reported as very quiet.

WOLVERHAMPTON.—Current prices of pig iron:—Staffordshire cold blast, 4*l* 5*s*; Old Windmill End Mine, Nos. 1, 2, and 3 melters, warm air, 4*l*; Old Windmill End, second quality, Nos. 1 and 2, melting pig iron, 3*l*; Old Windmill End Mine forge pig iron, 3*l* 5*s* to 3*l* 7*s* 6d; best native hydrate pigs, 3*l* 7*s* 6d to 4*l*, according to the brand; first-class All Mine grey forge pigs, 3*l* 5*s* to 3*l* 7*s* 6d; Seend Grey Forge Mine pig iron, 3*l* to 3*l* 2*s* 6d; Seend Mine melting pigs, 3*l* 10*s* to 3*l* 15*s*; good mine pigs, with a modicum of flue cinder, 2*l* 10*s* to 2*l* 15*s*; mine pigs, deteriorated by cinder, 2*l* 10*s* to 2*l* 12*s* 6d; Cleator Moor hæmatites, 3*l* 5*s*; Barrow hæmatites, 3*l* 5*s*; Workington hæmatites, 3*l* 5*s*; grey forge cinder pig iron, 2*l* 10*s* to 2*l* 15*s*; white forge cinder pigs, 2*l* 5*s* to 2*l* 10*s*; ordinary melters, Nos. 1, 2, and 3, 2*l* 12*s* 6d to 2*l* 17*s* 6d; superior makes of mine melting iron, 3*l* 7*s* 6d to 3*l* 17*s* 6d, according to make and quality. The above prices are all delivered on to the wharfs at the South Staffordshire manufactories. Gadlys (Aberdare, South Wales), No. 1 foundry pig, cold blast, 4*l* 10*s* f.o.b. Favourite Shropshire and Forest of Dean brands, hot blast, 3*l* 12*s* 6d to 3*l* 15*s* delivered; Northern hæmatites, 3*l* 5*s*, according to brand or quality.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Nov. 6.—There has prevailed a steady fair demand for State and Western flour both for the local trade and for export, but under the influence of the less favourable advices from Europe, the market has ruled rather heavy, and prices have declined 5c to 10c per brl, the market closing quiet yesterday at the reduction. The sales comprise 58,000 brls, including 21,000 brls yesterday. Canada flour is a shade lower. Southern flour has been in limited request, but the market remains without important alteration.

EXPORT from 1st to 5th November.

	1861.	1860.
	barrels	barrels
Wheat Flour	56,666	23,565

EXPORT from Jan. 1 to Oct. 31.

	bbls		bbls
1861	2,351,728	1860	1,501,621

The wheat market remains without important change. The less favourable tenor of the European advices exerted but little influence, though prices yesterday experienced a reduction of 1c per bushel. The sales for the three days are heavy, comprising about 900,000 bushels, of which 267,000 changed owners yesterday. Corn has been in fair request, but at somewhat lower prices; the sales foot up 475,000 bushels, including 132,000 yesterday, closing at the annexed prices:—White Southern, 66c to 70c; yellow Southern, 64c to 66c; mixed Southern, 62c to 63c; round yellow, 63c to 64c; round white, 66c to 70c; mixed Western, 62c to 63c; and unsound, 58c to 61c.

EXPORT from 1st to 5th November.

	1861.	1860.
	bushels	bushels
Wheat	517,643	337,424
Corn	77,775	125,916

EXPORT from Jan. 1, to Oct. 31.

	1861.	1860.
	bushels	bushels
Wheat	21,700,293	9,434,147
Corn	10,002,534	2,337,901

NEW YORK, Nov. 8.—The amount of business transacted in flour, since the above report, has been rather limited. Prices, however, have ruled tolerably firm. Wheat has changed hands somewhat freely for export, at extreme rates. The market for corn has been firm, at full quotations.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Nearly the whole of the markets held since we last wrote have been very moderately supplied with English wheat. Both red and white qualities have commanded a steady sale, at full quotations, and at which good clearances have been effected. Fine foreign wheats have realised quite as much money as of late, but the business doing in them has been somewhat restricted. Low and damp qualities have met a dull inquiry. The prevailing cold weather has led to an active sale for malting barley, at extreme currencies, and there has been an improved demand for grinding and distilling sorts. Good sound oats have moved off steadily,—other kinds slowly, on former terms. No quotable change has taken place in the value of either beans or peas. The flour trade has continued in a healthy state.

Advices from most of the French markets are to the effect that wheat has continued to sell heavily at the late decline in value; but that barley and all other kinds of spring corn have sold at extreme currencies. In America, no change of importance has taken place in the value of either wheat or flour. The shipments to Europe, however, continued on a large scale.

The Scotch markets have been but moderately supplied with wheat, which has moved off freely at full quotations. There has been a good consumptive demand for barley and flour at quite previous rates.

In Ireland, the corn trade, generally, has been in a sluggish state; nevertheless, the value of all articles has ruled firm.

The supply of English wheat on sale at Mark lane, to-day, was very small, and the trade ruled firm, at full quotations. Foreign wheat was by no means extensively dealt in, yet prices were supported. Barley was a slow sale, and secondary qualities were rather cheaper. Oats moved off slowly, at barely late rates; but beans and peas were quite as dear as on Monday. In flour, very little was doing, on former terms.

Mr E. Rainford reports the arrival of 16 vessels off coast laden with grain, and an inactive demand for floating cargoes, at about stationary prices.

The London averages announced this day are:—

	qrs	s	d
Wheat	4341	at 63	3
Barley	1810	38	7
Oats	1024	24	8
Rye	150	40	10

Imports of the week ..... 187,814 qrs.

COMMERCIAL AND MISCELLANEOUS NEWS.

The following is dated Calcutta, Oct. 17:—It being now the Doorgah Poojah holidays, we have no changes whatever to report in the money, import, or export markets. All places of business are closed, every one is away from town, and there is nothing doing. This state of things will last till the 23rd instant, when the holidays will be over. Further intelligence, by telegraph, to Oct. 25, is as follows:—The Bank of Bengal yesterday reduced the rates of interest and discount ½ per cent. for loans of 30 days, and 1 per cent. for loans exceeding 30 days. Government securities—Five-and-a-Half per Cents., 4½ to 4⅝ premium; Five per Cents., 2½ to 2⅝ discount; Four per Cents., 15 to 15½ discount. Freights to London—Dead weight, 2l 15s per ton; jute, 3l per ton; seeds, 2l 15s per ton.

From Madras, we have news to the 23rd ult. Five-and-a-Half per Cents., 4 premium; Five per Cents., 2½ discount; Four per Cents., 7 discount; document bills, 2s 3⅜d Freights on sugar, 35s; cotton, 45s. Interest, 5 per cent. Money easy.

The annexed commercial news is dated Bombay, Oct. 26.:—Imports—Since the date of our last all kinds of imports have been dull of sale, and prices in consequence are rather weaker. Piece goods have changed hands to a very limited extent. A comparative dulness in the native bazaar, and the near approach of the Dewallee holidays, are the chief causes of the prevailing dulness. Twist is exceedingly dull, and prices are rather lower, but in the absence of any transactions of importance to test the market, our quotations may be considered nominal. Metals—In consequence of stocks in second hands being heavy, there has been no disposition on the part of dealers to speculate further in the various descriptions; only a few unimportant sales are reported at slightly lower rates. Cotton—Since the date of our last, large quantities of Dhollera, Broach, and Surat have arrived, and our stocks of these and other descriptions are being daily augmented by fresh arrivals. Shortly after the departure of last mail prices declined four to five rupees per candy; this reduction, however, was not sufficient to induce much business. The following are the contracts effected up to the arrival of the Galle telegram:—Dhollera, 725 candies, at 165r; Broach, 300 candies, at 165r; Dharwar sawginned, 400 candies, at 195r. On the arrival of the Galle telegram, dealers at once raised their demands, and prices are again nominally about the same as at the date of our last. The only contract entered into since the receipt of the Galle telegram is one of 700 candies Dharwar ginned, at 197r or 198r. 200r is now asked for this description of cotton.

From Havana, we have received the annexed information to the 25th ult.:—Clayed Sugars—Not much activity has prevailed in our market during the past four months. Our very reduced stock and high prices have checked transactions. To the Channel the exports have been quite trifling. As yet no contract has been made for next crop sugars. Muscovadoes—There are but few hogsheads remaining, and these are in second hands and are being shipped. The seasons of late have been favourable, and the coming crop looks promising. Cucuruchos quoted No. 7 to 10, DS, 29s 9d to 24s 7d; browns, 11 to 12, 25s 2d to 26s 4d; yellows, 13 to 14, 26s 11d to 27s 5d; florette, yellow, 15 to 20, 28s to 32s; whites, 32s to 37s 8d; muscovadoes, 29s 2d to 22s 10d per cwt f. o. b., exchange 16½ per cent. pm. The stock at this port and at Matanzas is 48,000 boxes, whilst at the same period in 1860 there were 120,000 boxes. Freights—To Falmouth there has scarcely been a charter since our last. 40s is the nominal value.

The following is from Rio de Janeiro, under date Oct. 25:—The coffee market opened after the departure of the Tyne steamer on the 9th instant at full prices, but, owing to a regular demand, unfavourable weather and moderate receipts, dealers gradually raised their pretensions, hence our quotations show an advance of 200 rs to 300 rs. Transactions since our last amount to 75,000 bags, of which only a few thousand bags after the arrival of the present conveyance, say 24,000 bags for the United

States; 35,000 North of Europe; 13,000 Mediterranean; 3,000 Cape of Good Hope and sundry ports. Ordinary quality, 45s 5d to 50s; regular first, 52s 3d to 53s 9d; good first, 56s to 57s 6d; prime good first and superior, 58s 3d to 60s 6d; round lots, 53s to 56s; better selections, 56s 9d to 58s 3d per cwt, free on board, without freight, exchange 25½d. Stock 150,000 bags. Freights without alteration, 50s to 60s. Desirable shipping scarce.

The value of the total imports of bullion into the United Kingdom, during the week ending Nov. 20, were 192,577*l*. The shipments in the same period were 329,193*l*.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 4 per mille premium, and the short exchange on London is 25.30 per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 1-10th per cent. dearer in London than in Paris.

By advices from Hamburg the price of gold is 429 per mark, and the short exchange on London is 13.6 per 1*l* sterling. Standard gold at the English Mint price is, therefore, about 4-10ths per cent. dearer in Hamburg than in London.

The course of exchange at New York on London for bills at 60 days' sight is 107 to 107¼ per cent., which, when compared with the mint par between the two countries, shows that the exchange is against *England*; but, after making allowance for charges of transport and loss of interest, the present rate leaves no profit on the transmission of gold to the United States.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT, pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 20th day of November, 1861.

ISSUE DEPARTMENT.

	£		£
Notes issued	28,518,290	Government Debt	11,015,100
		Other Securities	3,634,900
		Gold Coin and Bullion	13,868,290
		Silver Bullion	..
	28,518,290		28,518,290

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	10,706,646
Rest	3,178,047	Other Securities	16,294,532
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	4,104,901	Notes	8,035,140
Other Deposits	13,270,277	Gold and Silver Coin	845,297
Seven Day and other Bills	775,390		
	35,881,615		35,881,615

Dated the 21st November, 1861. M. MARSHALL, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	21,258,540	Securities	27,098,178
Public Deposits	4,104,901	Coin and Bullion	14,713,587
Private Deposits	13,270,277		
	38,633,718		41,811,765

The balance of Assets above Liabilities being 3,178,047*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£281,183
An INCREASE of Public Deposits of	335,632
An INCREASE of Other Deposits of	79,971
A DECREASE of Government Securities of	105,541
A DECREASE of Other Securities of	97,983
An INCREASE of Bullion of	351,092
An INCREASE of Rest of	13,148
An INCREASE of Reserve of	597,392

The above return is satisfactory, and shows a large addition to the resources of the Bank, a considerable increase having taken place both in the reserve and bullion. The other securities have again fallen off, and now stand at a lower point than at any period since February, 1859. Another decline is shown in the Government securities.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1851:—

At corresponding dates with the present week	1851.	1858.	1859.	1860.	1861.
Circulation, including bank post bills	£ 20,524,537	£ 21,188 667	£ 21,980,731	£ 21,123,176	£ 21,258,540
Public deposits	7,300,341	7,671,799	8,062,071	6,073,597	4,104,901
Other deposits	9,290,436	12 820,861	13,662,550	12,665,022	13,270,277
Government securities	13,241,768	10,808.591	10,925,157	9,490,273	10,706,646

In the corresponding week of 1851, Kossuth had taken his departure for the United States. The death of the King of Hanover had just been announced. A new loan of twenty-one million dollars was expected to be negotiated by Prussia for the Eastern Prussian Railroad. The advices from Vienna described a continued disorganisation in both political and financial affairs, the Jewish community for the moment being especially oppressed. From Russia it was stated that the proposed railway from St Petersburg to Warsaw had been marked out and the earthworks commenced. The news from California was favourable, the yield of gold continuing abundant. Important discoveries had also taken place in Australia. The London money market was rather less easy, owing to a greater demand from the provinces; but the Bank rate was only 3 per cent. The course of events in Paris was being watched with much interest. An expedition to blockade the ports of Mexico, unless British claims were satisfied, appeared imminent.

In 1858, the prosecution of M. de Montalembert was regarded with much attention. The prospectus of a Chilian 4½ per cent. loan of 1,554,800*l* at 92 had just been issued.

In 1859, the final instalment of the Indian loan of 5,000,000*l* had been paid. The French funds stood at 70f 20c, and Consols at 96⅜, showing a marked improvement over the present prices, notwithstanding the want of confidence caused by the equally sudden break out and termination of the Italian war.

In 1860, an arrangement had been concluded between the Banks of England and France for an exchange of 2 000,000*l* of gold against a similar amount of silver, by which means the extraordinary pressure still felt in Paris was beginning to be mitigated. The arrangements had been completed for the issue of the new Turkish loan of 16,000,000*l* by M. Mirès. The news from America announced the final election of Mr Lincoln to the Presidency, and stated that the excitement in the South was gaining strength. In New York, however, there was still an impression that, with the exception of South Carolina, the Union party were everywhere in the ascendant. The siege of Gaëta was still going on. Some important disasters at sea were attracting attention, especially the burning of the Transatlantic steamer Connaught belonging to the Galway line, the wreck in the Mediterranean of the Brazilian corvette Donna Isabel, and the loss of several steamers in the Baltic, owing, it was believed, to the practice of deck-loading.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1851, a deficiency of 2,299,084*l*; in 1858, a deficiency of 2,502,913*l*; in 1859, a deficiency of 5,395,953*l*; and in 1860, a deficiency of 7,632,994*l*. In 1861, the deficiency is 3,024,255*l*.

DISCOUNT AND MONEY MARKET.—The demand for discount this week has been without alteration, but the rate for the best short paper has been a shade firmer at 2⅝ to ¾ per cent. At the Bank the applications have been on a very moderate scale, except to-day, when, from exceptional causes, they slightly increased. In all departments of business great stagnation appears to prevail. The following are the usual discount charges for first-class paper of various dates:—

30 days	2⅝ to ¾ per cent.
60 days	2⅝ to ¾ per cent.
3 months	2¾ per cent.
4 months	3 to 3¼ per cent.
6 months	3½ per cent.

On the Stock Exchange the supply of capital is undiminished, and loans on Government securities were effected to-day at 1 to 1½ per cent.

The loan of 25,000*l* in 7 per cent. debentures for the harbour improvements of Auckland, New Zealand, was adjudicated on Monday. The minimum fixed was 105, at which there were biddings for 12,000*l*. Tenders were also sent in for 20,000*l* above that price, the highest offer being 108¾. The latter subscribers will consequently receive allotments in full, while the applications at 105 will experience a *pro rata* reduction.

According to the advices from Paris, it appears that M. Fould does not contemplate a new direct loan to meet the deficiency of 40,000,000*l* in the finances of France, and that he considers the immediate wants of the Treasury may be supplied through the medium of the floating debt. The Bourse, it is said, will be opened gratuitously at the end of the present year, a measure that has long been agitated; and the tax on the transfer of share property will be abolished or modified.

The general expectation that the Bank of France would shortly lower their rate of discount has been verified, a reduction being announced yesterday from 6 to 5 per cent. At Hamburg the current terms advanced in the beginning of the week to 4½ per cent., owing, it is said, to remittances of silver to Denmark and Russia; but a reaction has since taken place. The following are the present rates of discount in the chief cities of the Continent:—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	5	4½
Vienna	6	6
Berlin	4	3¾
Frankfort	4	3
Amsterdam	3	3
Turin	6½	6½
Brussels	4	3½
Hamburg	...	4
St Petersburg	7	8

ENGLISH FUNDS.—Consols in the early part of the week showed increased buoyancy, partly from purchases on banking account, and yesterday were quoted as high as 94¼ for money. A reaction, however, soon occurred, and after official hours last evening the prices were 93⅞ to 94 for immediate delivery, and 92½ to ⅝ ex dividend for the account. To-day the tendency has again been dull, chiefly from the apprehension of complications with the United States, but no further alteration has taken place. The present quotations are, therefore, exactly the same as last Friday. The general business of the week has been unimportant and below the average.

Exchequer bills have been again rather flat, the June issue having receded to 12s to 15s premium. The March bills were last quoted 7s to 10s premium. India bonds are also lower, at 12s to 15s premium.

India Five per Cents. have been steadily supported at 106⅝ to ⅞ throughout the week, although the purchases for investment in this stock have latterly in some degree diminished. The rupee paper securities have improved to 99 to ½ the Five per Cents., and to 105¼ to ½ the Five-and-a-half per Cents.

FOREIGN STOCKS.—There has been a fair demand for foreign securities this week, and several descriptions are again quoted higher. The principal advance has been in Turkish Six per Cents. of 1858, which at one period were as high as 72⅝, but a partial reaction has since followed. Some fluctuation has occurred in Spanish certificates, an improvement which had at one time been experienced being succeeded by a rather heavy decline. These changes are consequent upon statements alternately favourable and unfavourable respecting the future intentions of the Spanish Government in dealing with this question. The ordinary deferred Spanish stocks have been in request, the improved prospects of the country stimulating investments at the present comparatively low prices. Sardinian is higher partly in anticipation of the dividend. Venezuela bonds advanced in the early part of the week on the satisfactory advices of the progress effected in the pacification of that Republic, but a relapse has since taken place. Buenos Ayres securities are steady on the further successes of General Mitre. There have been some inquiries lately for Peruvian and Russian stocks, the former being especially in demand and higher.

The final quotation of French Three per Cents. in the Paris Bourse this evening was 70f 5c, showing a rise on the week of more than three-eighths per cent.

The advices from Buenos Ayres confirm the news of the successful advance of General Mitre, commanding the Buenos Ayres army. The town and port of Rosario have been occupied, Dr Derqui, the President of the Confederation having previously abandoned the place. The following extract from a mercantile letter has been published:—

Buenos Ayres, Oct. 15.

Since the victory at Pavon on the 17th of September, which, although claimed by both parties, was, as subsequent events have proved, gained by the Buenos Ayres Infantry, the field operations of the remnants of General Urquiza's forces have consisted in robbing and driving off cattle and sheep from the Buenos Ayres territory. In the confusion, one or two peaceful Irish sheep farmers have had their throats cut; but, considering that at least 8,000 to 10,000 ruffians broke loose, the damage to life and property has been very small. This is mainly to be attributed to the discipline which General Mitre has enforced among his followers. The President of the Confederation, his Commander-in-chief, and some few men have abandoned the town of Rosario, and escaped with their fleet to Parana, the capital of the Confederation.

The army of General Mitre now occupies Rosario, and the star of Buenos Ayres is decidedly in the ascendant. The Confederation, on the other hand, is entirely out of funds, and being likewise in bad credit, we may soon hear of the termination of the war, and a fresh organisation of the Republic under the auspices of the province of Buenos Ayres.

Rain has fallen abundantly, and everything promises well for cattle and sheep farmers. Business is at a complete stand, but with the prospects of a revival in a short time. It is said Urquiza had sent a confidential agent to treat for peace with General Mitre at Rosario.

The first section of the railway from Ascension (the capital of Paraguay) to Villa Rica was opened this month. The line, when finished, will be 90 miles in length.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and this day:—

	CONSOLS. Money. Lowest.	Highest.	Account. Lowest.	Highest	Exchequer Bills March.	June.

RAILWAYS AND OTHER SHARES.—The railway market this week has generally shown increased firmness, although the actual business done has not been large. The principal transactions have been in Midland and Lancashire and Yorkshire, and at one period a more considerable advance than is now apparent had been established in both these stocks. This rise is partly due to the comparatively favourable traffic returns, but is in a great measure assisted by the present large outstanding speculative account for a fall. The chief depression in this department, however, is in South-Eastern, a temporary improvement in the early part of the week not having been fully maintained. London, Chatham, and Dover has relapsed on a report, since contradicted, that this Company intend to abandon their proposed extension to Farringdon street. Caledonian is also flat. London and North-Western was in demand on Wednesday on the increase in the traffic, but afterwards relapsed. This afternoon, the tendency has been generally unfavourable.

In the colonial market, a rise occurred in the earlier part of the week in Canadian descriptions, but a reaction has since followed. It is stated that an influential deputation has arrived in England from the North American colonies, to endeavour to obtain from the Imperial Government a guarantee on the capital required for the completion of railway communication from Halifax to Quebec. Indian guaranteed stocks have been quiet, but steadily supported.

Foreign railway securities have been less firm, and in some instances show a fractional decline. Lombardo-Venetian closed dull, at ⅝ to ¾ premium, ex dividend.

In miscellaneous descriptions, there has been a rise in Crystal Palace stock and Red Sea Telegraph shares. United Mexican Mining have also experienced a renewed advance, and joint stock banks have been in more demand. Mercantile Fire Insurance are quoted ⅝ to ⅞ premium; and Commercial Union, ¼ dis to par.

Subjoined is our usual list of the closing prices of the principal railway shares last Friday and this day:—

FOREIGN EXCHANGES.—The rates on Hamburg and Amsterdam were a shade firmer on Tuesday, but to-day a general, though slight, decline has taken place.

BULLION.—Annexed is the weekly circular of Messrs Pixley, Abell, and Langley, describing the transactions in bullion during the week, and in Indian rupee paper:—

Gold.—The Ceylon has brought 118,000*l* from Australia by the overland route; but as there is still but little demand for export nearly the whole of the arrivals are taken to the Bank, which has, purchased about 311,000*l* during the past week. The only exports have been about 40,000*l* to the Peninsula, 4,500*l* to the East Indies, per Pera, and 3,500*l*, per Shannon, to the West Indies.

Silver.—The silver, ex Seine, has been sold at 61d per ounce standard, but on the receipt of the letters from Bombay a good demand arose, and the price increased to 61½d per ounce. As there is but little silver now on the market, we do not look for any reduction in rate, and we consider it firm at our quotation. The Pera took 121,000*l* for China—a larger amount than has been sent for some time.

Mexican dollars, ex Seine, have been sold at 4s 11⅛d per oz, and the market is nearly bare of this description of coin.

Exchange on Bombay and Calcutta, for banks' drafts at 60 days' sight has risen since our last to 2s per rupee; bills with documents, 1s 11⅞d to 1s 11½d; banks' bills on Madras, 60 days' sight, 1s 11⅞d to 2s; bills with documents, 1s 11d to 1s 11¼d.

India Government Loan Notes remain at our quotations this day week. We quote 5½ per Cents. 105 to 105½; and 5 per Cents. 98¾ to 99¼; 4 per Cents., 85 to 85½.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; bar gold, fine, 77s 9d per oz std; bar gold, refinable, 77s 11d per oz std; Spanish doubloons, 75s 6d to 76s, nominal; South American doubloons, 73s 8d per oz; United States gold coin, 76s 5d per oz, last price. Silver—Bar silver, 5s 1½d per oz std,; bar silver, containing 5 grs gold, 5s 1¼d per oz std; fine cake silver, 5s 5⅛d per oz; Mexican dollars, 4s 11⅛d per oz; Spanish dollars (Carolus), 6s 6d per oz, nominal.

About 40,000*l* in gold was taken to the Bank yesterday, and 35,000*l* to-day.

FAILURES AND MERCANTILE EMBARRASSMENTS.—A meeting of creditors of Mr Joseph Pickering, contractor, of New Bridge street, and Eynsham, Oxfordshire, was held on Tuesday, when the accounts presented showed unsecured creditors, 25,279*l*; creditors partially secured, 8,697*l*; and creditors fully secured, 44,100*l*. A proposal to pay 20s in the pound, viz., 2s 6d in three months, 2s 6d with security in six months, and two further payments of 7s 6d each at a future period, was agreed to.

Some more failures are announced from Montevideo.

At a meeting to-day of creditors of Messrs Mew and Thorne, ironfounders, of Cowes, Newport, and Southampton, it was resolved by a majority, after considerable discussion, to accept a composition of 5s 6d in the pound, payable in instalments at 3, 6, 9, and 12 months. The liabilities were stated to be 20,908*l*, with assets expected to produce 7,460*l*.

PUBLIC COMPANIES.—The United Kingdom Electric Telegraph Company have commenced taking messages of 20 words between London, Liverpool, Manchester, Birmingham, &c., at a uniform rate of 1s. The British and Irish Magnetic Company have also adopted a similar charge for those places.

The following calculations have been prepared by a professional accountant with regard to the actual value of the Red Sea Telegraph Annuity under the arrangement with the new Company:—

In February, 1862, when the next half-yearly payment becomes due, the value of Red Sea Telegraph shares will be as follows:—

	£	s	d
If computed at the rate indicated by the market price of the Annuities expiring in 1885, i.e., 3¾ per cent., payable February 1862	0	9	0
Value of Annuities to August, 1908	19	14	8
	20	3	8
If computed at 3½ per cent., i.e., the rate indicated by Consols assured at 92 3-10, payable February, 1862	0	9	0
£23 5s 10d Consols, at 92 3-10	21	10	2
	21	19	2
If computed at 3½ per cent., i.e., the mean rate between 3¾ per cent. for Annuities to 1885, and 3¼ per cent. for 3 per cent. Consolidated Annuities, treated as perpetuities, payable February, 1862	0	9	0
Value of Annuity to August, 1908	20	11	10
	21	0	10

The Directors of the new London and Lancashire Fire Insurance Company have given notice that the arrangements for the proposed amalgamation with the Queen Insurance Company have been finally completed.

The report of the Madras Irrigation Company, issued preparatory to their meeting on Saturday week, states that the operations in India are progressing favourably, upwards of 14,000 labourers being now employed. Careful investigation has also shown that the original estimate of the outlay required will turn out correct. Considerable difficulty was experienced and time expended in the reorganisation of the establishment which had been broken up by the stoppage of the works at Kurnool, but the chief engineer was, notwithstanding, enabled to break ground on the day named, and the ceremony of raising the first sod was performed under highly favourable circumstances. Not only had a sufficiency of labour been obtained, but information has also been received that 2,000 Wuddahs (Indian navvies) are ready to proceed from a distant part of Madras to the field of operations. The report also describes in detail the exact position of the different works undertaken.

The Directors of the Intercolonial Royal Mail Steam Company, in their report to be presented on Tuesday next, announce that the total receipts during the half-year ending in June were 43,298*l*, and that, after deducting home and colonial charges, a surplus remains available of 4,112*l*, out of which a dividend is recommended at the rate of 7½ per cent. per annum free of income tax. The net profits would have been larger but for the loss sustained in working the Auckland line. The mail service continues to be performed with regularity and efficiency. Captain J. Vine Hall, the representative and manager of the Company in the colonies, has arrived out.

The dividend that will be recommended to be declared at the next half-yearly meeting of the London Chartered Bank of Australia will be at the increased rate of 8 per cent. per annum.

The capital for the new Telegraph to India Company has been fully subscribed, and the shares have been allotted. The vessel with the cable on board is expected to leave England in a month.

The shares in the Indian Carrying Company have all been taken, and will be allotted on an early day.

The Mercantile Bank (Limited), which proposes to extend the principle of limited liability among the banks of the metropolis, will do so under favourable conditions. The Directors are men of business, with means and standing, and it is not intended to call up more than 30*l* per share of 100*l*, so that a large capital will always be held in the hands of the shareholders, and be available to satisfy in every event the claims of the public. The striking success of London joint stock banking is known to all readers of the ECONOMIST, and it is a matter for very serious consideration whether, with a good proprietary, and a large sum left unpaid-up in the shareholders' hands, the principle of limited liability is not *peculiarly* applicable to banking Companies.

The prospectus of the National Marine Insurance Company has been issued. It draws attention to the stupendous growth of the ocean carrying trade, and to the comparatively small increase of underwriting security. They consider that the entire absence of Marine Insurance Companies at Dublin and Glasgow especially indicates that there is an opening for the operation of a new company, and they intend to supply an existing want, by appointing, "under sufficient restrictions, competent representatives at "the different trading ports in the East Indies, China, "Japan, and Australia."

A new Company has been started for the purpose of working the hæmatite iron ore mines of Glamorganshire, situate at Mwyndy. It is stated that the district abounds in rich ores, which can be converted into pig iron at a profit varying from 5s to 10s per ton. The proposed capital is 160,000*l* in 40,000 shares of 4*l* each, and the calculation is that the mines will yield an annual profit of 10 per cent.—the shares have been done at ½ to ¾ premium.

MISCELLANEOUS.—At Lloyd's the rate of insurance on the James Wilson, now 132 days out from Australia, with 76,000*l* in gold, has advanced to 20 guineas per cent., and on the overdue Canadian steamer North Briton, to 50 guineas. The Anglo-Saxon, which left with the succeeding

mail from Canada, is also a few days late, and the increased premium of 50s is demanded. It is, however, inferred that the North Briton has met with some accident to her machinery, and that possibly the Anglo-Saxon has fallen in with her, and is delayed in rendering her assistance.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS, SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—A quiet tone still pervades the market, and there has not been any alteration in prices during the week, partly owing to the reduced supplies brought forward at the public sales. Native Madras and Cuba muscovado realised steady prices; but the demand generally is rather inactive. About 1,300 casks West India had sold to yesterday (Thursday) evening. 358 casks Barbadoes, offered by auction, were about one-third part sold at 34s 6d to 42s per cwt. The landings, last week, were again less than the deliveries, viz., 2,470 and 4,420 tons respectively, leaving the stock at the close 76,900 tons. In 1860, it was 56,500 tons.

Mauritius.—On Tuesday, 4,002 bags, consisting chiefly of the lower qualities, were mostly bought in: brown, 31s 6d to 35s.; dark grey, 35s 6d to 36s 6d per cwt.

Bengal.—1,121 bags partly sold at 40s 6d to 41s 6d for good to fine pale Gurpatta date; remainder bought in above the value. Good Cossipore taken in last week has since partly sold at 44s 6d per cwt.

Madras.—1,294 bags native chiefly sold at 31s to 32s 6d for brown Bright grocery taken in at 35s to 36s per cwt.

Foreign.—By auction, 735 casks Cuba were principally sold at full prices: grocery, 38s 6d to 41s 6d for low middling to good, and brown to middling grey at 33s 6d to 38s 6d. 1,288 boxes Havana were taken in at 32s to 37s 6d for very low brown to middling grey. 237 cases 46 barrels Bahia were also bought in: yellow to good greyish white, 38s to 43s 6d. 900 bags partly sold at 34s 6d to 39s for brown to good yellow. Some business is reported in foreign muscovado privately at the above quotations. A floating cargo of Havana sold yesterday for the United Kingdom, No. 10½, at 26s 6d per cwt.

Refined.—The market continues quiet, and the quotations are rather lower.

MELADO.—300 casks have sold privately at 25s 6d to 29s per cwt.

MOLASSES.—250 casks Bengal, by auction, were bought in at 16s to 17s per cwt. 60 puns Dominica sold privately at 15s per cwt.

RUM.—There is a better demand for common qualities at previous rates: Demerara, 1s 9d to 1s 10d; Leewards, 1s 7d to 1s 8d; 220 puns Penang chiefly at 1s 7d, and some Mauritius at 1s 6½d proof; Jamaica, common to middling, 2s 10d to 3s 2d per gallon. 50,000 gallons are required for the use of the Navy, contracts to be sent in on the 27th inst.

COCOA.—A Government contract for 200 tons is declared, tenders to be sent in on the 27th. This market has shown increased firmness. 469 bags Trinidad, by auction, partly found buyers at 65s to 75s for grey to good red. A small parcel of Guayaquil realised 64s per cwt. The stock of all kinds is 13,600 bags, against 19,300 bags last year, and 9,350 tons in the preceding one.

COFFEE.—No further change in prices can be noticed, and the market is steady, although rather less animated than last noticed. The public sales of plantation Ceylon, comprising 1,151 casks 1,040 barrels and bags, went off steadily, chiefly finding buyers at 73s to 79s 6d for small berry to middling and good; favourite marks as high as 83s. 884 bags, native were taken in above the value. 201 bags Munzerabad Mountain, pale and foxey, 71s to 77s. 185 cases 34 bags Tellicherry, 72s to 78s for pale to middling. 925 bags low to good ordinary Singapore, 65s 6d to 66s 6d; 50 casks 692 cases 256 bags other East India were chiefly bought in. 91 bales 21 half-bales Alexandria Mocha were bought in at 70s to 85s for ungarbled. 100 barrels Jamaica, 66s to 70s 6d. A floating cargo of good first Rio has sold at 55s, and one of superior pale at 60s 9d per cwt, for near continental ports.

TEA.—Transactions to a moderate extent have occurred in green teas just landed, and the new season's congous met with steady buyers. Good common is firm at 1s 1d per lb. 13,725 packages, by auction, yesterday went off at former prices, except for broken leaf congou, which was a little cheaper.

RICE.—Transactions on the spot have been limited at 11s 9d for good pinky Madras. Further contracts have been made in Necrancie Arracan for next year's shipment at 11s per cwt.

IMPORTS and DELIVERIES of RICE to November 16, with STOCKS on hand.

SAGO.—96 boxes old medium grain were sold at 23s. 114 bags old Borneo grain taken in at 20s per cwt.

SPICES.—The large sales of Singapore pepper have rather unsettled quotations, but 7,718 bags about two-thirds sold at a slight reduction on the previous value, from 3⅞d to 4d, with clean quality at 4d to 4¼d. 688 bags Singapore white realised 6d to 6⅛d, being the previous value. 185 cases brown nutmegs went off at last week's prices, about three-fourths of the above quantity finding buyers: low and small, 1s to 1s 4d; middling to fine bold, 1s 5d to 3s 9d. 37 cases mace: common to middling, 1s to 1s 4d. 14 cases Penang cloves, 1s 2½d to 1s 3¼d. 10 casks Amboyna bought in at 5d per lb. 80 boxes cassia vera sold at 88s and 91s per cwt for second and first piles.

SALTPETRE.—An active speculative demand prevails, and fully 2s 6d advance has been paid for fine Bengal, viz., 38s 6d per cwt. Several parcels sold for arrival, latterly at the same price.

IMPORTS and DELIVERIES of SALTPETRE to November 16, with STOCKS on hand.

	1861.	1860.	1859.	1858.
	tons	tons	tons	tons

Delivered	10450	11300	15660	12650
Stock	2850	4160	3900	2650

The deliveries last week were 243 tons.

COCHINEAL remains firm. The stock is 8,400 serons, against 6,750 last year, and 5,000 serons in the preceding year.

LAC DYE.—117 chests ordinary were bought in at 4d. A few lots of fair quality sold at 1s 6d to 1s 6½d per lb. The stock of this article is reduced to 6,000 chests, against 8,700 chests last year, 11,200 in the preceding one, and 12,550 chests in 1858, at the corresponding period.

OTHER DYESTUFFS.—Cutch is firmer, and now quoted 25s to 26s. 1,500 bags, by auction, yesterday, were bought in at those prices. Gambier steady. New Bengal safflower has sold at high prices, from 6*l* 17s 6d to 10*l* 2s 6d per cwt.

SHELLAC.—90 chests button sort partly sold at rather lower rates: common button sort, 7*l* 17s to 7*l* 10s; good pale red taken in at 8*l* 15s per cwt.

RUBBER.—Middling to good quality of East India remains firm at 1s 2½d to 1s 3d per lb.

METALS.—Transactions generally have been rather limited, without material alteration in prices. Foreign tin is firmer: Straits, 116s 6d to 117s; Banca, 119s to 120s. Scotch pig iron at one period advanced to 49s 7½d mixed Nos.; but the price has since receded to 49s 3d per ton. Spelter has been quiet. The last sale reported was 19*l* per ton. No change in other metals.

HEMP.—Manilla keeps very firm. Petersburg clean steady at 35*l* per ton.

HIDES.—88,000 East India, brought forward yesterday, went off at full rates and all sold.

JUTE.—The sales on Wednesday passed off without much spirit, and 5,260 bales about half sold at 14*l* to 20*l* 15s for common to fine. A few contracts have been made privately during the week, on about former terms.

LINSEED.—On the spot prices are unaltered. Bombay is held for 67s, and Calcutta at 62s to 64s as to quality; Black Sea, 60s 6d to 61s; Archangel, 57s. For arrival of parcels floating prices strengthen, 61s 3d delivered United Kingdom has been paid for a cargo Taganrog due, and 61s is demanded for October shipments. Several cargoes for spring shipment have been sold at 53s cost, freight, and insurance to United Kingdom, and 55s per quarter delivered, but no more to be had there at.

OILS.—Sperm has been neglected, and can be obtained at 88*l* to 89*l*. A cargo of cod oil near at hand has sold at 38*l*. Olive is quiet and slightly lower: Gallipoli, 61*l*; other kinds, 56*l* 10s to 60*l* per tun. There has been a better supply of linseed oil, and the present quotation is 35s 9d to 36s. The market for rape oil has been inactive: foreign refined, 46s 6d to 47s; brown, 43s to 43s 6d. Transactions in cocoa-nut are very limited: Ceylon, 49s 6d to 50s; Cochin, 50s to 51s, with a firm market. Fine palm sells slowly at 46s per cwt.

TURPENTINE.—Rough was last sold at 22s. Spirits difficult to sell. American, 72s per cwt.

TALLOW.—This market remains quiet, with very moderate transactions passing in foreign, and quotations are rather lower at the close. First sort Petersburg Y.C., 51s 6d to 52s; for delivery in the first three months, 52s to 52s 6d; old Y.C., 50s 6d to 51s per cwt.

PARTICULARS OF TALLOW.—Monday, November 18.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market was quiet to-day. 1,876 casks West India have sold during the week. 4,579 bags grocery Madras, by auction, chiefly sold at steady rates: grainy yellow and white, 40s 6d to 45s 6d; soft yellow, 38s 6d to 42s 6d. 730 bags Bengal went at 39s 6d to 40s 6d for Gurpatta date, and 46s 6d to 47s for extra fine Bally. 3,206 bags Mauritius were chiefly taken in.

COFFEE.—1,268 bags native Ceylon sold at 69s to 69s 6d for very good ordinary. Of 2,724 bags Rio, the washed portion brought 62s 6d to 68s 6d; the ordinary was taken in at 52s to 53s. 455 bags Java, sea damaged and repacked, sold at 73s to 74s per cwt.

COCOA.—30 bags Trinidad sold at 64s 6d to 79s per cwt.

SPICES.—495 bags Zanzibar cloves partly sold at 3⅛d to 3½d per lb. Some small parcels of other spice were taken in. 389 bags dusty Penang pepper sold at 3¾d per lb.

SAGO.—100 boxes old small grain sold at 23s 6d per cwt.

RICE.—310 bags 710 pockets Bengal sold at 11s to 11s 6d per cwt.

SALTPETRE.—Fine Bengal has sold at 40s; and some parcels now landing at 38s 6d per cwt, being again higher.

RUBBER.—142 baskets E.I. part sold at 1s 1¾d to 1s 2d for common; remainder held at 1s 4d per lb.

LAC DYE.—Of 408 chests, by auction, less than one-fourth part sold, chiefly fine marks, at 1s 6d to 1s 6¾d per lb.

GAMBIER.—1,237 bales, by auction, were bought in at 17s 6d to 18s per cwt.

OILS.—315 casks palm, by auction, were chiefly sold at 43s 3d to 43s 6d. 690 casks Rangoon earth oil partly sold at 15*l* 5s to 16*l* 5s. 30 tuns seal: brown to pale, 33*l* 10s to 40*l*. 40 tuns cod, 38*l* per tun.

TALLOW.—189 casks Australian sold at 46s 3d to 51s 6d; 80 packages South American, chiefly bought in, at 51s 6d to 52s 6d per cwt. Town reduced to 54s 3d per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—There is no alteration to note with respect to prices in the home market, for refined sugar the demand is very limited. Treacle continues scarce. Crushed, 33s to 33s 3d in barrels. The accounts from Holland are very dull for crushed.

DRY FRUIT.—Some large parcels of currants have been brought forward at public sale this week at easier rates; but the trade have not been induced to buy, being generally well stocked for the rest of the season. Many importers have withdrawn their samples till a better demand shall exist, which plan, if generally adopted, would be very beneficial to the future position of the market. No new feature in raisins. A cargo offered at auction was chiefly sold at 40s, and 57s was paid for fine selected sorts. Red Smyrnas are in fair request, at former rates. Large sales have been made in figs, at full prices, and some orders from America still remain unexecuted. Sultanas have been forced off at 45s, being a fall of about 5s on last week's prices.

ENGLISH WOOL.—The trade has improved, and several descriptions have advanced in value from ½d to 1d per lb, and are firm at the advance.

COLONIAL WOOL.—The colonial wool sales progress without change.

FLAX.—Market unaltered.

HEMP.—Market firm, at our quotations.

COTTON.—Sales of cotton from Friday, 15th November, to Thursday, 21st November, inclusive:—1,450 bales Surat, 9¼d for fully fair sawginned Broach; 8⅝d to 8¾d for good fair Dhollera; 7d to 7⅞d for ordinary to middling fair Oomrawatty; and 7d to 8d for middling to good fair Compta: 1,700 bales Tinnivelly, 8⅝d to 9¼d and 9⅜d for middling to good: 350 bales Western Madras, 7⅞d to 7¾d for fair to good fair; total, 3,500 bales. The market opened with a good demand, and prices of Surat advanced fully ¼d per lb, but within the last few days the advance has been lost, except on the better kinds of Compta, which are fully ¼d per lb dearer than last week, whilst the lower qualities of Surat are neglected. Tinnevelly and Western Madras have commanded higher prices, the advance being about ¼d per lb during the week; the market, however, closes very quietly, and with less disposition to purchase. 300 bales Tinnevelly, guaranteed good fair, have been sold for arrival at 8⅜d per lb. Yesterday, at public sale, 41 bales middling Compta were sold at 7d; 21 bales Surat, all faults, at 6½d to 8d; 38 bales Surat from the Cape, damaged, and all fauits, 5⅞d to 6¾d; 23 bales good St Vincent's at 13d; and 53 bales Barbadoes at 10d to 16½d. 48 bales Surat were bought in.

Imports, 1st Jan. to 21st Nov.	88,418	34,996	123,414
Stock, 21st Nov., 1861	41,707	17,336	59,043
— — 1860	13,808	18,713	32,521

P.S.—Market dull. Sales, 150 very good Oomrawatty at 9d per lb.

SILK.—The silk market is still extremely flat and quiet. Little or no change in prices.

TOBACCO.—A good demand has existed for exportation, resulting in sales to some extent. For home trade, sales have been chiefly of a limited character. Prices very firm for all descriptions.

LEATHER AND HIDES.—We have again no change to report on the leather market. The demand fully keeps pace with the supplies generally, so that the stocks continue rather to diminish than increase, but no alteration has taken place in prices. There is a great scarcity of prime crop hides of 45 lbs and upwards; good heavy English butts, extra thick foreign butts, good kips, best calfskins 25 to 30 lbs per dozen, and those of heavy weights, are also in small supply and are much wanted.

METALS.—There is little to note in our market. Copper is very firm in price of English, and foreign has become dearer. Iron continues to be rather more sought for. Tin is considerably higher in price of Banca, but Straits and English are little changed. Spelter is neglected. Lead is steady in price and demand. Tin plates well maintained at late improvement.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	54	8
Fat by ditto	2	9
Yellow Russian	52	6
Melted stuff	39	0
Rough ditto	22	6
Greaves	18	0
Good dregs	7	0

Imports this week 11,605 casks.

PROVISIONS.

More activity prevails in the bacon market this week, at lower prices. Friesland, very inferior, at 104s. More business doing in American butter this week, and that seems the only thing that sells well at present. No inquiry for Jersey, the market being very dull for that article.

METROPOLITAN CATTLE MARKET.

MONDAY, Nov. 18.—The total imports of foreign stock into London, last week, amounted to 5,837 head. In the corresponding period in 1860, we received 8,242; in 1859, 6,210; in 1858, 6,765; in 1857, 3,678; in 1856, 4,368; and in 1855, 5,032 head.

To-day's market was but moderately supplied with foreign stock, the general quality of which was by no means first-rate. On the whole, the demand for it ruled steady, at previous rates. The arrivals of beasts fresh up from our own grazing districts were only moderate for the time of year, both as to number and quality. Prime Scots, crosses, &c., command a steady sale, at full prices; but it must be understood that 5s 2d per 8 lbs was an extreme value. Inferior stock moved off slowly, at last week's currency. From Lincolnshire, Leicestershire, and Northamptonshire we received 2,400 Shorthorns, &c.; from other parts of England, 400 various breeds; from Scotland, 80 Scots and crosses; and from Ireland, 750 oxen and heifers. The show of sheep was again moderate, and the quality of most breeds was inferior. Devons and half-breds commanded a steady sale, at full quotations. Otherwise, the mutton trade was in a sluggish state, on former terms. The best Downs were worth 5s 8d per 8 lbs. Calves—the supply of which was small—changed hands steadily, at Thursday's reduced rates. The top figure was 5s 2d per 8 lbs.

SUPPLIES.	Nov. 19, 1860.	Nov. 18, 1861.
Beasts	5450	4980
Sheep	21200	21100
Calves	203	144
Pigs	510	440

THURSDAY, Nov. 21.—To-day's market was seasonably well supplied with beasts, more than a moiety of which was composed of arrivals from Tonning. All breeds moved off slowly; nevertheless, Monday's prices were supported, a few very superior Scots realising 5s 2d per 8 lbs. Although the supply of sheep was rather limited, the mutton trade was in a sluggish state, at previous currencies. The best old Downs sold at 5s 8d per 8 lbs. Calves were in short supply and good request at an improvement in value of 2d per 8 lbs. The top quotation was 5s 4d per 8 lbs. Pigs were a slow inquiry, and milch cows were very dull.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	2	10	3	2	Prime Southdown sheep	5	4	5	8
Second quality ditto	3	4	4	0	Large coarse calves	4	4	4	10

Total supply—Beasts, 1,200; sheep, 5,160; calves, 150; pigs, 412.
Foreign supply—Beasts, 660; sheep, 820; calves, 80.

NEWATGE AND LEADENHALL

FRIDAY, Nov. 22.—Fair average supplies of meat are on sale here. Good and prime qualities are in steady request; but inferior kinds are a dull business. In prices very little change has taken place, compared with our previous report.

Per 8 lbs by the carcase.

	s	d	s	d		s	d	s	d

HOP MARKET.

BOROUGH, Monday, Nov. 18.—We have no alteration to report in our trade, which continues good for every description of the new growth at full prices. Mid and East Kents, 180s to 195s, choice 220s; Weald of Kents, 147s to 165s, choice 185s; Sussex, 135s to 145s, choice 155s.

FRIDAY, Nov. 22.—The market, as regards prices, is decidedly firm to-day, but the inquiry is mostly confined to good and fine new qualities.

POTATO MARKET.

SOUTHWARK WATERSIDE, Monday, Nov. 18.—During the past week the arrivals both coastwise and by rail have been moderate. The trade much in the same state. The following are this day's quotations:—Kent and Essex Regents, 110s to 130s; Yorkshire ditto, 100s to 125s; Lincolnshire ditto, 90s to 110s; Scotch ditto, 60s to 110s; French whites, 100s to 110s per ton.

FRIDAY, Nov. 22.—Fair supplies of potatoes are on sale, and the trade, generally, rules steady, at full prices.

HAY MARKETS.—THURSDAY.

SMITHFIELD.—Meadow hay, 2*l* 0s to 5*l* 0s; clover ditto, 3*l* 10s to 6*l* 0s; and straw, 1*l* 8s to 1*l* 16s per load. A fair demand.

CUMBERLAND.—Meadow hay, 2*l* 2s to 5*l* 0s; clover, 3*l* 10s to 5*l* 18s; and straw, 1*l* 8s to 1*l* 17s per load. Trade steady.

WHITECHAPEL.—Meadow hay, 2*l* 0s to 5*l* 0s; clover, 3*l* 10s to 6*l* 0s; and straw, 1*l* 8s to 1*l* 16s per load. Supply moderate.

COAL MARKET.

FRIDAY, Nov. 22.—Wallsend Tees, 16s 6d; Wallsend Russell Hettons, 19s. 17 ships at market.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Nov. 22.—The demand for home consumption continues very restricted, and what little there is doing in this market at present is principally for export to the States at prices tending upwards, as low wools are getting very scarce.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Nov. 22.—Market moderately attended, and there is no alteration whatever in wheat and flour, both of which are inactive, and have undergone no change in prices, holders refusing to submit to any reduction. Indian corn unaltered. Oats and oatmeal dull. Supplies small.

The Gazette.

TUESDAY, Nov. 19.

EPITOME OF RAILWAY NEWS.

TRAFFIC RECEIPTS.—The traffic receipts of railways in the United Kingdom for the week ending the 9th of November amounted to 526,031*l*, and for the corresponding week of last year to 517,992*l*, showing an increase of 8,039*l*. The gross receipts of the eight railways having their termini in the metropolis amounted to 239,359*l*, and for the corresponding week of 1860 to 231,873*l*, showing an increase of 7,486*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, Nov. 18.—The railway market opened this morning without change, but a marked improvement almost immediately took place which was fairly maintained to the close. London and North-Western, Midland, Lancashire and Yorkshire, and Great Northern advanced about 1 per cent., Great Western and Caledonian ⅝ to ¾, and other descriptions ½ to ⅝. South-Eastern exceptionally declined, on the unfavourable traffic return. The general transactions were rather numerous, especially in Lancashire and Yorkshire, and Midland. In the colonial market, Grand Trunk improved to 21 to ½, and Indian guaranteed stocks were steady. In foreign descriptions, French were rather flatter. Belgian, on the other hand, continued in request, Great Luxembourg especially advancing to 9¼ to ⅜. Lombardo-Venetian closed the same as on Saturday, at ⅝ to ¾ pm. ex dividend. Nova Scotia Government debentures were quoted higher. In American securities there was a rise in Erie preference shares, and a decline in Virginia Six per Cents. Mines were in better demand, and in several cases showed an advance.

TUESDAY, Nov. 19.—In the railway market to-day there was only a moderate business doing, and until the official close prices were fairly maintained. After regular hours, however, there was a less favourable tendency, Midland, Great Western, South-Eastern, London and North-Western, and Lancashire and Yorkshire, experiencing a decline of ¼ to ⅜ per cent. Great Northern and North-Eastern stocks, on the other hand, were in demand, and slightly improved. No change of importance occurred in the colonial department. Indian guaranteed stocks, however, continued with a strong upward tendency. In foreign descriptions there was a fresh advance in Sambre and Meuse. San Paulo, Lombardo-Venetian, and one or two French railways were also higher. American securities were firm. Virginia Sixes, Erie ordinary and preference shares, Illinois Central and New York Central especially showing an advance. Mines were in fair demand, at an occasional rise. In joint stock banks, Ottoman were quoted higher. Miscellaneous descriptions left off about the same as yesterday.

WEDNESDAY, Nov. 20.—The railway market to-day was dull and heavy. In some of the leading stocks a decline of about ½ per cent. took place, especially in Midland, South-Eastern, Great Northern, and Caledonian. London and North-Western, however, improved ½ per cent., and South-Western, York and North Midland, and Eastern Counties, ¼ to ⅜. Business during the day was rather limited. Colonial descriptions remained quiet at former prices. In the foreign market an improvement took place in Bahia. In American securities, Virginia Six per Cents. were higher. Mines were in fair demand and firm, East Carn Brea and United Mexican having especially advanced. In joint stock banks there was a rise in English, Scottish, and Australian Chartered, and in London Chartered of Australia. In miscellaneous descriptions an improvement occurred in Crystal Palace, Madras Irrigation, and Red Sea Telegraph.

THURSDAY, Nov. 21.—The railway market to-day was without the slightest animation, and in several descriptions a decline took place. London and North-Western receded ⅜ per cent., and Caledonian and North-Eastern stocks ¼ to ½. South-Western and South-Eastern, however, improved. The general business was limited. The chief alteration in the colonial market was a fall of ⅜ per cent. in Grand Trunk of Canada stock, to 20¼ to ⅜. Great Western shares were also lower. In foreign descriptions, Lombardo-Venetian declined to ⅜ to ¾ prem. Great Luxembourg were likewise dull. American securities remained firm. Virginia Six per Cents. and Erie preference shares advanced. The principal transactions in mines were in East Carn Brea, which, after experiencing a further rise in the morning, subsequently relapsed. In several other descriptions there was an improvement, particularly Port Philip.

FRIDAY, Nov. 22.—The railway share market to-day was rather flat. A reduction of about ¼ per cent. took place in several of the principal stocks, but was not general. Caledonian fell ½ per cent. South-Eastern was heavy. Lombardo-Venetian Railway shares were quiet, at ⅜ to ¾ prem., ex div. The Indian lines ruled quiet. Pernambuco Railway shares were rather more offered.

THE GREAT FIRE.—Destructive Fire at the Jarrow Docks Station, on the North-Eastern Railway.—"Collector's office, Tyne Dock, South Shields, 28th Jan., 1861. Gentlemen,—In reply to your favour of the 25th inst., respecting the state and contents of one of your Safes after the fire at this office on the 31st ult., I have to inform you that it was subjected to a very hot fire for three or four hours, and must at one time have been nearly red hot, as the workmen were not able to touch it for two or three hours after the fire was extinguished. On the Safe being opened, the books and cash were found to be in good condition. The cash boxes contained both notes and cheques, the whole of which were quite safe. I am, gentlemen, yours respectfully, R. THUBRON. Messrs Milner and Son, Phœnix Safe Works, Liverpool, and 47A Moorgate street, City, London." Note.—Another party says, "I have seen the Safe, and it has had a regular roasting. There was a large amount in bank notes and several bags of gold in the drawers, and the principal books above. Everything else in the building was entirely destroyed; nothing left but the bare walls."

PRACTICAL OBSERVATIONS on the CAUSES and TREATMENT of CURVATURES of the SPINE. Third edition, price 6s.

AND

Just published, second edition, price 1s 9d,

CASES and OBSERVATIONS illustrative of the beneficial results which may be obtained by close attention and perseverance, in some of the most unpromising instances of Spinal Deformity; with numerous Engravings.

By SAMUEL HARE, F.R.C.S., &c.

"The author has had much success in his plan of treatment, and we are of opinion that the principles on which he acts, in the treatment of these affections, are correct."—LANCET.

"We unhesitatingly commend this work as a truthful and trustworthy statement of the power of scientific surgery and medicine over some of the most grievous hindrances to human activity and industry."—MEDICAL GAZETTE.

"Mr Hare may take credit to himself for having effected much good in the treatment of the cases described."—BRITISH MEDICAL JOURNAL.

"Mr Hare is, we think, a sound and successful practitioner."—MEDICAL CIRCULAR.

London: John Churchill; and may be had of all booksellers

FREEDOM FROM COUGH IN TEN MINUTES is insured by DR LOCOCK'S PULMONIC WAFERS. From Mr J. W. Bowden, bookseller, Market place, Gainsborough:—"Several persons in this neighbourhood, who have been afflicted with apparently incurable asthmas and coughs for a series of years, have found relief only in the use of Dr Locock's Wafers." These wafers give instant relief and a rapid cure of asthma, coughs, and all disorders of the breath and lungs. To singers and public speakers they are invaluable for clearing and strengthening the voice. They have a pleasant taste. Price 1s 1½d, 2s 9d, and 11s per box. Sold by all medicine venders.

HOLLOWAY'S PILLS.—BE NOT DISMAYED.—Those doomed during winter to dwell in large towns should occasionally resort to some means of ridding the blood and body of inhaled impurities. They change, neutralise, or render harmless all disease-breeding vapours. These Pills are to the morbid blood what a filter is to dirty water; however noisomely impregnated, it is rendered by their action pure and sustaining. As therapeutics they are unequalled; as purifiers and tonics they are unmatched. Holloway's Pills are most inoffensive, yet efficient alteratives. They will keep the constitution robust and the health high even under the deteriorating influence of the vitiated atmospheres of large cities.

THE LANDS IMPROVEMENT COMPANY (incorporated by Special Act of Parliament in 1853), 2 Old Palace yard, Westminster, S.W.—To Landowners, the Clergy, Estate Agents, Surveyors, &c., in England and Wales, and in Scotland.—The Company advances money, unlimited in amount, for the following works of agricultural improvement, the whole outlay and expense in all cases being liquidated by a rent-charge for 25 years:—

1. Drainage, irrigation, and warping, embanking, enclosing, clearing, reclamation, planting for any beneficial purpose, engines or machinery for drainage or irrigation.

2. Farm roads, tramways, and railroads for agricultural or farming purposes.

3. Jetties or landing places on the sea-coast or on the banks of navigable rivers or lakes.

4. The erection of farmhouses, labourers' cottages, and other buildings required for farm purposes, and the improvement of and additions to farmhouses and other buildings for farm purposes.

Landowners assessed under the provisions of any Act of Parliament, Royal Charter, or Commission, in respect of any publicor general works of drainage or other improvements, may borrow their proportionate share of the cost, and charge the same with the expenses of the lands improved.

No investigation of title is required, and the Company, being of a strictly financial character, do not interfere with the plans and execution of the works, which are controlled only by the Government Enclosure Commissioners.

For further information and for forms of application apply to the Hon. William Napier, Managing Director, 2 Old Palace yard, Westminster, S.W.

AT HAMBLY HOUSE ACADEMY, Streatham Common, Surrey, Young Gentlemen are carefully Educated for the Public Schools, Military Colleges, Professions, or Commerce, by Mr R. S. TROUSDALE, L.C.P., aided by highly qualified assistant masters.

The domestic arrangements are on the most liberal scale; and the house is very delightfully situated. The terms for pupils under ten years of age, 30 guineas per annum; ten and under fourteen, 35 guineas per annum; fourteen, 40 guineas per annum. The above amount includes board and instruction in the Latin, Greek, French, and English Languages, Writing, Arithmetic, Merchants' Accounts, History, Geography, the Use of the Globes, Astronomy, Geometry, Algebra, and the other branches of the Mathematics. A library is devoted to the instruction and amusement of the pupils during their leisure hours. Religious works are provided for Sunday perusal; and lectures on various popular subjects are occasionally delivered. German, Drawing, Dancing, and Music, on the usual terms. Washing, half-a-guinea per quarter. Drilling during the summer months, at a trifling charge; and board during a vacation, four guineas. All accounts are expected to be settled quarterly. Excellent accommodation for foreigners or gentlemen of neglected education. A quarter's notice of removal is required.

EDUCATION.—International.—The Royal Continental Collegiate Institute (limited to 20 young gentlemen), on Bushey heath, three miles from Harrow station and two from Watford. Principal, Dr Vellère, late of the Harrow Preparatory School. This school is highly recommended for three reasons—first, for very excellent board, liberal supply, judicious treatment, great success in education, and, above all, as preferable to going abroad with regard to acquiring the French language perfectly; secondly, for very moderate and strictly inclusive terms, within the reach of nearly every one; and, thirdly, that no case of illness has ever occurred since the school has been established in 1857, a fact which has never been heard of in any other school, not even those excepted at the seaside. From the great attention incessantly paid by the principal to his pupils' comfort, happiness, and future welfare, he trusts that he will be patronised by a discriminating public. Travelling expenses beyond 25 miles are entirely paid by him. The quarter or half-quarter is dated from the day of the arrival of the pupil. Terms from 30 guineas upwards. Address, stating age and requirements, Dr Vellère, Bushey heath, Watford.

TEETH.—REGISTERED PNEUMATIC VENTILATING PALATE.—Discovery of a new principle in dentistry, and great reduction in price.—Mr LEWIN MOSELY, 30 Berners street, W., established 25 years, offers for inspection Specimens of all the latest inventions in ARTIFICIAL TEETH. His PNEUMATIC VENTILATING PALATE is recognised as the best combination of improvements submitted to the medical profession, supplying all dental deficiencies without extraction of stumps or any painful operation. Sharp edges, wires, springs, ligatures, and all metals, especially avoided, rendering impossible unpleasant secretions and vitiated breath (hitherto causes of general complaint). This Palate may be added to teeth in wear, and defies competition for cheapness and durability. Consultation and every information free. Success guaranteed in all cases by Mr Lewin Mosely, 30 Berners street, Oxford street, W.

JOZEAU'S COPAHINE, or SACCHARATED CAPSULES.—Copaiba and Cubebs are, doubtless, the best remedies, but these drugs are of a repulsive taste and odour, and occasion colicky pains, nausea, and gastric disturbance. M. Jozeau has succeeded in rendering these valuable therapeutic agents perfectly innocuous by increasing, in in his Copahine, all the curative properties. This preparation has been adopted by the Paris Academy of Medicine, after more than a thousand trials in Paris and the different London hospitals, viz., St Thomas's, Guy's, and St Bartholomew's, under the care of Messrs Lloyd, Poland, and Legros Clark, LANCET, Nov. 6, and Dec. 10, 1857. The Copahine, which is in form of a pretty pink sugar plum, effects a cure in about six days, either in recent or chronic diseases. 100 capsules, 4s 6d; post free, 5s 2d. Post-office order required; at G. Jozeau's, French Chemist, 49 Haymarket, London; 22 Rue St Quentin, Paris; and all the most important Chemists.

PETROLEUM FOR EXPORT.—

A large Supply in Yard, in prime shipping order, on consignment, from the principal Wells in the United States, for Sale on the most favourable terms. Shipping facilities direct from the Yards.—SCHIEFFELIN BROTHERS and CO., 170 and 172 WILLIAM STREET, NEW YORK.

DENT, CHRONOMETER,

Watch, and Clock Maker to the Queen and Prince Consort, and Maker of the Great Clock for the Houses of Parliament, invites attention to the superior workmanship and elegance of design of his extensive Stock of Watches and Drawing-room Clocks.

Ladies' Gold Foreign Watches	8 Guineas
Gentlemen's do. do.	10 —

Gentlemen's Silver ditto	28 —
Marine Chronometers	35 —

Gold and Silver Pocket Chronometers, Astronomical, Turret, and Bracket Clocks, of every description. An elegant assortment of London-made Fine Gold Albert and Guard Chains, &c.

DENT, 61 Strand (adjoining Coutts' Bank); 34 and 35 Royal Exchange; and at the Clock and Marine Compass Factory, Somerset Wharf, Strand, London.

THE FRENCH AND GERMAN

PROTESTANT COLLEGE, Netherton House, Clapham, Surrey, combines the comforts of an English home with the advantages of a Continental Education. The French and German Languages, so indispensable to a good education, are taught by resident masters. They give lessons daily. The course of instruction adopted secures for young gentlemen a sound English, Classical, and Mathematical Education, combined with Drawing, History, Geography, and Modern Science. Pupils prepared for the military, naval, merchant, and civil service examinations. Terms, inclusive, from thirty to fifty guineas per annum, according to age and requirements. A difference will be made for two Pupils from the same family. For references and prospectuses apply to Monsieur A. de Chastelain, as above.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER

TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

ELASTIC STOCKINGS, KNEE

CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price, 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.

WHITE, MANUFACTURER, 228 Piccadilly, London.

A BOON TO NERVOUS

SUFFERERS.—Twenty Thousand Copies of a Medical Book for gratuitous circulation. HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., who has devoted fifteen years to the study and treatment of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, will send free, for the benefit of Nervous Sufferers, a copy of the New Medical Guide, containing his highly successful mode of treatment, with necessary instructions, by which sufferers may obtain a cure. Post free on receipt of a stamped directed envelope. Address Dr Henry Smith, 8 Burton crescent, Tavistock square, London, W.C.

DR MARSTON'S LECTURES—

FREE ISSUE.—The following Lectures are ISSUED GRATUITOUSLY by the Professors of the Royal Institute of Anatomy and Science, 369 Oxford street, London, Firstly, as a mark of esteem to their distinguished colleague, Dr MARSTON, M.R.C.S., L.S.A., and Secondly, from a conscientious belief that the Lectures will do a vast amount of good by enlightening the public upon subjects of the highest importance to their moral welfare and physical health, ignorance of which has to the present day been a most fruitful cause of human suffering and misery.

No. I.—NERVOUS DEBILITY (the result of youthful error), loss of memory, shortness of breath, dimness of sight, exhaustion, and general incapacity. Addressed specially to Young Men.

No. II.—MARRIAGE: Its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who desire Children.

No. III.—THE BRAHMIN'S ELIXIR OF LIFE: Its History—Secret Remedies of the Hindoos no Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Reinvigorator of the Impaired Functions, and in all Cases of Nervous Debility.

No. IV.—THE DISEASES INFLICTED UPON MANKIND BY THE GREAT SOCIAL EVIL. With a simple means of complete Cure without Mercury.

"These lectures contain Dr Marston's experience during Twenty-five Years of Successful Practice, and point out to those who need it Simple yet Effectual means of complete restoration to vigorous health."—MEDICAL JOURNAL.

State the No. of the Lecture required, and enclose 2 Stamps to prepay postage; or the whole Four may be had, neatly bound, 164 pages, octavo, post free, for 6 Stamps.—Address, Treasurer, Royal Institute, 369 Oxford Street, London.

KITCHEN REQUISITES

(including BRUSHES and TURNERY).—WILLIAM S. BURTON has every Article for the Furnishing of Kitchens arranged in Four Sets, each complete in itself—

	1. £ s d	2. £ s d	3. £ s d	4. £ s d
Kitchen Utensils	63 14 10	24 18 7	10 18 0	4 0 10
Brushes and Turnery to suit	20 4 2	13 3 2	5 19 8	1 17 2
Total per set	83 19 0	38 1 9	16 12 8	5 18 0

Any single article may be had at the same price quoted for it in the different lists. For particulars see catalogues published by, and which can be had free by post from William S. Burton, 39 Oxford street (corner of Newman street); 1, 1A, 2, 3, and 4 Newman street; 4, 5, and 6 Perry's place; and 1 Newman mews, London.

DINNEFORD'S PURE FLUID

MAGNESIA has been, during twenty-five years, emphatically sanctioned by the Medical Profession, and universally accepted by the Public, as the Best Remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion, and as a Mild Aperient for delicate constitutions, more especially for Ladies and Children. Combined with the Acidulated Lemon Syrup, it forms an agreeable Effervescing Draught, in which its aperient qualities are much increased. During hot seasons and in hot climates, the regular use of this simple and elegant remedy has been found highly beneficial. Manufactured (with the utmost attention to strength and purity) by DINNEFORD and CO., 172 New Bond street, London; and sold by all respectable chemists throughout the Empire.

DEANE'S TWO-HOLE BLACK PENS

which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped

"G. and J. Deane, London bridge,"

and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed

"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

Under the Patronage of the Governments of Great Britain, Spain, Denmark, Brazil, Russia, &c., &c.

EASTON'S PATENT BOILER

FLUID effectually removes and prevents incrustation in steam boilers (land and marine), without injury to the metal, with great saving in fuel, and with less liability to accident from explosion. It is now generally used by the principal steam-packet companies of London, Liverpool, Hull, Southampton; by H.M. steam store-ships, Woolwich Arsenal, by the Honourable Corporation of Trinity House, the War Department, and India Store Department, at Bombay, Calcutta, and Kurrachee, and by engineers and manufacturers thro hout the country.

Testimonials from eminent engineers, boiler-makers, millwrights, manufacturers, and steam-boat proprietors, with full particulars, will be forwarded on application to P. S. EASTON and G. SPRINGFIELD, sole manufacturers and patentees, 37, 38, and 39 Wapping Wall, London, E.; or of their agents in the principal towns of Great Britain.

BLAIR'S GOUT AND RHEUMATIC

PILLS.—Price 1s 1½d and 2s 9d per box.

This preparation is one of the benefits which the science of modern chemistry has conferred upon mankind; for during the first twenty years of the present century, to speak of a cure for the gout was considered a romance; but now the efficacy and safety of this medicine is so fully demonstrated, by unsolicited testimonials from persons in every rank of life, that public opinion proclaims this as one of the most important discoveries of the present age.

Sold by all medicine venders. See the name of "Thomas Prout, 229 Strand, London," on the Government stamp.

DR CURTIS'S MEDICAL WORK "MANHOOD,"

An Essay on Nervous and Generative Diseases.

The 140th thousand, with numerous plates, in a sealed envelope, price 1s, or post paid, by the Author, for twelve stamps.

MANHOOD: THE CAUSE AND

CURE of PREMATURE DECLINE in MAN, with Plain Directions for Perfect Restoration to Health and Vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, the result of twenty-five years' successful practice. By Dr J. L. CURTIS, 15 Albemarle street, Piccadilly, London. Consultations, Ten till Three and Six till Eight.

REVIEWS OF THE WORK.

"We feel no hesitation in saying that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a parent, preceptor, or clergyman."—SUN, evening paper.

"Dr Curtis has conferred a great boon by publishing this little work, in which is described the sources of those diseases which produce decline in youth, or more frequently premature old age."—DAILY TELEGRAPH, March 27, 1858.

N.B. The author of the above Medical Treatise may be consulted, as usual, either by letter or personally, at his residence. The efficacy and harmless nature of the remedies employed by Dr Curtis having been demonstrated by the most complete success during a practice extending over a period of 20 years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

Published by Allen, 20 Warwick lane, Paternoster row; Mann, 39 Cornhill; and free from the Author for 12 stamps.

ALLEN'S PATENT

PORTMANTEAUS and TRAVELLING BAGS with square openings.

LADIES' WARDROBE TRUNKS, DRESSING BAGS, with silver fittings.

DESPATCH BOXES, WRITING and DRESSING CASES, and 500 other articles for home or continental travelling. Illustrated catalogues post free.

Also Allen's Barrack Furniture Catalogue of Portable Bedsteads, Drawers, Easy Chairs, Washhand-stands, Canteens, &c., post free.

J. W. ALLEN, Manufacturer and Patentee, 22 and West Strand, London, W.C.

MERCHANTS HAVING

commissions for Furniture or Carpets of a superior class, are respectfully invited to visit the manufactory and show rooms of Messrs JACKSON and GRAHAM. By the introduction of machinery worked by steam power in various processes, J. and G. have effected a considerable improvement and economy in the manufacture of furniture, and their spacious show rooms afford to purchasers unrivalled facilities for the selection of all requisites, useful and ornamental, in the best taste. Four show rooms, each 120 feet long, are exclusively devoted to the display of Bedsteads and Chamber Furniture. J. and G. are also large importers of Silks, Tapestries, and other Fabrics for Curtains, and their Gallery of Bronzes d'Art is the sole depot for the celebrated productions of F. Barbedienne and Co., of Paris, which they sell at the prices of the Paris catalogue, with 5 per cent. added for expenses of importation.

GREAT FIRES IN BELFAST,

in which nine of MILNER'S SAFES (six in the first and three in the last) have preserved their contents. The following is one of the certificates from all the owners:—

(Copy.)

"Messrs Thos. Milner and Son.

"Belfast, February 13, 1861.

"Gentlemen,—We beg to say that the block of buildings in Bedford street, in which our warehouses and offices were situated, was totally destroyed by fire on the 8th instant, but we are happy to say that all our books contained in two of your Safes were found, on forcing the Safes open, to be perfectly secure and the writing quite legible, though the edges and some leaves were stained by the steam, and some of the covers damaged by adhering to the sides of the Safes from the heat to which they were exposed.

"We are, Gentlemen, your obedient servants,

"J. B. RALSTON and Co."

Milner's Phœnix Safe Works, Windsor, Liverpool. London Depot, 47A Moorgate street, City.

DR DE JONGH'S

(Knight of the Order of Leopold of Belgium)

LIGHT-BROWN COD LIVER OIL

has afforded immediate relief, arrested disease, and restored health in countless instances where other kinds of Cod Liver Oil had been long and copiously administered with little or no benefit.

CONSUMPTION and DISEASES of the CHEST

Hospital, dispensary, and private practice, all furnish innumerable cases in which Dr de Jongh's Cod Liver Oil, containing peculiar curative principles which no other Oil possesses, has been administered with the happiest results in Consumption and Diseases of the Chest. The distinguished Physician, Dr Hitchman, author of "On Consumption and its Successful Treatment," observes—"Having extensively prescribed Dr de Jongh's Light-Brown Cod Liver Oil for a long series of years in cases of Consumption, I deem it but an act of justice to record my emphatic testimony in favour of its superior merits as a preventive of Emaciation, and generally as an excellent restorative in Debility and Diseases of the Chest."

ASTHMA, BRONCHITIS, COUGHS.

The effects of Dr de Jongh's Oil have been singularly beneficial in the treatment of Asthma, Chronic Bronchitis, Dry Cough, and Humid or Winter Cough. Arthur Cridland, Esq., an eminent Surgeon, in bearing testimony to its efficacy in his own case of severe bronchial and laryngeal irritation, observes—"After taking Dr de Jongh's Oil for a few days, its good effects commenced; I regained my usual health and strength, and entirely lost the laryngeal irritation, which was of a most harassing and fearfully distressing character. It is therefore with much pleasure I beg to add my testimony to the excellent results attendant on Dr de Jongh's Oil."

Dr de Jongh's Light Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; capsuled, and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists.

SOLE CONSIGNEES:

ANSAR, HARFORD, and CO., 77 STRAND, London, W.C.

CAUTION.—Beware of Proposed Substitutions.

DR KAHN ON MARRIAGE.—

A new and entirely re-written edition (the forty-seventh of this celebrated treatise), with illustrations, engravings, &c., is now ready.

The object of the work is not to maintain any particular hypothesis, but to enable every one to understand for himself the structure and functions of the organs concerned in the fulfilment of the physical obligations of the married state; to acquaint him with the consequences arising from excesses; to prevent unnecessary misapprehension from unfounded fears, and to indicate, when those fears are well founded, the means of speedy relief. The work is not crowded with the technicalities of ordinary professional books, nor does it present the crudeness which characterises the so-called "popular works" on the subject.

Price One Shilling, free by post for thirteen stamps, or in a sealed envelope twenty stamps, either from the publisher, J. Allen, 20 Warwick lane; or from the author's address, 17 Harley street, Cavendish square, London, where he may be consulted daily.

HUBBUCK'S PATENT WHITE ZINC PAINT,

Made by their process, where it is sold by the Paint Grinders without adulterating it, is the most durable and beautiful of all Paints.

It is also sold by the Patentees, ground into paint, each cask stamped "HUBBUCK, LONDON, PATENT," to counterfeit which is forgery.

Extract from the Report of NATHAN MERCER, Esq., F.C.S.

7 Church street, Liverpool, April 6th, 1859.

"On Saturday I visited the iron ship "William Fairbairn," for the purpose of ascertaining whether or no her plates had been affected by the red lead with which she was coated previous to her late voyage to Calcutta. She was in the hands of the scrapers, and showed the great extent to which the iron had been corroded, patches of rust protruding through the paint, and being thickly spread over the unscraped portions. The red lead coating was covered with blisters, from each of which, on being opened, a clear fluid escaped, and left exposed on the surface of the iron a number of brilliantly shining crystals of metallic lead, and that they were formed at the expense of the iron, was evident from the corroded and pitted appearance of the plate beneath every blister. The fluid from the blisters is produced by the combination of the chlorine of the sea-water with the iron of the ship, showing that the "sweat," so well known to every person interested in iron ships, is not salt water, but a solution of chloride of iron.

On those portions which had been scraped, this "sweat" was exuding from every pore; and on looking along the surface, myriads of glittering particles of lead were seen.

The injurious effects produced by red lead were unmistakeable and self-evident."

Greenock, 7th August, 1859.

GENTLEMEN,—My object in writing to you, is to call attention to the state of the frames and plating of the iron ship "Thomas Hamlin." This vessel, when built eight years ago, was coated inside and outside with your Zinc Paint; the inside coating has never been renewed.

From the reports on other ships of even less age, I was led to fear that both the plates and rivet heads might be a good deal destroyed, the ship having had frequently sugar cargoes home from India, and molasses from the West Indies.

When the ship was opened fore and aft for the inspection of Lloyds' surveyors in London, my pleasure was not less than the surprise of those gentlemen, Messrs Ritchie and Light, to find that both the frames, plates, and rivet heads were as good as the day on which they were coated when the ship was building; in fact, to use the expressive words of the surveyor, nothing could be better.

The iron of the plates, rivets, and frames, were no doubt good originally, but the high state of preservation I attribute to having had them coated, before any red oxide had formed on them, with your Zinc Paint.—I am, Gentlemen yours very truly, JAMES HAMLIN.

Messrs Hubbuck and Son, 24 Lime street, Fenchurch street.

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

MR LEWIS AND SON, 113 Strand.—The Royal Lewisian Systems of Writing, Arithmetic, Bookkeeping, and Shorthand, as taught for upwards of fifty years by Mr Lewis, the real inventor and first teacher of these world-renowned and only infallible systems, insures perfection in any of the above branches after a few easy and interesting lessons Persons unable to take the lessons may obtain the inventor's works for self-instruction at his only institution, 113 Strand.

GOOD DIVIDENDS.—Messrs DAUNT and COMPANY, of 30 Clement's lane, Lombard street, E.C., have on SALE some Foreign Government BONDS, yielding Eight and Nine per Cent. Interest, payable half-yearly, as punctually as on Consols, and are perfectly secure. Business transacted in the English Funds at 1-16th, Railways at ¼, and Mines at 1 per cent. A list of safe investments forwarded (gratis) on application. Investors will be cautioned against spurious mines.

ROYAL LYCEUM THEATRE. Sole Lessee and Manager—Mr Edmund Falconer. Third week of the brilliantly successful new and original Drama, PEEP O' DAY; or, Savourneen Deelish. Pronounced by the Press and generally acknowledged to be one of the most picturesque, life-like, excellently acted, and exciting spectacular Dramas ever produced.

On Monday, Nov. 25, and during the week, the performance will commence, at 7, with the Farce of GONE TO TEXAS. Mr Walter Lacy, and Mrs St Henry. After which, every evening, at a ¼ to 8, PEEP O' DAY; or, Savourneen Deelish. Principal characters by Messrs Walter Lacy, Addison, C. Selby, Herman Vezin, Edmund Falconer; Mrs P. D. Bowers, Miss Clara Weston, Miss M. Hudson. The scenery by Messrs Grieve and Telbin. Music arranged by John Barnard, and dances by Mr Oscar Byrne. The dresses by Mr S. May. The general action of the Drama suggested and directed by the author, Mr Edmund Falconer. Prices as usual. Box office open daily from 11 till 5. Acting Manager, Mr F. B. Chatterton.

NEW THEATRE ROYAL ADELPHI. Sole Proprietor and Manager, Mr B. Webster. Tremendous success of the Great American drama, by Dion Boucicault, Esq., entitled THE OCTOROON, or LIFE IN LOUSIANA.

On Monday and during the week, THE PRETTY HORSEBREAKER. Messrs J. L. Toole and P. Bedford; Miss Woolgar, Mrs H. Marston. THE OCTOROON. Messrs Dion Boucicault, G. W. Jamison, R. Phillips, Billington, P. Bedford, Emery, Stephenson, Romer, C. J. Smith; Mrs Dion Boucicault, Mrs H. Marston, Mrs Billington, Miss Lattimer, Miss Denvil. And DOMESTIC ECONOMY. Mr J. L. Toole and Romer; Miss K. Kelly, Laidlaw, and Stocker. Commence at 7.

MOZART NIGHT AT THE MONDAY POPULAR CONCERTS.—On Monday Evening next, Nov. 25, the programme will be selected from the works of Mozart, and will include the celebrated Quintet in A major for clarionet and stringed instruments. Pianoforte, Mr Charles Halle; Violin, M. Vieuxtemps (his last appearance but three); Clarionet, Mr Lazarus. Vocalists, Mdlle. Florence Lancia and Mr Winn. Conductor, Mr Benedict. Sofa stalls 5s; balcony 3s; admission 1s. Tickets at Chappell and Co's., No. 50 New Bond street; Cramer's and Hammond's, Regent street; Keith, Prowse, and Co., 48 Cheapside; and at the Hall, 28 Piccadilly.

GEORGE HODSON EVERY NIGHT at 8.—PAT'S CURIOSITY SHOP—Roars of laughter—Crowded houses.—Saturday afternoon, at 3. George Hodson's complimentary benefit, Friday, Nov. 29th. Secretaries, managers, &c, requiring Mr Hodson's services apply immediately.—St James's hall, Piccadilly.

POLYTECHNIC INSTITUTION.—Next Monday evening, at half-past 7, lecture on the "Detection of Arsenical Poisoning," by James D. Malcolm, Esq. Last week of the lecture by Professor J. H. Pepper on the "Art of Balancing," explaining the principles on which Blondin and Leotard perform their wonderful feats. Engagement of Master Edwin Sanders, the infant vocalist of extraordinary power, daily at 4, and every other evening at 9. Re engagement of G. A. Cooper, Esq., assisted by Miss Emma Snelson and Madame Allene, for his highly successful musical entertainment, entitled "The Rose, the Shamrock, and the Thistle." Lecture on Haworth's Patent Perambulator and New Street Railway. The Series of Magnificent Dissolving Views with Descriptive Lecture, by J. D. Malcolm, Esq., illustrating "The Citizen of the World." Beautiful Electrical Experiments, by Mr J. L. King. Open from 12 to 5, and from 7 to 10. N.B.—John Snell, Waterman, of Hampton, will illustrate the Rope Feats. Eighth and last week of his engagement.

A WELCOME ANNOUNCEMENT.

E. MOSES AND SON beg respectfully to acquaint the public that they have made preparations, on an unprecedentedly large scale, for the Autumn and Winter Seasons. Their stock of OVERCOATS comprises every modern style in all kinds of seasonable and serviceable materials, with the latest improvements in workmanship. The Eversley and Shelburne overcoats are particularly recommended.

Their general stock includes every description of attire for all classes, all ages, and all occupations; the articles are too numerous to particularise, but may be gathered from their several trades of—

READY-MADE AND BESPOKE TAILORS, HABIT MAKERS, WOOLLEN DRAPERS, HATTERS, HOSIERS, BOOT AND SHOE MAKERS, AND GENERAL OUTFITTERS.

Their BESPOKE CLOTHING DEPARTMENT is too important a branch of their business to be passed over without a special notice. It offers a perfect fit, combined with the most fashionable and comfortable styles, and the most elegant workmanship.

E. MOSES and SON need scarcely remind the public that in every department of all their establishments the Highest Degree of Excellence is associated with Prices the Most Moderate.

Any article not approved of will be exchanged or the money returned.

New Fashion Plate for the present season, with rules for self-measurement and lists of prices post free.

E. MOSES and SON'S establishments are closed every Friday evening at sunset till Saturday evening at sunset, when business is resumed until Eleven o'clock.

E. MOSES and SON.
London Houses.
City Establishment.
154, 155, 156, 157, Minories; 83, 84, 85, 86, Aldgate.
Oxford street Branch.
506, 507, 508, New Oxford street; 1, 2, 3, Hart street.
Tottenham Court road Branch.
137, 138, Tottenham Court road; 283 Euston road.
Country Establishments.
Sheffield and Bradford, Yorkshire.

N.B.—Our Celebrated "INDISPENSABLE SUIT," adapted equally for walking, riding, travelling, or business, may be had in a large variety of seasonable and fashionable materials, from 30s to 70s.

THE MWYNDY IRON ORE COMPANY (Limited).

Established and registered under the Joint Stock Companies Acts, whereby the liability of the shareholders is limited to the amount subscribed.

Capital, £160,000, in 40,000 shares of £4 each.
Deposit on application, £1 per share. First call on allotment, £1 10s per share.
More than one-half of the shares are already subscribed for.

From the easy and satisfactory mode in which the payment of the purchase-money for the estate and property has been arranged, it is anticipated that of the proposed capital only the deposit and first call will be required.

DIRECTORS.

Charles Capper, Esq., 9 Mincing lane.
Joseph Fry, Esq., Gresham House, Old Broad street.
Samuel Gurney, Esq., M.P., 65 Lombard street.
John Lancaster, Esq., Kirkless Hall Works, near Wigan.
Frederick Levick, Esq., Cwm Celyn and Blaina Iron Works, Newport, Monmouthshire.
Edmund Pelly, Esq., Bell alley, Lombard street.
John Taylor, jun., Esq., 6 Queen street place, Upper Thames street.

BANKERS.

Messrs Masterman, Peters, Mildred, and Co., 35 Nicholas lane, Lombard street.

SOLICITORS.

Messrs Young, Jones, and Vallings, St Mildred court, Poultry.
Charles Morgan, Esq., Old Jewry chambers.

DIRECTING MANAGERS.

Messrs John Taylor and Sons, 6 Queen street place, Upper Thames street.

BROKERS.

Messrs Hill, Fawcett, and Hill, 29 Threadneedle street.
SECRETARY (pro tem.)—Mr N. M. Maxwell.
OFFICES (pro tem.)—4 Allhallows chambers, Lombard street.

The object of the proposed Company is to purchase and bring into more extensive and profitable working the celebrated hematite iron-ore mines of Glamorganshire, situated at Mwyndy, having direct railway communication with the iron-mining districts of South Wales; and with the docks and shipping port of Cardiff, from which they are only 11 miles distant.

The property is freehold. It consists of 152a 2r 22p of land abounding in the richest and most largely developed deposit of brown hematite iron ore now known. In respect to geological formation, it rests upon the edge of the great Glamorganshire coal-fields, and possesses within itself limestone of the best possible kind for the making of pig iron.

The Mwyndy Hematite mines, late the property of Mr Nash Vaughan, have for the last five years been worked for the raising of iron ore. During that period experience has shown that to render them as largely remunerative as they may be made, blast furnaces should be erected so as to make available the large quantity of valuable ore which now has to be separated from the bulk of that sent away, and which, in consequence, so long as it is unused, falls as an extra charge in the price of raising upon the ore sold.

Many thousand tons of this ore having been already banked are immediately available for furnace purposes, the only difference between the first and second quality being that the ore known as "seconds" contains a somewhat larger admixture of refuse matter.

By a recent survey made in June last, and addressed to Messrs John Taylor and Sons, by a mineral agent recommended by that firm, the yield of ore from present demonstrations is put at the gross quantity of 1,440,000 tons, and the assumed value, after allowing 8s per ton as the cost of working, at £360,000, without taking into account any value for the limestone, or the increased profit from converting a quantity of the ore into pig iron. (See Dennis's Report, &c.)

The Ely Valley Railway, having a special branch to Mwyndy, recently purchased by the Great Western, runs through the estate, and connects it, by the broad gauge, with the South Wales Railway at Llantrissant.

But in addition to the broad gauge already in operation, the Llantrissant Branch of the Taff Vale Railway will, upon its completion, provide a narrow gauge line running into the Company's works, thus securing for them both a broad and narrow gauge railway communication with the iron works of South Wales, as well as with the chief shipping ports of the district.

This line, when completed, will give, in co-operation with the Mid-Western, a short narrow gauge run into Staffordshire, from whence a large trade may be confidently anticipated, but which the break of gauge and long and expensive route by Gloucester has hitherto almost entirely prevented.

The Mwyndy Hematite is in extensive use and has been thoroughly tested. From practical yields tried by furnace workings, the percentage of metallic iron varies from 45 to 50 per cent. The chemical analysis shows a much higher percentage, (See analysis, etters, &c.)

The present face of open work shows a thickness of upwards of 30 feet in solid ore; whilst in two other portions of the estate where sinkings have been made bodies of massive ore 22ft. 6in. and 18ft. respectively have been sunk through without arriving at their full thickness, which may be equal, if not greater, than the face exposed.

The present rate of yield may be taken at about 60,000 tons per annum, which is readily sold to some of the first firms in South Wales.

Coal for smelting can be delivered on the spot at from 6s to 8s per ton. Limestone is found on the property, and can be delivered to the furnaces in any quantity at less than 1s per ton.

The cost of the ore loaded into trucks is estimated at 4s 6d per ton. (See Dennis's Report, &c.)

The selling price may be taken at 10s per ton.

The net annual profits upon a moderate working of the Hematite ore alone—say 60,000 tons supplied to the public, and the same quantity taken for the furnaces—are estimated at £25,000, which is equal to a profit of 25 per cent. on a capital of £100,000 But, in addition to this, there will be the profit accruing upon the manufacture of 15,000 tons of pig iron, estimated, at the present low price of pig iron, at 5s per ton only.

Reference is confidently made to the annexed reports of ironmasters, engineers, &c, in confirmation of the above statements and calculations. They show that the undertaking has every requisite of success, in an almost inexhaustible quantity of mineral produce of very superior quality, which can be got at a low rate; in a constant and regular demand for the ore raised or the iron made, as well as in unsurpassed facilities for cheaply distributing either to their various markets throughout the kingdom.

The fixed and working plant, including roadways, steam engines, rails, trucks, shafts, headings, other openings, &c., is put at £25,000.

The cost of erecting three furnaces with steam power, &c., complete, should not exceed at the present time £10,000, which, with £15,000 for working and floating capital in hand, it is confidently anticipated will ensure an out-put of 400 tons of ore per day, besides 500 tons of pig iron per week, of the very highest order of quality.

One great feature in respect to this property is, that no royalties are payable either for lime or iron ore, the royalties for the ore having been set by authorities of the highest eminence at from 2s to 3s per ton, at which rate the works could be readily let, if desirable.

A provisional contract for the purchase of the property has been entered into with the present owners upon the following terms, viz.:—

The estate, property, working plant, &c., the extraordinary and unusual value of which may be best judged of by the accompanying documents, are taken at £125,000.

Of the amount of purchase-money £50,000 is to remain on mortgage at 5 per cent. interest, to be paid off by yearly instalments of £8,000 each, or earlier if preferred. This it is expected the profitable working will provide for, and thus enable the further calls of 30s per share on 40,000 shares, amounting to £60,000, to remain in reserve.

Thus, if the present expectations are realised, a capital of £100,000 will amply suffice to secure a large rate of interest, in addition to paying off, during the same period, the whole mortgage debt out of profits, which will leave the property chargeable for future years with a capital of £100,000 only, when the rate of interest will be proportionately increased.

More than half the shares having been subscribed for, no applications will be received after the 29th instant.

Applications for the remaining shares, addressed in the annexed form to the Directors, may be sent to the Secretary, at the offices of the Company, 4 Allhallows chambers, Lombard street, E.C.; to Messrs John Taylor and Sons, 6 Queen street place, Upper Thames street, E.C.; or to Messrs Hill, Fawcett, and Hill, 29 Threadneedle street; but no application will be considered unless a deposit of £1 for each share applied for shall have been previously made with the bankers of the Company. This sum will be applied towards the payment of the balance due on the first call of £1 10s per share, or returned in full in the event of no allotment being made.

FORM OF APPLICATION FOR SHARES.

To the Directors of the Mwyndy Iron Ore Company (Limited).

Gentlemen,—Having paid to the Bankers of this Company £ , being 20s per share deposit on shares in the Mwyndy Iron Ore Company (Limited), I request that you will allot me shares of £4 each in the said Company, which, or any less number you may grant, I hereby agree to accept, subject to the articles of association, and to pay the call of £1 10s per share on allotment. I further authorise you to place my name on the register of shareholders, for the number of shares that may be allotted to me; and I promise to pay all calls thereon that may be hereafter made, in such manner, and at such time, as you may direct.

Dated this day of 186

Received the day , 186 , on account of the Directors of the Mwyndy Iron Ore Company (Limited), from , the sum of , being the deposit made in accordance with the terms of the prospectus, on an application for an allotment of shares in the undertaking,

£ . ——, Bankers.

MWYNDY IRON ORE COMPANY (Limited).

All application for shares must be made on or before the 29th instant, as upon that day the List will be definitively closed.—By order,

N. M. MAXWELL, Secretary.

SIX PER CENT. DEBENTURES.

CANADA LANDED CREDIT COMPANY.

The Directors are prepared to comply with all applications for their Debentures at par. They are issued in sums of £50, £100, £500, and £1,000, for periods of five, seven, and ten years, bearing interest at 6 per cent. per annum, both principal and interest being made payable in London.

The amount received is invested in mortgages of freehold land of very ample value, the Company by its charter being in every case first mortgagee.

Individuals and public institutions, who usually lend on mortgage, are offered a higher class security than is afforded by the old mortgage system.

The interest is payable by coupons, on the 1st January and 1st July, at the banking house of Messrs Smith, Payne, and Smiths, 1 Lombard street, London, and the same is receivable through any of the country banks.

The last half-yearly statement and the Debentures may be had at the Company's brokers, Messrs Brunton and Son, Auction Mart chambers, Bartholomew lane, London, E.C.

GLENFIELD PATENT STARCH, USED in the ROYAL LAUNDRY.

The Ladies are respectfully informed that this Starch is EXCLUSIVELY USED in the ROYAL LAUNDRY, and Her Majesty's Laundress says, that although she has tried Wheaten, Rice, and other Powder Starches, she has found none of them equal to the GLENFIELD which is the FINEST STARCH SHE EVER USED.

WHEN YOU ASK FOR

GLENFIELD PATENT STARCH,

see that you get it, as inferior kinds are often substituted

WOTHERSPOON and CO., Glasgow and London.

INDIAN CARRYING COMPANY (LIMITED).

—Notice is hereby given, that the Allotment of Shares in the Indian Carrying Company (Limited) will be made on Tuesday next, the 26th instant.—By order of the Board,

WALTER THOMPSON, Secretary.

62 Moorgate street, E.C., Nov. 21, 1861.

DEBENTURE BONDS.

—The Directors of the London Dock Company hereby give notice, that to meet Debenture Bonds paid off, they are prepared to receive Loans of Money on the like security, at the rate of 4½ per cent. per annum interest, for terms of three, five, or seven years, at the option of the lenders.

THOMAS CHANDLER, Secretary.

London Dock House, New Bank buildings, E.C., November 13th 1861.

LOANS ON DEBENTURES.—

The Ipswich Dock Commissioners are prepared to receive TENDERS for LOANS, in sums of not less than £100 each, on security of the rates and duties payable under the Ipswich Dock Act. Coupons for payment of the interest half-yearly, either at Messrs Alexander's, bankers, Ipswich; or Messrs Barnett's, bankers, London, will be attached to the debentures. Tenders, stating the amount desired to be advanced, and the rate of interest, may be sent to the undersigned, of whom any further information can be obtained.

PETER BW. LONG,
Solicitor and Clerk to the Commissioners.

Ipswich, Nov. 13, 1861.

CIENFUEGOS AND VILLA CLARA (CUBA) RAILROAD 7 PER CENT. BONDS.—

The Half-Yearly Interest on the above Bonds, due on the 1st of December, will be Paid on Monday, the 2nd December, and every succeeding day, at the counting house of Messrs J. Henry Schroder and Co., 145 Leadenhall street, between the hours of 11 and 2 o'clock. The coupons must be left for examination two clear days before applying for payment.

London, 15th November, 1861.

THE LANCASHIRE AND YORKSHIRE RAILWAY COMPANY.—Debenture Stock.

—The Directors are prepared to receive applications for the issue of a portion of the Company's Perpetual Four per Cent. Debenture Stock, which will be recorded in the books of the Company in the names of the applicants free of stamp duty or other charge.

This stock will be entitled to the same priority against the property and income of the Company as the mortgage debt, in substitution of which it will be issued.

Forms of application may be obtained from the undersigned, either personally or by letter.—By order,

S. WM. BULTEEL, Treasurer.

Manchester, Nov. 1861.

NORTH LONDON RAILWAY COMPANY.

FOUR-AND-A-HALF PER CENT. PREFERENCE STOCK.

The North London Railway Company are prepared to receive applications for their new shares of £20 each, created under the powers of their Acts of 1861, bearing a fixed Preferential dividend at the rate of 4½ per cent. per annum, with a contingent right to a further increase up to £5 per cent. per annum. The shares will be issued on such terms that the holders will be entitled to 4½ per cent. on the whole nominal amount of the shares, from the 1st January, 1862, to the end of 1865, after which they will be entitled to the further contingent increase.

A form of application, in which the terms are fully and particularly stated, may be had on application at the Company's offices.—By order,

HARRY CHUBB, Secretary.

Euston Station, London, 20th November, 1861.

GREAT NORTH OF SCOTLAND RAILWAY COMPANY.

ISSUE OF "NEW" PREFERENCE SHARES.

The Directors of this Company are prepared to receive applications for portions of a further issue of "New Shares," of £10 each, created under the powers of the "Great North of Scotland Railway Consolidation Act, 1859."

These shares bear a fixed dividend, at the rate of 4½ per cent. per annum, payable half-yearly, said fixed dividend ranking, pari passu, with the existing 5 per Cent. Preference Shares of the Company, the whole being amply secured by a Surplus Annual Income, now amounting, after payment of debenture interest and working expenses, to about £50,000.

The last half-yearly dividend on the Company's original shares was at the rate of 7 per cent. per annum.

Application may be made to the Secretary, at Aberdeen; or through an agent or broker.—By order,

ROBERT MILNE, Secretary.

Company's offices, Aberdeen, November, 1861.

MADRAS RAILWAY COMPANY.

—The Directors are prepared to comply with applications for Debentures at par, in sums of not less than £100 each, bearing interest at 5 per cent. per annum, payment of interest and principal being guaranteed by Her Majesty's Secretary of State for India in Council. The interest is payable by coupon, half-yearly, at the Union Bank of London. The Debentures are of the two following descriptions:—

1st. For a term of 5 years from the 1st of January last, transferable by endorsement without stamp, and renewable at the option of the holder for a second term of 5 years at the same rate of interest of 5 per cent.

2nd. For a term of 4 or 5 year , and convertible at the option of the holder into Capital Stock of the Company, bearing 5 per cent. interest, guaranteed by the contract with the East India Company.

Forms of application may be obtained at this office.

JAMES WALKER, Managing Director.

Company's offices, No. 33 New Broad street, London, E.C., April 30, 1861.

NORTH POOL MINE.—

This SHARE LIST will be CLOSED after 2nd DECEMBER, and SHARES will be ALLOTTED from PRIORITY of APPLICATION.

NORTH POOL COPPER MINING COMPANY.

To be incorporated under the statutes limiting shareholders' liability to the amount subscribed.

Capital £24,000, in 6,000 shares of £4 each. Deposit, 2s 6d per share on application, and 2s 6d per share on allotment. The remainder by quarterly instalments of 5s per share, as required for working the mine, of which due notice will be given.

Directors to be chosen by shareholders at the first meeting.

BANKERS—Messrs Bolitho, Sons, and Co., Penzance, Cornwall.

SOLICITOR—F. W. Snell, Esq., 1 George street, Mansion House, London, E.C.

AUDITORS—Messrs Cooper Brothers, and Co., 13 George street, Mansion House, London.

MANAGING AGENT—Capt. Thomas Faull, late Manager of Linares and other home and foreign mines, now of Camborne, Cornwall.

ENGINEERS—Messrs Mitchell and Jenkin, Redruth, Cornwall.

SECRETARY—J. S. Phillips, 12 St Michael's alley, Cornhill, London.

Offices—7 George yard, Lombard street, London, E.C.

A grant to work the extensive sett called North Pool, Illogan, Cornwall, has been obtained, at £20 per annum minimum rent, and 1-18th maximum dues.

The geological position of North Pool is unsurpassed by any mine in the kingdom, being situated about half a mile north of, and parallel to, the celebrated granite hill Carn Brea, around which six square miles have produced at least £6,000,000 sterling profits, by the comparatively small outlay of about £600,000, and more mineral wealth than has been returned by all the other mines of Devon and Cornwall by tenfold outlay.

It is a very extensive sett, Cook's Kitchen (and other mines) being only about one-fourth as long on the lodes, although it has been at work upwards of 200 years, and even now about to become a rich tin mine in depth.

Its immediate neighbours are, on the north and east, the Tolguses; southward, Wheal Agar, East Pool, Carn Brea, and Tincroft; and westward, the Croftys, Setons, and North Roskear Mines.

North Pool has been worked once, but only to a very limited extent (£61,450 profits were made in eight years, at a cost of only £8,180, in about 100 fms. long, and above the 80 fm. level), whereas several of the best mines of this district have been re-worked twice and thrice most profitably, to the depth of from 200 to 300 fms.; and still continue very rich and promising, although much less so for the ground first wrought therein.

The promoters consider the old mine a good speculation in depth; but as at least 19-20ths of this lode in such a long sett is quite unexplored at a fair mineral depth, and moreover, four side lodes, almost entirely unworked, they confidently believe it to be an unusually valuable property, and eminently deserving attention and trial.

Two good engines—a 70-inch for pumping, and a 28-inch for winding and crushing—will be amply sufficient to work the engine and side lodes to a proper depth, and long before this capital is fairly expended good results will, in all probability, be attained.

Much work has been executed that will speed progress, such as roads, floors, and well-timbered shafts, at a cost of many thousand pounds, which are immediately available for future operations; and the Hayle and Portreath Railway passing through the mine will greatly facilitate the transit of materials and minerals.

The limited liability has been adopted, as a guarantee of good faith to the large portion of the public who prefer it to the unlimited (and sometimes abused) Cost-book System; and to counteract the greatest evil of the former £24,000 is intentionally more than sufficient.

All money will be drawn from the bank by cheques signed by two or more directors and the secretary.

The promoters agree to accept 300 fully paid-up shares (as a guarantee of their confidence), and 2s 6d per share cash, for the sett, and which shall clear all the preliminary expenses of incorporation, travelling, reporting, mapping, printing, law costs, advertising, and broker's commission, with grants and leases.

Reports with sections and plans of the sett and neighbouring mines were published in the MINING JOURNAL of Oct. 5, 1861, from which the most sceptical will see and allow its merits, and that no more has been stated than plain statistical facts will most amply verify.

Applications for prospectuses and form of order for shares to be addressed to the secretary.

EXTRACTS FROM REPORTS.

W. Bowden, Manager of Camboru Vean, and late Agent at North Pool Mine.

Sept. 10, 1861.—I have been engaged in North Pool Mine upwards of eleven years, during which period it made £61,000 profit from the adit to the 72, having an almost continuous bunch of copper ore for about 100 fms in length. I should more particularly call the attention of those embarking in this speculation to the western part of this sett, on the engine and side lodes, which part was totally neglected by the late workers. The stratum and indications, as far as seen, are precisely similar to the old mine, where such large deposits of ore existed; and I, therefore, see no reason why you may not have as good a mine here as the old party had further east. This sett lies on the same run of lodes as the Tolguses on the east and Setons on the west, and being in such a good locality is a speculation rarely to be met with. In conclusion, I may say that as only about 200 fms long have been explored at a fair mining depth, and that as the sett is 900 fms long, and contains five lodes, exceedingly little has been worked for this rich district; therefore it is highly probable that many other bunches of ore may be discovered, that will, I have no doubt, lead to large profits; and I can highly recommend it to the mining community.

J. Daw, Manager of Corn Brea Mines, &c.

Sept. 12, 1861.—I beg to hand you my report of North Pool Mine. This mine is situated in the parish of Illogan and is bounded on the east by South Tolgus, which is on the same run of lodes, and has given great profit to the adventurers—on the west by North Crofty and Wheal Seton. The sett is very extensive, it being about 900 fms long and 200 fms wide, with four or five parallel lodes, traversing its entire length. These are intersected by cross courses and elvans, with patches of iron or greenstone. About 500 fms east of the western boundary a shaft is sunk through the great north lode at 12 fms below the surface, where it is large, and spotted throughout with copper ore. Looking at the situation of this mine, I consider it to be more than an ordinary speculation, having such a long piece of unexplored ground in this highly mineralised district, and on lodes which have been so productive in the mines to the east and west, so I think it well worthy the attention of capitalists.

J. Vivian, Manager of North Roskear, North Crofty, &c.

Sept. 11, 1861.—In reply to yours of yesterday, I am well acquainted with the district of North Pool Mine, and believe it to be a first-rate piece of mining ground.

W. Pascoe, Manager of South Frances, &c.

July 25, 1861.—In reply to your kind favour of the 22nd inst., respecting the above mine, I beg to say that I know but little about the old workings, but I believe with you that there is an extensive piece of untried ground to the north and west of the old mine, which, in such a good locality, ought to be tried. I think you very fortunate to get the setts, and wish you every success in the undertaking.

W. H. Reynolds, Manager of Great Retallack, Wheal Unity, &c., of Messrs Watson and Cuell's firm.

Sept. 3, 1861.—I am glad to find that you have secured the sett of North Pool Mine, and I know of no ground in the district lying idle that is so deserving of attention. It is an extensive sett, being about 900 fms. long by 200 fms. wide, and traversed by at least five lodes, some of which I suppose to be those of South and Old Tolgus on the east, and the Setons on the west. The most important feature, however, is that there is upwards of half a mile of unexplored ground between the late workings and the Seton Mines; and, judging from the general productiveness of these lodes, it is highly probable that in this ground valuable discoveries may be made. When we look at the very rich locality in which this mine is situated, and the immense returns made from so small a portion of the sett, it certainly does appear that the prospects of the speculation are unusually good.

G. Rickard, Manager of Great Onslow Consols.

Sept. 26, 1861.—I have considered the feasibility of North Pool sett as a speculation for further working, and, taking into consideration the fact that very extensive and profitable mines have been, or are being, worked at both ends of the property, the recent richness of the mine itself, the rich locality, and great extent of unexplored ground in the sett, there do not appear to me any sound reasons why the unexplored portions of the engine lode, as well as any parallel lodes, may not prove profitably productive; and I consider if these lodes are properly worked there is a very fair chance of success.

M. Edwards, late Manager of Wheal Kitty, &c.

Sept. 3, 1861.—The extensive and valuable mining property of North Pool is situated in the parish of Illogan, and is closely surrounded on the south, east, and west by some of the most productive and profitable mines in Cornwall. These lodes, however, run the entire length of the sett, and as there is a large amount of unexplored ground in the western part of it, I would strongly recommend you to commence operations there, open on the lodes, and give it a vigorous and spirited trial. For this purpose only a moderate amount of capital will be required, which in my opinion will not fail, if judiciously laid out, to make a lasting and profitable mine.

An early application should be made to secure shares, which are being rapidly taken up.

UNIVERSAL PRIVATE TELEGRAPH COMPANY.

Incorporated by Act of Parliament 24 and 25 Vict. (Royal Assent, 7th June, 1861), by which Shareholders are exempt from all liability beyond the amount of their Shares.

Professor Wheatstone's Patent.

Capital £100,000, in 4,000 shares of £25 each.

DIRECTORS.

David Salomons, Esq., Alderman, M.P., Chairman.
John Henry Dillon, Esq., Deputy-Chairman.
Lord Claud Hamilton, M.P.
Joseph Cary, Esq.
William Fairbairn, Esq., C.E., F.R.S.
Dr Edward Frankland, F.R.S.
Frederick C. Gaussen, Esq.
Charles Wheatstone, Esq., F.R.S.

ENGINEER.

Thomas Page, Esq., C.E., Middle Scotland yard.

ELECTRICAL ENGINEER.—Nathaniel J. Holmes, Esq.

BANKERS.

Union Bank of London (Temple Bar Branch).

The Universal Private Telegraph Company erect and maintain private telegraphic wires (Wheatstone's patent) at a fixed annual rental, and provide the instruments necessary to work them.

Their system has been for some time in successful operation in London, and is in general use by the daily Press, Mr Reuter's establishments, the City of London police, the docks, and numerous mercantile firms.

The original estimate of the directors, "That a minimum net dividend of £10 per cent. might fairly be looked for," has been more than realised. The company having recently extended their operations to Glasgow and Manchester with the most satisfactory result, and being in the constant receipt of applications from new renters, are now prepared to make a further issue of 1,200 shares of £25 each (first call £3 per share), applications for which are to be made to Mr Geo. E. Seymour, 38 Throgmorton street, E.C., the broker to the Company, on or before the 30th November instant.—By order,

LEWIS C. HERTSLET, Secretary.

Universal Private Telegraph Company's Offices, 448 West Strand.

SEVEN PER CENT. DEBENTURES,

Interest payable March and September.

SUBMARINE TELEGRAPH COMPANY, 58 Threadneedle street, London, incorporated by Royal Charter, and constituted under exclusive privileges from the French, Belgian, Danish, and Hanoverian Governments.

Paid-up capital £210,000. Debentures £70,000.

DIRECTORS.

The Right Hon. Lord de Manley.	Samuel Gurney, Esq., M.P.
Sir James Carmichael, Bt., Chairman.	Captain J. Grant, R.A.
J. W. Brett, Esq.	Francis Edwards, Esq.
	Charles Saunderson, Esq.
	George Scamell, Esq.

The Directors are prepared to receive applications, at par, for the unissued Debentures of this Company, in sums of £50 and upwards, bearing interest at 7 per cent. per annum, payable half-yearly, on the 12th March and 12th September; the interest to commence on payment of the money.

These debentures are issued for five years, the Company reserving to themselves the right of paying them off in three years. The holders have the option, during the whole of the period, of converting them into the stock of the Company at par.

This Company is now in possession, under exclusive privileges, of seven cables to different parts of the Continent, forming an aggregate length of telegraphic cable of nearly 900 miles.

The debenture debt is restricted by the Company's charter to one-third of the paid-up capital, and forms the first charge on the Company's revenue.

Applications to be made to the Secretary, or to Messrs Foster and Braithwaite, 68 Old Broad street, the brokers of the Company.—By order,

L. WALTER COURTENAY, Secretary.

November, 1861.

ORIENTAL PARCELS CONVEYANCE.—THE ORIENTAL INLAND STEAM COMPANY (Limited), under subsidy from the Indian Government. Capital £500,000.

The Directors have the pleasure of intimating for general information that they are now prepared to transmit parcels, and various descriptions of merchandise, from the coast to many places in the interior of India, by the most eligible means of conveyance, and at very moderate charges; and also, in connection with such internal traffic, to forward such parcels and other goods from Europe to India.

The Company having efficient agents established for their own steamers at Kurrachee, Calcutta, and most of the principal stations on the Indus and the Ganges, as well as in various other parts of India, are enabled to offer unusual advantages in the transmission of goods to the interior, and such as no existing agency can afford, undertaking to act as forwarding agents from the termini of their own navigation.

Packages will be cleared at and removed from the Customs in India, and forwarded to their destination, bearing import duty, which, with the landing and other internal charges, must be paid by the consignee previous to delivery; but the freight to India of such goods as are required to be forwarded from Europe must be paid in England.

For tariff rates, &c., apply at the Company's offices, 9 Billiter street, London, E.C.; or 2 Queen's terrace, Southampton; or to the Company's agents at the following stations in the East, at which agencies have either been already formed, or will be formed as early as practicable. Agencies have been already established at many other points not enumerated herein:—

Agra.	Ferozepore.	Moultan
Ahmednuggur.	Futteyghur.	Neemuch.
Allyghur.	Fyzabad.	Nynee Tall.
Allahabad.	Ghazeepore.	Patna.
Assam.	Gwalior.	Peshawur.
Attock.	Hydrabad (Scinde)	Poonah.
Baroda.	Kurrachee.	Rajmahal.
Bareilly.	Lahore.	Rawul Pindee.
Benares.	Landour.	Sattara.
Bombay.	Loodheana.	Sehwan.
Calcutta.	Lucknow.	Shikarpore.
Cawnpore.	Mahableshwur.	Simla.
Commercolly.	Meerut.	Sukkur.
Dacca.	Mirzapore.	Tatta.
Delhi.	Moorshedabad.	Umritsur.

The arrangements for the Madras Presidency are not yet matured, but will be announced when completed.

RICHARD FORD and CO., Patentees, 38 Poultry, London.

FORD'S EUREKA SHIRTS,

known from Cornhill to China, for the last ten years, as the acme of perfection for fit and quality. Where difficulty occurs in procuring Ford's Eureka Shirts, send to the Patentees.

RICHARD FORD and CO., 38 Poultry, London, E.C.

"MIMEMA."—

Her Majesty's Royal Letters Patent have been granted to Richard Ford and Co., of 38 Poultry, London, for the Mimema, or Demi-Shirt, which is intended to be worn over an outside flannel shirt, giving the appearance of dress at any time without the necessity of changing the flannel shirt, and thus preventing taking cold. The Mimema is made of long-cloth, with plain and fancy linen fronts and wrists, and being close fitting, not the slightest incumbrance is experienced by the wearer. An illustrated price list, with instructions for measurement, sent free on application. Sold by all hosiers, drapers, &c., and wholesale and retail by the Patentees, RICHARD FORD and CO., 38 Poultry, London, E.C.

SOLICITORS—Messrs Davidson, Bradbury, and Hardwick, 22 Basinghall street.

BROKERS—Messrs Bragg and Stockdale, 6 Throgmorton street.

SECRETARY pro tem.—Samuel Stockton, Esq.

Temporary Offices—St Michael's House, St Michael's alley, Cornhill.

The universal success of all respectably conducted banks recommends their shares as a most profitable investment; and now that Parliament has made the principle of limited liability applicable to banking companies, the danger which formerly attached to their shareholders on account of their unlimited liability may be avoided by registration under those acts.

Notwithstanding the great difficulties which must attend the change from unlimited to limited liability, in respect to banks already established, two important banking companies have availed themselves of the privilege, and in both instances the good effect of the step is evidenced by an increase in the amount of deposits, and by an improved value and marketability of the shares. The present undertaking, therefore, will be incorporated with limited liability, but an ample portion of the capital will be uncalled to secure the confidence of customers.

The business ordinarily conducted by a bank is well known to the public. It is sufficient, therefore, to say that all the operations ordinarily or legitimately pertaining to a Joint Stock Bank will be comprised within the transactions of The Mercantile Bank, Limited.

The following brief recapitulation of published results, as regards the undermentioned Joint Stock Banks, presents data for an opinion as to the profits and advantages which may be expected to accrue to the shareholders of The Mercantile Bank, Limited.

	Capital.	Current and Deposit Accounts.	Amount paid up per share.	Present price of shares.	Dividends.
	£	£	£	£	Per Cnt.
London and Westminster	1,000,000	14,821,650	20	72	20
London Joint Stock	600,000	11,425,037	10	34	25
Union	600,000	10,415,020	10	28	10
London and County	500,000	5,973,348	20	39	10
City	300,000	2,840,346	50	75	9
Bank of London	300,000	1,684,129	50	64	5

In order to show the enormous increase in the banking operations of the metropolis, and consequently the opening which now exists for a new joint stock bank, it is only necessary to state the fact that the current and deposit accounts of the above-named banks have increased £6,370,714 during the last year.

The capital of The Mercantile Bank, Limited, will be £1,000,000, in 10,000 shares of £100 each; and it is proposed that not more than £30 per share shall be called up, and that the calls shall be at intervals of at least three months; the Directors reserving the right to commence business prior to the whole of the capital being subscribed.

Applications for shares must be made in the form annexed to the Prospectus. The deposit of £2 per share must be paid to the Company's bankers, for which a receipt will be given. If no allotment be made, the deposit money will be returned in full; and if a less number be allotted than is applied for, the surplus will be used towards the payment on allotment.

Prospectuses, and Forms of Application for Shares, may be obtained at the temporary offices, and of the brokers.

NATIONAL DISCOUNT COMPANY (LIMITED), 33 Cornhill, London.

Subscribed Capital, £2,000,000. Paid up, £385,345.

Approved mercantile bills discounted for parties properly introduced.

Money received at interest on deposit, repayable on call or at fixed periods.—By order of the Board,

RICHARD PRICE, Secretary.

Cornhill, November, 1861.

ANDREW FRANCIS, Secretary.

THE SCOTTISH WIDOWS' FUND LIFE ASSURANCE SOCIETY,

the oldest Life Office in Scotland, is now, in annual revenue and extent of business, the largest Mutual Life Office in the world.

I. BONUS SYSTEM.

Bonus are declared on the original sum assured, and on Bonuses added at previous Divisions of Profits; and, accordingly, the Policies of this Society increase in a ratio similar to a sum of money laid out at compound interest. At the last division of profits for the seven years ending 31st December, 1859, the additions varied from £1 12s 6d per cent. on the original sum assured under the youngest policy, up to £3 6s per cent. per annum on the older policies. These additions formed one of the largest bonuses ever declared by any insurance company, being equal to an average bonus of from 50 per cent. on the seven premiums paid on the more recent policies, to 107 per cent. on the older policies.

Persons intending to effect assurances will bear in mind that these unusually large bonuses have all been declared out of profits actually realised at the respective terms of division, and that every element of profit ever possessed by the Society, with vastly increased resources, remains for the increase of present and new members' policies.

II. CASH VALUE OF POLICIES PAYABLE ON DEMAND.

Many offices decline giving any surrender value, unless the policy shall have been of a certain number of years' standing, although the premiums paid greatly exceed the risk borne by the office and the proper expenses of the assurance. The practice of the Scottish Widows' Fund is, and always has been, to pay at any time from the day of the issue of a policy its actual office value, and even when the policy lapses by non-payment of the premiums during the 13 months within which they can be received, an allowance equal to the full surrender value is paid.

These two important features, viz.:—1. The largeness of the bonuses declared out of realised profits; and 2. The certainty from the first of a fixed cash value being paid to the member himself in the event of his desiring to discontinue his assurance—render policies of the Scottish Widows' Fund, whether held for family or business purposes, instruments of the highest value.

III. FUNDS AND REVENUE.

Invested Funds, £3,700,000. Annual Revenue, £430,000.

A NEW PROSPECTUS,

containing detailed tables, explanations, and examples of the practical results of the above, and other important features, will be sent free on application to the Head Office, or any of the Society's agents.

SEVENTH DIVISION OF PROFITS.

IMPERIAL LIFE ASSURANCE COMPANY, No. 1 Old Broad street, London, E.C.

Instituted 1820.

Policies effected during the year 1861 will participate in the profits to be declared in the year 1866, equally with policies of the longest duration, in proportion to the amounts insured.

Prospectuses and further information may be had at the chief office, as above; at the branch office, 16 Pall Mall, S.W.; or of the agents in town and country.

SAMUEL INGALL, Actuary.

UNIVERSAL LIFE ASSURANCE SOCIETY, No. 1 King William street, London, E.C.

Committees in Calcutta, Madras, and Bombay.
Agents throughout India.

The last Annual Reduction of Premium amounted to 45 per cent., so that a person being assured for £1,000 at the age of 30 is now paying £13 8s 7d instead of £24 8s 4d.

Invested Capital upwards of £780,000.

M. E. IMPEY, Secretary.

ACCIDENTS OF ALL KINDS,

and from Any Cause, may be provided against by an Annual payment of £3 to the RAILWAY PASSENGERS ASSURANCE COMPANY, which secures £1,000 at death by Accident, or £6 weekly for Injury.

No Extra Premium for Volunteers.

One Person in every Twelve insured is injured yearly by Accident.

£75,000 has been already paid as Compensation.

For further information apply to the Provincial Agents, the Railway Stations, or at the Head office, 64 Cornhill (late 3 Old Broad street).

Annual Income, £40,000.
Capital, One Million.

W. J. VIAN, Secretary.

64 Cornhill, E.C., January, 1860.

SWEDISH PROVINCIAL MORTGAGE BONDS.

—Loan for £450,000 Four per Cents., negotiated by Messrs Palmer, Mackillop, Dent, and Co., and Messrs C. Tottie and Sons.—Notice is hereby given, that the Half-Yearly Dividend on the above Bonds, due on the 1st of December next, will be Paid at the counting house of Messrs Dent, Palmer, and Co., on Monday the 2nd December next, and every succeeding day (except Saturday), between the hours of 11 and 3.

The coupons, with a list in numerical order, must be left two clear days previously for examination.

Nov. 21, 1861.

SWANN AND CO.'S STOURPORT MALT VINEGAR for PICKLING.

"The best known."—Vide "Lancet," Feb. 16 and Aug. 29, 1852.

CITY DEPOT—WHITMORE and CRADDOCK, 16 Bishopsgate street within, London, E.C., opposite "The Baltic" Coffeehouse.

Shippers and the trade supplied on best terms.

HARVEY'S SAUCE.—CAUTION.—

The admirers of this celebrated Sauce are particularly requested to observe that each bottle bears the well-known label, signed "Elizabeth Lazenby." This label is protected by perpetual injunction in Chancery of the 9th July, 1858, and without it none can be genuine.

E. LAZENBY and SON, of 6 Edwards street, Portman square, London, as sole proprietors of the receipt for Harvey's Sauce, are compelled to give this caution, from the fact that their labels are closely imitated with a view to deceive purchasers.

Sold by all respectable grocers, druggists, and oilmen.

IMPORTANT TO OWNERS OF HORSES.

—No more Oats or Beans required in the feeding of this true and faithful animal.—Try one ton of THORLEY'S NEW FEEDING MEAL, composed of the finest Locust Beans, Indian Corn, Linseed, &c., &c., well seasoned with Thorley's Condiment. Price £16 per ton. Horse-keepers are respectfully invited to give this compound a fair trial, mixed with damp chaff and nothing else, and notice the saving in keep, with an improved working condition. See Dr Brown's report, and trials made by some of our first carmen in town and country. A sample barrel, containing 12 stones, carriage paid to any railway station in the United Kingdom (barrel included), for 30s. 14 barrels, weighing nett 21 cwts. at 16s, delivered free to rail in London (barrels free), £16 16s. Post office orders or cheques must be made payable to the Inventor, Joseph Thorley, Steam Mills, Caledonian road, King's cross, London, N.B.—Purchasers of 5 tons and upwards are charged at the rate of £15 per ton.

BRITISH AND NORTH AMERICAN ROYAL MAIL STEAM SHIPS,

BLACK BALL MONTHLY AUSTRALIAN CLIPPERS From LONDON direct.

SYDNEY packet for 10th December, the celebrated yacht-built clipper BEEMAH, 1,800 tons, A 1 at Lloyd's for 11 years, was built expressly for speed, is celebrated for having made some of the most extraordinary passages on record, as follows:—England to Java Heads, in 69 days; to Hong Kong, 89 days; from Foo Chow Foo to St Helena, in 56 days; proving herself by far the fastest ship on the berth; to be followed as

SYDNEY packet for 10th January, by the far-famed CAIRNGORM, 1,800 tons, CAIRNGROSS, Commander.

MELBOURNE packet for November, receiving goods in the London Docks until the 25th (unless previously full), the Black Ball clipper

SOLWAY, 1,800 tons, DUGUID, Commander. This high class English-built clipper, A 1 at Lloyd's for 13 years, just returned from her third voyage, offers unsurpassed opportunities to shippers of fine and season goods, and superb accommodation for all classes of passengers. Victoria warrants taken in part payment; to be followed as

MELBOURNE packet for December, receiving goods until the 20th, unless previously full, and sailing punctually on the 25th, by the superb China clipper CARIBBEAN, A 1 at Lloyd's 13 years, 1,800 tons.

ADELAIDE packet for December, the clipper GLENCLUNE, 800 tons, A 1 at Lloyd's 10 years. This beautiful clipper is famous in the China trade for her great speed and sound delivery of cargo, and offers the best opportunity to shippers of fine and season goods; to be followed in January by the well-known clipper ship

SPIRIT OF THE NORTH

QUEENSLAND packet for 15th December, the splendid clipper

MONTMORENCY. This beautiful ex-royal mail ship has just returned from a voyage with passengers to Queensland, for H. M. Commissioners of Emigration, and will be punctually despatched; to be followed as

QUEENSLAND packet for January by the Black Ball clipper

CITY OF BRISBANE, 2,000 tons.

Two of the ground rents are subject to an annuity of £20 each, during the lives of two persons, ages 21 and 34.—Particulars can be had at the auctioneers' offices, 80 Cheapside.

GEORGE SMITH, Wine Merchant, 86 Great Tower street, 9 and 10 Great Tower street, and 1 St Dunstan's hill, E.C., and 17 and 18 Park row, Greenwich, S.E. Established 1785. A large and valuable stock of old bottled Ports, of various shippers and vintages, accumulated during the last forty years, including a bin fourteen years in bottle, of eight hundred and fifty dozen, bottled by the late Mr Fenwick, of the firm of Messrs Ruck, Fenwick, and Ruck, known to the trade as his celebrated "Six Vintage" Wine, dry, full of "beeswing," of immense flavour, delicacy, and bouquet. Samples forwarded on payment.

TAYLOR, WATT AND CO., Merchants, Auctioneers, Commission Land and Estate Agents, Wanganui, Province of Wellington, New Zealand.
London Agent:—BERNARD LEWIS, WINE and COLONIAL MERCHANT, St Michael's House, Cornhill.
Wanganui, 4th July, 1861.
No charge for storage on goods consigned for sale.

A GENTLEMAN, 35 YEARS OF age, desires Employment at home or abroad; he has had long mercantile experience in England and India, is a thorough accountant, a good linguist, and accustomed to take the management of an office. Good references will be given.—Address to Delta, care of the housekeeper, 23 Laurence Pountney lane, City, E.C.

A GENTLEMAN, 35 YEARS OF age, of good address and business habits, is desirous of meeting with an engagement as out-door Clerk, and to make himself useful in the office when not otherwise engaged. Has been 13 years with his late employer, and can give unexceptionable references. A moderate salary only expected.—Address A. Z., Mr Oliver, 169 Dover road, Borough.

AN ENGLISH GENTLEMAN of considerable experience, who has been at the head of a house abroad for some years, and who possesses a good knowledge of manufactured goods, with some influence among the shippers in Lancashire and Yorkshire, is open to an engagement to go out to take charge of a house abroad.—Address O. P. Q., B. Wheeler, Newspaper Office, Manchester.

TO MERCHANTS AND OTHERS.—A Young Man, aged 29, of undeniable character, requires a re-engagement as CLERK. A practical Bookkeeper. References to present employers (stock brokers).—Address L. H., 18 Warrington street, Oakley square, N.W.

TO BANKERS.—A Gentleman of many years' experience in Banking, and who for six years was a Branch Manager, wishes to obtain a similar appointment or some other of responsibility, in a Joint Stock or Private Bank. Age 33. Reference to the Company he has recently left.—Address W. B., care of Messrs. W. H. Smith and Son, 186 Strand, London, W.C.

TO HOTEL PROPRIETORS, CAPITALISTS, &c.—The Owner and Proprietor of the Monster Irish American Hotel at Bray, County Wicklow, Ireland (which is now fast drawing to completion, and will be opened by the 1st of June next), is now ready to treat with a competent Person as MANAGING PARTNER. In order to give some idea of the extent and advantages of this monster building (which stands in one of the most rising and fashionable watering places in the three kingdoms), the following particulars may be stated:—It contains over 150 bedrooms, bathrooms, 22 sitting rooms, great dining hall, ball-room, ladies' drawing rooms, coffee room, smoke-room, and most extensive bars; together with a basement complete with culinary, servants' apartments, &c., arranged in corridors of 450 feet long. The structure in itself being a model, is replete with all modern improvements.—For further particulars, &c., apply to the owner, J. BRENNAN, Esq., Brennan's terrace, Strand, Bray, County Wicklow. None but capitalists and principals need apply. The strictest confidence will be observed.

PARTNERSHIP.—Engineering Business.—A gentleman of active business habits, with from £15,000 to £25,000, can be admitted a partner (in the place of the senior partner deceased) in one of the oldest and most celebrated engineering establisments in Lancashire. The concern receives a large amount of Government and foreign orders, and has also a first-class home connection. The opportunity to enter such a firm seldom occurs, and the terms offered to the new partner are very liberal.—Apply to Mr David Chadwick, 75 King street, Manchester.

WANTED, BY AN OLD AND respectable firm in the South American trade, a Partner with £10,000 to £15,000, to take the place of one retiring. The firm is one of over 30 years' standing, and has a highly respectable connection. There are three houses, one in England, and two abroad. Principals only will be treated with, and all communications will be considered confidential.—Address to T. K. Hassall, Esq., Solicitor, Old Churchyard, Liverpool.

WANTED, TWO GENTLEMEN of about 30 years of age, well acquainted with Banking and General Business, to act as Assistants in the Bank of Bombay, at the Head Office, or to take charge of Branches which may shortly be established in the interior of the Presidency. They would have to engage for 3 years certain, and give security for £5,000. Salary £800 per annum with the prospect of an increase.—Applications marked B. B., to be addressed within the next fortnight to Messrs C. and S., No 20 Cornhill, London.
26th November, 1861.

UNITED KINGDOM LIFE ASSURANCE COMPANY,

8 WATERLOO PLACE, PALL MALL, S.W.

THE HON. FRANCIS SCOTT, CHAIRMAN.
CHARLES BERWICK CURTIS, ESQ., DEPUTY-CHAIRMAN.

FOURTH DIVISION OF PROFITS.

SPECIAL NOTICE.—Parties desirous of participating in the fourth division of profits to be declared on policies effected prior to the 31st December, 1861, should make immediate application. There have already been three divisions of profits, and the bonuses divided have averaged nearly 2 per cent. per annum on the sums assured, or from 30 to 100 per cent. on the premiums paid, without the risk of copartnership.

To show more clearly what these bonuses amount to, the three following cases are given as examples:—

Sum Insured.	Bonuses added.	Amount payable up to Dec., 1854.
£	£ s	£ s
5,000	1,987 10	6,987 10
1,000	397 10	1,397 10
100	39 15	139 15

Notwithstanding these large additions, the premiums are on the lowest scale compatible with security; in addition to which advantages, one-half of the premiums may, if desired, for the term of five years, remain unpaid at 5 per cent. interest, without security or deposit of the policy.

The Assets of the Company at the 31st December, 1860, amounted to £730,665 7s 10d, all of which had been invested in Government and other approved securities.

No charge for Volunteer Military Corps whilst serving in the United Kingdom.

Policy Stamps paid by the Office.

For prospectuses, &c., apply to the Resident Director, No. 8 Waterloo place, Pall Mall.

By order, E. L. BOYD, Resident Director.

ESTABLISHED 1837.

BRITANNIA LIFE ASSURANCE COMPANY.

Empowered by Special Act of Parliament, 4 Vic., cap. 9.
1 Princes street, Bank, London.

DIRECTORS.

Major-General Alexander, Blackheath park, Chairman.
George Bevington, Esq., the Lodge, Dulwich.
Fortescue P. Cockerill, Esq., Shadwell and Twickenham.
George Cohen, Esq., Shacklewell.
Millis Coventry, Esq., Corn Exchange chambers.
John Drewett, Esq., 50 Cornhill.
Thomas Samuel Girdler, Esq., 7 Tokenhouse yard.
Henry Lewis Smale, Esq., Doctors' commons.

Increasing rates of premium, especially adapted to the securing of loans or debts.

Half-credit rates, whereby half the premium only is payable during the first seven years.

Sum assured payable at 60, or at death, if occurring previously.

Provision during minority for orphans.

BRITANNIA MUTUAL LIFE ASSOCIATION.

Empowered by Her Majesty's Royal Letters Patent.

Profits divided annually.

Premiums for every three months' difference of age.

Half-credit policies granted on terms unusually favourable; the unpaid half premiums being liquidated out of the profits.

EXTRACTS FROM TABLES.

Age.	Without Profits. Half prem. 1st seven years.	Without Profits. Whole prem. remaind. of life.	With Profits. Age.	With Profits. Annual prem.	With Profits. ½ yearly prem.	With Profits. Quarterly prem.

Andrew Lusk, Esq. (A. Lusk and Co.).
John Robert Thomson, Jun., Esq. (J. R. Thomson & Co).
Joseph Underwood, Esq. (Hills and Underwood).
John Kemp Welch, Esq. (Orlando Jones and Co.)

MANAGER—Henry Thomson, Esq.
BANKERS—The London and County Bank.
SOLICITORS—Messrs Marten, Thomas, and Hollams, Mincing lane.

The Directors are prepared to accept proposals for Fire Insurance on all descriptions of property.

The Tariff for London Mercantile Business has been adjusted on the principle of classification; adopting the plan that each class of goods should be charged a premium proportionate to the risk.

The Directors, in deciding upon this tariff, have endeavoured faithfully to fulfil the wishes of the Commercial community expressed at the influential meeting held at the Mansion House on the 25th July last, and trust they will be supported by the public to enable them to carry out this system with success.

Ordinary Insurances taken at the usual rates.

A commission will be allowed to solicitors and agents introducing business.

Forms of proposal and all information can be obtained at the temporary offices of the Company, 34 Gracechurch street, E.C.

SEVENTH DIVISION OF PROFITS.

IMPERIAL LIFE ASSURANCE COMPANY, No. 1 Old Broad street, London, E.C.

Instituted 1820.

Policies effected during the year 1861 will participate in the profits to be declared in the year 1866, equally with policies of the longest duration, in proportion to the amounts insured.

Prospectuses and further information may be had at the chief office, as above; at the branch office, 16 Pall Mall, S.W.; or of the agents in town and country.

SAMUEL INGALL, Actuary.

IMPERIAL LIFE INSURANCE COMPANY, No. 1 Old Broad street, London, E.C.

Instituted 1820.

DIRECTORS—1861.

Thomas Newman Hunt, Esq., Chairman.
James Gordon Murdoch, Esq., Deputy-Chairman

Thos. G. Barclay, Esq.	George Field, Esq.
James C. C. Bell, Esq.	George Hibbert, Esq.
Charles Cave, Esq.	Samuel Hibbert, Esq.
Ed. H. Chapman, Esq.	Frederick Pattison, Esq.
Geo. W. Cottam, Esq.	W. R. Robinson, Esq.
Geo. Henry Cutler, Esq.	M. T. Smith, Esq., M.P.
Henry Davidson, Esq.	Newman Smith, Esq.

Profits.—Four-fifths, or 80 per cent. of the profits are assigned to policies every fifth year. The assured are entitled to participate after payment of one premium.

Bonus.—The decennial additions made to policies issued before the 4th of January, 1842, vary from £78 to £16 15s per cent. on the sums insured, according to their respective dates.

The quinquennial additions made to policies issued after the 4th of January, 1842, vary in like manner from £28 17s to £1 5s per cent. on the sums insured.

Purchase of Policies.—A liberal allowance is made on the surrender of a policy, either by a cash payment or the issue of a policy free of premium.

Loans.—The Directors will lend sums of £50 and upwards on the security of policies effected with this Company for the whole term of life, when they have acquired an adequate value.

Insurances without participation in profits may be effected at reduced rates.

Prospectuses and further information may be had at the chief office as above; at the branch office, 16 Pall Mall; or of the agents in town and country.

SAMUEL INGALL, Actuary.

THE MERCANTILE FIRE INSURANCE COMPANY.

Henry B. Hassall, Esq., Liverpool.
Robert McEwen, Esq., Manchester.
A. F. Morcom, Esq., Bristol.
J. B. Mundy, Esq., Bath.

Temporary Offices—Adelaide chambers, 52 Gracechurch street, London.

ABRIDGED PROSPECTUS.

This Company has been established for the purpose of affording, by the combination of the greatest despatch with the closest economy, additional security to the widely extended and continually increasing commerce of the principal seaports of Great Britain and Ireland.

The best and safest means of effecting marine insurance have not kept pace with the demands of the public, and to assist in giving security and facility to insurers living in all parts of the country, the National Marine Insurance Company has been established, and arrangements will be made whereby every port of importance shall be provided with the means of effecting marine insurance hitherto attainable only in London.

Dublin and Glasgow especially have no marine insurance companies, and it is notorious that the number of individual underwriters in those great trading marts is totally incommensurate with the large amount of ocean and coasting insurances which are constantly required to be effected there, thus showing there is ample scope for the establishment of another marine insurance company.

It is also intended to appoint competent representatives (under sufficient restrictions) at the different trading ports in the East Indies, China, Japan, and Australia; the number of insurance companies being quite inadequate to the requirements of the now greatly extended trade with and between those countries, and presenting a wide field for the operations of a marine insurance company.

The policies will, in accordance with the practice of other joint stock marine insurance companies, be so drawn up as to limit the liability of each shareholder to the amount of his shares.

The staff of officers to be selected by the directors will be composed of gentlemen thoroughly competent to discharge their respective duties.

Applications for shares must be accompanied with a banker's receipt for the deposit of 10s per share. No application will be entertained on which such deposit has not been paid, and in the event of no allotment being made, it will be returned without deduction.

Applications may be forwarded to the Secretary, and through any of the bankers or brokers to the company, from whom copies of the prospectus and forms of application may be obtained.

OUR DUTY.

THE forcible seizure of certain Confederate gentlemen on board a regular English packet by a Federal man-of-war is an act contrary to the usage of civilised nations, which the Federal Government must be called on to disavow,—and is, if it be not promptly apologised for and disowned, a *casus belli* that a stern duty will not permit us to disregard. The subject may be easily perplexed by needless verbiage; but the essential considerations may be simply stated, and in few words.

The duty of self-exculpation, at the outset, lies with the Federal Government. An armed vessel of theirs has taken from an unarmed vessel of ours, under irritating circumstances, certain passengers whom our ship had received on board at the port of a neutral nation, in the usual course of business, and with no fraudulent intent. Those passengers claimed our protection, and appealed to the inviolable sanctity of the British flag. They claimed the right of asylum which we have boasted that we offer on our ships and our soil to the weaker party of all countries; they asked no aid and no favour from us; they simply sought the ordinary safeguard of our laws and the common assurance of our hospitality. It is no light matter that a foreign Government should presume to touch with the tip of a finger men in such circumstances. The honour of England is tarnished by the ill-treatment of our guests; the security of our commerce is impaired by the violation of our vessel. The Americans *may* be able to justify their conduct; but they have done an act of very serious consequences, and needing very conclusive exculpation.

What, then, are their reasons? Their real and true reason very likely was that they wished to apprehend certain persons whom they call, and who are in the eye of their law, rebels. The passion—the fury—of a great civil conflict among a half-instructed people whose political passions know no restraint, has become so intense and eager that for the sake of capturing their adversaries the Federalists were ready to brave every consequence and risk every danger. But this true and real ground they cannot avow. It is precisely because of the intensity of the evil passions incident to civil war that the right of asylum upon neutral soil is so invaluable to political refugees all over the world, and it is this safe asylum which England has ever and will ever afford them without exception and without distinction. As we should not permit the Austrian Government to take Mazzini from the packet between Dover and Calais—as we should not permit the French Emperor to harm Louis Blanc between Dublin and Holyhead,—so we must protect those so-called American rebels *on our ship* between St Thomas and the Havana.

As the vital reason cannot be alleged, the Federal Government will have to advance legal and technical defences, which may be variously amplified and worded, but which are reducible in substance to these two.

First, it will be alleged that the captured persons were "contraband of war." This barbarous term is properly applicable to any munitions or implements of war; to any soldiers or sailors on active service; to any despatches from the belligerent Government to its subordinates; and implies that these men and articles are liable to seizure for contravening the peculiar laws of war, just as smuggled goods are likewise liable to it for contravening the common laws of commerce. The ground of this doctrine is the ground of necessity. It is said to be the right and the duty of every belligerent to finish the war in which he is engaged as promptly as he can. For this purpose, therefore, it is his duty to preclude his enemy from obtaining supplies of men and ammunition, from writing letters which might aid him in obtaining them, from the import of arms and men, and from the export of such documents and despatches as may strengthen him and may prolong the war.

The limit of this right is the limit of its reason. It is bounded by its necessity. Neutral nations, and the Americans above all, have been active and anxious for many years to enclose it within rigid bounds. If it were not stringently confined, all trade might be stopped; for all trade strengthens the trader, and the more commerce any belligerent enjoys, the longer he will be able to protract the war. Defined regulations have, therefore, been agreed on by the mutual consent of nations, and we have only to ask whether the act of the Captain of the San Jacinto be within those rules.

Beyond all question it is not. The Captain of a man-of-war has no power to adjudicate on such questions as the present. Naval officers on remote stations, with passions and without books, are not fit to adjudicate on important and anxious questions. The worst rule regularly adjudicated upon by a competent Court of Law would be better than the best administered by a sea-captain. It is certain that the act of the Federal Commander was one which *he* at all events had no right to do.

And if the case had been brought before a regular Prize Court, even an American Prize Court, it would have been doubtless decided that the act now done was illegal. When the news first arrived, it was argued that as the Federals would have a right to intercept a despatch of the Confederates, they would also have a right to intercept an Envoy, who was only an "animated despatch." But this ingenious suggestion fails for two reasons. First, the American Government would have no right to seize a despatch which was addressed to a neutral. The design of the rule which allows the capture of despatches is the prevention of the military measures of one belligerent by another. This design is presumably promoted by the capture of despatches from the belligerent Government to its subordinates, or from those subordinates to the belligerent Government, for these probably relate more or less to the conduct of the war. But it is not presumably promoted by the capture of a despatch from a belligerent to a neutral. "The presumption," says Kent, the first American, perhaps

the first existing, authority on the subject, "is, that the neutral preserves its integrity." "The neutral country has a "right to preserve its relations with the enemy, and "it does not necessarily follow that the communications are "of a hostile nature." If England were at war by any unfortunate chance with Holland, what insignificant proportion of the despatches of the English Government to other nations would have a material bearing on the fortunes of the war? We should not be asking their aid, nor would they be requesting us to accept of it.

The whole foundation of the alleged analogy of the Envoy to the despatch therefore fails; for the Federal Government would in this case, on the authority of their own lawyers, have possessed no right to intercept a despatch. But even supposing it had, there is a material difference between a man and a document. The document proves its own contents; you can say by reading it whether it was or was not designed to facilitate the success of the war in progress. *But the errand of a man is the secret of his brain.* In some sense, political refugees have always treason in their hearts. Mazzini might be said to be a professional Envoy, and if that were a ground for seizing him, he might be seized anywhere or at any time. In the present case, it has not been proved, and very likely is not true, that the Confederate Envoys were authorised to solicit military aid from Europe. They were probably commissioned to procure, if possible, from France or England a recognition of the national independence; but that recognition would have given them no military advantage, and the arrival or non-arrival of particular Envoys has very little tendency to accelerate or retard events of that kind and magnitude.

On this ground, no judge has ever decided that an Envoy could be seized, even in circumstances where written despatches might be intercepted. The object of the man is almost always, as here, uncertain—that of the letters manifest; and it is too much, therefore, for the Americans to contend that they could arrest an Envoy where they could not even seize a despatch.

If this first technical ground of justification fail the Americans, the second is yet more shadowy and unsubstantial. We have, at various times, claimed to impress our *own* seamen on board foreign vessels, on the ground that we had a right to claim the military aid of all our subjects whenever or wherever they may be found by us. But it would be a monstrous insult to common sense to say that these Envoys were impressed by the Federal Captain to serve in the Northern fleet against their countrymen in the South. They are infinitely more likely to be hanged as rebels than to be trusted as auxiliaries. The defence, too, would be inconsistent with the entire bearing of the Federal Captain, who throughout acted as if he were apprehending rebels, not as if he were impressing seamen.

These are the only two technical justifications of the American outrage, and, as they both fail, it is left without excuse and without defence. It appears that the Americans seized certain foreigners claiming English protection and in an English asylum; and we should be shrinking from the sacred duties of hospitality, and abandoning one of the highest privileges of a great nation, if we permitted such an act.

Why the Americans have so acted, it is impossible to say. At times we acknowledge we have inclined to the belief that there was a deliberate intention to insult this country. We remembered the antecedents of Mr Seward; his language as to Canada; his circular to the several States, requesting them to fortify themselves on the North, and, therefore, against England; we thought of the many recent occasions in which a studious distinction has been drawn between the French and ourselves, in which they have been treated with studious respect, and we *at least* with rudeness; we called to mind the ignorance, not so much of the conspicuous American politicians as of the low "President-makers" and pot-house patrons on whom they depend; we fancied that some vague scheme of remedying shame *within*, by insult *without* might float in turbid minds. But we will hope not. The highest authorities in this country we understand hope not. They believe that this insane outrage was caused rather by enmity to the South than by insolence to us.

Our duty is clear. We must demand moderately, but firmly, apology for the insult, and reparation to the injured. We must require that the gentlemen who have been seized should be at once set at liberty, and that regret should be expressed for the dishonour of our national flag and for the violation of the sacred right of asylum;—and we must intimate that if they refuse we have no alternative save *war*. The calamity is great, but the obligation is greater.

THE REALITIES OF THE COTTON QUESTION.

During the past fortnight we have received several communications from Lancashire in reference to the supply and consumption of cotton, all bearing more of an alarmist character than had hitherto been the case. No doubt there is much cause for the gravest uneasiness,—for the most anxious consideration of what ought to be done,—for the utmost promptitude in doing whatever it shall appear, on such consideration, can be done. But in looking our position carefully in the face, it is very important to avoid alike, as far as possible, all vagueness and all exaggeration. From the outset of the American difficulty, we have uniformly endeavoured to calm all excessive fears, and to show how the calamity which has so long hung over us ought to be met and might be mitigated. Six months ago we explained that, if the probability of the withholding of the whole, or nearly the whole, of the American crop for an entire year were once fully realised and laid to heart, the prices would advance to such a rate as to draw all the cotton that India could, with her imperfect means of transport, contrive to send us;—and that, if at the same time, our spinners resolutely and systematically reduced their hours of work to four days a week, this extra Indian supply, added to what remained in stock and was still to arrive from other quarters, would make up a total which would keep our operatives tolerably well employed, and at least out of reach of starvation, for twelve months,—by which period we entertained little doubt that relief would reach us in one form or other. Unfortunately, however, neither of these *ifs* were early enough converted into actual facts:—the price rose for some months so slowly that the requisite stimulus to the shipment of cotton from India has scarcely yet fairly begun to operate there; and "short time" was not generally resorted to till the stock of cotton in Liverpool had been alarmingly reduced. The actual state of matters at present is, we believe, nearly as follows:—

	bales.	bales,	bales.
Stock, Nov. 22, in Liverpool—American	274,120		
— — Surat	279,060		
— — Other sorts	34,500		
		587,680	
In spinners' hands (say)		112,320	
		700,000	
At sea, or expected to be received by June 1, 1862 (say):—			
Surat		350,000	
Other sorts		85,000	
		1,135,000	
Probable export up to June, say 9,000 bales a week—27 weeks		243,000	
Available for home consumption			892,000
Consumption for 27 weeks at the estimated rate of 30,000 bales a week—that of 1860 having been about 47,000 bales			810,000
Probable stock on June 1, 1862			82,000

On this table we have to remark that, though as near an approach to accuracy as we can obtain, it still contains several items which are and must remain conjectural. In the first place, the stock of cotton in spinners' hands can never be *known*, and it may be larger than the figure we have set down. In the second place, the amount taken for export may be more or less than we have calculated. In ordinary years we furnish the continent of Europe with a large portion of its supply, and this year of course the pressure from that quarter will be greater than ever, except in as far as it may be reduced by the enormous advance of price. Probably, however, this advance will not check foreign consumption quite so much as English; for most foreign manufacturers have both a larger average margin of profit than English ones, and a more artificially *secured*, if a more limited and poorer market. In the third place, the calculation as to the amount of East Indian cotton to be expected before June, refers only to that which we have reason for knowing or believing will reach us from *the old fields*:—whatever quantities the high price may be adequate to attract from new places in the interior, especially from the Nagpore district, viâ Calcutta, or down the Godavery, are not included. In fact, any estimate as to the amount from these

quarters would be a mere baseless conjecture. *Some*, however, we probably may expect. In the fourth and last place, our table takes no account of any cargoes from America which may reach us by running the blockade. (One has arrived at Havre this week.)

Bearing in mind all these modifying memoranda, then, we still cannot but admit that the result of these calculations of ways and means is gloomy enough, being neither more nor less than this:—That *if* our mills work two-thirds of their usual time, or about four days a week, so as to keep the operatives out of reach of actual want;—and *if* no *extraordinary* supply arrives from *new* Indian districts;—and *if* no considerable quantity of cotton runs the American blockade;—and *if* the Continent takes the amount we have (impartially) estimated,—then by next summer we shall have only about 80,000 bales left, or not more than three weeks' supply. No doubt before that time—*long* before that time perhaps—the whole aspect of affairs may have been changed by the termination of the American conflict, or the cessation of the blockade by the intervention of either France or England in the war. We have already discussed in some detail the likelihood of each of these occurrences, and we will not go over that ground again here. Each is *possible* at any moment—none appears immediately probable or imminent. It is said, and we believe with truth, that the French authorities are acting as if they wished to precipitate a quarrel with the United States. It is said, and we believe with truth, that the United States authorities are acting as if they were at least not unwilling to precipitate a quarrel with England. The news that has so startled us all this week is an apt exemplification. What may come of such proceedings we will not attempt to predict. All we can say with confidence is that the best efforts of our Government have hitherto been directed to control both the natural *fidgettiness* of France and the natural irritation of England. But what we are concerned with at present is to point out as a matter deserving the careful consideration of our merchants and manufacturers, because forming an important element in the actual position and prospects of the cotton question—that a considerable period (probably not less than four months) must elapse *even after the raising of the blockade*, before any great quantity of cotton would be able to reach our shores. The crop now picked or in process of picking is stored on the plantations in its roughest form. It is neither ginned nor packed;—packed, indeed, it cannot be for want of bagging, nearly all of which is usually imported; and this will have to be sent from the producing countries, before the process of baling can even commence. Then, too, there are no ships in the cotton ports—four-fifths of those usually employed being at this side of the ocean, and likely for the most part to remain here till peace is proclaimed or till the blockade is broken. Finally, the means of inland transport, on which so bulky an article as cotton is particularly dependent for transmission to the ports of shipment, have been greatly disorganised by the war. The river steamers are built for only three or four years' duration;—this year scarcely any have been constructed, and the greater proportion of the existing ones have been taken up for the conveyance of troops and warlike stores, and will probably be returned at the expiration of the war in a nearly unserviceable condition. Nearly all the bullock carts and other vehicles are also said to have left the plantations and gone to the war, where the demand for such things ensures large profits to their owners. Altogether, the reorganisation of the usual rapid channels of communication between the cotton plantations of America and the cotton manufacturers of England must be a work of time and difficulty;—and even if the ports were open as early as the 1st of February, it would probably be the 1st of June before cotton could reach us thence in any quant ty.

Several journals, both English and American, have been commenting in rather a wild style on the probable effect of the seizure of Beaufort by the Federalists, on the export of cotton to Liverpool and Boston. Some of them have proclaimed it as if it were the opening of one of the Southern ports to the commerce of the world, and as if thenceforth neither France nor England would have any reason to complain of the blockade. But, even if the occupation of Charleston were to follow on the capture of Port Royal, we do not see in what way the liberation and transmission of the cotton crop to Europe would be materially affected by the success. If, indeed, Charleston were a great depôt of cotton, and thousands upon thousands of bales were lying there, belonging to rebels whose property might be seized, or to loyal subjects who desired nothing better than to sell them, then *pro tanto* relief would be afforded. But we apprehend there is scarcely any cotton to be found now at Charleston or for many miles in the interior. If, again, the plantations within easy reach of Charleston were owned by Unionists, anxious only to transmit their produce to the port as soon as it was possible to ship it, something might be done. But there is no appearance whatever of such a state of things. Unless the Federal forces could occupy a large portion of the State (which no one contemplates as possible or even as intended), we may be pretty sure that the Southern authorities will prevent cotton being forwarded for confiscation by the Federalists, and equally sure that the Federalists will not permit it to be sold or shipped for the benefit of the rebels. If the Southerners be allowed to dispose of their produce and be paid for it, the whole object of the blockade is abandoned. If they are not, we may rely upon it that scarcely a single bale will find its way to Charleston, Beaufort, or Savannah,—or to any port where it will be within reach of capture by the Unionists. Neither party will so far play the game of the enemy as to *join* in allowing cotton to come to us from Charleston or Beaufort; and unless they do so join, only a very few bags can filter through.

One or two writers seem to imagine that the occupation of Port Royal and the command of the adjoining coasts and islands, will enable the Northerners to seize all the cotton grown there, and to set about cultivating more for themselves. Of course, *if they have skill and negroes at hand*, they may grow cotton next year on any land which they actually and securely occupy; but this is little better than nonsense. It is quite true, as alleged, that the finest cotton of America is grown on the small islands which lie along the coast of South Carolina and Georgia; but the quality of this cotton is peculiar, and the quantity extremely small. Of the whole 2,500,000 bales which we usually receive from the States, *only about* 35,000 *bales consists of "Sea Islands."* The relief through this channel will, therefore, be scarcely appreciable, except by a few spinners of the finest counts for thread and muslin.

Of course it is scarcely necessary to observe that the possible and probable consequences of the strange proceeding on which we have commented in another column may lead to an earlier release of the American crop of cotton than a few days ago seemed likely.

RICASOLI AND THE POPE.

If the interest of the English public had not ebbed far away from Italy to topics of much greater immediate national interes the letter addressed by Baron Ricasoli to the Pope would have attracted deep attention and excited many eager comments. Even at a time of engrossing national occupation, it is well worth the attention of all those who wish to understand the principal events of their times. It is at once an official despatch of the Minister of the King of Italy, and one of the most perfect possible statements of the presen views of perhaps the most intellectual Catholics. It proposes briefly to give the Pope spiritual freedom out of Rome, if he will surrender the temporal Government in Rome; and is the development of the policy of Cavour. "We hold," said that great statesman, "that the in-"dependence and dignity of the Roman Pontiff, as well "as the independence of the Church, will be secured "by the separation of the two powers, and by a large "application of the principle of liberty to the relations "between civil and religious society." In truth, the most sincere Catholics of Italy are struck with their position in regard to the Head of their Church. They share in the tendencies of their age; they are anxious for the greatness of their country; they wish for civil freedom and for parliamentary government; they wish to see civil affairs

managed as they are managed North of the Alps, and not as they are managed in Naples and in Rome. Yet here they are at once brought into distinct opposition with the Head of their Church. The Pontiff is not only the supreme ruler of spiritual affairs in Christendom, but also a second-rate ruler of certain minor secular affairs in Central Italy. His real or fancied interest in the local business of the particular places he governs perverts (thus at least many Catholics naturally feel) his judgment in greater matters. The Pope undeniably uses the advantages of his spiritual dignity to secure his position as a Prince, and many most sincere Catholics naturally feel that this is a degrading of the greater to the less—a barter of the kingdom which is from above for the loaves and the fishes of this world.

So long as the Pope maintains his present position in Italy these feelings will inevitably augment. It is not possible that men of earnest motives, of high hopes, and liberal views, should perpetually perceive the political position of the chief dignitary of their religion to be the chief obstacle in their path, without being induced more or less consciously to regret that position, and to attempt to alter and modify it. A hundred years ago Continental politicians would have cut the knot entirely, and renounced the religion of their fathers without preserving a vestige and without bestowing a regret. But the present is a serious age. Men do not now renounce their religion for a political difficulty. They endeavour to change their polity,—they do not abandon their religion.

It is in this spirit that the letter of Ricasoli is composed To an English politician it will seem curiously religious. He observes: "What we ask is, that the Church, which, as "the interpreter and guardian of the Gospel, has brought "into human society a principle of supernatural legislation, "and has become the initiator of social progress, should "pursue its divine mission, and demonstrate still more the "necessity of its existence by the inexhaustible fruitfulness "of its relations with the work already commenced and in-"spired by it. If in every step in society's progress the "Church were not capable of creating new forms upon which "the successive stages of the social life may be founded, the "Church would not be a universal and perpetual institution, "but a temporary and perishable thing. God is immutable "in His essence, and nevertheless displays an infinite ferti-"lity in the creation of new substances and in the production "of new forms."

The sincere intention of the proposed scheme is to remove the alienation between the warmest partisans of the Church and the wisest patriots of the State—to remove that perpetual source of underlying irritation which must ever exist as long as the Pope uses the awful spiritual power with which he is believed to be endowed to gain a present income and to retain a petty sovereignty.

The scheme which Ricasoli proposes—which is in substance identical with the scheme of Cavour—is this. The King of Italy is to give the Pope perfect and full liberty to perform any act which he pleases as "Chief of the Church, and in virtue of the canonical law as Patriarch of the West and Primate of Italy." He engages that the Pope shall appoint Bishops without restriction, shall communicate with them at his pleasure, and shall have the right of convening synods when he chooses and where he chooses. He promises to "furnish to the Holy See a fixed and irrevocable dotation; the amount of which shall be regulated by mutual consent." *On the other hand*, the Pope is to renounce the entire temporal sovereignty of the Roman States, and to confine himself to his spiritual functions, as "Chief of the Church, Patriarch of the West, and Primate of Italy." The city of Rome would doubtless, if these conditions were accepted, be the capital of the Italian Kingdom, as well as the residence of the Sovereign Pontiff.

The most obvious remark which a secular foreigner would make upon the subject is, that these terms are more favourable to the Church than to the State. The Pope surrenders scarcely anything. He is scarcely Sovereign of Rome. He is a *tenant at will* under Louis Napoleon. If the French troops were withdrawn from Rome, he would not and could not retain his secular authority for a day. He has no *kingdom* to resign; he is only a nominal monarch, with little power and with no prospect of *self*-continuance. On the other hand, the Pope gains a most dangerous (so a politician would consider it) right of interference. He gains the unlimited power of appointment to all bishoprics. He gains, that is, the unlimited control of the whole ecclesiastical hierarchy—more powerful as it now is in many parts of Italy than the secular—very powerful as from the religious instincts of mankind it will ever continue to be. If a shrewd bystander were to scrutinise the bargain, it is certain he would believe that Ricasoli is offering too much—that he is buying the nominal sovereignty of a petty city which must fall in, at the price of real powers of vast extent extending over all futurity, and penetrating no one can say how minutely and how deeply into the civil polity of Italy. Yet the offer has been made by the party who seems to proffer too much, and will be refused by the party who seems to surrender too little.

Ricasoli probably will understand his policy, both as a statesman and as a Catholic. He wishes to reserve Rome for Italy and freedom for the Church. It may not succeed, but it is one of the greatest and most curious attempts of the age.

THE BOARD OF TRADE RETURNS.

The Board of Trade Returns for the month of October show less depression than in the same month of last year, when the American troubles had barely begun to tell on our trade with that country. Considering that the *monthly* exports of British goods to the American States is certainly diminished by at least the value of a million sterling, the following return shows a considerable rally in the British trade to the other nations:—

Declared Value of Exports.

Month ending 31st Oct.			Ten Months ending 31st Oct.		
1859.	1860.	1861.	1859.	1860.	1861.
10,717,873	11,232,181	11,684,910	108,755,184	112,956,567	105,422,742

This shows that, in spite of a falling off on the month of at least a million to America, the total value of our exports has risen by nearly *half a million* as compared with the same month last year,—a not unsatisfactory result. The main source of compensation during the year has no doubt been the gradually increasing trade with a great number of customers, of whom France and Italy are the most important specimens. We give an analysis of our exports to France in the ten months of the present year:—

Principal Exports for Ten Months to France.

	1860		1861
	£		£
Coals and culm	467,949	...	518,404
Hardwares and cutlery	87,584	...	151,764
Machinery	118,373	...	279,596
Iron—Pig	155,075	...	264,453
— Bar, bolt, and rod	88,748	...	95,201
— Railway of all kinds	276	...	86,146
Copper	420,778	...	204,341
Lead	8,274	...	13,392
Oil, seed	279,043	...	259,481
Silk—Thrown	171,566	...	158,650
— Twist and yarn	93,619	...	112,804
Wool	442,465	...	693,087
Woollens	168,494	...	424,376
Woollen and worsted yarn	189,653	...	180,493
	2,641,897	...	3,442,188

From this it will be seen that there is an increase in the woollen, hardware, and pig iron trade, though nothing as yet of any considerable magnitude. For cottons there does not seem as yet to be any French demand large enough to be separately noticed. The *whole* exports to France have increased rather more than this table would give an impression of, as we find for the nine months the following values given:—

Nine Months' Exports to France.

1857	1860	1861
£	£	£
3,128,000	3,756,000	5,982,000

But of this year's value, 678,900*l* represents British wheat and flour sent over to France in consequence of the unusually deficient harvest there, so that the increase, so far as it is affected by the commercial treaty, is nothing like so great. As to the import trade, it is remarkable that, while the *quantities* of French wines imported by us are increasing very rapidly every month, the computed *value* of the French wines imported shows even a diminution, indicating that we are getting a cheaper article than last year.

The trade with Naples and Sicily is not as yet large, but it is very remarkable how fast it has increased in the last twelve months :—

PRINCIPAL EXPORTS TO NAPLES AND SICILY.
Ten Months ending 31st Oct.

	1859.	1860.	1861.
	£	£	£
Cottons	266,712	225,190	663,652
Cotton yarn	253,699	242,958	403,860
Iron (bolt, bar, and rod)	62,069	75,814	88,042
Woollens (mixed stuffs)	55,814	52,567	128,883
	638.294	597,529	1,284,437

These are, however, only the principal details; our whole exports to Naples and Sicily now reach nearly two millions annually; and it will be seen that our trade thither has at least *doubled* since the Neapolitan *régime* was thrown off. Indeed, our exports to the Kingdom of Italy now exceed five millions annually, rivalling those to Holland, and standing fourth on our list of European customers.

With regard to the imports, we still find an increasing amount of British capital invested in foreign goods, notwithstanding the decrease of foreign capital invested in English goods :—

Month ended 30th Sept.			Nine Months ended 30th Sept.		
1859.	1860.	1861.	1859.	1860.	1861.
11,837,530	12,469,794	14,838,827	100,831,292	119,364,072	129,426,934

So that, though the decrease in our imports of foreign grain has already begun, the total value is still on the increase, owing partly to the arrivals of cotton from India and other sources, and partly perhaps to the rise in prices, which makes the same quantity of goods figure at a higher value. The Indian cotton supply, now coming in rapidly, may, we fear, be too soon checked by the risk of war with America, and the consequent probability of the opening of the Southern ports. The stimulus already given to the Indian supply is evident from the following figures :—

IMPORTS FROM BRITISH EAST INDIES.

	October.		
	1859.	1860.	1861.
	cwts.	cwts.	cwts.
Cotton, raw	211,793	115,504	467,578
	Ten Months.		
Cotton, raw	1,094,881	1,509,408	2,305,447

which, remembering that only very recently have the prices reached a point which would pay for any but the Bombay cotton, is a proof of considerable activity in the Indian market.

The following is an account of the quantities of the principal articles of food and drink received and retained for home consumption during the month of October :—

	Quantities Imported.		Quantities Retained for Home Consumption.	
	1860	1861	1860	1861
Cocoa ..... lbs	472,654	413,878	307,180	313,611
Coffee	8,184,884	12,583,546	3,170,883	3,150,455
Wheat ..... qrs	845,129	421,473	845,129	421,473
Barley, oats, beans, peas, and Indian corn	491,018	683,801	491,018	683,801
Wheatmeal and flour ... cwts	811,439	224,481	811,439	224,481
Spirits :—Rum ..... gals	1,112,210	1,029,672	315,916	291,821
Brandy	165,609	210,072	140,486	162,856
Geneva	9,984	10,942	9,708	9,574

THE SUFFICIENCY OF THE GOVERNMENT GUARANTEE TO THE RAILWAYS OF INDIA.

TO THE EDITOR OF THE ECONOMIST.

SIR,—In your paper of the 23rd there is an admirable article on the sufficiency of the guarantee given by the Indian Government to the Indian railways. It will reassure many, but not all. You make it plain to the dullest, that so long as there is no loss by working the railway the Company are guaranteed 5 per cent., and that as soon as there is a loss they may abandon the undertaking and recover back their capital. But the prevailing doubts regard the condition of the shareholders in the event of the undertaking being abandoned. You say the Government is bound to repay the entire capital,—that it is a complete error to suppose that from the sum to be paid by the Government to the Company the interest paid by the Government may be deducted. You may be, and it is to be hoped you are, right; but it is provided in the agreement that all charges arising out of the working of the lines, or the carrying on of the several undertakings, *including any interest received from the Government*, shall be reckoned as *charges on revenue*, and it is also provided that, on the railway being abandoned to the Government, the Government shall be at liberty to retain out of any moneys payable to the said Railway Company the amount of all claims or demands of any sort against the said Railway Company on *their revenue account*. In a word, interest is to be reckoned as charges on revenue, and claims of any sort on the revenue account must be satisfied on transfer to Government taking place. If you will explain this point as clearly as you have other points, and show that, in the event of a railway being abandoned to Government, the Government must forego any claim for the accumulated interest paid to the shareholders, you will confer a great benefit on on all parties; for, be it reasonable or unreasonable, the doubt exists.—Your obedient servant, 5 PER CENT.

We are happy to give a very conclusive reply to the question of our intelligent correspondent.

First, clause 21 expressly provides that, in the event of a surrender of the railway by the Company, all the covenants on the part of the Government to pay interest to the Company shall immediately cease, and "*all claims by the Secretary of State in Council in respect of interest shall also cease.*" In a word, upon such surrender the interest account is to be entirely and immediately closed. The Government is not to be liable to pay interest in future, and the Company are not to be called upon for any *back* interest.

Secondly, if after such a first consideration any second is needed, the interest previously paid by the Government to the Company would not, in our judgment, even irrespective of the express words we have cited, be a "claim or demand" retainable by the Government. It is not a claim *in præsenti*. The Company can only be called on to repay the interest paid to them in former years when their profits amount to more than 5 per cent., in which case half such excess of profits is set aside for such repayment. Until there is such an excess there is no "claim or demand,"—nothing to charge in any revenue account. When the Company abandon a railway, we may be sure that it is not paying more than 5 per cent.; and therefore, on the surrender, there will be no sum which the Government could legally deduct from the Company on account of interest previously paid in conformity with the guarantee.

REGARDING THE SALE OF WASTE LANDS AND REDEMPTION OF THE LAND REVENUE.

The 17th October, 1861.

WE had intended to have explained these most important resolutions this week, but want of space compels us to postpone our remarks.

1. RESOLUTION.—His Excellency the Governor General in Council has under his consideration the subject of the despatches from the Right Honourable the Secretary of State noted in the margin, with the opinions of the several Local Governments, and of most of their principal officers, on two important subjects :—

No. 2 of 31st December, 1858.
No. 1 of 16th March, 1859.

I. The sale of Waste Lands in perpetuity, discharged from all prospective demand on account of Land Revenue; and

II. Permission to redeem the existing Land Revenue by the immediate payment of one sum equal in value to the Revenue redeemed.

2. His Excellency in Council finds that the ablest and most experienced public officers very generally concur with private parties interested in land, in the expectation that substantial advantages will follow the adoption of both these measures.

3. There is, however, much diversity of opinion as to the extent to which either measure is likely to operate, and as to the rules under which the acquisition of waste land in perpetuity and the redemption of the land revenue should be allowed. Some experience may be required to test fully the comparative soundness of the several opinions on these points; but His Excellency in Council sees no reason to doubt that, so far as either measure may take effect, it will be in every way beneficial.

4. As regarded the sales of waste lands, there can be no question of the substantial benefits, both to India and England, which must follow the establishment of settlers who will introduce profitable and judicious cultivation into districts hitherto unreclaimed. His Excellency in Council looks for the best results to the people of India, wherever in such districts European settlers may find a climate in which they can live and occupy themselves without detriment to their health, and whence they may direct such improvements as European capital, skill, and enterprise can effect in the agriculture, communications, and commerce of the surrounding country. He confidently expects that harmony of the interests between permanent European settlers and the half-civilised tribes, by whom most of these waste districts or the country adjoining them are thinly peopled, will

conduce to the material and moral improvement of large classes of the Queen's Indian subjects, which, for any such purposes, have long been been felt by the Government to be almost out of reach of its ordinary agencies.

5. His Excellency in Council has still less doubt as to the beneficial results of permitting a redemption of the land revenue. He believes that increased security to fixed property, and comparative freedom from the interference of the fiscal officers of the Government, will tend to create a class which, although composed of various races and creeds, will be peculiarly bound to the British rule; whilst, under proper regulations, the measure will conduce materially to the improvement of the general resources of the Empire.

6. But it is the firm conviction of the Governor General in Council that, in order to obtain permanently good results from such measures, it is indispensable not only that no violence be done to the long-existing rights which, sometimes in a rude, sometimes in a complicated form, are possessed by many of the humblest occupants of the soil in India, but that these rights be nowhere slighted, or even overlooked. Scrupulous respect for them is one of the most solemn duties of the Government of India, as well as its soundest policy;—whatever may be the mode in which that Government may think fit to deal with rights of its own.

7. With these views, His Excellency in Council proceeds to state the rules under which he desires that the Governments and Administrations of India should give effect to these two measures:—

8. I.—As to the sale of unassessed waste lands, in which no right of proprietorship or of exclusive occupancy are known to exist at present, or to have existed in former times, and to be capable of revival.

9. In any case of application for such lands they shall be granted in perpetuity, under the rules which will be presently laid down, as a heritable and transferable property, subject to no enhancement of land revenue assessment.

10. All prospective land revenue will be redeemable, at the grantee's option, by a payment in full when the grant is made, and the land granted will thenceforward be permanently free of all demand on account of land revenue.

Or, at the grantee's option, a fixed annual sum may be paid at the rate of 10 per cent. on any unpaid portion of the price of the grant, which will then be under hypothecation till the price is paid in full.

11. The deed of grants shall be drawn up in English, with a vernacular translation attached, the meaning in all doubtful cases being settled by the English text.

12. Except under peculiar circumstances which may require special reservation, the deed shall convey all rights of forest, pasturage, mines, fisheries, and all other property of the Government in the soil; but it will reserve to the Government, to proprietors of other lands, and to the public, all existing and customary rights of freely using any stream for purposes of navigation or irrigation, and for the transport of timber or other property, and for other purposes of general utility.

13. There shall be no reservation to the Government of any right to take land or material for roads, tanks, canals, works of irrigation, or other public improvements other than may be marked out or designated at the time of the grant, or otherwise specifically excepted in the grant. But the absence of such reservation will not affect the power of the Government to purchase land under Act VI. of 1857, or under any other general law for the acquisition of land, &c., required for public purposes.

14. There shall be no condition obliging the grantee to cultivate or clear any specific portion of the grant within any specified time.

Conditions of this kind are considered by many experienced officers as useful, if not necessary, provisions; but the Governor General in Council is convinced that every reasonable object of such restrictions,—such as the guarding against attempts to monopolise advantage of situation with a view to a resale rather than to immediate use,—will be sufficiently secured by a limitation of the area of grants, and by the necessity for immediate payments, and that the latter kinds of security will be the more advantageous to purchasers.

15. And if the area be limited, His Excellency in Council does not attach importance to any provision for clearing and cultivating any specified proportion of it. The price to be paid will generally serve as a security that the grantee will clear as much as he can, unless he find it more profitable to keep land as forest or pasturage; and there is no ground of public policy upon which to require him to do more. It is rarely that the clearance of trees, beyond what is needed for cultivation, is an object of public importance. In many parts of the country the contrary is the case. And as a general rule, and whatever may be the nature of the growth which covers the soil, His Excellency in Council would wish, in this as in other matters, to leave it entirely to the owner's judgment and self-interest to make the best of a grant for which he has once for all paid a fair price to Government.

16.—The land registers of the Collectors of land revenue, or of any other local officers exercising Collector's powers, when properly kept and perfect, will often enable him to state at once whether there is any prior claim of property or occupancy on the land applied for.

17. When there is no such claim apparent from the Government records, and the Collector knows no other objection to the grant, he will advertise the application in the most customary and effectual manner for a term which probably need rarely exceed thirty days.

18. When, after the expiration of the term fixed, no such claim is preferred, or when, if preferred, it shall have been disposed of the Collector will give to the applicant a document testifying that the land, as described in his application, has been allotted to him, subject to the terms hereinafter specified.

19. If, after the allotment of the land under the preceding rule, persons shall establish a right of property in the land so allotted, the possession of the party to whom the land has been granted *bona fide* shall not be disturbed. But provided the claim be made within an year from the allotment, the claimant, on proof of his right, and on showing good reason why his claim was not advanced before the allotment took place, shall be entitled to receive from the Government full compensation for the actual value of his interest in such land. After the expiration of a year all rights of third persons which have not been already claimed will be altogether barred, as well in regard to compensation as against the land, subject, in regard to compensation, to the same exceptions in case of persons under disability from infancy, or other like causes as are admitted by the existing law of limitation.

20. No reference to Revenue Boards or other distant authorities should be necessary, except in special cases of doubt. Rules of procedure must be laid down by the Local Governments with sufficient clearness of detail to obviate, in all ordinary cases, any necessity for reference or sanction.

Grants will, of course, be immediately reported to the Local Government, and any departure from the rules of procedure should be promptly noticed by the Board of Revenue or other controlling authority. But no confirmation should be required to complete grants made in accordance with the published rules of procedure; and such grants should not be liable to be disturbed on account of any informality not attributable to any act or default of the grantee.

21. A maximum limit must be fixed to the size of land grants. Probably three thousand acres would be a suitable limit in Eastern Bengal, Cachar, Assam, and similar districts. In localities where land is more valuable and in great demand,—as, for instance, in the neighbourhood of towns, hill stations, and sanataria,—a lower limit may be fixed. It will generally be safe to consult the wishes of intended applicants on this subject, when they are in numbers sufficient to give weight to their opinions as to what general limitation is likely to be best for the general interests; but regarding such consultation each Local Government will exercise its own discretion.

22. Districts like Sylhet, Cachar, and Assam, where a considerable portion of the ground is in swamp or unculturable land, a due proportion may be deducted as valueless. Probably this need never exceed one-fourth of the whole area.

23. Wherever it is necessary, for the public interests, to reserve for future disposal any special tracts of land of which no immediate grant will be made, due notice should be given, so that applicants for land may not lose their time in examining such tracts.

24. It is to be understood that reserves of grazing land, or of land for the growth of forest trees, or of firewood near towns and stations, or for other special purposes, such as sites for sanataria, building lots, &c., are not to be sold without the special sanction of Government.

25. When the land applied for is unsurveyed, immediate possession may be given on payment of the Collector's estimate of the cost of survey; and this may generally be calculated at a fixed rate according to estimated acreage. But no time must be lost in having a survey made, and for this purpose one or more competent surveyors should be attached to every unsurveyed district where such applications are likely to be frequent. The survey need not embrace more details, nor be made with greater accuracy than is necessary clearly to define rights, and to ensure the ready identification of boundaries.

26. In surveyed districts, a tracing from the official plans and extracts from the field books and other registers will generally suffice.

27. Ten per cent. of the purchase-money, and the actual cost of survey (allowing, of course, for the sum previously deposited upon the Collector's estimate of the survey), will be paid by the grantee on delivery of the deeds and plan, and the name of the grantee will be provisionally entered in the Collector's records as proprietor of the grant.

28. If the balance of the purchase-money be not paid within three months, interest at 10 per cent. per annum will, as has been already prescribed in paragraph 10, be charged on the unpaid balance; and the land will be held liable to re-sale in default of the regular payment of such interest, should there be no crop or other moveable property on the land from which the claim of Government can be satisfied.

29. The price to be paid for unassessed land should not exceed 2*s*r

per acre for uncleared land, or 5r per acre for land unencumbered with jungle, subject to deduction of area for swamps or unculturable land, as above stated. This limitation of rates shall remain in force for five years from the 1st of January, 1862, subject to revision in the case of land which may be sold after that period.

30. In the event of more purchasers than one offering to buy the same tract, neither having any previous right to the land, it may be put up to auction at the upset price of an ordinary grant. But except in such cases, or in the case of suburban lots, recourse will not be had to sales by auction; the applicant will receive his land at a price fixed.

[The remaining resolutions will be given in our next number.]

Agriculture.

AGRICULTURAL STATISTICS.

OBSTACLES TO THE COLLECTION.

NOTWITHSTANDING the admitted benefits to be derived from a full collection and early publication of agricultural statistics, there appears to be at present no immediate hope of hitting upon any effective system. All who have had experience in atempting to collect agricultural statistics agree that without compulsory powers farmers will not afford the information sought.

At a meeting of the Newcastle-on-Tyne Farmers' Club, Mr Chrisp stated that the club had sent out circulars on the subject to different farmers' clubs, and that "the answers were few, but so far satisfactory that there was no direct opposition, with the exception of one case, in which there was a little hesitation." There was apathy and indifference amongst the farmers, who do not generally recognise the advantages of agricultural statistics; but he did not think there was a great amount of opposition. The collection in Scotland had been satisfactory. He proposed the resolution,—"That whilst this meeting approves of the collection of agricultural statistics, as necessary to the welfare of the community, they are not aware of any system of collecting that will be satisfactory to agriculturists, unless made by parties practically experienced in such matters, the selection of whom should be intrusted to those whose direct personal interest will be affected by any lack of judgment or discretion on the part of the collectors." And this was eventually adopted unanimously.

Mr Lawson, who had been one of the enumerators in Scotland, said that under the direction of Mr Hall Maxwell, who possessed the confidence of the Scotch farmers, statistics had been collected with the cordial co-operation of the farmers. The same co-operation is also afforded in Ireland. The collections of such statistics had ceased in Scotland in 1857, in consequence of a dispute between Mr Maxwell and the Treasury as to the auditing his account of the expenses, which were much less than had been anticipated by the Government. Mr Lawson said farmers were not afraid to give the returns, "but they did fear to give them to improper parties.....He did not think they (the farmers) travelled out of the line of courtesy in asking to be allowed the administration of a measure that might be either very pleasant or very obnoxious to them, according to the method adopted in the collection of these statistics." He also thought the local funds should not be subjected to any charge for the purpose.

Mr Hall Maxwell had written to Mr Lawson on the results of his experience, which he said had led him "to doubt the possibility of succeeding unless returns be made compulsory," and he doubted whether Parliament would be induced to pass such an enactment. He also said "that great objection will be taken to sending returns to the parish valuer. In Scotland there were hundreds who readily reported to me as the central authority, who would have withheld all information from a neighbour." As to English agricultural statistics, he says:—"The greatest difficulty I foresee in England is the want of leases. Here a tenant is so independent of his landlord that he cares little, comparatively, what may be known of his farm. With you, although the inquiry is not inquisitorial, nor its results greater than any landlord can ascertain for himself, there will be a jealousy and hesitation not unnatural on the part of those who have no fixed tenure."

This is perfectly true. There is no question that the great body of English farmers would regard any detailed account of the produce of their farms as likely to be taken advantage of by their landlords. This feeling, though exaggerated, is not altogether without foundation. Such a view cropped out curiously in Mr B. Denton's lecture on draining at the London Farmers' Club. In giving an estimate of the improvements effected by draining wet land, Mr Denton said:—"A tenant of a noble earl in Kent recently consulted me as to a claim of compensation upon his landlord, for the loss he experienced by a small portion of land not being drained as satisfactorily as the rest, and stated that the difference between the land sufficiently drained and that imperfectly drained was 8*l* an acre in the wheat crop he was then about to cut. It was only on my pointing out to him the injury he might do himself by drawing his landlord's attention to the fact that he got a profit of 8*l* an acre without any extra effort on his part from the whole extent of the land he admitted to be sufficiently drained, that induced him to withhold his claim." Here we see that a farmer was induced to withhold a claim of what he, rightly or wrongly, conceived to be a right to compensation, because he might call his landlord's attention to the returns obtained from his farm. This would not have occurred had the tenant been protected by a lease. We believe, however, that even yearly tenants are wrong in their objections to the collection of agricultural statistics, for a true return of their profits would in most cases show that they pay too much rather than too little rent, having regard to the actual state of their farms and the precarious nature of their holdings.

Literature.

[Owing to the pressure of other matter we are again obliged to omit our ordinary literary notices this week, but we are making arrangements to give hereafter an occasional literary supplement when the demands upon our columns may be unusually large. The first of such supplements will be issued next week.]

Foreign Correspondence.

(FROM OUR OWN CORRESPONDENT.)

PARIS, Thursday Evening.

An expectation was confidently entertained that M. Fould would not delay to announce the plans he has formed for remedying the financial situation of France, the gravity of which he has made known; but up to the present moment he has said nothing on the subject, and the report is spread that he does not intend to say anything until some time in next month, when in accordance with custom he will have to present to the Emperor a report on the finances. The general belief is that his plan will be very simple:—1, a loan to consolidate the whole or the greater part of the 40,000,000*l* which he admits to be owing by the Government; 2, an increase of taxes to meet the change which he has resolved to introduce in the Budget,—a change consisting in making the Corps Legislatif vote *all* disbursements, instead of as heretofore only a part thereof, leaving the rest to be provided by "extraordinary and supplementary credits," granted by Imperial decrees and paid by borrowing. This change in a constitutional point of view is no doubt important, since it apparently augments the power of the Legislature over the purse; but constituted as that Legislature is (all its members, with the exception of an infinitesimal minority, being mere nominees of the Government,) the change will not, we may fear, be of any practical utility as regards the diminution in public expenses. Already, indeed, M. Fould has found that a material reduction in outlay is not to be hoped for. He had, it is said, resolved on cutting down the enormous expenditure for the army and the navy; but the majority of his colleagues will not hear him speak of anything of the kind, and the Emperor himself is said to be against it. Certain it is that a Government organ at Toulon, the prineipal military port of France, is allowed to announce with some pomposity that not a single sixpence will be taken from the Budget of the Marine Department, and that, on the contrary, the grant next year for building iron ships will be 1,000,000*l* English more than it is this year. Certain it is also that another newspaper, published in Paris and which is said to receive what the French call "inspirations" direct from the Emperor's private cabinet, has published a series of articles for the purpose of showing that no "disarmament" of the army,—that is to say, no real and permanent reduction of the effective force,—can be accomplished in the present state of Europe:—all that can possibly be hoped for being, according to this journal, the grant of furloughs to 40,000, 80,000, or 100,000 men,—a measure which, it is true, would relieve the Budget of the cost of feeding them for a few weeks, but would do nothing more, inasmuch as they could be brought back to active service whenever the Government might wish, and in the meantime the staff of regimental officers and the vast military establishments by whom and which most of the money voted for the army is absorbed, would be kept up. Without a reduction in the army and navy, and a sweeping one, too, none can of course be looked for in any other department of the Government; and truth to say, none is to be expected under the Imperial system, that system being to keep up as many places and to spend as much money as possible in order to secure adherents. No diminution in the enormous outlay seems therefore the order of the day; and as experience has shown that the present revenue of France is totally inadequate to meet that outlay, recourse must evidently be had to new taxation. But new taxes are not easy to invent in this overburdened country. Chemical matches, pianos, horses, carriages, are spoken of, but the revenue they would yield would not be sufficient to fill up the void, and to taxes on such things there are many objections. Sir Robert Peel and Mr James Wilson, if alive, would perhaps have thought a good stout income tax the best thing that could be adopted in the present emergency; but the French people entertain great repugnance to such an impost, and French financial statesmen have not the courage to adopt so heroic a remedy. What M. Fould will propose is a matter of great curiosity.

Notwithstanding the gravity of the situation revealed by M. Fould, there is unfortunately reason to believe that he has greatly understated the reality. M. J. E. Horn, the eminent economist, has for example taken the trouble to compile from the *Bulletin des Lois* a table of all the supplementary and extraordinary credits decreed in the year 1860; and he has had the kindness to communicate to me the results, which are to be set forth in an article of the next number of the "Revue Contemporaine." Now M. Fould states in his report that in that year the amount of supplementary and extraordinary credits was 115,000,000f; but M. J. E. Horn shows that, "apart from some omissions which he may have made," they really were as follows:—

SUPPLEMENTARY CREDITS IN 1860.

No. of Credits.	Departments to which Accorded.	Amount. francs.
2	Foreign Affairs	1,047,429
7	Agriculture, &c.	13,430,950
1	Algeria	1,152,966
3	Ministry of State	74,118
8	Finance	25,584,975
6	Public Instruction	1,475,390
4	Interior	2,890,544
2	Justice	101,140
1	Marine	32,646
2	Legion of Honour	381,410
36		46,171,568

EXTRAORDINARY CREDITS IN 1860.

No. of Credits.	Departments to which Accorded.	Amount. francs.
7	War	97,974,700
5	Marine	73,101,834
6	Agriculture	7,445,000
5	Interior	4,121,856
6	Finance	2,786,550
9	Ministry of State	2,643,022
1	Algeria	1,461,325
4	Foreign Affairs	1,405,520
2	Legion of Honour	140,000
1	Public Instruction	75,000
46		191,154,807

The total of these credits for 1860 is, therefore, 237,326,375f, —that is, 122,326,375f more than M. Fould admits.

The Government journals have been instructed to diminish as much as possible the gravity of the fact that the sum now due by the Government is about 1,000,000,000f (40,000,000*l.*) Even the *Journal des Debats*, which is not ranked under the banner of Imperialism, has been compelled to publish an article to the same effect. This article, which is abler and more important than any other, attempts to show that as the larger part of the debt in question is due to public establishments, such as the Savings' Banks, the Dotation de l'Armeé, the Caisse des Depots et Consignations, the Communes, &c., and not on Treasury bills or on securities for which payment can be suddenly exacted, no uneasiness need be felt. But really this argument is puerile. Uneasiness is occasioned by the largeness of the debt,—not by the position or character of the institutions or persons to whom it is owing. The *Debats* further says that the funds of the said establishments ought to be considered not as loans to the Treasury, but as deposits made in it; but this is a most unfortunate argument. For what has the Government done with the deposits? Could it pay them if called on? Some ill-natured persons even go the length of remarking that if the argument of the *Debats* is to be accepted as valid, the Government has done the very thing for which the unfortunate M. Mires has been condemned to durance under the laws against swindling and embezzlement; he employed deposits, and could not produce them when called for.

At last, after years of complaint, the famous turnstiles of the Bourse, in other words, the charges made for admission to that establishment, have been abolished. This has caused great joy to the speculating fraternity, and there is no doubt that it will be advantageous to commercial enterprise. But though it has led to a much larger attendance of people at the Bourse, it has not thus far occasioned any marked increase in business. The Bourse has of course been greatly agitated by the grave affair of the Trent, and a rather serious fall has taken place in quotations in consequence:—

The Bank of France has issued a notification that the subscribers to the bonds of the Ardennes, Eastern, Southern, Orleans, Western, and Mediterranean Railways must pay a new call of 100f per share from the 1st to the 10th of December.

The "Commercial Wine Association" of Beaune has published a declaration that the "wines of 1861 will take their place amongst those of the most remarkable years.....They possess, in a word, all the qualities which secure them the first rank, and will cause them to be demanded hereafter." As this association last year had the honesty to declare that the wines of 1860 were "so bad as not to possess the right of being classified commercially," its testimony to the merits of this year's yield may perhaps be received with confidence.

The Government, it is said, intends to have a searching investigation into the state of the merchant navy instituted by the Superior Council of Commerce. There is no doubt, as your columns have more than once proved, that the merchant navy of this country is subjected to a series of absurd, expensive, and odious restrictions, which cripple its energies, and render it incapable of competing with the merchant shipping of other nations.

A Commission, headed by M. Michel Chevalier, has been charged to make a series of inquiries respecting the construction and working of railways, so as to introduce improvements thereon.

An account was given in my last of the amount of import duties received in the first ten months of the present year compared with the corresponding periods of the two preceding years. The following is a detailed account of the quantities of goods imported in the same period for consumption in France:—

	First ten months of 1861.	First ten months of 1860.	First ten months of 1859.
Oxen and sheep ..... head	583263	458923	439734

Annexed is an account of the markets:—

FLOUR.—Business at *Paris* has latterly not been very active, and prices have receded. Yesterday the quotation was at 79f to 85f the 159 kilogs a fall of 1f on the prices of the last week. For the four marks, the, current month was offered at 82f; December, 82f 25c; and the four months of next year, 85f 25c.

WHEAT.—At *Paris*, yesterday, offers were not very great, and prices were without any marked variation on those of last week. In foreign, white and red American, first quality, were offered and taken at 47f and at 45f to 46f the sack of 120 kilogs. Hungarian was offered at 42f to 43f, and spring American at 40f, 41f, and 42f, but there were no buyers. In French, for Lorraine, Berry, Allier, 42f, 43f, and 46f were demanded, but 41f 50c, 42f, and 45f were taken. Of the provincial markets, 82 present a rise of from 1f to 70c, 10 a fall from 1f to 35f. 30 are reported firm, 22 without variation, and 7 calm.

COTTON.—At *Havre*, in the week ending Friday, business was very calm, and prices receded. The sales were 3,352 bales, and the arrivals 1,575. The closing prices were 1f lower for all qualities. Consequently very low New Orleans was 146f the 50 kilogs; low, 153f; and very ordinary, 161f. The stock, on Friday, was 153,135 bales, against 108,180 at the same date in 1860, and 35,450 in 1859. This week, business has been dull, and prices continued to recede. Yesterday, very low was quoted 135f; and low, 146f to 148f.

COFFEE.—At *Havre*, last week, business was not very animated; however prices remained firm. The sales were 60 sacks Hayti Port-au-Prince, disposable, at 90f 50c the 50 kilogs in bond; 750 ditto, for delivery, 90f 50c; 100 Cape, disposable, 91f; 175 Rio, not washed, 64f; 2,274 ditto, 75f 50c; 96 Ceylon *trie*, disposable, 112f duty paid. The arrivals were about 7,750 sacks. This week, Rio has been quoted 82f 50c to 84f, and 78f to 79f; Hayti, 90f 50c to 92f; Demerara, 120f.; Java, 117f; Gonaives, 93f. At *Nantes*, last week, 193 bales Reunion went at 147f 75c. This week, no business has been done. At *Bordeaux*, during the last week, business was calm. The sales were 400 sacks Rio, at 102f to 106f; 56 Salem, 128f 50c; 1,550 Mysore, 116f; the most part of a lot of 600 Java, 119f. This week, no business. At *Marseilles*, last week, the sales were slack in consequence of the high prices demanded. 700 sacks went at 80f; 1,500 sacks, from places not stated, at 66f to 78f. Some business was likewise transacted in St Domingo at 90f.; quantity sold not stated. This week, Rio has been quoted at 74f.

SUGAR.—At *Havre*, business in the week ending Friday, was active, but the tendency of prices was downwards. The sales were 340 casks French West India disposable, at from 46f 50c to 46f the 50 kilogs, duty paid; 24 ditto, 47f 50c; 2,880 bales Reunion, 49f 50c; 800 ditto, 46f; 304 casks Cuba, 46f; 542 Havana, 33f 50c in bond; 57 ditto, 32f 50c. By auction, 17 French West India, 32 Porto Rico, 873 Havana damaged, were all disposed of. The arrivals were 1,452 sacks & 30 casks. This week, Havana has been quoted 33f 50c. At *Nantes*, last week, the sales consisted only of 77 casks French West India at 48f. This week, French West India gros grain and ditto usine have been quoted 54f. At *Bordeaux*, during the last week, business was little animated; the sales were 1,600 bales Reunion for delivery at 50f 50c; French West India, 46f 50c to 47f; 1,350 Mauritius, 51f; and 2,525 ditto, 53f 75c. This week, Cayenne has been at 46f. At *Marseilles*, last week, no business was done in French colonial. In foreign sugar, the sales were 5,000 sacks Brazil and 1,880 casks Havana. This week, 3,400 sacks Brazil have been sold, and 3,067 sacks Pernambuco damaged were disposed of by auction.

INDIGO.—Business at *Havre*, last week, was active, about 50 chests being disposed of; but the origin of the goods and their price are no stated. This week, there have been no sales. At *Bordeaux*, last week, the sales were 46 chests Bengal, and some small lots of Madras and Kurpah. Prices are indicated as firm, but are not given. This week, no business has been done.

HIDES.—At *Havre*, in the week ending Friday, business was regular, and prices firm. The sales were 4,000 dry La Plata at 90f to 112f 50c the 50 kilogs; 2,400 ditto salted Saladeros, 70f to 72f 50c for ox; 100 Rio Grande dry, 105f; 1,650 ditto, salted, 65f to 68f; 373 Rio Janeiro, salted green, 55f; 2,196 California dry, 105f; New York, salted green, 48f 75c; 500 Ireland ditto, 45f; 22 bales *vachettes* La Plata, 80f to 81f. By auction, 782 Monte Video dry went at 110f 50c; 7,746 ditto salted, 63f 50c to 71f; 166 ditto cow, 52f 50c; 1,303 Buenos Ayres dry, 100f to 115f; 21 ditto, 52f; 1,353 ditto salted Saladero, 70f to 73f; 521 ditto salted Saladeros, cow, 52f 50c to 63f; 1,215 Rosario dry, 92f to 100f 50c; 1,000 La Plata dry, 104f to 105f; 201 Rio Grande dry, 50f; 1,312 Rio Grande salted Saladeros, 61f to 66f; 60 ditto, 40f; 918 Pernambuco dry, 75f to 85f 50c; 1,148 Pernambuco salted, 75f to 80f; 2,101 Pernambuco salted dry, 60f to 80f 50c; 252 Bahia dry salted, 75f; 275 Minas dry, 91f 50c; 1,267 Rio Janeiro, salted green, 40f to 50f; 2,480 Valparaiso, salted green, 56f to 61f 50c; 112 Lima dry, 95f; 557 Rio Hacha, dry and salted dry, 87f 50c; 1,837 Central America dry, 36f to 70f 50c; 155 Martinique, salted green, 52f 50c to 55f; 216 Reunion, salted dry, 53f 50c; 669 New York, salted green, 43f 50c to 44f; 100 Hamburg calves salted, 52f; 24 Ireland ditto ditto, 30f; 85 horse, La Plata dry, 5f to 6f 75c apiece; 91 Monte Video dry, 5f to 6f 50c; 150 Monte Video salted, the 100 kilogs, 82f; 12 cases vachettes, Calcutta, the 50 kilogs, 60f to 120f. The arrivals were 21,524. This week, Pernambuco salted have been quoted 82f 50c; Rio Grande salted, 68f; Guadeloupe salted, 63f.; Monte Video salted, 71f for ox, and 68f for cow; horse La Plata, at 8f 75c apiece.

WOOL.—At *Havre*, in the week which ended Friday, business was very animated. The sales were 470 bales Buenos Ayres and Monte Video not washed, at 1f 20c to 2f 2c the kilog; 1 ditto, washed, 3f; 44 Entre Rios, not washed, 1f 50c; 30 Chili ditto, 1f 95c; 139 ditto sheepskin, La Plata, not washed, 1f 45c to 1f 46½c for *prima*, 1f 10c to 1f 15c for *secunda*, and 95f to 97½ for *tertia*, and 1f 5c for lamb. The arrivals were 400 bales in wool, 126 in sheepskin, and 3 in lambskin. This week, Monte Video, not washed, has been at 2f 55c in sheepskin; Buenos Ayees, not washed, 1f 20c.

TALLOW.—Last week, at *Havre*, business was slack, with a downward tendency in prices. The sales consisted of 25 casks New York, for delivery, at 65f 75c the 50 kilogs; 25 ditto, disposable, at 64f 50c. The arrivals were 320 casks. This week, no business. At *Paris*, yesterday, the 100 kilogs were at 128f.

SPIRITS.—At *Paris*, yesterday, 3-6 of 90 deg., first quality, were at 73f; Montpelier disposable, of 86 deg., 110f. At *Bordeaux*, the day before yesterday, Languedoc was at 100f.; and beetroot, first quality, 85f.

COMMERCIAL AND MISCELLANEOUS NEWS.

The annexed commercial news is dated Calcutta, Oct. 22:—The holydays are not yet over, and business still remains generally suspended. A little business was, however, done in the import market by some speculative houses this week, and some 3,000 packages changed hands at a slight improvement in prices. Most importers, however, prefer waiting for the general resumption of business, in the expectation of better prices. Hides—In this market business has commenced to-day. There is a heavy demand for all kinds of cow hides, and the stock is less than the demand. Prices, however, are not altered. Buffaloes are dull, and in goatskins only a small business has been done in the Cawnpore sort.

By the West India mail, the following has come to hand:—Advices from Jamaica are to the 8th instant. The revenue returns for the quarter and the financial year ending the 30th of September last had been published. The revenue for the quarter shows a considerable falling off as compared with both the June quarter ending June 30, 1861, and the corresponding September quarter of 1860, there being a decrease in the first case of 5,673*l*, and in the latter of 9,311*l*. The produce market showed some improvement, the demand for all articles for exportation having recently increased. From Trinidad we learn that there was no improvement in business, and great slackness in every department of trade. At St Lucia, the weather is all that could be wished for,—fine prospects for next year's crop. Crop will commence next month from stand-over from the crop of 1860. Over 1,000 hhds were left in the fields in consequence of the wet weather. Trade continued exceedingly dull at Demerara. Importations from the United States had been heavy, and the advance in the price of breadstuffs on that side caused slight reaction in the market. Higher rates were demanded for flour. The stock of rice was still very heavy, and prices had a downward tendency. Rum not plentiful, and in little demand. Molasses scarce and wanted. Tonnage abundant.

Statement of business at the United States Assay Office at New York, for the month ending Oct. 31, 1861:—

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT, pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 27th day of November, 1861.

ISSUE DEPARTMENT.

	£		£
Notes issued	28,718,710	Government Debt	11,015,100
		Other Securities	3,634,900
		Gold Coin and Bullion	14,068,710
		Silver Bullion	..
	28,718,710		28,718,710

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	10,892,859
Rest	3,133,731	Other Securities	16,194,997
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	4,203,932	Notes	3,714,330
		Gold and Silver Coin	876,068
Other Deposits	14,086,309		
Seven Day and other Bills	701,282		
	36,678,254		36,678,254

Dated the 28th November, 1861. M. MARSHALL, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	20,705,662	Securities	27,184,856
Public Deposits	4,203,932	Coin and Bullion	14,944,778
Private Deposits	14,086,309		
	38,995,903		42,129,634

The balance of Assets above Liabilities being 3,133,731*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£552,878
An INCREASE of Public Deposits of	99,031
An INCREASE of Other Deposits of	816,032
An INCREASE of Government Securities of	186,213
A DECREASE of Other Securities of	99,535
An INCREASE of Bullion of	231,191
A DECREASE of Rest of	44,316
An INCREASE of Reserve of	709,961

The principal change in the above account is the large increase in the private deposits, owing chiefly to the extensive supply of unemployed capital in the money market. A considerable augmentation has likewise taken place in the reserve and bullion. The other securities continue to diminish, showing the general slackness of trade.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1851:—

At corresponding dates with the present week	1851.	1858.	1859.	1860.	1861.
Circulation, including bank post bills	£ 20,398,145	£ 21,107,538	£ 22,066,641	£ 20,616,067	£ 20,705,662
Public deposits	7,745,054	8,245,211	8,679,315	6,515,612	4,203,932
Other deposits	9,129,575	12,491,758	13,364,382	13,366,250	14,086,309
Government securities	13,241,768	10,808,591	10,925,157	9,490,273	10,892,859
Other securities	11,573,465	15,432,330	19,376,439	20,392,252	16,194,997
Reserve of notes & coin	10,916,612	12,942,174	10,248,882	8,435,161	9,590,398
Coin and bullion	16,134,077	18,776,314	17,018,512	13,860,376	14,944,778
Bank rate of discount	3 p. c.	3 p. c.	2½ p. c.	5 p. c.	3 p. c.
Price of Consols	96⅛	93⅛	96⅜	93⅝	91⅜ xd
Average price of wheat	37s 2d	41s 2d	44s 1d	56s 3d	60s 5d
Exchange on Paris (shrt)	25 25 35	25 7½ 15	25 7½ 12½	25 15 22½	25 22½ 30
" Amsterdam ditto	11 17½ 17⅝	11 14 15	11 13⅝ 14¼	11 14¼ 15	11 17½ 18
" Hamburg (3months)	13 10¼ 10¾	13 7 7½	13 5 5½	13 6¾ 7	13 8½ 9

In the corresponding week of 1851, the exodus from Ireland to America continued on an undiminished scale. The accounts from Vienna again described great distrust in political and financial circles, the Government going so far as to post policemen in the Exchange, with orders to arrest persons making the slightest adverse remarks. Prussia was stated to be contemplating the establishment of free trade in grain. An entire change in a reactionary direction had been made by the new King of Hanover in the ministry. The advices from Italy stated that poverty and robbery were on the increase, while as regards Tuscany the taxes were becoming almost unbearable. In the London discount market money continued remarkably easy, and some more Californian gold companies had been started.

In 1858, the Bank had returned to a position of great strength compared with the twelve months previous when the crisis still prevailed. The rate of discount had fallen to 2½ per cent. only. The new Chilian Four-and-a-half per Cent. loan for 1,554,800*l* at 92 had all been taken, and was quoted ½ premium.

In 1859, the Council of India were lending money on the Stock Exchange at 2 per cent., and for the time being had suspended remittances of silver to the East. The funds were buoyant, in consequence of the expected convocation of a Congress and the cessation of an Anglo-French paper war which for a long time had been raging. Messrs Baring, Rothschild, Huth, and others had signed an address to Lord John Russell, praying that the Government would throw its protection over British interests in Mexico, and put a stop to those outrages which have since so long continued.

In 1860, the pressure in the London money market was subsiding, and a reduction in the Bank rate had been adopted from 6 to 5 per cent. Large sums in gold were beginning to be sent to New York, the exchange having fallen from the secession panic. South Carolina had passed out of the Union, and Georgia and Alabama were about to follow. The question of exacting double income tax on Indian rupee paper securities was being actively discussed in the English press. In the Court of Bankruptcy some further extraordinary revelations had been made in the case of Streatfeild, Laurence, and Mortimore, the bankrupt leather traders. The siege of Gaëta by the national troops continued, but there appeared reason to expect an early fall of the place. Intelligence had arrived of the capture by the Chinese of Mr Parkes, the interpreter, Mr Bowlby, the *Times* correspondent, and some officers of the British army.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1851, a deficiency of 2,443,890*l*; in 1858, a deficiency of 2,940,572*l*; in 1859,

a deficiency of 6,012,057*l*; and in 1860, a deficiency of 7,026,002*l*. In 1861, the deficiency is 2,108,688*l*.

DISCOUNT AND MONEY MARKET.—The demand for money this week has again been limited, and the rates of interest show a further tendency to decline. The news from America has acted but slightly on the money market, trade being already very limited, but has necessarily caused a greater feeling of caution. The following are the ordinary charges for the best paper at various dates:—

30 days to 60 days	2½ per cent.
3 months	2¾ per cent.
4 months	3 per cent.
6 months	3½ per cent.

It will be seen that while in most cases a reduction has taken place, the rate for long-dated bills has been fully maintained.

On the Stock Exchange the supply of capital is ample, and loans on Government securities can be easily obtained at 1½ per cent.

The announcement of the forcible capture of Messrs. Slidell and Mason, the Southern delegates, on board the West India mail steamer Trent, by the United States frigate San Jacinto, has occasioned the greatest excitement in the City, and has been the topic of universal conversation. The general opinion is decidedly adverse to the Northern Government, but there is still a hope that the affair may be arranged without a war. At Lloyd's, on the arrival of the West India packet, five guineas per cent. war risk was asked on vessels from New York, but these terms were not conceded, and the actual rate paid has been 20s. For outward bound British ships to China 10s war risk has been given, and to Australia 15s, but a general disposition is shown to act cautiously, and hence risks for long voyages are not readily taken.

It transpired this morning that the Government have forbidden the export of saltpetre as contraband of war, and consequently none of the 3,000 tons lately announced to have been purchased on American account will be permitted to leave the country. The price, which had advanced to about 43s per cwt, has since fallen back nominally to 38s.

The tenders for the 200,000*l* Six per Cent. debentures, proposed to be issued by the Government of the Cape of Good Hope, were opened on Monday. The minimum fixed was 107⅛, and it appeared that of an aggregate amount applied for of 885,000*l*, only about 11,000*l* was at and above that price. The highest tender was at 107½, and the lowest at 100. The Agents General for the Crown colonies, who are intrusted with the conduct of the operation, have given notice that they are prepared to receive applications for the unallotted portion of the loan at 107⅛.

The following are the rates of discount in the principal cities of the Continent, showing a decline in Turin and Hamburg:—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	5	4½
Vienna	6	6
Berlin	4	3½
Frankfort	4	3
Amsterdam	3	3
Turin	5½	5½
Brussels	4	3½
Hamburg	..	3½
St Petersburg	7	8

ENGLISH FUNDS.—Consols were rather buoyant in the early part of the week, and on Tuesday went to 92¾ to ⅞ for the account, from which, however, a slight relapse occurred to 92⅝ to ¾, owing to some sales by the public. On Wednesday morning the market was rather dull, and on the announcement of the outrage on the West India steamer Trent by the San Jacinto, an immediate fall took place of nearly 1 per cent., from which there was only a slight recovery. Yesterday rather more steadiness was shown at the commencement of business, but a report that Government are about to send large reinforcements to Canada again caused a downward movement, and the final price was 91¾ to ⅞. To-day the market has again been agitated, and at one time the quotation was 90¾ to ⅞, showing a further reduction of 1 per cent. Late in the afternoon there was a rumour, to which, however, little credit can be fairly attached, that the Federal Government will disown the acts of Captain Wilks, and a sudden rise occurred to 91 to ⅛. After regular hours there was a further improvement, the last price being 91⅜. For money the quotation at the official close was 92⅜ to ⅝, but transactions were subsequently entered into at a fraction higher. Compared with last Friday, a reduction is consequently shown on the week of fully 1 per cent.

There has been some demand for Exchequer bills for temporary investment, and the March issue has improved to 8s to 12s premium. The June bills are steady at 12s to 15s premium, the reduction in the rate of interest having been fully anticipated. India bonds left off at 12s to 16s premium.

India Five per Cents. have been similarly affected with Consols, and closed at 105½ to ¾, or a decline of fully 1 per cent. The rupee paper securities are also heavy, the Five per Cents. leaving off at 98 to 99, and the Five-and-a-half per Cents. at 104 to 105.

The annexed notice respecting the June Exchequer bills appeared in the *Gazette* of Tuesday. The rate of interest, which has hitherto been 3¾ per cent., is thus reduced for the half-year from the 11th of December to the 11th June, 1862, to 3 per cent.:—

The Lords Commissioners of Her Majesty's Treasury hereby give notice to the holders of Exchequer bills issued under the authority of the Act 24th Victoria, cap. 5, and dated the 11th of June, 1861, that the interest thereon for the half-year commencing on that day will be payable at the Bank of England on and after the 11th day of December next; and that the interest of such Exchequer bills for the following half-year, to June, 1862, will be at the rate of 3 per centum per annum.

FOREIGN STOCKS.—The foreign market was rather firm in the commencement of the week, but the news from America caused an immediate fall, which was followed by another heavy decline this morning. In the afternoon, however, the tendency was less unfavourable. The stocks chiefly affected have been the more speculative descriptions, viz., Mexican, Turkish Six per Cents., and Venezuelan. The heaviness in the latter was also increased by the report that the ex-President, General Monagas, has effected a landing on the coast of the Republic, although, it is said, his forces consist of 800 men only. Turkish Six per Cents. of 1858 have receded between 1 and 2 per cent., notwithstanding the satisfactory announcement that about 130,000*l* is now either in the hands of the Syndicate at Constantinople, or in the Bank of England, towards the dividend and sinking fund next March. Peruvian descriptions remain comparatively firm, being exceedingly well held, and only small amounts of stock being brought to market. A fair demand has also prevailed for Russian stocks, but prices have not been fully maintained.

The closing quotation of French Three per Cents. on the Paris Bourse this evening was 68f 90c, showing a fall of more than 1⅛ per cent, occasioned by the adverse intelligence from America, and the decline in our market.

Subjoined is a communication from the Committee of Spanish-American Bondholders respecting the debt of New Granada. The 4,514*l* alluded to below has been received in London by Messrs Baring:—

The Committee have received from Santa Marta the following copy of an order from the Finance Minister to the Commissioner of the Customs at Santa Maria:—

"United States of New Granada, Executive Power of the Union.

"The Secretary of State in the Treasury Department to the Commissioner of the Custom House of Santa Marta

"I have received orders to inform you:—

"1. That the whole of what may have been collected in your Custom House for the 25 per cent. of import duty apportioned to the foreign debt, and that should be found in deposit, as provided under the circular order No. 1 of the 25th of July last, of this section and branch, is to be immediately remitted by you to Messrs Baring Brothers, the bankers of the Republic in London.

"2. That you are to perform monthly the same operation, in respect of what you may continue collecting after the date of the receipt of this note.

"The said remittances shall be made by you, in bills or money, in manner most safe and economical.

"JULIAN TRUJILLO.

"Bogotá, Sept. 13, 1861"

("It is a copy. The Commissioner. Signed, A. DE MOSQUERA.")

The following is an extract from the letter received by the Committee:—

"Santa Marta, Oct. 27.

'From the general conduct observed by Colonel Mosquera, the collector of the Customs at this port, since taking charge of his post here, and from the tenour of his personal communications to me, which are frequent, I am satisfied that it is the earnest wish of General Mosquera to carry out scrupulously the engagemen

entered into with the bondholders in March last, for the liquidation of the foreign debt of this country. By the mail of to-day a remittance goes forward corresponding to 25 per cent. of Customs' revenue since Colonel Mosquera took possession of his post, amounting to 4,514*l.*

The Ecuatorian Commission of Agency have given notice that the mail just arrived from Guayaquil has brought a further remittance on account of the dividends on he debt of Ecuador of 4,440*l.*

The annexed is from the Committee of Mexican Bondholders:—

The Committee have received a letter, dated Vera Cruz, the 31st ult., from their agents there, covering bill of lading for 56,009 dols, being the proceeds of Vera Cruz bills on Mexico, which reached Vera Cruz by the last *conducta*.

P.S.—A letter dated Mexico, the 29th of October, but not coming in the mail bag, has also been received from Mr Whitehead. It recounts negotiations between Sir Charles Wyke and the Mexican Minister for Foreign Affairs to bring about an arrangement, which the arrivals of the letters by the English packet of the 2nd of October will, no doubt, have put an end to. The firing of cannon and ringing of bells announced to the capital on the 21st ult. the defeat of Marquez and Mejia at Real del Monte; but the next account of them was, that they had brought 50,000 dols of the Real del Monte Company safely into their new quarters at Tisayerca, a stage half way to Mexico, without having been wounded, as has been reported.

In consequence of the failure of Messrs Gutierrez, the late agents in Guayaquil of the Ecuador bondholders, a meeting was held on Wednesday to consider the best course to be pursued. After a detailed statement of the circumstances connected with the stoppage, a resolution was carried unanimously authorising the Committee to take such steps as they may consider desirable. In answer to questions, it was mentioned that the amount due from Messrs Gutierrez is 10,075*l.* With regard to the dividend fund, there is at present realised 6,437*l* in London, and 5,131*l* in Guayaquil, to which the bondholders' fourth share of the Customs receipts for August and September will have to be added. A further sum of 21,701*l* is also due from the Government of Ecuador, which has been arranged to be paid at the rate of 1,300*l* a month, commencing from January next. With reference to the threatened blockade of Ecuador by President Castilla of Peru, a letter of remonstrance has been addressed to Earl Russell within the last few days, to which no reply has yet been received.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and this day:—

Railways and other Shares.—The market for British railway stocks has followed the movements in the funds, the American outrage having produced an especially adverse effect on the lines in the manufacturing districts. The sales have chiefly proceeded from operators who had previously purchased on the ease in the money market, but there have also been some moderate realisations by the public. Midland, Lancashire and Yorkshire, and South-Eastern have manifested the greatest heaviness. This morning, nearly all stocks were almost unsaleable, but in the afternoon the improvement in the funds caused a feeling of more confidence, and the closing prices show a partial recovery. Compared with last week, however, a general decline has taken place. The agitation in this department has been greater than might otherwise have been the case, owing to the news from America arriving on the first day of the fortnightly settlement.

In the colonial department, Indian guaranteed stocks are lower, but decline slowly from the very satisfactory accounts from India, and the expectation that our Eastern Empire is about to enter into a new era of prosperity. Canadian descriptions have fallen rather considerably, but in some degree rallied this afternoon.

The foreign market has been very depressed, and nearly all descriptions of shares have receded. Lombardo-Venetian closed at ¼ to ⅜ premium. American securities have experienced a rather severe fall.

There have been few changes in miscellaneous descriptions. The Government debentures of Canada, Nova Scotia, and New Brunswick have been prejudiced by the American news. Red Sea Telegraph and United Mexican Mining shares have likewise declined. The new Mercantile Fire Insurance left off at ¼ to ½ premium; and Commercial Union, ⅝ to ¾ dis.

Subjoined is our usual list of the closing prices of the principal railway shares last Friday and this day:—

Foreign Exchanges.—The rates this week have been generally firmer, but no material change has taken place.

Bullion.—Annexed is the weekly circular of Messrs Pixley, Abell, and Langley, on the movements in bullion during the week, and the transactions in Indian rupee paper:—

Gold.—We have to report the arrival of the Roxburgh Castle and the James Wilson, from Melbourne, the former ship bringing 201,500*l*, and the latter 76,000*l*. There being scarcely any demand for export, nearly the whole of these amounts will be purchased by the Bank; about 217,000*l* has already been sent in, and any immediate arrivals will follow. The La Plata has brought 54,000*l* from the West Indies, and the Ellora has taken 28,330*l* to Bombay.

Silver.—Our market has been quiet since the departure of the Ellora, with 232,270*l* for Bombay, and the price remains the same as we last quoted, viz., 61¾d per oz standard. The inquiries for Calcutta and China are limited in amount, and we do not think the steamer sailing on the 4th December will take any large sum. The La Plata has brought about 145,000*l* in bar silver, but this specie will not be deliverable for some few days.

Mexican Dollars.—Some small parcels of dollars have been sold at 4s 11⅛d per ounce. The La Plata has brought about 250,000*l* in dollars from the West Indies; but as they cannot be deliverable in time for the China mail, we do not look for any alteration in price yet. A slight reduction in the rate will, doubtless, have to be submitted to, in order to effect the sale of so large an amount.

Exchange on Bombay and Calcutta continue as last quoted by us, viz., banks' drafts on Bombay and Calcutta, at 60 days' sight, 2s per rupee; bills, with documents, 1s 11⅛d to 1s 11⅜d; on Madras, 1s 11⅛d to 2s; bills, with documents, 1s 11d to 1s 11⅛d.

India Government loan notes are not quite so firm as last week. We quote 5½ per Cents., 104⅝ to 105¼; 5 per Cents., 98¾ to 99¼.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; bar gold, fine, 77s 9d per oz std; bar gold, refinable, 77s 11d

per oz std; Spanish doubloons, 76s per oz; South American doubloons, 74s per oz; United States gold coin, 76s 6d per oz, last price. Silver—Bar silver, 5s 1½d per oz std,; bar silver, containing 5 grs gold, 5s 1⅝d per oz std; fine cake silver, 5s 5⅛d per oz, last price; Mexican dollars, 4s 11⅛d per oz, last price; Spanish dollars (Carolus), 6s 6d per oz, nominal.

About 78,000*l* in Australian gold was sent into the Bank yesterday, and 65,000*l* to-day, making a total of 143,000*l* since the making up of the last account.

Failures and Mercantile Embarrassments.—The suspension has been announced of Messrs Benoliel Brothers, merchants, of London and Gibraltar, with liabilities of about 40,000*l*. The stoppage is attributed to the non-receipt of remittances. The estate is expected to turn out favourably, private property being held to a considerable amount.

A meeting of creditors of Messrs Bedford, Burys, and Co., steel manufacturers, of Sheffield, has just been held, when it was stated that the liabilities are about 55,800*l*, while the assets are valued at 54,656*l*. An offer of 12s in the pound, on a satisfactory guarantee, was accepted by the creditors present, but some proceedings have since been taken in bankruptcy.

The advices from St Petersburg mention the failure of Messrs Froom, Gregory, and Co., machine and iron agents. It is said that their chief debts on this side are covered, and that any loss will mostly fall upon Russia. The cause of the suspension is variously stated, and in some quarters is attributed to speculative transactions in tallow, unconnected with their legitimate trade. At a meeting of their creditors on the 19th instant, it was resolved that the firm be authorised to continue their business, and to prepare a full statement of affairs to be submitted to a second meeting on the 11th of December. The liabilities were stated at about 200,000*l*, and assets at 206,000*l*, showing a small surplus.

The suspension is reported to have taken place of the Caen banking house of M. Dubois, with engagements for about 48,000*l*.

A meeting of creditors of Messrs Amott Brothers, silk mercers, of St Paul's churchyard, took place on Wednesday, when a balance-sheet was presented, showing liabilities 20,792*l*, and assets 16,348*l*, or about 15s 8d in the pound. It appeared that the firm commenced business in April, 1858, with little or no capital beyond a sum of about 4,000*l* borrowed from connections and friends, but that for the most part the trade has realised a profit. At the same time their expenses have been large, especially in advertising and printing, the latter alone having cost between 5,000*l* and 6,000*l*. The subject chiefly discussed was the circumstance of the capital of the house having been nearly all borrowed, some of the creditors asserting that when Messrs Amott commenced business it was distinctly stated they possessed between 4,000*l* and 5,000*l* of their own. It was, however, ultimately resolved to accept an amended offer of 12s 6d in the pound, payable in instalments in three, six, and nine months.

A meeting of creditors of Messrs James Coster, Beater, Dennant, and Russ, warehousemen, who stopped payment in August last, was held yesterday, to receive a legal opinion respecting the claim of the executors of the late Mr James Coster for about 130,000*l* to rank upon the estate equally with the trade creditors for about 88,000*l*. It had been objected at a previous meeting that a portion of the former sum was left in the business as partnership effects, and, therefore, could not be withdrawn until the ordinary debts were satisfied. A legal opinion was consequently taken upon this point, but did not pronounce positively on the question, one of the counsel employed being in favour of the creditors, and the other of the executors. After considerable discussion, it was announced that the estate had been placed in bankruptcy, a course which had been previously recommended by several speakers. Under the new Act, the difficulty will be speedily, and at the same time cheaply, adjusted. The realised assets in hand amount now to 149,000*l*, of which 117,000*l* is in cash and 9,000*l* in short bills, and a dividend of 13s in the pound may be paid within little more than a month.

Public Companies.—A special meeting of the Mercantile Fire Insurance Company took place on Monday, when a resolution was passed to the effect that it is inexpedient that the call of 2*l* 10s per share due on the 1st December be paid at present. It appeared that the Directors wished, in the first instance, to call up this portion of the capital, making a total paid of 400,000*l*, partly to give the proprietary a substantial interest in the concern, and partly to afford ample security to the public. Since then, however, the provisional agreement with the North British has been effected, which will render unnecessary the raising of any further sum than the amount now paid. In order to fix a fair tariff of rates, the Directors have commissioned Mr T. Piper, of the late firm of Piper and Sons, builders, to survey in detail all the docks, warehouses, and wharves of the port of London, and his report is now hourly expected, when it will be at once taken into consideration and acted upon. Meanwhile, the Company have commenced business on terms equivalent to the modified charges of the old offices, with a proviso that a rebate will be made in such rates as may be higher than the premiums adopted in the new tariff of the Company. In their negotiations with the North British, a condition has been made for the equitable adjustment of fire risks, in accordance with the principles on which the Mercantile Company was instituted.

The distribution that will be proposed at the forthcoming meeting of the Peninsular and Oriental Steam Company, on the 3rd proximo, will be a dividend of 3½ per cent. for the past six months, and a payment of 3 per cent. for the year from the indemnity account.

At a meeting of the Intercolonial Royal Mail Steam Company, on Tuesday, a dividend was declared at the proposed rate of 7½ per cent per annum, free of income tax, leaving about 1,150*l* to be carried forward. The attendance of shareholders not being sufficient to constitute a quorum, the business transacted was only provisional. The Chairman congratulated the proprietors upon the satisfactory position of their affairs, and pointed out that the gold discoveries in New Zealand will probably prove beneficial by increasing the traffic of the Company both in gold and passengers. The mail service has been well performed, the report of the Postmaster-General stating that the contract has been carried out with creditable punctuality. The cost of coal continues to form a heavy item in the expenditure of all steam companies, the increase of price of Australian rendering it cheaper to use Welsh coal exported from here.

At a meeting to-day of the Trust and Loan Company of Upper Canada, a report was presented stating that the net profit in the half-year ending in September was 14,696*l*, which, with the sum brought forward from March, made an available balance of 14,763*l*. It was recommended to declare a dividend at the rate of 8½ per cent. per annum, less income tax; to add one-half of the surplus profit over 6 per cent. per annum and the usual charge for interest, together 3,847*l*, to the reserve; to write off 250*l* towards preliminary expenses, and to carry forward 41*l*. The reserve fund will then consist of 37,293*l*. Satisfactory accounts are being received of the success of the Company's operations, and it is believed that little or no prejudicial effect will be experienced by the present crisis in the United States. After a few explanations, the report was carried unanimously.

The report of the Bank of British North America, issued preparatory to their meeting on Tuesday next, announces a dividend for the past half-year at the rate of 6 per cent. per annum, free of income tax. The business of the Bank during the six months ending in September shows an increase in the profit; but some apprehension is expressed with regard to the future effect of the American civil war.

The prospectus of the Cardiganshire Consolidated Mining Company has been issued. The proposed capital is 50,000*l*, in shares of 5*l* each. We are informed that the Company has obtained possession of the celebrated lead and copper mines of Sir C. Price, and that their produce hitherto has been very large. It appears that they are only about 60 fathoms from the surface of the soil,—that, at one period, ore valued at 20,000*l*, was disposed of in three years,—and that the present Company has already sold about 5,000*l*. worth of lead and copper.

Notice has been given of an intention to bring into Parliament a Bill to enable the West Hartlepool Harbour and Railway Company to enlarge the harbour and dock accommodation of that flourishing place in various specified ways. It is believed, on apparently adequate grounds, that such an addition to the capacities of the port is much wanted, and that the capital expended in affording it will yield a good return.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 3 per mille premium, and the short exchange on London is 25.25 per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about the same price in London and Paris.

By advices from Hamburg the price of gold is 428 per mark, and the short exchange on London is 13.6¼ per 1*l* sterling. Standard gold at the English Mint price is, therefore, about 1-10th per cent. dearer in Hamburg than in London.

The course of exchange at New York on London for bills at 60 days' sight is 107¾ to 108 per cent., which, when compared with the mint par between the two countries, shows that the exchange is against England; but, after making allowance for charges of transport and loss of interest, the present rate leaves no profit on the transmission of gold to the United States.

INDIA EXCHANGES.—NOVEMBER 26.

Imports of the week ..... 214,156 qrs.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The wheat trade, to-day, at Mark lane, was free from excitement. Most holders of English samples were asking an advance of 1s to 2s; but an improvement was realised in a few instances only, and that to the extent of but 1s per quarter. The supply on offer was small, yet the greater portion was left unsold at the close of business. Importers of foreign wheat were very firm, and all descriptions were held at enhanced rates. Some portion of the American supply was withdrawn from the market. The demand for barley was in a very sluggish state, and secondary qualities were decidedly cheaper. Oats, beans, and peas were in moderate, though by no means active request, on former terms. Flour was firm, and American brands advanced 6d per barrel. This week's imports are somewhat extensive, viz., 20,020 quarters of wheat; 4,280 barley; 8,090 oats; 500 sacks and 14,300 barrels of flour.

At Liverpool, this morning, wheat advanced 3d to 4d per cental; flour, 1s to 1s 6d per barrel; and Indian corn, 1s to 1s 6d per 480 lbs.

The wheat trade of Alexandria during the week ending Nov. 18 was quiet, and prices had a downward tendency. Choice qualities of Beheireh wheat, however, sold freely at late rates. Beans and linseed were firm. Annexed are the sales:—Saide wheat, private trade produce, 10,700 quarters, 31s 3d to 32s; Saide wheat, Pasha's produce, 34s 6d to 35s 6d; Beheireh wheat, private trade produce, 3,220 quarters, 30s to 31s; Beheireh wheat, private trade produce, white, 490 quarters, 31s to 32s; Beheireh wheat, Pasha's produce, white, 1,940 quarters, 36s to 36s 11d; Saide beans, private trade produce, 2,390 quarters, 27s to 28s; Beheireh beans, private trade produce, 272 quarters, 25s to 25s 10d; barley, 528 quarters, 19s 6d to 20s 6d; lentils, 126 quarters, 25s 6d to 26s 6d; peas, 81 quarters, 25s to 25s 6d; linseed, 125 quarters, 48s to 48s 6d per quarter, free on board. Freights—In consequence of considerable arrivals, the freight market closes at a reduction upon the rates that prevailed during the greater part of the week. Beans to the United Kingdom for orders may be quoted 6s 3d to 6s 9d per quarter, and other descriptions in proportion; to a direct port, 5s 6d to 6s; Liverpool, 5s 3d to 5s 6d for wheat or beans; by steamer, 6s 9d.

EXPORTS of GRAIN in Quarters from ALEXANDRIA from 3rd to 16th Nov.

	Wheat.		Beans.		Barley.

The Liverpool cotton market this week opened very quiet, and only a limited business was transacted; but since the receipt of the news of the capture of the Confederate Commissioners by a Federal man-of-war, the market has received a complete check, everybody waiting to see how the British Government will act in this affair, and how the Americans will regard it. Most owners are not eager to press sales; those, however, who are compelled to sell are obliged to take ¼d to ½d less, there being no buyers but for immediate wants. If the cotton supplies from America are not obtained through an interference of this country, prices, no doubt, will soon rise again, as the animosity between the two belligerent parties continues on the increase. The sales of the week only amount to 22,000 bales, including 17,000 to spinners, and 5,000 on speculation and for export. To-day, barely 1,000 bales have been sold at very irregular prices.

Annexed is Messrs Briggs' report of the cotton trade of Alexandria for the week ending Nov. 18:—Prices of cotton continue moderate. We have just seen an intelligent native who has come from the cotton districts. His report is that there will be about the same quantity gathered as last year, notwithstanding that the inundation has destroyed about a fourth of the lands sown. The operations for the past week have been as follows; but we beg to remark that the prices quoted are those now ruling, for much higher were paid early in the week:—583 bales fully good middling to fair, 10 9-10d to 11 11-100d; 1,864 bales fully fair to good fair, 11 25-100d to 11 55-100d; 965 bales good, 11 55-100d to 11 83-100d; 1,453 bales fine, 12d to 13d per lb, free on board. Freights firm at 1d per steamer, and ⅜d by sailing vessel.

EXPORT of COTTON in bales from ALEXANDRIA from 3rd Oct. to 16th Nov.

1861—1862	1,758	316	410	2,484

Messrs Arles Dufour and Co., of Lyons, thus report the silk trade of that city for the month ending Nov. 27;—"We regret having no improvement to report in the silk trade. Under the lasting pressure of the American crisis, a general dulness has prevailed on all our markets during the present month, the limited wants of the European consumptions being insufficient to give rise to more than an accidental activity. However, with the present low range of prices, a further notable depression can hardly be anticipated, and, notwithstanding the discouraging state of things, it is satisfactory to see that our actual quotations differ but little from those given a month ago."

The public sales of tea held this week, have gone off slowly. Assam qualities have fallen 1d to 2d per lb; but in the value of China descriptions, very little change has taken place. In the private contract market, only a moderate business has been done on former terms.

The following intelligence, in reference to tea and silk, is dated Hong Kong, Oct. 16:—

Canton Silk—Sales amount to only 90 piculs, as follows:—Loongkong, 30 piculs, at 390 dols; Kumchuck, 30 piculs, at 380 dols; and Kowkong, 30 piculs, at 360 dols. Stock—600 piculs. Tea—During the past month little has been done, and teamen remain firm at quotations. Supplies come in slowly, and the stock of congou is gradually increasing. Scented teas have not been in request, and the commoner descriptions can be had on more reasonable terms. Canton green teas have attracted attention in consequence of the extreme London quotations for the country tea; prices, however, show little alteration. Macao—Little has been done in tea. The stock of Tayshan congou is small, and comprises little of medium and none of fine quality. One vessel is loading slowly. Amoy advices are to the 10th of October. Tea—Some large settlements have been made during the month, amounting to 20,141 half-chests Oolong, 2,285 half-chests Ankoi, 2,298 half-chests congou, 1,145 half-chests orange pekoe, and 2,800 boxes caper. Oolongs of the lower grade and Ankois were quoted 2 dols higher than previous rates. Stocks—Oolong, 4,440 half-chests; Ankoi, 7,785 half-chests; congou, 6,857 half-chests; orange pekoe, 852 half-chests; caper, 2,050 boxes. Foochow advices are to the 7th inst. In tea a large business has been done at fully previous rates, except in the case of purchases in barter for goods, where an advance on late quotations of full 1 tael per picul is said to have been paid, but as the price of the teas is not given, this statement cannot be checked. Stocks showed a small increase as compared with last season, and were held firmly. Souchong—Small sales, and stocks were reduced. Oolong—During the last few days settlements to the extent of 21,000 half-chests are reported, principally by two English firms, and rates are considered extreme. In addition to these there must be quite 30,000 half-chests shipped per Peterborough and coastwise, or withdrawn from the market, and the stock, though nominally shown as 97,336 half-chests, does not in reality comprise above 60,000 half-chests available tea. Stocks—Congou, 129,000 chests; souchong, 5,830 chests; Oolong, 99,336 half-chests; pekoe, 1,245 chests; scented teas, 3,478 boxes. Shanghai advices are to the 5th of October. Tea—During the month a fair business has been done. In the early part some sales of Oopeik and Oonahms were made at a reduction of 1 to 2 taels, and buyers held off for a further fall. However, holders were firm, and a few transactions have since taken place at a slight advance. Stock—Black, 19,700 chests, against 23,300 last year; green, 8,000 chests, against 2,500 half-chests last year. Stock at Ningpo and on the way up to Shanghai, about 25,000 packages of green. Silk—Settlements for the month amount to 6,000 bales, making total settlements for the season 24,000 bales. Stock estimated at fully 25,000 bales, with 2,000 more at Ningpo, but of that large quantity there was hardly a bale better than No. 3 Tsatlee. Prices have declined 5 to 10 taels per picul. The total export of silk from China to Europe is 18,281 bales, against 26,373 bales last year, or a decrease of 8,092 bales. The total export of tea from China to Great Britain is 33,665,400 lbs, against 26,949,000 lbs, showing an increase of 6,716,400 lbs. To the United States the export is 3,958,700 lbs, against 10,016,400 lbs, showing a decrease of 6,057,700 lbs. Freights—To London, 3*l* for tea and 4*l* 10s for silk; to New York, 15 dols and 25 dols.

For all kinds of sugar, both raw and refined, the market has ruled inactive, and prices have been with difficulty supported.

EXPORTS of Sugars from Havana and Matanzas from Jan. 1 to Nov. 6:—

	1860. boxes.	1861. boxes.
To Great Britain	418,470	524,850

Total	1,301,198	1,432,949

Coffee has sold somewhat readily, at fully previous rates. Messrs Fryer, Schultze, and Co., writing from Colombo, Oct. 31, thus refer to the trade of that port:—

The weather continues fine, though occasionally broken, the north-east monsoon having fairly set in. To date the exports of the crops for the season 1861-62 are as under:—

PLANTATION COFFEE.				
To Great Britain	cwts 26,020	against last year,	cwts	16,358
Foreign Ports	...	—	—	...
Australia and India	1,858	—	—	...
	27,878			16,358
NATIVE COFFEE.				
To Great Britain	cwts 3,218	against last year,	cwts	9,204
Foreign Ports	...	—	—	1,496
Australia and India	1,850	—	—	...
	5,068			10,700

The new crop of plantation coffee is coming in freely, and, during the next fortnight, a good deal will be on board ship. The shipments of the new gatherings to date are comparatively small. Labour is nowhere abundant, whilst many estates are underhanded. Very little of the new crop of native has been as yet received in Colombo, and very few samples are offering. The parcels already to hand are sound, but generally small in the bean. Freights—The supply of tonnage in our roads is ample for the present requirements of shippers, but rates are maintained at 4*l* 5s for coffee in casks.

Cocoa has been less active, but has continued firm in value. Rice has met a dull sale, at barely stationary prices. For dry fruit, the inquiry has been confined to actual wants. Currants have fallen 1s to 2s; and Valencia raisins, 3s to 4s per cwt.

In rum, the dealings have been to a limited extent, at late rates. The Government contract has been taken at 1s 7½d per gallon. Brandy continues dull; but grain spirits support former prices.

Good and fine qualities of colonial wool have changed hands more freely, at the public sales now in progress, but for inferior qualities the biddings have ruled very inactive. Prices remain unaltered, being from ½d to 3d per lb lower than at last auctions. By private contract, English wool is in fair demand, at fully the late advance. Hemp is very firm, at 35*l* for clean Russian.

Considerable quantities of saltpetre have been purchased for export to America, at enhanced quotations; but an embargo

having been laid upon exports, the trade, this afternoon, has ruled heavy, with sellers on lower terms. Indigo is very firm.

The principal change in the metal trade is an advance of 5*l* per ton in the value of copper, and of about 2*l* in that of foreign tin.

Linseed oil has ruled inactive, at 35s 6d per cwt on the spot. Most other oils have sold steadily, at about previous rates. Turpentine is dull, at nominal currencies.

The amount of business transacted in tallow has been small. P.Y.C. is quoted at 50s 6d to 50s 9d per cwt on the spot; and at 51s for January to March delivery. Town tallow, 51s 6d net cash.

COTTON.

NEW YORK, Nov. 12.—The market for cotton was firm. Middling Upland was quoted at 24½c to 24¾c per lb.

NEW YORK, Nov. 15.—There was much less firmness in the demand for cotton, and a fall took place in prices—the value of middling Upland being 24¼c per lb.

LIVERPOOL MARKET.—NOVEMBER 29.

The cotton market has been extremely sensitive during the week. At times there have been evidence of a return of confidence and a disposition to speculate, but the last day or two all operations except needful ones have been suspended, owing to the seizure of the Confederate Commissioners. A few transactions which took place yesterday were at prices so irregular as to make any quotation nominal. We have reduced those for American and East India ¼d per lb. Long-stapled kinds are further reduced, and are somewhat pressed for sale, especially Egyptian. The sales to-day are from 500 to 1,000 bales, at rates wholly nominal. The reported export amounts to 4,270 bales, consisting of 1,270 American, 40 Brazil, and 2,960 East India.

MARKETS IN THE MANUFACTURING DISTRICTS.

The advices at hand, this week, from the manufacturing districts are of a gloomy character. Both for home use and export, the transactions in goods have been on a limited scale, and late rates have been with difficulty supported. Iron, however, has commanded more attention, at very full prices, and coals have realised extreme rates.

MANCHESTER, Nov. 28.—We retain last week's quotations, but prices have been entirely nominal. Notwithstanding better telegrams on Tuesday from Bombay to 8th inst., and from Calcutta to 10th, this market has been altogether quiet and stagnant; and to-day especially, in consequence of the American seizure on board the Trent, and the possible bearings and complications of American affairs, all attempts at business have been tacitly withdrawn. The high range of prices to which the trade have now been fairly committed, renders both buyers and sellers most nervously sensitive; the least cause renders the former unwilling to increase stocks whilst prices abroad are still so unremunerative, the latter it renders anxious for a further reduction of working rather than of price. A reduction, however, has been made in cop yarn of ¼d per lb, owing to the vastly growing number of looms standing empty, a course from which no change seems at present in view.

BRADFORD.—Wool—The startling intelligence at hand seems to have stopped all business. During the past week or ten days there has been an unusual buoyancy in wool, and (with an especial demand for bright-haired sorts) all wools have been in active request, even Downs, so long inanimate, at length manifesting some life. Now, however, there is a sudden pause; and every one feels inclined to wait till the suspense is over, and holds aloof from operations. The remarks we have made about wool apply almost with equal force to yarns. Pieces—The great advance of prices in bright-haired goods, coupled with the intelligence of the Trent affair, have arrested speculative purchases for the present, and the market is, in consequence, much quieter.

LEEDS.—There is no change in the general condition and prospects of the woollen trade of this town and district, both of which are better than they were a month ago. The flax trade is a little more active, and prices have an upward tendency. The raw material is rather scarce. Wools are quite as high as on this day week, and holders are very firm in their demand.

ROCHDALE.—Upon the whole, the tone of the trade is tolerably cheerful, manufacturers being fairly employed, and the stocks of goods on hand are not very heavy, great care having been used not to glut the market. Yorkshire goods are in moderate request, the best sales being for kerseys. Wools do not move off very freely; but prices keep steady.

LEICESTER.—The hosiery trade continues on the whole in a satisfactory state, and useful goods are in tolerable demand for both the London and provincial markets. At Loughborough and the country districts generally, trade remains steady. There is a fair demand for yarns, and material is high in price, spinners working full time. The wool market is quiet in most sorts, but prices remain firm.

NOTTINGHAM.—The home trade is more than usually dull for the season of the year, and business for the foreign markets is flat. There are a few small orders for plain goods, as also for muslin and other cotton edgings. The silk lace continues exceedingly quiet. In hosiery there is a fair business doing for some branches.

BELFAST.—Yarns—The demand for the higher counts of warps has kept rather brisk. Manufacturers have been bare of stocks; and, although there are few purchases made for holding over, the cur-

rent rate of consumption is so well maintained as to keep stocks within moderate bounds. Full time continues at all the mills in operation here, and in the distant parts of the country. Flax—Prices are fully supported. Handscutched, 5s 6d to 8s 3d; and milled, 6s 3d to 12s 6d the stone of 16½ lbs.

WOLVERHAMPTON.—We copy the annexed report from Mr S. Griffiths' circular:—The official list of prices of Staffordshire finished iron is as follows:—Common Staffordshire bars, 7*l* at the works; best bars, 8*l*; sheets, 8*l* 10s; doubles, 10*l*; nail sheets, 8*l*; latten, 11*l* 10s; boiler plates, 8*l* 10s; best and best best in proportion; common rods, 7*l*; hoops, 8*l*; gas strip, 7*l* 10s; Canada plates, 11*l* 10s; and all other sorts in proportion. Second and third-class makers are selling below these rates. Current prices of pig iron:—Staffordshire cold blast, 4*l* 5s; Old Windmill End Mine, Nos. 1, 2, and 3 melters, warm air, 4*l*; Old Windmill End, second quality, Nos. 1 and 2, melting pig iron, 3*l*; Old Windmill End Mine forge pig iron, 3*l* 5s to 3*l* 7s 6d; best native hydrate pigs, 3*l* 7s 6d to 4*l*, according to the brand; first-class All Mine grey forge pigs, 3*l* 5s to 3*l* 7s 6d; Seend Grey Forge Mine pig iron, 3*l* to 3*l* 2s 6d; Seend Mine melting pigs, 3*l* 10s to 3*l* 15s; good mine pigs, with a modicum of fine cinder, 2*l* 10s to 2*l* 15s; mine pigs, deteriorated by cinder, 2*l* 10s to 2*l* 12s 6d; Cleator Moor hæmatites, 3*l* 5s; Barrow hæmatites, 3*l* 5s; Workington hæmatites, 3*l* 5s; grey forge cinder pig iron, 2*l* 10s to 2*l* 15s; white forge cinder pigs, 2*l* 5s to 2*l* 10s; ordinary melters, Nos. 1, 2, and 3, 2*l* 12s 6d to 2*l* 17s 6d; superior makes of mine melting iron, 3*l* 7s 6d to 3*l* 17s 6d, according to make and quality. The above prices are all delivered on to the wharfs at the South Staffordshire manufactories. Gadlys (Aberdare, South Wales), No. 1 foundry pig, cold blast, 4*l* 10s f.o.b. Favourite Shropshire and Forest of Dean brands, hot blast, 3*l* 12s 6d to 3*l* 15s delivered; Northern hæmatites, 3*l* 5s, according to brand or quality.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Nov. 12.—The flour market was less buoyant. Sales were moderate, and the low grades of State and Western were rather easier, while medium and extra shipping brands, including extra round hoop Ohio, were quite firm at Saturday's rates, with sales of about 17,000 bbls. Canadian flour was heavy and lower, with sales of about 800 bbls, closing within the above range of prices. Southern flour was again heavy, and easier for common grades. The sales embraced about 1,200 bbls within the above figures. Wheat was in good request, though somewhat irregular for some grades. Good and desirable shipping lots were firm, and in some cases ½c per bushel higher. The sales footed up about 300,000 bushels, closing within the following quotations:—White Western, 1 dol 38c to 1 dol 52c; red amber ditto, 1 dol 30c to 1 dol 57c; Milwaukee Club, 1 dol 22c to 1 dol 26c; Chicago and Racine, 1 dol 18c to 1 dol 24½c; red State, 1 dol 30c to 1 dol 32c; 1 dol 37c to 1 dol 40c for white Canadian—the lower figure for smutty; 1 dol 35c to 2 dols 44c for white Indiana and Wisconsin.

NEW YORK, Nov. 15.—A full average business was doing in flour, for export, at extreme rates. Wheat sold freely, on higher terms, but the market for corn was flat.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Compared with the previous week, no change of importance has taken place in the wheat trade. Most of the leading markets of consumption have been tolerably well, but not to say heavily supplied with home-grown wheat in good saleable condition. Both red and white samples have changed hands somewhat steadily; nevertheless, no quotable change has taken place in prices. The supplies of wheat, both here and at the various outports, have been seasonably extensive. Selected qualities have sold, chiefly in retail quantities, at full currencies; but inferior descriptions have commanded very little attention. Although the shipments of food from the American and Black Sea ports continue on an extensive scale, holders here have shown no disposition to force sales. Barley has come freely to hand, and the sale for it has been somewhat restricted, on rather easier terms. In the value of malt, scarcely any change has taken place. There has been a steady inquiry for oats, at full quotations. Both beans and peas have ruled quite as high as in the previous week. There has been a fair average business doing in flour, at quite late currencies.

The French markets have exhibited more firmness than of late, and, in some instances, wheat has produced rather more money. All kinds of spring corn have moved off somewhat freely. In the States, produce is in large supply. Prices, however, owing to the large export business to England and France, continue steady.

In Scotland, wheat has moved off slowly, at about previous rates. Barley has given way in price; but all other articles have moved off steadily.

The Irish markets have been somewhat fully supplied with produce. Fine wheat, oats, and maize have changed hands freely, at full currencies. Otherwise, the trade has been in a sluggish state.

At Mark lane, to-day, considerable firmness was observed in the English wheat trade, and both red and white qualities were held at an advance of 1s to 2s per quarter. In some few instances, 1s per quarter more money was obtained. Importers of foreign wheat were very firm in their demands, and all descriptions were only obtainable by submitting to enhanced rates. Some portion of the American supply was withdrawn from the market. Barley was dull, and prices had a downward tendency. Oats, beans, and peas ruled steady, on former terms. The flour trade was firm, and American brands realised an advance of 6d per barrel.

Mr E. Rainford reports the arrival of 40 vessels off coast, and a moderate business doing in floating cargoes, at full prices.

The London averages announced this day are:—

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS, SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The market still presents a quiet appearance, but general quotations are unchanged. Up to yesterday only 1,258 casks West India had changed hands, including the portion of 780 casks offered by auction. Barbadoes, 33s 6d to 41s 6d; Tobago and St Kitts, 34s to 38s per cwt. In other kinds the transactions have been unusually limited. The Nether land Trading Company's Java sale, held on the 26th ult., went off with little animation, and at September rates to ½ florin more. The landings last week were 1,875 tons, and the deliveries 4,360 tons, consequently the stock has further decreased to 74,400 tons. In the three preceding years it was 54,160, 66,000, and 54,700 tons respectively. The home deliveries to this date show a deficiency of 9,500 tons contrasted with last years.

Mauritius.—Of 6,260 bags by auction, on Tuesday, the bulk was taken in, a portion selling as follows, being about the former value: brown, 31s to 35s; black, 28s 6d; soft grainy brown to grey, 34s 6d to 38s 6d per cwt.

Bengal.—2,644 bags were nearly all taken in, including dry white Gurpatta date at 38s to 39s; white Benares, 44s to 46s 6d per cwt. A few small parcels have changed hands by private contract; fine Goosery, 46s 6d per cwt.

Madras.—476 bags grocery sold by auction at 40s 6d to 42s. 472 bags good brown native taken in at 33s per cwt.

Siam.—100 bags yellow and grey, 42s to 43s 6d per cwt.

Foreign.—By auction, 586 boxes clayed Cuba were taken in; brown to good grey, 37s to 45s. 535 casks muscovado chiefly sold at 32s 6d to 38s 6d. Privately, clayed Manilla has sold at 35s 6d per cwt.

Refined.—The market continues inactive. Low to middling dry goods, 48s to 49s; crushed steady at 45s 6d to 46s 6d per cwt. Supplies are still moderate.

MOLASSES.—About 300 puncheons have sold chiefly at 15s to 15s 6d per cwt for West India.

RUM.—Common kinds are in steady demand, at previous quotations. Some fine Jamaica has sold as high as 4s 6d per gallon.

COFFEE.—No alteration is perceptible in this market, which remains firm. 1,152 bags Singapore by auction brought 64s 6d to 66s 6d for

rather more than half, comprising ordinary to good ordinary quality. 100 bags bold Java from the Cape, 73s 6d. 54 casks 300 bags native, small berry to good, 68s to 70s 6d. 340 casks 143 barrels 279 bags plantation, pale and small berry to middling, 73s to 78s. 307 packages longberry Mocha taken in at 135s and 150s, being above the value. Two floating cargoes Rio have sold for the Continent: real good ordinary to good, 58s 3d to 59s 10½d; and one of ordinary at 55s 6d per cwt for the Mediterranean.

COCOA.—433 bags Trinidad were mostly bought in at 64s to 75s per cwt for ordinary greyish to good.

TEA.—The sales have gone off without much animation. 1,885 packages Assam sold steadily, but at a decline on finer sorts of 1d per lb, and on the inferior sorts of 2d per lb. Privately, a steady demand prevails for good to fine new season's congous.

RICE.—This article continues dull of sale.

IMPORTS and DELIVERIES of RICE to November 23, with STOCKS on hand.

	1861.	1860.	1859.	1857.
	tons	tons	tons	tons

Stock	26250	38500	72550	88300

SALTPETRE.—Further extensive purchases have been made at higher rates, partly on American account, and there are now few sellers even at the fresh advance of 2s to 3s established. By auction, yesterday, 316 bags Bengal, refraction 8¾ to 7, sold at 40s to 41s. Privately, fine has last sold at 42s to 43s; to arrive, 40s to 41s per cwt. The market is now flat, owing to the exports from here being prohibited.

IMPORTS and DELIVERIES of SALTPETRE to November 23, with STOCKS on hand.

	1861.	1860.	1859.	1858.
	tons	tons	tons	tons
Imported	10030	11740	17000	9200
Delivered	10600	11650	15950	12880
Stock	2740	3950	4020	2440

The deliveries last week were 276 tons.

SPICES.—31 cases brown nutmegs and 42 cases mace were chiefly bought in at previous rates. 112 bags Zanzibar cloves realised 3¼d to 3⅜d. 240 bags Singapore white pepper went slightly easier, from 6d to 6⅛d. 2,141 bags Singapore: greyish to good black, 3⅞d to 4d. 99 bags shot Malabar, 5⅛d to 5¼d. 580 bags Alleppy partly sold: superior light, 4⅞d to 5d; greyish, 4½d. Of 912 bags pimento, two-thirds sold at 3d to 3¼d per lb. 184 cases Cochin ginger: ordinary rather small and rough to good, 49s to 75s. 62 barrels Jamaica: ordinary to middling, 53s to 75s per cwt.

METALS.—The markets show a decided tendency to improvement. English copper is 5*l* higher; tile, 107*l* 10s per ton; sheet, 1s per lb. More inquiry prevails for iron, and speculative sales are reported in Scotch pig. The last price was 49s 7½d per ton for mixed numbers. Foreign tin is much higher, owing to the advance in Holland. Straits last sold at 120s to 122s on the spot and to arrive. Banca quoted 122s to 123s per cwt. Few transactions have occurred in spelter,—the last was at 18*l* 10s per ton. Lead has been in better demand.

JUTE.—2,635 bales, by auction, were about half disposed of at 13*l* to 20*l* 10s per ton for common to good. A better demand prevails privately.

TURPENTINE.—Quotations nominal. American spirits, 70s per cwt.

TALLOW.—The market continues dull, and foreign has been sold upon rather lower terms. 1st sort Petersburg Y. C., 50s 6d to 50s 9d; 50s to 50s 3d, next month; 51s, January to March; and 52s per cwt for the the latter month only.

PARTICULARS OF TALLOW.—Monday, November 25.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market is flat, and 600 casks West India offered by auction to-day were chiefly bought in. 1,774 casks have sold for the week.

COFFEE.—283 casks 323 barrels and bags plantation Ceylon, and 331 bags 15 casks native sold at about former prices. 52 bales longberry Mocha realised 128s per cwt.

COCOA.—65 bags Grenada were taken in at 63s to 67s per cwt.

RICE.—4,000 bags Rangoon have sold at 11s 3d per cwt.

SALTPETRE neglected.

TALLOW flat at previous quotations. Town reduced to 52s 9d per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar has been quite neglected this week; in some instances 6d less has been accepted by the refiners. Treacle scarce and firm. Crushed, 33s in barrels.

DRY FRUIT.—Valentia raisins have been offered in considerable quantities without reserve, and the article may be quoted 3s to 4s lower. Currants, rain-damaged and low new, show a fall of 1s to 2s.

ENGLISH WOOL.—The demand for long wool still continues.

COLONIAL WOOL.—There is no change to report.

FLAX unaltered.

HEMP.—Market firm, and but few disposed to sell except at full rates.

COTTON.—Sales of cotton, from Friday, 22nd November, to Thursday, 28th November, inclusive:—350 bales Surat at 8¼d to 9d for good to fine Oomrawatty, 8½d to 7⅝d for middling fair Mangarole; 85 Tinnevelly at 8¼d to 9⅜d for middling to good; 150 Western Madras at 7⅝d to 7¾d for good fair—total 585 bales. The market opened quietly, with a very moderate business doing up to Monday, but without change in prices; since that period, owing to the dulness in Liverpool, there have been no transactions, and the news of yesterday of the forcible capture of the Confederate Commissioners by the Federal man-of-war has entirely checked business. Last week's quotations are resumed, but they must be considered quite nominal. Sales for arrival, 650 bales Tinnevelly at 8⅜d to 8¾d per lb, and 150 by a ship overdue at 8⅞d guaranteed good fair, and 400 Oomrawatty at 7⅞d per lb guaranteed middling fair. 50 bales Carriacous are advertised for public sale on Thursday, 5th December.

IMPORTS AND STOCK OF EAST INDIA COTTON IN LONDON.

	Surat. bales.	Madras. bales.	Total. bales.
Imports, 1st Jan. to 29th Nov.	90,814	37,211	128,025
Stock, 29th Nov., 1861	42,137	18,050	60,187
— — 1860	13,398	18,446	31,844

SILK.—Market continues extremely quiet. Prices nominally the same.

TOBACCO.—Demand has been rather less active for home trade. For exportation further sales have been effected, at full prices. Market very firm.

TIMBER.—The stocks of wood are becoming very large. The prices are low, and the consumption is very considerable, but scarcely any one article can be said to realise the import cost, which has been based on the expectation that foreign shippers would reap some advantage out of the import duty remitted in 1860.

LEATHER AND HIDES.—There has been about an average amount of business for the time of year done during the past week in the leather trade, at about late prices.

METALS.—Copper advanced in quotations on 25th inst., but transactions have since been limited so far. Tin has become very buoyant, and foreign is considerably dearer, but the chances of the enhanced rates being maintained are doubtful.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	52	9
Fat by ditto	2	8
Yellow Russias	53	0
Melted stuff	39	0
Rough ditto	22	6
Greaves	18	0
Good dregs	7	0

Imports this week 4,309 casks.

PROVISIONS.

Very little doing in bacon at previous rates. Butter market dull. Friesland fell to 102s. Large arrivals of American; fine qualities making as much as 102s.

METROPOLITAN CATTLE MARKET.

MONDAY, Nov. 25.—The total imports of foreign stock into London, last week, amounted to 6,303 head. In the corresponding period in 1860, we received 8,330; in 1859, 5,931; in 1858, 5,674; in 1857, 4,484; in 1856, 4,014; and in 1855, 5,992 head.

For the time of year, the supply of foreign stock on offer in to-day's market was moderately good, and, on the whole, in fair average condition. The show of home-fed beasts was only moderate as to number; but we observed a decided improvement in their general quality. For all breeds the demand was in a sluggish state, and last week's prices were barely supported. The top quotation for the best Scots was 5s per 8 lbs. From Lincolnshire, Leicestershire, and Northamptonshire we received 2,300 Shorthorns, &c.; from Norfolk, 60 Scots; from other parts of England, 400 various breeds; from Scotland, 240 Scots and crosses; and from Ireland, 800 oxen and heifers. Only a moderate supply of sheep was on offer, and their condition was by no means first-rate. Downs and half-breds commanded a steady sale, at full prices; but all other breeds moved off slowly, at barely previous rates. The top quotation was 5s 8d per 8 lbs. We have to report a fair demand for calves—the supply of which was limited—at Thursday's improvement in value. The best calves realised 5s 4d per 8 lbs.

SUPPLIES.

	Nov. 26, 1860.	Nov. 25, 1861.
Beasts	5300	5120
Sheep	21850	21200
Calves	148	146
Pigs	360	360

THURSDAY, Nov. 28.—Although only a moderate supply of beasts was on offer in to-day's market, the demand for all kinds ruled heavy, at Monday's currency. Thus the extreme value of the best Scots was 5s per 8 lbs. With sheep we were scantily supplied; nevertheless the mutton trade was in a sluggish state, at 2d per 8 lbs less money. The best Downs sold at 5s 6d per 8 lbs. There was only a limited inquiry for calves—the supply of which was small—on former terms. Pigs were dull, and rather lower to purchase. In milch cows very little was doing.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	3	0	3	4	Prime Southdown sheep	5	2	5	6
Second quality ditto	3	6	4	0	Large coarse calves	4	4	4	10

Inferior mutton	3	0	3	6					

HOP MARKET.

BOROUGH, Monday, Nov. 25.—We continue to have a steady demand for every description of the new growth, and fine samples, from their scarcity, realise rather more money. We have more inquiry for old hops. Mid and East Kents, 180s to 195s, choice 220s; Weald of Kents, 147s to 165s, choice 185s; Sussex, 135s to 145s, choice 155s.

...caine's own confession. 33 c...

FRIDAY, Nov. 29.—There is rather less doing in hops, and the market, generally, is in a quiet state. Prices, however, are supported.

POTATO MARKET.

SOUTHWARK WATERSIDE, Monday, Nov. 25.—During the past week the arrivals both coastwise and by rail have been more plentiful. Trade still dull. The following are this day's quotations:—Kent and Essex Regents, 120s to 140s; Yorkshire Flukes, 120s to 140s; ditto Regents, 100s to 130s; Lincolnshire ditto, 90s to 110s; Scotch ditto, 70s to 100s; French whites, 100s to 110s per ton.

FRIDAY, Nov. 29.—The supplies of potatoes are tolerably extensive, and the trade, though far from active, rules steady, at late rates. The best samples from Essex and Kent command 140s per ton.

HAY MARKETS.—THURSDAY.

SMITHFIELD.—Meadow hay, 2*l* 0s to 5*l* 0s; clover ditto, 3*l* 10s to 6*l* 0s; and straw, 1*l* 8s to 1*l* 16s per load. A slow trade.

CUMBERLAND.—Meadow hay, 2*l* 5s to 5*l* 0s; clover, 3*l* 10s to 6*l* 0s; and straw, 1*l* 8s to 1*l* 16s per load. Trade steady.

WHITECHAPEL.—Meadow hay, 2*l* 0s to 5*l* 0s; clover, 3*l* 10s to 6*l* 0s; and straw, 1*l* 8s to 1*l* 16s per load. Supply good.

COAL MARKET.

FRIDAY, Nov. 29.—Wall's-end:—Hetton 19s—Haswell 19s—South Hetton 19s—South Hartlepool 18s—Kepier Grange 18s—Kelloe 18s 6d—Acorn Close 17s 6d—Hedley 17s 6d—West Hartley 15s 9d—Bebside Hartley 15s 9d—Howard's Hartley 15s 9d. 72 ships at market.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Nov. 29.—There has been rather more inquiry for the home trade this week, without however yet resulting in much business. Low wools for export to the States are still sought after, but our market offers very little choice of such kinds.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Nov. 29.—Good attendance at to-day's market. Wheat meets a ready sale at an advance of 3d to 4d per cental; flour, 1s to 1s 6d per barrel; and Indian corn, 1s to 1s 6d per 480 lbs. Mixed, 34s 3d to 34s 6d. Egyptain beans steady sale at late rates. Other articles rather neglected.

The Gazette.

TUESDAY, Nov. 26.

BANKRUPTS.

J. Moore, Ely, innkeeper—I. Gadsby, Chalk Farm, Camden town—C. Highfield, late of Euard st, Caledonian rd, cab proprietor—J. Crick, Soham, Cambridgeshire, innkeeper—J. EPITOME OF RAILWAY NEWS.

TRAFFIC RECEIPTS.—The traffic receipts of railways in the United Kingdom for the week ending the 16th of November amounted to 506,146*l*, and for the corresponding week of last year to 502,626*l*, showing an increase of 3,520*l*. The gross receipts of the eight railways having their termini in the metropolis amounted to 226,246*l*, and for the corresponding week of 1860 to 221,568*l*, showing an increase of 4,678*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, Nov. 25.—The railway market to-day was firm in sympathy with Consols. Midland and Lancashire and Yorkshire were especially buoyant, closing about ¾ per cent. higher; North British likewise improved ¾ per cent.; Caledonian and Great Northern about ½, and other stock ⅛ to ¼. South-Eastern was exceptionally dull, and declined ½ per cent. The business of the day was not extensive. In the colonial department, Buffalo and Lake Huron improved, while Grand Trunk relapsed to 20 to ½. Great Western of Canada shares were quiet at 10¼ to ⅜. Foreign descriptions were steady, and Lombardo-Venetian and Dutch Rhenish left off a fraction higher, the former being last quoted ⅝ to ¾ premium. American securities showed increased buoyancy. The transactions in mines were to a moderate extent only, but prices were generally firm.

TUESDAY, Nov. 26.—The railway market showed increased firmness. Among the more speculative stocks Great Western was chiefly in demand at an advance. London and North-Western, Berwick, North-British, South-Eastern, Great Northern, and Sheffield also improved. There was little business doing. No change of importance took place in colonial descriptions; Grand Trunk stock remained at 20 to ½, and Great Western of Canada shares at 10¼ to ⅜. In the foreign market there was a decline in Pernambuco. Lombardo-Venetian were steady at ⅝ to ¾ premium. American securities were less firm, a reaction especially occurring in Erie ordinary and preference shares and Illinois Central. Mines were rather dull. East Carn Brea, however, improved. St John del Rey and United Mexican were quoted lower. In joint stock banks there was a rise in London Chartered of Australia. In miscellaneous descriptions, Victoria Dock stock and Australian Agricultural shares advanced, while a reduction took place in Electric Telegraph.

WEDNESDAY, Nov. 27.—In the railway market to-day there was considerable excitement, the appearance of the American news causing a general and heavy fall. Midland especially was negotiated as low as 130, and Lancashire and Yorkshire at 106½, being a decline of between 2 and 3 per cent. Towards the close there was a less unfavourable feeling, and a partial recovery occurred. Compared with yesterday, however, the final prices showed an average reduction of 1 per cent., Midland, Lancashire and Yorkshire, and London and North-Western remaining the heaviest stocks in the market. In the colonial market there was less depression than in British descriptions, but several Indian guaranteed stocks were quoted lower. Foreign shares were flat. Bahia, San Paulo, Sambre and Meuse, and Lombardo-Venetian especially exhibiting a decline. Dutch-Rhenish slightly improved. Canada, New Brunswick, and Novia Scotia debentures showed a reduction. In American securities, a fall took place in Erie and Illinois Central shares. Mines were dull and occasionally depressed. United Mexican, however, advanced. Joint stock banks and miscellaneous descriptions closed about the same as yesterday.

THURSDAY, Nov. 28.—The railway market to-day was again dull and unsettled, and closed at a further decline. Midland, Lancashire and Yorkshire, and South-Eastern showed the greatest heaviness, the two former being especially affected by the possibility of a rupture with America. Other descriptions also receded, the average fall being about 1 per cent. South-Western was exceptionally steady. In the colonial market, a reduction took place in Buffalo and Lake Huron, Grand Trunk, and Great Western of Canada. India guaranteed stocks were also lower, but are slow to fall, owing to the satisfactory accounts from Calcutta. A general decline occurred in foreign descriptions, Brazilian and Belgian being especially heavy. Lombardo-Venetian closed at ⅜ to ½ premium. New Brunswick, New South Wales, and Nova Scotia debentures were flat. American securities have experienced a rather severe fall, particularly United States Five per Cents., Erie shares, and Illinois Central. There was little business doing in mines, but prices were generally firm.

FRIDAY, Nov. 29.—The railway share market was extremely depressed, and prices showed a further heavy reduction. Lombardo-Venetian Railway shares declined to ½ to ¼ prem. Indian, Canadian, Brazilian, and other foreign railway shares were generally worse.

The Economist's Railway and Mining Share List.

THE HIGHEST PRICES OF THE DAY ARE GIVEN.

KENTISH TOWN COLLEGIATE SCHOOL, N.W.—Head Master, DR SHERRIN, F.R.G.S.—The above school offers high advantages to parents seeking for their sons sound practical tuition, combined with domestic comfort, and careful moral and religious training. Premises very commodious. Situation most healthy. Masters selected with great care. For prospectus and references, which are unexceptionable apply to Head Master, Leighton House, Kentish town.

FREEDOM FROM COUGH IN TEN MINUTES is insured by DR LOCOCK'S PULMONIC WAFERS. From Mr James Fronde, chemist, Dorchester:—"A gentleman, a clergyman, called on me this afternoon, and expressed himself with much pleasure of the decided benefit his sister had received. She had been for some years the subject of a most distressing cough. The remedies usually employed by the profession had not succeeded in affording relief; but on trying Dr Locock's Wafers benefit was almost instantly derived, and by a little steady perseverance, the cough, which was before distressingly troublesome, is now perfectly cured." To singers and public speakers they are invaluable for clearing and strengthening the voice. They have a pleasant taste. Price 1s 1½d, 2s 9d, and 11s per box. Sold by all medicine vendors.

CAUTION.

The public is cautioned against purchasing any (so-called) "Pulmonic" Medicine, "Locock's Pills," "Lotion," "Bark," "Tooth Powders," or any such catchpenny things, under the belief that they are connected with "Dr Locock's Wafers." This caution has often been given before; but it is still, from time to time, found that some persons try to foist such articles upon the public. The only genuine medicines are, "Dr Locock's Wafers, and "Dr Locock's Cosmetic" (for the complexion); all others are an imposition upon the public.

FRAMPTON'S PILL OF HEALTH, Price 1s 1½d and 2s 9d per box

This excellent Family Pill is a medicine of long-tried efficacy for purifying the blood, and correcting all disorders of the stomach and bowels. Two or three doses will convince the afflicted of its salutary effects. The stomach will speedily regain its strength; a healthy action of the liver, bowels, and kidneys will rapidly take place; and renewed health will be the quick result of taking this medicine, according to the directions accompanying each box.

Persons of a Full Habit, who are subject to headache, giddiness, drowsiness, and singing in the ears, arising from too great a flow of blood to the head, should never be without them, as many dangerous symptoms will be entirely carried off by their timely use, and for elderly people, where an occasional aperient is required, nothing can be better adapted.

These Pills require no restraint of diet or confinement during their use; and in consequence of the great and increasing demand, the Proprietor has obtained permission from Her Majesty's Commissioners to have the name and address of "Thomas Prout, 229 Strand, London," impressed upon the Government stamp affixed to each box. Sold by all venders of medicine.

JOZEAU'S COPAHINE, or SACCHARATED CAPSULES.—Copaiba and Cubebs are, doubtless, the best remedies, but these drugs are of a repulsive taste and odour, and occasion colicky pains, nausea, and gastric disturbance. M. Jozeau has succeeded in rendering these valuable therapeutic agents perfectly innocuous by increasing, in in his Copahine, all the curative properties. This preparation has been adopted by the Paris Academy of Medicine, after more than a thousand trials in Paris and the different London hospitals, viz., St Thomas's, Guy's, and St Bartholomew's, under the care of Messrs Lloyd, Poland, and Legros Clark, LANCET, Nov. 6, and Dec. 10. 1857. The Copahine, which is in form of a pretty pink sugar-plum, effects a cure in about six days, either in recent or chronic diseases. 100 capsules, 4s 6d; post free, 5s 2d. Post-office order required; at G. Jozeau's, French Chemist, 49 Haymarket, London; 22 Rue St Quentin, Paris; and all the most important Chemists.

AT HAMBLY HOUSE ACADEMY, Streatham Common, Surrey, Young Gentlemen are carefully Educated for the Public Schools, Military Colleges, Professions, or Commerce, by Mr R. S. TROUSDALE, L.C.P., aided by highly qualified assistant masters.

The domestic arrangements are on the most liberal scale; and the house is very delightfully situated. The terms for pupils under ten years of age, 30 guineas per annum; ten and under fourteen, 35 guineas per annum; fourteen, 40 guineas per annum. The above amount includes board and instruction in the Latin, Greek, French, and English Languages, Writing, Arithmetic, Merchants' Accounts, History, Geography, the Use of the Globes, Astronomy, Geometry, Algebra, and the other branches of the Mathematics. A library is devoted to the instruction and amusement of the pupils during their leisure hours. Religious works are provided for Sunday perusal; and lectures on various popular subjects are occasionally delivered. German, Drawing, Dancing, and Music, on the usual terms. Washing, half-a-guinea per quarter. Drilling during the summer months, at a trifling charge; and board during a vacation, four guineas. All accounts are expected to be settled quarterly. Excellent accommodation for foreigners or gentlemen of neglected education. A quarter's notice of removal is required.

EDUCATION.—International.—The Royal Continental Collegiate Institute (limited to 20 young gentlemen), on Bushey heath, three miles from Harrow station and two from Watford, Principal, Dr Vellère, late of the Harrow Preparatory School. This school is highly recommended for three reasons—first, for very excellent board, liberal supply, judicious treatment, great success in education, and, above all, as preferable to going abroad with regard to acquiring the French language perfectly; secondly, for very moderate and strictly inclusive terms, within the reach of nearly every one; and, thirdly, that no case of illness has ever occurred since the school has been established in 1857, a fact which has never been heard of in any other school, not even those excepted at the sea-side. From the great attention incessantly paid by the principal to his pupils' comfort, happiness, and future welfare, he trusts that he will be patronised by a discriminating public. Travelling expenses beyond 25 miles are entirely paid by him. The quarter or half-quarter is dated from the day of the arrival of the pupil. Terms from 30 guineas upwards. Address, stating age and requirements, Dr Vellère, Bushey heath, Watford.

PRACTICAL OBSERVATIONS on the CAUSES and TREATMENT of CURVATURES of the SPINE. Third edition, price 6s.

AND

Just published, second edition, price 1s 6d,

CASES and OBSERVATIONS illustrative of the beneficial results which may be obtained by close attention and perseverance, in some of the most unpromising instances of Spinal Deformity; with numerous Engravings.

By SAMUEL HARE, F.R.C.S., &c.

"The author has had much success in his plan of treatment, and we are of opinion that the principles on which he acts, in the treatment of these affections, are correct."—LANCET.

London: John Churchill; and may be had of all booksellers

TEETH.—REGISTERED PNEUMATIC VENTILATING PALATE.—Discovery of a new principle in dentistry, and great reduction in price.—Mr LEWIN MOSELY, 30 Berners street, W., established 25 years, offers for inspection Specimens of all the latest inventions in ARTIFICIAL TEETH. His PNEUMATIC VENTILATING PALATE is recognised as the best combination of improvements submitted to the medical profession, supplying all dental deficiencies without extraction of stumps or any painful operation. Sharp edges, wires, springs, ligatures, and all metals, especially avoided, rendering impossible unpleasant secretions and vitiated breath (hitherto causes of general complaint). This Palate may be added to teeth in wear, and defies competition for cheapness and durability. Consultation and every information free. Success guaranteed in all cases by Mr Lewin Mosely, 30 Berners street, Oxford street, W.

HOLLOWAY'S OINTMENT AND PILLS.—COLDS, INFLUENZA.—Until within a very few years these complaints were treated with blood-letting, blistering, and emetics. Now a more rational mode of cure has been adopted: Holloway's Ointment and Pills purify, heal, and strengthen. They neither weaken the body, nor disconcert the nervous system. Depletion, doubtless, arrested these diseases, but at the same time it took away nature's means of restoration. Holloway's remedies, on the contrary, while working the cure, are laying the foundation for perfect recovery not only of the afflicted, but every organ. Holloway's preparations are also the best preservatives against the whole list of winter ailments; they throw out impurities, preserve the vital principle from disease, or lead it back to health.

DR KAHN ON MARRIAGE.—A new and entirely re-written edition (the forty-seventh of this celebrated treatise), with illustrations, engravings, &c., is now ready.

The object of the work is not to maintain any particular hypothesis, but to enable every one to understand for himself the structure and functions of the organs concerned in the fulfilment of the physical obligations of the married state; to acquaint him with the consequences arising from excesses; to prevent unnecessary misapprehension from unfounded fears, and to indicate, when those fears are well founded, the means of speedy relief. The work is not crowded with the technicalities of ordinary professional books, nor does it present the crudeness which characterises the so-called "popular works" on the subject.

Price One Shilling, free by post for thirteen stamps, or in a sealed envelope twenty stamps, either from the publisher, J. Allen, 20 Warwick lane; or from the author's address, 17 Harley street, Cavendish square, London, where he may be consulted daily.

WHOLESALE IRONMONGERY.

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Bottles and Casks, and on Draught, from all the most respectable wine and beer merchants and licensed victuallers, on "ALLSOPP'S PALE ALE" being especially asked for.

When in bottle, the genuineness of the lable can be ascertained by its having "ALLSOPP and SONS" written across it upon red and white ground striped.

The Brewery, Burton-on-Trent, April 30, 1860.

THE GREAT FIRE.—Destructive Fire at the Jarrow Docks Station, on the North-Eastern Railway.—"Collector's office, Tyne Dock, South Shields, 28th Jan., 1861. Gentlemen,—In reply to your favour of the 25th inst., respecting the state and contents of one of your Safes after the fire at this office on the 31st ult., I have to inform you that it was subjected to a very hot fire for three or four hours, and must at one time have been nearly red hot, as the workmen were not able to touch it for two or three hours after the fire was extinguished. On the Safe being opened, the books and cash were found to be in good condition. The cash boxes contained both notes and cheques, the whole of which were quite safe. I am, gentlemen, yours respectfully, R. THURSON. Messrs Milner and Son, Phœnix Safe Works, Liverpool, and 47A Moorgate street, City, London." Note:—Another party says, "I have seen the Safe, and it has had a regular roasting. There was a large amount in bank notes and several bags of gold in the drawers, and the principal books above. Everything else in the building was entirely destroyed; nothing left but the bare walls."

SWANN AND CO.'S STOURPORT MALT VINEGAR for BICKLING.

"The best known."—Vide "Lancet," Feb. 14 and Aug. 29, 1852.

CITY DEPOT—WHITMORE and CRADDOCK, 16 Bishopsgate street within, London, E.C., opposite "The Baltic" Coffeehouse.

Shippers and the trade supplied on best terms.

GLENFIELD PATENT STARCH, USED in the ROYAL LAUNDRY.

The Ladies are respectfully informed that this Starch is EXCLUSIVELY USED in the ROYAL LAUNDRY, and Her Majesty's Laundress says, that although she has tried Wheaten, Rice, and other Powder Starches, she has found none of them equal to the GLENFIELD which is the FINEST STARCH SHE EVER USED.

WHEN YOU ASK FOR

GLENFIELD PATENT STARCH,

see that you get it, as inferior kinds are often substituted

WOTHERSPOON and CO., Glasgow and London.

Any single article may be had at the same price quoted for it in the different lists. For particulars see illustrated catalogues published by, and which can be had free by post from William S. Burton, 39 Oxford street (corner of Newman street); 1, 1A, 2, 3, and 4 Newman street; 4, 5, and 6 Perry's place; and 1 Newman mews.

A BOON TO NERVOUS SUFFERERS.—Twenty Thousand Copies of a Medical Book, for gratuitous circulation. HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., who has devoted fifteen years to the study and treatment of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, will send free, for the benefit of Nervous Sufferers, a copy of the New Medical Guide, containing his highly successful mode of treatment, with necessary instructions, by which sufferers may obtain a cure. Post free on receipt of a stamped directed envelope. Address Dr Henry Smith, 8 Burton crescent, Tavistock square, London, W.C.

DR CURTIS'S MEDICAL WORK "MANHOOD," An Essay on Nervous and Generative Diseases.

The 140th thousand, with numerous plates, in a sealed envelope, price 1s., or post paid, by the Author, for twelve stamps.

MANHOOD: THE CAUSE AND CURE of PREMATURE DECLINE in MAN, with Plain Directions for Perfect Restoration to Health and Vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, the result of twenty-five years' successful practice. By Dr J. L. CURTIS, 15 Albemarle street, Piccadilly, London. Consultations, Ten till Three and Six till Eight.

REVIEWS OF THE WORK.

"We feel no hesitation in saying that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a parent, preceptor, or clergyman."—SUN, evening paper.

"Dr Curtis has conferred a great boon by publishing this little work, in which is described the sources of those diseases which produce decline in youth, or more frequently premature old age."—DAILY TELEGRAPH, March 27, 1858.

N.B. The author of the above Medical Treatise may be consulted, as usual, either by letter or personally, at his residence. The efficacy and harmless nature of the remedies employed by Dr Curtis having been demonstrated by the most complete success during a practice extending over a period of 20 years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

Published by Allen, 20 Warwick lane, Paternoster row; Mann, 39, Cornhill; and free from the Author for 12 stamps.

GAME LICENCES.

THE COMMISSIONERS OF INLAND REVENUE hereby give notice, that LISTS containing the Names of all Persons who have taken out LICENCES TO KILL and DEAL IN GAME, in the current Year to 30th September last inclusive, have been printed for each Excise Collection, and that a Copy thereof may be obtained GRATIS by any Person on application at this Office, or to the Collector or Supervisor of Inland Revenue, Distributor or Sub-distributor of Stamps, in the country.

The Commissioners further give Notice, that instructions have been issued to their officers to take the necessary steps to prefer informations for penalties against all persons found in pursuit of or dealing in Game without licence. THOS. DOBSON, Secretary.

Inland Revenue, Somerset House, London, Nov. 25, 1861.

FORD'S COLOURED FLANNEL SHIRTS.—Patterns of all the newest designs in fancy wove and printed flannels sent per post free.

RICHARD FORD and CO., Patentees, 38 Poultry, London.

FORD'S EUREKA SHIRTS, known from Cornhill to China, for the last ten years, as the acme of perfection for fit and quality. Where difficulty occurs in procuring Ford's Eureka Shirts, send to the Patentees.

RICHARD FORD and CO., 38 Poultry, London, E.C.

"MIMEMA."—Her Majesty's Royal Letters Patent have been granted to Richard Ford and Co., of 38 Poultry, London, for the Mimema, or Demi-Shirt, which is intended to be worn over an outside flannel shirt, giving the appearance of dress at any time without the necessity of changing the flannel shirt, and thus preventing taking cold. The Mimema is made of long-cloth, with plain and fancy linen fronts and wrists, and being close fitting, not the slightest incumbrance is experienced by the wearer. An illustrated price list, with instructions for measurement, sent free on application. Wholesale and retail by the Patentees, RICHARD FORD and CO., 8 Poultry, London, E.C.

DINNEFORD'S PURE FLUID MAGNESIA has been, during twenty-five years, emphatically sanctioned by the Medical Profession, and universally accepted by the Public, as the Best Remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion, and as a Mild Aperient for delicate constitutions, more especially for Ladies and Children. Combined with the Acidulated Lemon Syrup, it forms an agreeable Effervescing Draught, in which its aperient qualities are much increased. During hot seasons and in hot climates, the regular use of this simple and elegant remedy has been found highly beneficial. Manufactured (with the utmost attention to strength and purity) by DINNEFORD and CO., 172 New Bond street, London; and sold by all respectable chemists throughout the Empire.

THE FRENCH AND GERMAN PROTESTANT COLLEGE, Netherton House, Clapham, Surrey, combines the comforts of an English home with the advantages of a Continental Education. The French and German Languages, so indispensable to a good education, are taught by resident masters. They give lessons daily. The course of instruction adopted secures for young gentlemen a sound English, Classical, and Mathematical Education, combined with Drawing, History, Geography, and Modern Science. Pupils prepared for the military, naval, merchant, and civil service examinations. Terms, inclusive, from thirty to fifty guineas per annum, according to age and requirements. A difference will be made for two Pupils from the same family. For references and prospectuses apply to Monsieur A. de Chastelain, as above.

DR DE JONGH'S (Knight of the Order of Leopold of Belgium) LIGHT-BROWN COD LIVER OIL has afforded immediate relief, arrested disease, and restored health in countless instances where other kinds of Cod Liver Oil had been long and copiously administered with little or no benefit.

CONSUMPTION and DISEASES of the CHEST

Hospital, dispensary, and private practice, all furnish innumerable cases in which Dr de Jongh's Cod Liver Oil, containing peculiar curative principles which no other Oil possesses, has been administered with the happiest results in Consumption and Diseases of the Chest. The distinguished Physician, Dr Hitchman, author of "On Consumption and its Successful Treatment," observes—"Having extensively prescribed Dr de Jongh's Light-Brown Cod Liver Oil for a long series of years in cases of Consumption, I deem it but an act of justice to record my emphatic testimony in favour of its superior merits as a preventive of Emaciation, and generally as an excellent restorative in Debility and Diseases of the Chest."

ASTHMA, BRONCHITIS, COUGHS.

The effects of Dr de Jongh's Oil have been singularly beneficial in the treatment of Asthma, Chronic Bronchitis, Dry Cough, and Humid or Winter Cough. Arthur Cridland, Esq., an eminent Surgeon, in bearing testimony to its efficacy in his own case of severe bronchial and laryngeal irritation, observes—"After taking Dr de Jongh's Oil for a few days, its good effects commenced; I regained my usual health and strength, and entirely lost the laryngeal irritation, which was of a most harassing and fearfully distressing character. It is therefore with much pleasure I beg to add my testimony to the excellent results attendant on Dr de Jongh's Oil."

Dr de Jongh's Light Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; capsuled, and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists.

It is also sold by the Patentees, ground into paint, each cask stamped "HUBBUCK, LONDON, PATENT," to counterfeit which is forgery.

Extract from the Report of NATHAN MERCER, Esq., F.C.S.

7 Church street, Liverpool, April 6th, 1859.

On Saturday I visited the iron ship "William Fairbairn," for the purpose of ascertaining whether or no her plates had been affected by the red lead with which she was coated previous to her late voyage to Calcutta. She was in the hands of the scrapers, and showed the great extent to which the iron had been corroded, patches of rust protruding through the paint, and being thickly spread over the unscraped portions. The red lead coating was covered with blisters, from each of which, on being opened, a clear fluid escaped, and left exposed on the surface of the iron a number of brilliantly shining crystals of metallic lead, and that they were formed at the expense of the iron, was evident from the corroded and pitted appearance of the plate beneath every blister. The fluid from the blisters is produced by the combination of the chlorine of the sea-water with the iron of the ship, showing that the "sweat," so well known to every person interested in iron ships, is not salt water, but a solution of chloride of iron.

On those portions which had been scraped, this "sweat" was exuding from every pore; and on looking along the surface, myriads of glittering particles of lead were seen.

The injurious effects produced by red lead were unmistakeable and self-evident.

Greenock, 7th August, 1859.

GENTLEMEN,—My object in writing to you, is to call attention to the state of the frames and plating of the iron ship "Thomas Hamlin." This vessel, when built eight years ago, was coated inside and outside with your Zinc Paint; the inside coating has never been renewed.

From the reports on other ships of even less age, I was led to fear that both the plates and rivet heads might be a good deal destroyed, the ship having had frequently sugar cargoes home from India, and molasses from the West Indies.

When the ship was opened fore and aft for the inspection of Lloyds' surveyors in London, my pleasure was not less than the surprise of those gentlemen, Messrs Ritchie and Light, to find that both the frames, plates, and rivet heads were as good as the day on which they were coated when the ship was building; in fact, to use the expressive words of the surveyor, nothing could be better.

The iron of the plates, rivets, and frames, were no doubt good originally, but the high state of preservation I attribute to having had them coated, before any red oxide had formed on them, with your Zinc Paint.—I am, Gentlemen yours very truly, JAMES HAMLIN.

A WELCOME ANNOUNCEMENT.

E. MOSES AND SON beg respectfully to acquaint the public that they have made preparations, on an unprecedentedly large scale, for the Autumn and Winter Seasons. Their stock of OVERCOATS comprises every modern style in all kinds of seasonable and serviceable materials, with the latest improvements in workmanship. The Eversley and Shelburne overcoats are particularly recommended.

Their general stock includes every description of attire for all classes, all ages, and all occupations; the articles are too numerous to particularise, but may be gathered from their several trades of—

READY-MADE AND BESPOKE TAILORS, HABIT MAKERS, WOOLLEN DRAPERS, HATTERS, HOSIERS, BOOT AND SHOE MAKERS, AND GENERAL OUTFITTERS.

Their BESPOKE CLOTHING DEPARTMENT is too important a branch of their business to be passed over without a special notice. It offers a perfect fit, combined with the most fashionable and comfortable styles, and the most elegant workmanship.

E. MOSES and SON need scarcely remind the public that in every department of all their establishments the Highest Degree of Excellence is associated with Prices the Most Moderate.

Any article not approved of will be exchanged or the money returned.

A card of Fashions for the present season, with rules for self-measurement and lists of prices post free.

E. MOSES and SON'S establishments are closed every Friday evening at sunset till Saturday evening at sunset, when business is resumed until Eleven o'clock.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

ELASTIC STOCKINGS, KNEE CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price, 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.

WHITE, MANUFACTURER, 228 Piccadilly, London.

DR MARSTON'S LECTURES—FREE ISSUE.—The following Lectures are ISSUED GRATUITOUSLY by the Professors of the Royal Institute of Anatomy and Science, 369 Oxford street, London, Firstly, as a mark of esteem to their distinguished colleague, Dr MARSTON, M.R.C.S., L.S.A., and Secondly, from a conscientious belief that the Lectures will do a vast amount of good by enlightening the public upon subjects of the highest importance to their moral welfare and physical health, ignorance of which has to the present day been a most fruitful cause of human suffering and misery.

No. I.—NERVOUS DEBILITY (the result of youthful error), loss of memory, shortness of breath, dimness of sight, exhaustion, and general incapacity. Addressed specially to Young Men.

No. II.—MARRIAGE: Its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who desire Children.

No. III.—THE BRAHMIN'S ELIXIR OF LIFE: Its History—Secret Remedies of the Hindoos no Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Reinvigorator of the Impaired Functions, and in all Cases of Nervous Debility.

No. IV.—THE DISEASES INFLICTED UPON MANKIND BY THE GREAT SOCIAL EVIL. With a simple means of complete Cure without Mercury.

"These lectures contain Dr Marston's experience during Twenty-five Years of Successful Practice, and point out to those who need it Simple yet Effectual means of complete restoration to vigorous health."—MEDICAL JOURNAL.

State the No. of the Lecture required, and enclose 2 Stamps to prepay postage; or the whole Four may be had, neatly bound, 164 pages, octavo, post free, for 6 Stamps.—Address, Treasurer, Royal Institute, 369 Oxford street, London.

WEST HARTLEPOOL HARBOUR and RAILWAY.
DOCK EXTENSION.

(Extension of Dock Works at West Hartlepool; Additional Share and Loan Capital; Provisions as to Share and Loan Capital; Further Subscriptions to Cleveland Railway; Provisions for Intercommunication between Cleveland Railway and West Hartlepool Railways; Amendment of Acts, &c.)

Notice is hereby given, that application is intended to be made to Parliament in the ensuing session for leave to bring in a Bill for the following purposes, or some of them, that is to say:—

To authorise the West Hartlepool Harbour and Railway Company, in this notice referred to as the Company, to make and maintain a new cut or channel commencing in or from and out of a dock called the Ward Jackson Dock, at or near the north-western corner of such dock, in the township of Stranton, in the parish of Stranton, in the county of Durham, and terminating at or near a road at the southern extremity of the timber dock or timber pond known as the Timber Pond No. 2 of the Company, in the said township and parish of Stranton.

Also, to make and maintain a new dock or docks, by the conversion into a deep-water dock or docks of the said timber dock or timber pond No. 2, and of a timber dock or timber pond known as the Timber Pond No. 3 of the Company, by deepening, altering, extending, widening, or otherwise improving such timber docks or timber ponds, or either of them, or any part or parts thereof, commencing in the said parish and township of Stranton, by a junction with the intended new cut or channel at the northern end of such cut or channel, and terminating at or near to the northern embankment of the timber dock or timber pond No. 3, in the township of Hart, in the parish of Hart, in the said county of Durham.

Also, to divert, alter, or stop up a certain road in the said township of Stranton, leading to Middleton from and out of the public highway between West Hartlepool and Hartlepool and Middleton, or some part or parts of such road.

In connection with such intended cut, channel, and dock or docks, and for the purposes of the existing docks and the accommodation of the trade and commerce of West Hartlepool, and of shipping, to authorise the Company to make and maintain quays, locks, basins, timber ponds, bridges, tramways, warehouses, sheds, and other works and conveniences connected therewith, and to divert or alter any railways, tramways, roads, cuts, locks, or communications required to be diverted or altered for the purposes of the intended works.

All the above works and the lands to be taken or used for the purposes thereof will be made, or are situate in, or will pass, from, in, through, or into, the several parishes, townships, and extra parochial places of Stranton Township, Stranton Parish, Hart Township, Hart Parish, West Hartlepool, or some of them, in the county of Durham.

To authorise the Company to levy tolls, rates, and duties, to alter existing tolls, rates, and duties, to confer, vary, or extinguish exemptions from the payment of tolls, rates, and duties. To purchase lands and houses compulsorily, and to use and appropriate any lands belonging to the Company for the purposes of the said Bill, and to vary and extinguish all rights and privileges, which would in any way interfere with the objects and purposes of the said Bill.

To authorise the Company to raise further capital by the issue of shares or stock, with or without any preference or priority in payment of dividend over the ordinary capital of the Company, or with other privileges or advantages; and to authorise the Company, with or without any increase of the share capital, to raise any further sums of money by mortgage or bond; and to charge or apportion all or any part or parts of the money already borrowed, or to be borrowed by the Company, whether exceeding or not exceeding one-third of the share and stock capital of the Company, upon the undertaking of the Company, or upon any part or parts of the undertaking or revenues of the Company, exclusively of any other part or parts of such undertaking or revenues, or upon other special conditions, and to make other provisions with reference to the share or loan capital of the Company, and the augmentation thereof and with reference to the liabilities of the Company.

To authorise the Company to subscribe towards, and hold additional shares in the capital of the Cleveland Railway Company; and to apply, for the purpose of their subscriptions to that Company, any capital already raised, or to be authorised to be raised, under the powers of the intended Bill.

To authorise the Company to provide and use vessels of any description, for the purpose of maintaining the intercommunication between the wharfs, staiths, and landing places of the Company on the River Tees, and the pier and shipping places of the Cleveland Railway Company sanctioned by the Cleveland Railway Act, 1861; and to convey the traffic by such vessels, and to charge rates or fares for the use thereof, and to apply for those purposes any capital of the Company or money to be raised under the powers of the intended Bill.

To make provision for the prevention of interruptions and impediments to the passage of the traffic carried by vessels between the works of the West Hartlepool Harbour and Railway Company and of the Cleveland Railway Company respectively on the River Tees, and for the punishment of persons creating such interruptions or impediments, and for the imposition of penalties, and to require the dredging or keeping open the access to such works, and to enable the Company in certain events to do such dredging and keep open the said river adjacent to such works, and to make provision for the settlement of disputes between the Company and the Tees Conservancy Commissioners or any other parties.

To alter, amend, enlarge, or repeal, as far as needful, the powers and provisions of the several Acts following, namely—"The West Hartlepool Harbour and Railway Act, 1852;" "The West Hartlepool Harbour and Railway Act, 1857;" "The West Hartlepool Harbour and Railway Company's Capital Act, 1861;" "The West Hartlepool Harbour and Railway Traffic, &c., Act, 1861;" "The Cleveland Railway Act, 1858;" "The Cleveland Railway Act, 1861;" "The Tees Conservancy and Stockton Dock Act, 1852;" "The Tees Conservancy Act, 1854;" and "The Tees Conservancy Act, 1858."

On or before the 30th of November instant, plans and sections describing the lines and levels of the intended new docks, cut and works, and the lands, houses, and property which may be taken or used for the purposes thereof, with a book of reference to the plans containing the names of the owners or reputed owners, lessees or reputed lessees, and occupiers of such lands, houses, and property, and a copy of this notice, as published in the LONDON GAZETTE, will be deposited with the Clerk of the Peace for the county of Durham, at his office in the city of Durham; and, on or before the same day, a copy of so much of the said plans, sections, and book of reference as relates to any of the parishes aforesaid, in or through which the said intended new docks, cut, and works will be made, with a copy of the said notice, will be deposited with the parish clerk of each such parish at his residence.

Printed copies of the intended Bill will, on or before the 23rd day of December next, be deposited in the Private Bill Office of the House of Commons.

Dated this 9th day of November, 1861.

PROSPECTUS.

This Company holds the celebrated Lead and Copper Mines of Sir Carbery Price, known as Esgair-hir and Esgair-fraith, situate in the rich mineral district of Cardiganshire.

About 160 years ago several publications appeared, showing the extraordinary richness of these lodes, and the immense profits to be derived from them if they were worked with adequate capital. Among these was one by Mr Waller, who had had "long practice and experience in the mining trade," entitled "An Essay on the Value of the Mines, late of Sir Carbery Price," and published in 1698. Waller truly remarks, "If a man has the richest mines in the world, even Potosi itself, and yet is not willing himself to raise a competent stock (capital), to make levels, &c., and carry on the works, nor will part with them to others that are, he can expect no profit from them, though ever so rich and profitable in their own nature; and this accident does not lessen the intrinsic value of the mines to men that have both stock and skill to manage them. And (he adds), to such it is not doubted, but these mines in a few years, will be worth above a million of money."

In 1691* a lease of the mines was granted to a Company, and operations carried on to some extent. Waller gives many details and wonderful statements of the richness of the lodes, and among others he says, "There are in the North of England many rich mines discovered, but there are none in England or Wales that can pretend to come near the value of the famous mines of Sir Carbery Price. I have not read or heard of such a mine of lead in all the world as the great vein, which is 11 feet wide betwixt its firm sides, and 7½ feet already in pure ore, which still increases downwards, and it is not doubted but at last it will come to be 11 feet wide in ore. And I humbly conceive, I may confidently affirm, that no history hath yet given us an instance of so many rich mines, both of lead and copper, lying so near together." He also states that, in the year 1693, before the copper mines were discovered, Sir Carbery Price, having recovered his right from the patentees of royal mines, divided his interest therein into 4008 shares, whereof each share was valued and sold at £17 per share; and for the other moiety he was afterwards offered £40,000 by an eminent merchant in this city, to be immediately paid down, which he refused for this reason—that I had then demonstrated to the said Sir Carbery and his partners that with a sufficient stock he would be able, in a few years, with 600 men, to bring in a clear profit from one of the said veins of £70,500 per annum, as by a paper printed in the year 1693 may appear." At that time it may be mentioned, the price of lead was barely half what it is now; while the mode of working mines was then far less efficient and more expensive, it having been difficult to carry the operations beyond a comparatively shallow depth.

Many more similar extracts might be given, but it will suffice to add, that the returns were of that importance that works were erected at Neath for smelting the ores.

One or two limited attempts have been made in later years to work the mines, which are yet only 30 fms below adit (or about 60 fms from surface), and although the last Company opened little or no new ground, either by sinking or driving the levels, they sold £20,000 of ore in about three years, principally discovered by crosscutting the lode, and breaking down the sides of the old levels.

The present Company have been carrying on operations for some time, and have sold about £5,000 worth of lead and copper ores. They have recently had the property thoroughly examined by some of the best practical authorities, whose reports will be found in the accompanying circular.

It will be seen that the lode is one of extraordinary width, being in places as much as nearly 100ft., and therefore, although when deposits of ore are met with they are of unusual extent, yet it requires care and judgment in the system of working, as only a very small part of the lode can be seen in merely driving the levels. In order also to work the mines with spirit, and in a manner that will probably lead to early successful results, it is necessary to carry on more extended operations. The lode is quite untouched for a great length in the sett, and it is stated that in all the ground that has been worked in these mines, "there is none of the surface of the lodes that offered a richer show of minerals, gossans, &c.," than those places now recommended for trial.

Messrs Phillips and Darlington state in their report, "It is quite certain that the old men made enormous returns from the ground near the surface, and that the mine has from time to time commanded very considerable attention;" and they conclude, "Having regard to the large produce of ore which it is known to have afforded, the peculiar mode in which it is disposed, and the limited depth yet attained, we conclude that the undertaking is not only deserving of an adequate trial, but with a sufficiency of capital, we should expect good remunerative results in depth, as well as from many points in the neighbourhood of the old workings."

In their letter of 7th October, 1861, they express their favourable opinions still more forcibly, thus—"During our recent visit to this property, we were unable to examine the whole of the Potosi workings, but from the large and interfoliated character of the lode, and the evident absence of adequate systematic explorations, we are induced to believe that a considerable amount of valuable ore ground still remains unworked. The lode is, as before remarked, an exceedingly powerful one, and will, from its peculiar nature, require to be worked with great skill and good judgment, taking care to lay open a sufficient extent of ground to secure permanent and regular returns.

"In order to proceed in this way, it would be requisite that adequate capital should be provided, and in case of this being found, we are of opinion that the Cardigan Consols Mine offers more than average security for the money so employed.

"We may further observe, that the lode in this mine appears to be very analogous to that of Wildberg, in Germany, which, under our management, returned about £55,000 worth of ore in a period of 2½ years, and which undertaking has been worked during several centuries, and at various periods afforded large profits to the proprietors."

Among the reports will be found a joint one from the managing agents of the Dyliffe and Dyfngwm mines, who have minutely examined the Cardigan Consols property, and having traced the lode for the distance between these mines, they confirm the previous belief that Cardigan Consols is on the Esgair-gold lode of Dyliffe. The Dyliffe mines were purchased about three years ago by Mr Bright, M.P., and his friends, for the sum of £24,000, and they were bound also to lay out £10,000 in explorations, &c. The returns are now upwards of 200 tons of lead ore per month, which it is believed yield a profit of about £1,000 per month. At Dyfngwm (adjoining Dyliffe) they are making a profit of about £200 per month, and likely to improve.

The managers of Dyliffe and Dyfngwm also state that if their recommendations are carried out at Cardigan Consols, "it is our firm opinion that the mine would again open out productive, and large bodies of ore be discovered. It would then prove itself to be what it was always supposed to be by those who have known it longest and best, viz., one of the first in the kingdom. We speak from experience of 30 and 20 years in a similar stratum to yours. And what we recommend you to do, we have already done something similar ourselves. And we are now carrying on works of the same magnitude on the very same lode." Mr Davies, of Dyfngwm, also states in a letter, "we consider that Esgair-hir has a national character, and if this mine turns out a complete failure, nothing is safe."

In a letter also, written by Mr John Taylor, jun. (of Messrs John Taylor and Sons), dated 22nd April, 1857, he states, "As to the mine itself (Cardigan Consols, then called Welsh Potosi), I have a high opinion. This opinion is not formed from personal inspection, for I never was on the spot; but I have watched the returns of ore from it for very many years, and I have received many reports on the lode from competent judges. Moreover, I know the character of this lode well at the Dyliffe mine, where I have the management."

The Welsh lead mines have been famous for centuries for their immense productiveness and profits. Many of them have, and are still, carried on as private undertakings; but the following may be given as the results of some of the successful mines that are now at work, where adequate capital has been provided to carry them out; though, with the exception of Minera, the Cardigan Consols Mines are likely to greatly exceed the results of those named.

No. of shares.	Name of Mine.	Amount paid up per share. £ s d	Present price per share. £ s d	Amount of dividends paid per share. £ s d
867 ...	Cwm Erfin...	7 10 0 ...	21 0 0 ...	6 0 0
128 ...	Cwmystwith..	60 0 0 ...	200 0 0 ...	227 10 0
300 ...	East Darren...	32 0 0 ...	50 0 0 ...	77 10 0
400 ...	Lisburne	18 15 0 ...	110 0 0 ...	377 10 0
1800 ...	Minera	25 0 0 ...	180 0 0 ...	75 0 0

The mines of this Company are held under lease for twenty-one years from 1853, at 1-14th dues to the lord, Pryse Loveden, Esq., of Goggerdan, renewable, at the option of the lessees, for a further term of twenty-one years, at the same dues. The grant is a very extensive one, being about two miles in length on the course of the lode, affording ample opportunity to open out a large mine.

The plant and surface works are on a scale capable of returning large quantities of ore, and were established at a great outlay by the last Company. The present proprietors have expended £8,000 of capital (including the purchase of the leases and plant), and have also spent the proceeds of the ores, namely about £5,000, making their whole expenditure about £13,000; but even this last named sum does not nearly represent the amount of capital which has been laid out on the surface works alone, which are available and useful to this Company.

In order to provide adequate capital, the proprietors have resolved to issue 8,000 new shares of £5 each, making with the present 2,000 shares (£4 per share paid up), the nominal capital of the Company 10,000 shares of £5 each. Out of these 8,000 new shares, 1,000 fully paid up shares are to be allotted to the present proprietors in consideration of the £5,000 spent by them from the proceeds of ores sold, and on account of the general vine of the property. Applications for the remaining 7,000 shares, on the form annexed, accompanied by a deposit of 5s per share, may be addressed to the Directors, at the office, or to the Brokers. On allotment, 15s per share additional will have to be paid, but if no shares are allotted, the deposit will be returned in full. It is not at all likely that nearly the whole of the nominal capital will be required, but it has been thought advisable to have an ample reserve for all contingencies, and the Directors will allot the 7,000 shares, or portions of them, at such times as they may deem expedient, and will expend on the mines the sums so raised from time to time, though the total number of shares may not be subscribed for.

Looking at the past history of the mines—the immense width of the lode and its highly favourable and mineralised character, and the great returns and profits derived from the same lode in other mines—the Cardiganshire Consols offer unusual prospects of success with a moderate outlay.

Prospectuses, with the reports, and forms of application for shares, may be obtained at the office, 117 Bishopsgate street within, E.C., or from any of the brokers.

*The lease is dated 5th April, 1691, and is in the possession of the family of Pryse Loveden, Esq., of Gogerddan, Cardiganshire, the owners of the property, who also possess other interesting documents respecting this wonderful concern.

THE CARDIGANSHIRE CONSOLIDATED MINING COMPANY, LIMITED.

FORM OF APPLICATION FOR SHARES.

To the Directors of the Cardiganshire Consolidated Mining Company, Limited.
117 Bishopsgate street within, London.

Gentlemen,—I request you will allot me shares of £5 sterling each, in the Cardiganshire Consolidated Mining Company, Limited, for which I hand you herewith the deposit of 5s per share; and I agree to accept such shares, or any less number that may be allotted me, and to pay the first call of 15s per share on the same, and in all respects to conform to the provisions of the Joint Stock Companies Acts, 1856 and 1857, and to the rules and regulations for the time being of the Company. And I further authorise you to place my name on the register of shareholders for the number of shares which may be allotted to me; and I agree to pay all calls thereon that may be hereafter made and as you may direct.

Kelly, Laidlaw, and Stocker. Commence at 7.

MONDAY POPULAR CONCERTS.

—St James's Hall.—On Monday Evening next, Dec. 2, Beethoven's Grand Septett in E flat will be performed. For full particulars see programme. Executants, M. Vieuxtemps (his last appearance but two), Mr Charles Halle (his last appearance before Christmas), M. M. L. Ries, H. Webb, Lazarus, C. Harper, Chisholm, Severn, and Paque. Vocalists, Mdlle. Florence Lancia, and Miss Leffler. Conductor, Mr Benedict. Sofa stalls 5s; balcony 3s; admission 1s. Tickets at Chappell and Co's., 50 New Bond street; Cramer's and Hammond's, Regent street; Keith, Prowse, and Co., 48 Cheapside; and at Austin's ticket office, 28 Piccadilly.

POLYTECHNIC INSTITUTION.—

The following important novelties will commence next Monday, Dec. the 2nd:—

First.—Two New Lectures by Professor J. H. Pepper, F.C.S., A. Inst. C.E., entitled "The Iron Age," and the Science of the Armstrong, Whitworth, and other Rifled Guns, illustrated with experiments—also with pictures, diagrams, and photographs, shown by the Oxy-Hydrogen Light on the largest scale.

Second.—Entirely New Series, of Dissolving Views, with Descriptive Lecture, by James D. Malcolm, Esq., illustrating the Navies, Dockyards, and Iron-Clad War Steamers, the "Warrior" and "La Gloire" of England and France, copied from the Drawings of J. L. Pickering, Esq., whose delineations of War Ships, &c., are so well known.

Third.—Third New Series of Photographs by Messrs Birnstingl, of the International Exhibition of 1862, showing the progress of the building to the present time.

HARVEY'S SAUCE.—CAUTION.—

The admirers of this celebrated Sauce are particularly requested to observe that each bottle bears the well-known label, signed "Elizabeth Lazenby." This label is protected by perpetual injunction in Chancery of the 9th July, 1858, and without it none can be genuine.

E. LAZENBY and SON, of 6 Edwards street, Portman square, London, as sole proprietors of the receipt for Harvey's Sauce, are compelled to give this caution, from the fact that their labels are closely imitated with a view to deceive purchasers.

Sold by all respectable grocers, druggists, and oilmen.

ROYAL EXCHANGE ASSURANCE

OFFICE, Royal Exchange, London, 20th November, 1861.

The Court of Directors of the Corporation of the Royal Exchange Assurance do hereby give notice, that their transfer books will be shut from Tuesday, the 10th of December next, to Tuesday, the 7th of January following; that the Annual General Court appointed by their Charter will be holden at their office on the Royal Exchange, on Wednesday, the 18th of December, at Twelve o'clock at noon; and that a dividend will be considered of at the said Court.

FREDK. G. SMITH, Secretary to the London Board.

No. 37 Cornhill, London.

THE SCOTTISH WIDOWS' FUND

LIFE ASSURANCE SOCIETY.

HEAD OFFICE—9 St Andrew square, Edinburgh.

Is now, in annual revenue and extent of business, the largest Mutual Life Office in the world.

I. BONUS SYSTEM.

The Last Bonus for the seven years ending December, 1859, yielded additions on the sum assured of from £1 12s 6d on the most recent policies, up to £3 6s per cent. per annum on the oldest policies, which was equal, on an average, to from £50 per cent. to £107 per cent. of the seven premiums paid, and was one of the largest bonuses ever declared by any Insurance Company.

II. CASH VALUE OF POLICIES PAYABLE ON DEMAND.

Cash Value is allowed at any time from the issue of a policy on a strictly equitable scale, by which neither retiring nor remaining members are benefited at the expense of the other.

III. FUNDS AND REVENUE.

Invested Funds, £3,700,000; Annual Revenue, £430,000.

HUGH M'KEAN, Central Agent.

London, 4 Royal Exchange buildings, Cornhill, November, 1861.

LOCAL AGENTS.

Major R. S. Ridge, 49 Pall Mall.

Benton Seeley, Bookseller, Islington green.

Robertson and White, Accountants, 4 Princes street, City.

SPECIAL NOTICE.

Proposals lodged at the Head Office, or with any of the Agents, before 31st December, will secure participation in the above advantages, and also One Bonus more than proposals of later date.

Empowered by Act of Parliament, 3 Wm. IV.

THE ECONOMIC LIFE

ASSURANCE SOCIETY, 6 New Bridge street, Blackfriars, London.

Established 1823.

DIRECTORS.

Robert Biddulph, Esq., Chairman.

William Routh, Esq., Deputy Chairman.

Alfred K. Barber, Esq.	Rear-Admiral Robert Gordon.
Henry Barnett, Esq.	Charles Morris, Esq.
The Rt. Hon. E. Pleydell Bouverie, M.P.	George Kettilby Rickards, Esq.
Edward Cherrington, Esq.	Augustus Keppel Stephenson, Esq.
Pascoe Charles Glyn, Esq.	
Sir Alex. Duff Gordon, Bart.	

ACTUARY.—James John Downes, Esq., F.R.A.S.

SECRETARY.—Alexander Macdonald, Esq.

The Society offers the following Advantages:—

The lowest rates of Premium on the Mutual System.

The whole of the Profits divided every Fifth Year.

Reversionary Bonuses have been added to Policies to the extent of..... £ 1,365,000

The last Bonus, declared in 1859, which averaged £65 per cent. on the Premiums paid, amounted to..... 475,009

8,471 Policies are now in force, yielding an annual income of £189,000, assuring the sum of £6,697,572, which, with £610,827 Bonus additions, makes a total Liability of £7,308,399.

The Invested Capital is £1,911,505, producing upwards of £74,000, thus making the present Annual income of the Society £263,000.

Service in the Militia, Yeomanry, or Volunteer Corps will not affect the validity of Policies.

Prospectuses and further particulars may be obtained on application to

ALEXANDER MACDONALD, Secretary.

HEAL AND SON'S EIDER-DOWN

196 Tottenham Court road, W.

THE LANDS IMPROVEMENT

COMPANY (incorporated by Special Act of Parliament in 1853), 2 Old Palace yard, Westminster, S.W.—To Landowners, the Clergy, Estate Agents, Surveyors, &c., in England and Wales, and in Scotland.—The Company advances money, unlimited in amount, for the following works of agricultural improvement, the whole outlay and expense in all cases being liquidated by a rent-charge for 25 years:—

1. Drainage, irrigation, and warping, embanking, enclosing, clearing, reclamation, planting for any beneficial purpose, engines or machinery for drainage or irrigation.

2. Farm roads, tramways, and railroads for agricultural or farming purposes.

3. Jetties or landing places on the sea-coast or on the banks of navigable rivers or lakes.

4. The erection of farmhouses, labourers' cottages, and other buildings required for farm purposes, and the improvement of and additions to farmhouses and other buildings for farm purposes.

Landowners assessed under the provisions of any Act of Parliament, Royal Charter, or Commission, in respect of any public or general works of drainage or other improvements, may borrow their proportionate share of the cost, and charge the same with the expenses of the lands improved.

No investigation of title is required, and the Company, being of a strictly financial character, do not interfere with the plans and execution of the works, which are controlled only by the Government Enclosure Commissioners.

For further information and for forms of application apply to the Hon. William Napier, Managing Director, 2 Old Palace yard, Westminster, S.W.

ORIENTAL PARCELS

CONVEYANCE.—THE ORIENTAL INLAND STEAM COMPANY (Limited), under subsidy from the Indian Government. Capital £500,000.

The Directors have the pleasure of intimating for general information that they are now prepared to transmit parcels, and various descriptions of merchandise, from the coast to many places in the interior of India, by the most eligible means of conveyance, and at very moderate charges: and also, in connection with such internal traffic, to forward such parcels and other goods from Europe to India.

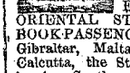
The Company having efficient agents established for their own steamers at Kurrachee, Calcutta, and most of the principal stations on the Indus and the Ganges, as well as in various other parts of India, are enabled to offer unusual advantages in the transmission of goods to the interior, and such as no existing agency can afford, undertaking to act as forwarding agents from the termini of their own navigation.

Packages will be cleared at and removed from the Customs in India, and forwarded to their destination, bearing import duty, which, with the landing and other internal charges, must be paid by the consignee previous to delivery; but the freight to India of such goods as are required to be forwarded from Europe must be paid in England.

For tariff rates, &c., apply at the Company's offices, 9 Billiter street, London, E.C.; or 2 Queen's terrace, Southampton; or to the Company's agents at the following stations in the East, at which agencies have either been already formed, or will be formed as early as practicable. Agencies have been already established at many other points not enumerated herein:—

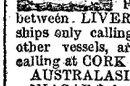
Agra.	Ferozepore.	Moultan
Ahmednuggur.	Futteyghur.	Neemuch.
Allyghur.	Fyzabad.	Nynee Tall.
Allahabad.	Ghazeepore.	Patna.
Assam.	Gwalior.	Peshawur.
Attock.	Hydrabad (Scinde)	Poonah.
Baroda.	Kurrachee.	Rajmahal.
Bareilly.	Lahore.	Rawul Pindee.
Benares.	Landour.	Sattara.
Bombay.	Loodheana.	Sehwan.
Calcutta.	Lucknow.	Shikarpore.
Cawnpore.	Mahabuleshwur.	Simla.
Commercelly.	Meerut.	Sukkur.
Dacca.	Mirzapore.	Tatta.
Delhi.	Moorshedabad.	Umritsur.

The arrangements for the Madras Presidency are not yet matured, but will be announced when completed.



OVERLAND ROUTE.—

COMMUNICATION by STEAM to INDIA, AUSTRALIA, &c., via Egypt.—The PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY BOOK PASSENGERS and receive Cargo and Parcels for Gibraltar, Malta, Egypt, Aden, Ceylon, Madras, Calcutta, the Straits, and China, by their steamers leaving Southampton on the 4th and 20th of every month; for Gibraltar, Malta, Egypt, Aden, and Bombay, by those of the 12th and 27th of each month; and for Mauritius, Reunion, King George's Sound, Melbourne, and Sydney by the steamers leaving Southampton on the 20th of every month.—For further particulars apply at the Company's offices, 122 Leadenhall street, London, E. C., or Oriental place, Southampton.



BRITISH AND NORTH AMERICAN ROYAL MAIL STEAM SHIPS,

between LIVERPOOL and NEW YORK direct, and between LIVERPOOL and BOSTON, the Boston ships only calling at HALIFAX. The following, or other vessels, are appointed to sail from Liverpool, calling at CORK to receive the mails:—

AUSTRALASIAN, for NEW YORK, Saturday, Dec. 7

NIAGARA, for BOSTON, Saturday, Dec. 14.

*ASIA, for NEW YORK, Saturday, December 21.

* Taking passengers and goods for Nassau and Havana, to be transferred at New York on board the R.M.S.S. Karnak.

Passage money, including steward's fee and provisions, but without wines or liquors:—To Halifax and Boston, chief cabin, Twenty-two Pounds; second cabin, Sixteen Pounds. To New York, chief cabin, Twenty-six Pounds; second cabin, Eighteen Pounds. Freight to Halifax, Boston, and New York, £3 per ton and 5 per cent. primage.—Apply to J. B. Foord, 52 Old Broad street, London; D. Currie, Havre, and 12 Place de la Bourse, Paris; G. and J. Burns, Buchanan street, Glasgow; D. and C. MacIver, Queenstown; or D. and C. MacIver, 8, Water street, Liverpool.

BLACK BALL MONTHLY AUSTRALIAN CLIPPERS

From LONDON direct.

SYDNEY packet for 10th December, the celebrated yacht-built clipper

BEEMAH, 1,800 tons, A 1 at Lloyd's for 11 years, was built expressly for speed, is celebrated for having made some of the most extraordinary passages on record, as follows:—England to Java Heads, in 69 days; to Hong Kong, 89 days; from Foo Chow Foo to St Helena, in 56 days; proving herself by far the fastest ship on the berth; to be followed as

SYDNEY packet for 10th January, by the far-famed CAIRNGORM, 1,800 tons, CAIRNCROSS, Commander.

MELBOURNE packet for December, receiving goods in the East India Docks until the 20th (unless previously full)

CARIBBEAN, A 1 at Lloyd's 13 years, 1800 tons. This magnificent high class English-built clipper, celebrated in the China and colonial trade for her rapid passages and sound delivery of cargo, offers the best conveyance to shippers of fine and season goods. Has full and spacious poop, with superb accommodation for passengers.

ADELAIDE packet for December, the clipper ship GLENCLUNE, 800 tons, A 1 at Lloyd's 10 years. This beautiful clipper is famous in the China trade for her great speed and sound delivery of cargo, and offers the best opportunity to shippers of fine and season goods; to be followed in January by the well-known clipper SPIRIT OF THE NORTH

QUEENSLAND packet for 15th December, the splendid clipper

MONTMORENCY. This beautiful ex-royal mail ship has just returned from a voyage with passengers to Queensland, for H. M. Commissioners of Emigration, and will be punctually despatched; to be followed as

QUEENSLAND packet for January by the Black Ball clipper

CITY OF BRISBANE, 2,000 tons.

For all particulars respecting freight or passage to Australia, apply to JAMES BAINES and CO., Liverpool; all Agents for the Black Ball Line; and to T. M. MACKAY and CO., 1 Leadenhall street, E.C.

STEAM SHIPS.—

The General Steam Navigation Company's powerful and first-class STEAM SHIPS leave from St Katharine's Wharf for—

HAMBURG—Every Wednesday and Saturday morning. Chief cabin, 2l; fore, 1l 5s.

HARBURG—Sunday morning.

COPENHAGEN—STETTIN—The Germania

ROTTERDAM—Tuesday, Thursday, and Saturday, at 11, morning. Chief cabin, 1l 10s; fore, 17s 6d. Cologne, 35s 6d or 19s 9d.

ANTWERP, BRUSSELS, and the RHINE.—The Moselle and Dolphin, every Tuesday and Thursday at 11 morning. Chief cabin, 1l 7s; fore, 20s. Brussels, 22s 3d Cologne, 35s 6d. Leaving Antwerp for London every Sunday and Friday at noon.

OSTEND, BRUSSELS, and the RHINE—Every Wednesday and Saturday morning. Dec. 4 at 12 noon; 7 at 4; 11 at 8. Leaving Ostend for London every Tuesday and Friday night. Chief cabin, 18s; fore, 14s. Brussels, 20s 3d. Cologne, 34s.

HAVRE—From St Katharine's Wharf, every Sunday morning. Dec. 1 at 10; 8 at 5 a.m. Chief cabin, 14s; fore, 10s London to Paris, £1.

PARIS, via CALAIS, direct—From London Bridge Wharf, every Wednesday and Saturday morning. Dec. 4 at 1; 7 at 4; 11 at 7. Chief cabin, 14s; fore, 10s. London to Paris, 17s 8d.

BOULOGNE—From London Bridge Wharf, every morning (Saturday excepted). Dec. 1 at 11; 2 at 12 noon.; 3 at 1; 4 at 2; 5 at 3; 6 at 4. Chief cabin, 14s; fore, 10s. London to Paris, 15s.

EDINBURGH—From St Katharine's Wharf adjoining the Tower, every Wednesday and Saturday at 10 morning. Fares: chief cabin, 20s; return, 30s; fore, 15s; return, 22s 6d; deck, 7s 6d; which fares include all pier dues at London and Granton.

HULL—From London Bridge Wharf, every Wednesday and Saturday at 8 morning Chief cabin, 6s 6d; return, 10s; fore cabin, 4s; return, 6s.

NEWCASTLE—From Newcastle Steam Wharf, 272 Wapping, Wednesday and Sunday, at 10 morning. Chief cabin, 8s; return ticket, 12s; fore, 5s; return, 7s 6d.

YARMOUTH—From London Bridge Wharf, every Wednesday and Saturday at Four afternoon. Saloon, 8s; return, 12s: fore cabin, 5s; return, 7s 6d.

Offices 71 Lombard street, 37 Regent circus, and 35 Leadenhall street; and St Katharine Wharf.

HISTORY OF THE COLONIAL EMPIRE of GREAT BRITAIN.
By BROWN H. E. ROBERTS, B.A., of the University of Oxford.
London: Longman, Green, Longman, and Roberts.

New Edition, enlarged to 1,624 pages, price in boards, £1 11s 6d; bound, £2 2s,

WEBSTER'S COMPLETE DICTIONARY of the ENGLISH LANGUAGE.
Is distinguished from all others by Accuracy of Definition—Pronunciation intelligibly marked—the addition of 9,000 recent Scientific and Technical Words—Obsolete Words requisite for understanding of Great Writers—Uniformity in Spelling—Plentiful Quotations illustrating use of Words—Table of Synonyms, and cheapness, the arrangement giving a greater quantity of matter in each page.
Longman and Co.; Whittaker and Co.; Simpkin and Co.; and all booksellers.
It is necessary to specify the "Quarto Edition" to secure the complete work.

WEBSTER'S COMPLETE DICTIONARY of the ENGLISH LANGUAGE.
New Edition, revised and greatly enlarged, by CHAUNCEY A. GOODRICH, Professor in Yale College. 4to. (1624 pp.) £1 11s 6d; Calf, £2 2s.
Though the circulation of Dr Webster's celebrated Dictionary, in its various forms, in the United States, in England, and in every country where the English Language is spoken, may be counted by hundreds of thousands, it is believed that there are many persons to whom the book is yet unknown, and who, if seeking for a Dictionary which should supply all reasonable wants, would be at a loss to select one from the numerous competitors in the field.
In announcing this New Edition, the Proprietors desire to call attention to the features which distinguish it, and to put before those who are in want of such a book, the points in which it excels all other Dictionaries, and which render it the best that has as yet been issued for the practical purposes of daily use:—
1. Accuracy of Definition. 2. Pronunciation intelligibly marked. 3. Completeness. 4. Etymology. 5. Obsolete Words. 6. Uniformity in the Mode of Spelling. 7. Quotations. 8. Cheapness.
With the determination that the superiority of the work shall be fully maintained, and that it shall keep pace with the requirements of the age and the universal increase of education, the Proprietors have added to this New Edition, under the editorship of Professor Goodrich,—
A Table of Synonyms. An Appendix of New Words. Table of Quotations, Words, Phrases, &c.
London: Longman and Co.; Whittaker and Co.; Simpkin and Co.; Hamilton and Co.; Bell and Daldy; A. Hall and Co.; Groombridge and Sons; and Kent and Co. Edinburgh: Menzies. Dublin: McGlashan, Gill.

Just out, price 6d, by post 7 stamps,

MRS HAMILTON'S HOUSEKEEPING BOOK or FAMILY LEDGER, on an Improved Principle, by which an exact account can be kept of Income and Expenditure, together with Hints on Household Management, Recipes, &c.
Price 1s stiff covers, or 1s 6d cloth.
Bell and Daldy, 186 Fleet street.

LOANS ON DEBENTURES.—The Ipswich Dock Commissioners are prepared to receive TENDERS for LOANS, in sums of not less than £100 each, on security of the rates and duties payable under the Ipswich Dock Act. Coupons for payment of the interest half-yearly, either at Messrs Alexander's, bankers, Ipswich; or Messrs Barnett's, bankers, London, will be attached to the debentures. Tenders, stating the amount desired to be advanced and the rate of interest, may be sent to the undersigned, of whom any further information can be obtained.
PETER BW. LONG,
Solicitor and Clerk to the Commissioners.
Ipswich, Nov. 13, 1861.

THE LANCASHIRE AND YORKSHIRE RAILWAY COMPANY.—Debenture Stock.—The Directors are prepared to receive applications for the issue of a portion of the Company's Perpetual Four per Cent. Debenture Stock, which will be recorded in the books of the Company in the names of the applicants free of stamp duty or other charge.
This stock will be entitled to the same priority against the property and income of the Company as the mortgage debt, in substitution of which it will be issued.
Forms of application may be obtained from the undersigned, either personally or by letter.—By order,
S. WM. BULTEEL, Treasurer.
Manchester, Nov. 1861.

NORTH LONDON RAILWAY COMPANY.
FOUR-AND-A-HALF PER CENT. PREFERENCE STOCK.
The North London Railway Company are prepared to receive applications for their new shares of £20 each, created under the powers of their Acts of 1861, bearing a fixed Preferential dividend at the rate of 4½ per cent. per annum, with a contingent right to a further increase up to £5 per cent. per annum. The shares will be issued on such terms that the holders will be entitled to 4½ per cent. on the whole nominal amount of the shares, from the 1st January, 1862, to the end of 1865, after which they will be entitled to the further contingent increase.
A form of application, in which the terms are fully and particularly stated, may be had on application at the Company's offices.—By order,
HARRY CHUBB, Secretary.
Euston Station, London, 20th November, 1861.

LOANS ON DEBENTURES, guaranteed by the Secretary of State for India.—The Directors of the MADRAS RAILWAY COMPANY are prepared to issue DEBENTURES, as under, at par, in sums of not less than £100 each, bearing interest at 5 per cent. per annum, payment of interest and principal being guaranteed by Her Majesty's Secretary of State for India in Council. The interest is payable by coupon, half-yearly, at the Union Bank of London.
1. For a term of 5 years from the 1st of January last, transferable by endorsement without stamp, and renewable at the option of the holder for a second term of 5 years at the same rate of interest.
2. For a term of 5 years from the above date, convertible, at the option of the holder, into Capital Stock of the Company, bearing 5 per cent. interest, and with the option also of renewal for a second term of 5 years at the same rate of interest.
Forms of application may be obtained at this office.
JAMES WALKER, Managing Director.

Principals only will be treated with, and all communications will be considered confidential.—Address to T. K. Bassall, Esq., Solicitor, Old Churchyard, Liverpool.

UNIVERSAL LIFE ASSURANCE

SOCIETY, No. 1 King William street, London, E.C. Established in the year 1834.

Committees in Calcutta, Madras, and Bombay.

Agents throughout India.

The last Annual Reduction of Premium amounted to 45 per cent., so that a person being assured for £1,000 at the age of 30 is now paying £13 8s 7d instead of £24 8s 4d.

Invested Capital upwards of £780,000.

M. E. IMPEY, Secretary.

SEVENTH DIVISION OF PROFITS.

IMPERIAL LIFE ASSURANCE

COMPANY, No. 1 Old Broad street, London, E.C. Instituted 1820.

Policies effected during the year 1861 will participate in the profits to be declared in the year 1866, equally with policies of the longest duration, in proportion to the amounts insured.

Prospectuses and further information may be had at the chief office, as above; at the branch office, 16 Pall Mall, S.W.; or of the agents in town and country.

SAMUEL INGALL, Actuary.

ACCIDENTS OF ALL KINDS,

and from Any Cause, may be provided against by an Annual payment of £3 to the RAILWAY PASSENGERS ASSURANCE COMPANY, which secures £1,000 at death by Accident, or £6 weekly for Injury.

No Extra Premium for Volunteers.

One Person in every Twelve insured is injured yearly by Accident.

£75,000 has been already paid as Compensation.

For further information apply to the Provincial Agents, the Railway Stations, or at the Head office, 64 Cornhill (late 3 Old Broad street).

Annual Income, £40,000.

Capital, One Million.

W. J. VIAN, Secretary.

64 Cornhill, E.C., January, 1860.

Empowered by Act of Parliament, 3 Wm. IV.

THE ECONOMIC LIFE

ASSURANCE SOCIETY, 6 New Bridge street, Blackfriars, London.

Established 1823.

DIRECTORS.

Robert Biddulph, Esq., Chairman.

William Routh, Esq., Deputy Chairman.

Alfred K. Barber, Esq.
Henry Barnett, Esq.
The Rt. Hon. E. Pleydell Bouverie, M.P.
Edward Charrington, Esq.
Pascoe Charles Glyn, Esq.
Sir Alex. Duff Gordon, Bart.
Rear-Admiral Robert Gordon.
Charles Morris, Esq.
George Kettilby Rickards, Esq.
Augustus Keppel Stephenson, Esq.

ACTUARY.—James John Downes, Esq., F.R.A.S.

SECRETARY.—Alexander Macdonald, Esq.

The Society offers the following Advantages:—

The lowest rates of Premium on the Mutual System.

The whole of the Profits divided every Fifth Year.

Reversionary Bonuses have been added to Policies to the extent of ..... £ 1,365,000

The last Bonus, declared in 1859, which averaged £65 per cent. on the Premiums paid, amounted to 475,000

8,471 Policies are now in force, yielding an annual income of £189,000, assuring the sum of £6,697,572, which, with £610,827 Bonus additions, makes a total Liability of £7,308,399.

The Invested Capital is £1,911,505, producing upwards of £76,000, thus making the present Annual Income of the Society £263,000.

Service in the Militia, Yeomanry, or Volunteer Corps will not affect the validity of Policies.

Prospectuses and further particulars may be obtained on application to

ALEXANDER MACDONALD, Secretary.

	21 years	144 1 0	165 10 0

*** For Prospectuses, Forms of Proposal, &c., apply at the Offices as above, or to any of the Company's Agents.

THE SCOTTISH WIDOWS' FUND

LIFE ASSURANCE SOCIETY.

HEAD OFFICE—9 St Andrew square, Edinburgh.

Is now, in annual revenue and extent of business, the largest Mutual Life Office in the world.

I. BONUS SYSTEM.

The Last Bonus for the seven years ending December, 1859, yielded additions on the sum assured of from £1 12s 6d on the most recent policies, up to £3 6s per cent. per annum on the oldest policies, which was equal, on an average, to from £50 per cent. to £107 per cent. of the seven premiums paid, and was one of the largest bonuses ever declared by any Insurance Company.

II. CASH VALUE OF POLICIES PAYABLE ON DEMAND.

Cash Value is allowed at any time from the issue of a policy on a strictly equitable scale, by which neither retiring nor remaining members are benefited at the expense of the other.

III. FUNDS AND REVENUE.

Invested Funds, £3,700,000; Annual Revenue, £430,000. HUGH M'KEAN, Central Agent.

London, 4 Royal Exchange buildings, Cornhill, November, 1861.

LOCAL AGENTS.

Major R. S. Ridge, 49 Pall Mall.
Benton Seeley, Bookseller, Islington green.
Robertson and White, Accountants, 4 Princes street, City.

SPECIAL NOTICE.

Proposals lodged at the Head Office, or with any of the Agents, before 31st December, will secure participation in the above advantages, and also One Bonus more than proposals of later date.

THE COMMERCIAL UNION FIRE

ASSURANCE COMPANY.

Temporary Offices—34 Gracechurch street, E.C.

Capital, £2,500,000.

DIRECTORS.

Henry Wm. Peek, Esq., (Peek Brothers and Co.), Chairman.
Henry Trower, Esq. (Trowers and Lawson), Vice-Chairman.
Jeremiah Colman, Esq. (J. and J. Colman).
Charles Curling, Esq. (Charles Curling and Co.)
Edwin Fox, Esq. (Halliday, Fox, and Co.).
Henry Ghinn, Esq. (late of Victoria), 39 Euston square.
Nehemiah Griffiths, Esq. (N. Griffiths, Tate, & Fisher).
Samuel Hanson, Esq. (Samuel Hanson and Co.).
George Harker, Esq. (G. Harker and Co.).
Frederick William Harris, Esq. (Dixon and Harris.)
Smith Harrison, Esq. (Harrisons and Crosfield).
David Hart, Esq. (Lemon Hart and Son).
Francis Hicks, Esq. (Thomas and Francis Hicks).
John Hodgson, Esq. (Grant, Hodgson, and Co.)
John Humphery, Jun., Esq. (Humphery and Son).
Moss Joshua, Esq. (Joshua Brothers and Co.).
William Leask, Esq., Eastcheap.
William Lee, Esq., M.P. (Lee, Son, and Smith).
Andrew Lusk, Esq. (A. Lusk and Co.).
John Robert Thomson, Jun., Esq. (J. R. Thomson & Co).
Joseph Underwood, Esq. (Hills and Underwood).
John Kemp Welch, Esq. (Orlando Jones and Co.)

MANAGER—Henry Thomson, Esq.

BANKERS—The London and County Bank.

SOLICITORS—Messrs Marten, Thomas, and Hollams, Mincing lane.

The Directors are prepared to accept proposals for Fire Insurance on all descriptions of property.

The Tariff for London Mercantile Business has been adjusted on the principle of classification; adopting the plan that each class of goods should be charged a premium proportionate to the risk.

The Directors, in deciding upon this tariff, have endeavoured faithfully to fulfil the wishes of the Commercial community expressed at the influential meeting held at the Mansion House on the 25th July last, and trust they will be supported by the public to enable them to carry out this system with success.

Ordinary Insurances taken at the usual rates.

A commission will be allowed to solicitors and agents introducing business.

Forms of proposal and all information can be obtained at the temporary offices of the Company, 34 Gracechurch street, E.C.

ROYAL EXCHANGE ASSURANCE

OFFICE, Royal Exchange, London, 20th November, 1861.

The Court of Directors of the Corporation of the Royal Exchange Assurance do hereby give notice, that their transfer books will be shut from Tuesday, the 10th of December next, to Tuesday, the 7th of January following; that the Annual General Court appointed by their Charter will be holden at their office on the Royal Exchange, on Wednesday, the 18th of December, at Twelve o'clock at noon; and that a dividend will be considered of at the said Court.

ROBERT P. STEELE, Secretary.

THE NEW BUSINESS OF THE

STANDARD LIFE ASSURANCE COMPANY during the last fifteen years has exceeded that of any other Office.

The annual revenue is now upwards of ... £315,000

And the accumulated fund..... £1,950,000

The profits of the Company have been divided on six occasions. The next division will be made in 1865.

A policy opened in 1830 for £1,000 had increased, with bonus additions, to £2,115 in 1860; one for £2,000, opened in 1835, had in like manner increased to £3 580; and one for £3,000, opened in 1840, had amounted to £4,515.

The Directors invite particular attention to the system of "Free Assurance," under which persons assured are permitted to reside in any part of the world free of extra premium.

Forfeited Policies can be renewed within thirteen months on certain conditions.

One of the Medical Officers attends at the London Office daily at Half-past One.

WILL. THOS. THOMSON, Manager.

H. JONES WILLIAMS, Res. Secretary.

LONDON—82 King William street.

EDINBURGH—3 George street (Head Office).

DUBLIN—66 Upper Sackville street.

ROYAL LYCEUM THEATRE.

Sole Lessee and Manager—Mr Edmund Falconer. Triumphant success and 5th week of the new and original Drama, PEEP O' DAY.—Re-appearance of Miss Lydia Thompson.

On Monday, Dec. 9, and during the week, the performance will commence with THE DAY AFTER THE WEDDING. Mr Walter Lacy, and Mrs St Henry. After which, at a quarter before 8, PEEP O' DAY; or, Savourneen Deelish. Principal characters by Messrs Walter Lacy, Addison, C. Selby, Herman Vezin, Edmund Falconer; Mrs P. D. Bowers, Miss Clara Weston, Miss M. Hudson, &c. To conclude with AN UNPROTECTED FEMALE, in which Miss Lydia Thompson will dance The Volunteer Quick Step. Prices as usual. Doors open at half-past six; to commence at seven. Box office open from 11 till 5 daily. Acting Manager, Mr F. B. Chatterton.

NEW THEATRE ROYAL ADELPHI.

Sole Proprietor and Manager, Mr B. Webster.

Great attraction for the Cattle Show Week. Mr and Mrs Dion Boucicault in two Pieces.

On Monday and during the week, THE OCTOROON. Messrs Dion Boucicault, Emery, G. W. Jamison, R. Phillips, Billington; Mrs Dion Boucicault, Mrs H. Marston, Miss C. Denne, and Miss Latimer. THE COLLEEN BAWN. Mesrs Dion Boucicault, D. Fisher, Billington, S. Emery, Stephenson; Mrs Dion Boucicault, Mrs Billington, and Miss Woolgar. Commence at 7.

THE QUEEN'S CONCERT-ROOMS,

Hanover square.—Mr COCKS begs to inform those Ladies and Gentlemen who propose giving Concerts, Balls, Soirées, Matinées, Lectures, or other Entertainments—as also the Directors of Religious and other Societies—that these celebrated Rooms will be ready for use the First Week in January, 1862. The Rooms have been highly decorated, and are furnished with lavatories and every modern appliance for the promotion of comfort.—For particulars apply to Messrs Robert Cocks and Co., New Burlington street (publishers to Her Most Gracious Majesty the Queen), and No. 4 Hanover square.

POLYTECHNIC INSTITUTION.—

New Lectures on the "Armstrong," "Whitworth," and other Rifled Guns, by Professor J. H. Pepper.—New Diss-ving View-, illustrating the "Navies, Dockyards, and Iron-Clad War Steamers, the 'Warrior' and 'La Gloire,' of England and France."—Musical Entertainment by G. A. Cooper, Esq., entitled "The Emerald Isle." Admission to the whole, 1s. Open 12 to 5 and 7 to 10. 309 Regent street.

GEORGE HODSON EVERY NIGHT

at 8.—PAT'S CURIOSITY SHOP—Roars of laughter—Crowded houses.—Saturday afternoon, at 3. Secretaries, managers, &c., requiring Mr Hodson's services apply immediately.—St James's hall, Piccadilly.

MOZART NIGHT AT THE

MONDAY POPULAR CONCERTS.—On Monday Evening next, Dec. 9, the programme will be selected from the works of Mozart, and will include (by desire) the celebrated Quintet in A major for clarionet and stringed instruments. Pianoforte, Miss Arabella Goddard; Violin, M. Vieuxtemps (his last appearance but one); Clarionet, Mr Lazarus. Vocalists, Miss Banks and Miss Louisa Vinning. Conductor, Mr Benedict. Sofa stalls, 5s; balcony, 3s; admission, 1s. Tickets at Chappell and Co's., 50 New Bond street; Cramer's and Hammond's, Regent street; Keith, Prowse, and Co.'s, 48 Cheapside; and at the hall, 28 Piccadilly.

GOOD DIVIDENDS.—

Messrs DAUNT and COMPANY, of 30 Clement's lane, Lombard street, E.C., have on SALE some Foreign Government BONDS, yielding Eight and Nine per Cent. Interest, payable half-yearly, as punctually as on Consols, and are perfectly secure. Business transacted in the English Funds at 1-16th, Railways at ¼, and Mines at 1 per cent. A list of safe investments forwarded (gratis) on application. Investors will be cautioned against spurious mines.

WILL THERE BE AN AMERICAN WAR?

LEAVING to others the discussion as to the precise limits of belligerent rights, the degree to which they have been overstepped by the Federal Commander in this instance, and the instances, real or supposed, in which our own proceedings in former days may have afforded precedents somewhat embarrassing to our demand for reparation,—we will address a few words to the practical question which more immediately interests us all.

If the conduct of the Federal Government since the commencement of their unhappy civil disputes had been in the main friendly towards this country; if they had manifested any wish to be fair or courteous; if their departures from courtesy and friendly behaviour had been such as could reasonably have been attributed to excessive irritation arising out of their home perplexities and griefs, and such as might have been excused in consideration of these circumstances; if they had ever manifested the faintest desire to mitigate to us as far as they could the inevitable inconveniences and sufferings which their belligerence and our neutrality combined to inflict upon us; if, in a word, their habitual language and proceedings had been at all indicative of, or compatible with, a desire to remain in amity with us,—then it would have been easy for them to have made such an acknowledgment in reference to the seizure of the Commissioners as we could have accepted, and we should on our part have been too happy to make such acknowledgment as little onerous to their pride and as little damaging to their popularity with their vain and irritable countrymen as possible. But the very contrary of all these "ifs" is unfortunately true. From the beginning of their difficulties they have been as cantankerous and uncivil as they could; they have stretched every inconvenient and vexatious right of belligerents to the utmost; what they have done they have done in an unusually offensive manner; rightly or wrongly, from temper or from design, they have given the impression that they were not only willing but rather anxious to insult us;—and to crown the whole it is believed by many well-informed persons that the act of Capt. Wilkes was the result of a deliberate and well-considered design; and that it was only a matter of accident that the outrage was not perpetrated a fortnight earlier and in our own waters. Believing and considering all this, we cannot for a moment expect either that the authorities at Washington intend to apologise for the act of their officer, or to make restitution of their captives. Nor do we entertain much doubt that, even were we—if such a thing were possible—to pass over this outrage or to be content with an inadequate and informal reparation, we should soon have to submit to some further insult even more flagrant and intolerable. We greatly fear, from all that we can learn of the temper of the Cabinet at Washington,—or at least of those members of it who have hitherto determined its policy,—as well as from that of the trading and agitating politicians who guide or drive it,—that the Government of the United States are quite capable, if we yield or temporise now, of boarding and searching for rebels, envoys, and despatches, every mail packet that plies between Dover and Calais, and between Holyhead and Dublin.

Again: we do not believe that, even if the United States Government were inclined to apologise and restore, they would dare to do it. The temper of the people and the Press, as is clear by our last accounts, would make such a course instantaneously fatal to the official career of the Ministers who should propose it. Even if the case of wrong were so perfectly clear that even Americans could not gainsay it, we doubt whether any American Government would venture, or would be able, to make an acknowledgment of error and to deliver up the captives. But, unfortunately, the case is not so clear as this:—*we* are right, no doubt; but the Americans, as we see by their papers and speeches, have no doubt also that *they* are right. They are already crowing over the assumption that we must pocket the affront because we have no legal ground of complaint. The matter—obvious as we hold the justice of the transaction to be—*at least admits of discussion*;—and if our antagonists would scarcely yield to us if they had *no case*, is it likely they will concede an inch when they have persuaded themselves they have *a very good case?*

Beyond all question it is something very like insanity for the Federalists to bring upon themselves a war with England, when they have enough and more than enough on their hands already. *But they do not think so.* They—that is the voting, electioneering, spouting, rowdying public—do not think either that their hands are full, or that a war with England is a thing to be dreaded or deprecated. The depth of their ignorance is unfathomable. The height of their frenzy is inconceivable. Their talk is not mere conscious bombast and rhodomontade. They actually *believe* that they can easily conquer the South, and lick Great Britain into the bargain. They are already growing wild with the prospect of crowning their victories by adding Canada to Texas. Of course Mr Seward knows better than this, and so do Mr Lincoln and Mr Chase. So does Mr Adams over here. So do the hundreds of well-informed and travelled gentlemen in Boston. So do the trembling and victimised merchants of New York. But what of that? These are not the men—these are not the clases—who habitually decide the policy of the United States, who elect the Congress, and enthrone the President. Only in the rarest crises are their voices heard; and even then they are too commonly drowned in the fierce and tumultuous roar of a passionate, misled, and ungovernable populace,—accustomed to make their own law, to avenge their own wrongs, to trample on all obstacles, moral, legal, and material,—sincerely fancying (for they have been always taught so) that nobody *ought* to oppose them, and that nobody *can* resist them.

There appears to be three chances — feeble ones unquestionably—that the dire extremity of war may yet be escaped. *First.* The merchants and bankers of the North, who have entered into such heavy engagements to supply he Government with money, may get thoroughly frightened at the utter ruin which a rupture with England would entail upon them; may make the best use of the secret power they are said to have over the Cabinet; and,—calling to their aid the moderation, good sense, and sound knowledge which undoubtedly pervade the educated classes of the Union, but are usually so silent and inoperative,—may rise in their inherent strength, brave and curb the violent mob and the corrupt jobbers and contractors, eject Mr Seward from the Ministry, and compel the Government to yield. Such an issue is unquestionably possible, and much to be desired. There can be no doubt of the existence of the party we speak of, nor of its wealth and numbers: we only mistrust its courage and its power.

Secondly. Those enthusiastic patriots who are bent, heart and soul, upon the subjugation and reannexation of the South, and those untaught fanatics who sincerely believe in their power of achieving these results, may perhaps be awakened—(it is at least in the power of their leaders to awaken them)—to the conviction that a war with England would be at once and irretrievably fatal to their hopes. The first step of England as soon as hostilities broke out, would naturally be to recognise the Southern Confederacy, and the second, to terminate the blockade. These things once effected, the independence of the Seceding States becomes a *fait accompli*, which nothing could undo. Now we know that the restoration of the Union is with the majority of the Northerners the dearest object of their heart—dearer even than insult and injury to England. They still prefer the recovery of their own grandeur to the humiliation of their rival; and they may be willing to apologise to us now, reserving vengeance and compensation for a future day, rather than give up at once the sacred purpose of the civil war. There is no doubt of the existence of this party, nor of their numbers, nor of their earnestness:—the only question is as to their rationality and their political influence. Thus much seems certain:—if the Government refuse our demand, it will be a sure sign that they at least have abandoned all hope of a successful issue of the civil war. If they offer us reparation, it is because they still cling to and hope for the restoration of the Union.

Thirdly. They may, however, pursue a middle course, and this, we apprehend, is the one they will adopt. How *we* shall receive it, it will be for us to determine. They may see that they cannot fight Great Britain and the Southern Confederacy at once, and so may endeavour to put us off by diplomatic stratagem. In this case, they will express their unfeigned surprise that Great Britain should take so strange a view of international law,—their conviction that they have only acted within the strict limits of belligerent rights, and according to precedents set by England herself. They will disclaim any intention of insult, and ask how we can attribute such folly and such discourtesy to a people who are notoriously models of forbearance and good sense. But since the two Governments take such diametrically opposite views of the matter, and as they are sincerely desirous that no hostile discussion should arise between nations so closely connected by interest and kindred, and to show their willingness to soothe our wounded sensibilities, they have no objection to express regret for any transgression as to *form* of which Commodore Wilkes may have been guilty, and to refer the question of substantial right and law to the proper legal authorities, to American Prize Courts, of which all the world has long admired the impartiality,—or if England insists, even to a Court of Joint Commission.

Such a course on their part might embarrass us not a little. It might at all events *postpone* a war;—and our Government would then have to consider whether a partial apology and a reference of the essentials of the complaint to a Court whose decision we feel confident must be in our favour, would secure us from similar outrages in future, and save us from the painful necessity of avenging our own wrongs with our own hands,—whether, in fact, a partial and imperfect reparation be preferable to a sanguinary and desolating war.

THE EFFECT OF AN AMERICAN WAR UPON ENGLISH COMMERCE.

The extreme probability, for so we must speak, of a war with the Northern part of the United States, compels us to consider the painful problem of its probable effects. Under ordinary circumstances this would be a subject capable of a very easy division; it would resolve itself into the two inquiries—What harm can we do to America, and what harm can America do to us? In consequence, however, of the previous war between two sections of the American Union, there is a third element of which the consequences must be carefully calculated. The effect upon commerce of a *first war* is pure evil; but when one war is already raging, the outbreak of another, though always causing great loss and suffering, may nevertheless, like many other calamities in this involved and complicated world, produce collateral and attendant benefits. It may partially counteract the evils of the antecedent war; and in the present instance we may expect it to be so. A war with America must always be one of the most lamentable incidents in the history of England; but if it is to happen, the present is certainly the period at which it will do us the minimum of harm, and the only moment in our joint annals at which it could confer on us an incidental and partial compensation.

The export trade of this country is principally with the Northern part of the United States, and this has already greatly declined. The Americans are spending their money upon a most costly article—civil war, and they have little to spare for the peaceful commodities they used to buy from us. Some of our largest imports from America—cotton especially—come from the South; and a war with the North, though not to be thought of on such a ground, would indisputably be the best way of obtaining them. The French Government, which has but a vague idea of a purely moral scruple, has wished for many weeks past to intervene in the internecine struggle for its own individual advantage. We have not thought ourselves at liberty to aid or to countenance such a project; but if the Northern States should as we fear they will, force war upon us, we cannot but observe with satisfaction that they have selected a happy moment for so doing. They are wretched customers now instead of good ones: they are now deeply injuring us by cutting us off from great supplies of raw material, to which, in the event of a war, we shall at once help ourselves.

On another side of the subject we see the same fact under a different form. As far as the money market is concerned, no time has occurred so favourable, or rather so little unfavourable, as this for an American war in the recollection of men of business. Ordinarily no incident could be more disastrous. The usual course of our direct trade gives a vast credit to America, and we are likewise, for the most part, largely under acceptance for her on credits drawn from India and China. Neither of these is the case now. We have sold little to America for months past, and that little has been mainly for cash. America has bought so little in the East, and we have been so cautious with respect to that little, that we are scarcely under acceptance for America at all. The great houses who mostly conduct the credit business are said, we believe truly, to have now scarcely a fifth of the American liabilities which they had in 1857.

These are but fortunate accidents of the moment. What is, under ordinary circumstances and under the present laws of warfare, the harm which we can inflict on the Federal States, and what is the harm which we must expect to suffer from them? If we refer to the history of the last war, it would appear that we could almost wholly destroy their commerce, without their materially impairing ours. The years of war were 1813 and 1814, and we may at once draw our own conclusions by comparing them with the adjacent years:—

	Imports into the United States. £	Exports from the United States. £
1812	16,047,916	8,026,506
1813	4,584,375	5,813,322
1814	2,701,041	1,443,216
1815	17,308,349	10,959,531

The returns of our Custom House for 1813 were destroyed by fire, and those for 1814 are so largely affected by the peace with France, that no exact comparison with others can be satisfactorily made; but it is certain that neither six-

sevenths of our exports nor six-sevenths of our imports were taken from us by the American war.

The nature of the American trade explains why we were able to do so much harm. The valuable and authentic table which we annex to this article shows that the commerce of America is even now in the place most exposed to our cruisers. The commerce of America is greatest with Great Britain,—then with Europe, which is very near to us and very far from them,—then with Cuba, which is close to our West India Islands,—then with India and China, one of which is a dependency of ours, and near to both of which we have places of resort and coaling stations, most important now-a-days in these days of war steamers, and near to which they have neither. If we had wished for an enemy's commerce in an exposed position, we should have placed it where the American commerce now is. If the laws of warfare were now what they were in 1813, we could, if so disposed, annihilate the whole trade of the United States.

But the laws of warfare are not the same. We have consented to modify and ameliorate them; and although the United States declined to participate in these humane efforts, it seems that they will derive much benefit from them. We engaged at Paris to acknowledge the rule that neutral ships should make neutral goods; and though the Americans have never yet covenanted to do so, such will probably be the rule on both sides in a future struggle. French ships will therefore be able to carry the grain of North America to Europe, and to carry the silks of France to North America;—and we shall not seek to prevent them. We have abandoned, for good and wise reasons, the mode of warfare which we pursued forty years ago; and though a war may in consequence be more prolonged, it will be less painful, both to ourselves and to the enemy.

But what was formerly true of American commerce, is still true of their *shipping*. The Congress of Paris illogically and unwisely, as we have often pointed out, did not give the same security to an enemy's ships which it gave to an enemy's goods. Why that distinction is made we need not now inquire; it is enough to know that it has been made. We shall, therefore, by our cruisers be able, if we choose, to exclude American vessels from most of their own trade. As we have shown, it is peculiarly exposed and open to attack, and neutral vessels will, therefore, be selected in preference to carry it on.

One consequence is remarkable. The trade between California and New York,—the trade by which almost all of the gold of the former is usually conveyed, first to the New York Banks, and then through the world, will be *arrested*. The Americans have insisted that it is a coasting trade, and have declined to throw it open to foreign nations. If they persist in that policy, neutral vessels will not be able to carry gold from California because of the legal prohibition, and American vessels will not be able to carry it because of the war.

In addition to these evils, we can, and probably shall, blockade some of the Northern ports, or even New York itself, and thus teach the communities which have been during the struggle with the South so unsparing and so violent in the use of commercial weapons of warfare, the precise pain which these detestable inventions are calculated to inflict.

On the whole, therefore, we can in three ways, if we choose, inflict great suffering on the North. We can drive their shipping from the seas, inconvenience their commerce, and blockade the great resorts of their foreign trade. We shall not inflict so much suffering as under the old rules of warfare, but still we shall inflict great suffering.

What harm, on the other hand, can the Americans do us? They can *only* inconvenience our commerce. Their fleet is, in comparison with ours, altogether contemptible. It could not stand a regular naval engagement for two hours; but it does not follow that their naval resources are to be despised. They are a people of great energy, great audacity, and great invention. They will probably, as in the last war, fit out single vessels—perhaps privateers—of great speed and admirable equipment, and with them maraud far and wide upon the ocean. So long as the other conditions of the Congress of Paris are observed, we might, if we choose, fit out privateers to oppose them; for neutral nations could not complain of a proceeding by which they would not be injured, and America refused to be a party to the new rules of maritime warfare. But an imitation of their practice will not cure or perhaps much mitigate, its consequences; and we must expect to suffer as we did in the last war from the enterprise of the most crafty, enterprising, and unscrupulous of naval depredators.

But it is not likely that we shall suffer nearly as much. We are now fighting with but half America. Half the coast from which her cruisers and privateers could then issue, and to which they could return, would now be friendly to us, and bitterly hostile to them. That coast could be closely watched, and perhaps effectually blockaded, at all important points by our fleet; and the American privateer would have not only to come out in search of his prize, but likewise to return home with his prize. No neutral nation probably would permit an adjudication of prize to such a privateer in their Courts, any more than we should now permit it to the privateers of the South. The privateering business would require a clever run out, and a quick run in, both of which will be assuredly difficult, and we hope will be rare.

Our ships would certainly be subject to some risk in case of war from which neutral ships are exempt, but we need not fear that this risk will drive them out of employment. There are not neutral vessels enough to do the work of the world; commerce cannot dispense *both* with American shipping and with British shipping; and if merchants have to make a choice, they will choose the latter. Freights, indeed, would probably rise in the event of war, since it renders tonnage less efficient from the necessity of awaiting convoy, since the Government would probably charter extensively, since in the Indian and other long voyage trades our own ships have now to overcome an effective competition with the American.

The only other important mode in which the Americans could injure us is by not paying their debts to us, and of this there is certainly some fear. The "sponge" is a Transatlantic institution, and in proportion to the weight of the debt is the disposition to its use. Though the trading debts of the North are unusually small, yet the "securities" of various kinds held in this country, of which the interest is annually payable by the North to us, are as numerous as ever. Some of this interest would probably be duly paid in the event of a rupture, but it would be very sanguine to expect the whole.

On the whole, therefore, we may conclude by observing that it would be idle vanity in the Americans to fancy that they can eke out their admitted military inferiority to this country by a disastrous superiority in the infliction of commercial disaster. Our power to inflict it on them is much greater than theirs to inflict it on us. Let us hope, in spite of many painful appearances, that they will be as unwilling as we are either to cause or to suffer it.

IMPORTS and EXPORTS of the UNITED STATES from and to FOREIGN COUNTRIES, during the Year ending June 30, 1859.

This table includes the Exports and Imports of the Southern States.

EFFECT OF WAR RUMOURS ON COTTON.

It is earnestly to be hoped that whatever answer the United States give to our demand for reparation will be a prompt and decisive one. It is to be hoped, also, that whatever our Government find it necessary to do will be done speedily. Suspense and uncertainty are death to commerce. War with America may afford immediate relief and plenty to the famished cotton market: *expectation* of war only brings increased pressure and menaces decreased supply. If we are to have a war with the Federal Government, we shall, of course, recognise the Southern Confederacy, break the blockade of the Southern ports, and scatter to the winds the squadron that for so many months has been sealing up our cotton. Ships will at once sail to New Orleans, Mobile, Charleston, and Savannah, laden with all that the Confederates need, and will return to us in three or four months with cargoes of that raw material which is wanted to save the operatives of Lancashire from idleness and privation. If we are not to have war, then the high prices which will be maintained will secure as large a supply from India as can be furnished to us for the money. But if we are to have for a considerable period an imminent probability of war, followed by a resumption of pacific relations which will leave the blockade and the civil conflict in America untouched, then there is every danger, not to say certainty, that we shall obtain cotton from neither quarter. Peace will prevent its coming from America—the dread of war will have deterred its coming from India.

Already much has been jeopardised, and all parties connected with the cotton manufacture are under great uneasiness. The effect of the news of the San Jacinto outrage and of our consequent proceedings has already been to cause a fall of price in Liverpool of nearly 2d per lb,—*quite* 2d from the highest point previously reached. This fall, and still more the further one which would ensue from complete rupture, will be sufficient to render unprofitable a considerable part of the importations ordered and expected from India. Many of the orders recently sent out are, therefore, being countermanded; and of many more the limits of price at which they were to be executed are being much reduced. Those merchants who have had the courage to direct Indian cotton to be bought at Calcutta, Bombay, or Mirzapore, on the basis of a price in Liverpool of 8d per lb, will lose enormously, if the United States apologise and if peace is maintained. The knowledge of this, and the feeling that, under any circumstances, what has happened shows how very precarious must be the continuance of the American blockade, will, we fear, greatly discourage the shippers of cotton from Indian ports. Every day of uncertainty risks and costs millions. As we said at the outset, *actual war* with the North will bring with it material compensations. The *prospect of war* carries with it no compensation whatever.

THE WASTE LANDS OF INDIA AND ITS REVENUE.

The only practical objection yet raised to the rules for the sale of Indian waste lands is that they are too liberal,—that resources which belong to the whole community have been sacrificed to a class. We say the only practical objection; for, though thinkers like De Tocqueville still doubt whether the settlement of Europeans in India does not tend to increase race hatred, and therefore to sap the foundations of our Empire, the question has long since passed out of the domain of English politics. We cannot keep out the Europeans, who have already created a trade which we see by accounts brought by this mail has risen to *ninety* millions, and the only remaining resource is to find them beneficial work within the Imperial system. To this end a freehold tenure on spots not settled by natives directly conduces, and though it is possible to make terms too liberal, the end would justify some extravagance. In this case, however, there is none. It is urged that part of the Sayer revenue, the bits and snippets of income derived from these lands, from grazing commons, and cutting firewood, and such like privileges, has been thrown away. This, however, is a mistake. The revenue is not lost till the land is sold, and when it is the price will cover the loss. Even Indians forget sometimes how vast the waste lands of the Government are. The Indian authorities have just published an official account of the lands at their disposal, which amount to greatly more than a hundred millions of acres. There is one little item of 40,000 square miles of hill land in Pegu alone, which would of itself absorb all the colonists likely to settle at least in one generation.

If the whole were sold, as it will not be for three generations, it would yield at the Government rate twenty-five millions sterling, the interest of which is about ten times the Sayer revenue. There is, therefore, no direct loss to the State, while the income tax now levied on every acre of these lands which is turned to good account will one day be a large indirect gain. Tea land, for example, produces at least ten shillings an acre, and the tax on the income yielded by 3,000 reclaimed acres is 60*l* a year, certainly ten times any possible profits to be made out of the jungle. Then it is urged that many persons will buy the jungle, recoup themselves by clearing, and then abandon the land. Very likely, and what then? The next settler will buy the cleared land, and find cultivation easy, which is exactly the object Government has in view. If, indeed, Government intends to sell *timbered* land—jungle is not timber—it is doing a silly thing, but there is no evidence of any such blunder; and the outcry among officials caused by the gift of a few thousand miles of forest in the Terai to Jung Bahadoor, is too recent to allow us to believe in any charge of forgetfulness in the matter. The jungle may be worth something for firewood, but Government would not have cut it; and if the natives are anxious for the privilege, they have only to buy it at the

rate said to be so absurdly low. Besides, the Government has not given a pledge to sell always at 5s an acre, but only to take that rate during the next five years. As the lands become settled, and the waste round them more valuable, the price may be advanced at least twice in every fresh decade, a provision far less wasteful than a private owner would make.

The rules seem to us in themselves as just to the State as they are encouraging to settlers, and Indians know what the British public does not, viz., the drawback which makes a low price so indispensable an attraction. The hills to which enterprise will be at first confined are without supplies of labour. Observers, aware of the density of the Indian population, imagine that it must be easy to attract any number of men if the pay is sufficiently large. They forget that the labouring man is also the proprietor,—that every tiller of the soil has his own patch of ground, which, except after a famine, nothing will induce him to desert. The floating labour supply consists almost entirely of men who will only work for the winter, and the railway contractors, though they offer preposterous wages, can barely supply their need. The number of men on one contract will vary by hundreds a week, according to the demands of the neighbouring cultivation. Even the ruined man must be supplied with funds to emigrate, for distances in India are measured by hundreds of miles, and if he moves at all, it must be with his household gods. The settler must not only buy his land, and then offer great wages, but he must for the present import his own colony, —spend, in fact, on his labour the capital which in Australia he would spend on the purchase. He must in the hill districts "hut" his people, perhaps ensure them supplies, and even then run the risk of seeing them bribed away. It is for this reason that old Indians succeed so much better as settlers than strangers, because their connection with the people, through servants, *employés*, and others whose confidence they have secured, reduce their difficulty about labour to the minimum allowed by the physical circumstances of the locality. It is for this reason, too, that an emigrant from England, if he wishes for real success, should spend at least two years in a sort of apprenticeship, learning above all things to talk to his men himself, unless he desires to be at once traduced and plundered.

The second provision contained in the recent orders, the power of redeeming the land tax, is open to graver doubt. It is said that the price to be paid is equivalent to so much debt to be extinguished; but Treasury efforts to reduce a national debt are never very earnest or persevering. Government will be very apt in any emergency to seize the land fund instead of investing it, and if it does not, incessant Government purchases will soon raise the funds above par, at which point a loss accrues. It would have been better and simpler to receive payment only in Government paper, to be cancelled by the Collector as he signed the deeds of the sale. Even then the State will lose, for it gives up not only the land tax, but the power of increasing it as the wealth of the country develops. But though these arguments are, so far as they go, very just, there are some compensations to be considered. In the first place, the experience of a hundred years proves that, wherever the land tax increases *pari passu* with prosperity, the prosperity disappears. Whether it be owing to the suspicious character of the Indian landowner, or to the feeling of insecurity, or to the exceptional way in which a Hindoo always looks down the vista of years, like an English peer, to see what his descendants will have, it is certain that long leases do not suffice to make a native improve. Colonel Baird Smith, a most sound authority, says that as the settlement periods recur at intervals of 30 years, the owners leave their lands waste lest Government should increase the rental, and are afraid to dig wells lest that should be an excuse for more taxation. A more fatal state of affairs can hardly be imagined, or one more calculated to keep a population stationary. The loss of the possible increase of tax is, therefore, in a great measure unreal. What remains of real loss is fully compensated for by the fact that the profit of land perpetually settled is now subject to income tax. Mr Wilson's wise firmness on this point in 1860 altered the whole future of the land revenue; for it made it possible to allow of redemption, by giving a certainty of larger returns from the income tax instead of the chance of larger returns from the land rent. Upon the whole, therefore, if the receipts for the land are applied to cancel the debt, the liberty to redeem is not unjust to the State.

REGARDING THE SALE OF WASTE LANDS AND REDEMPTION OF THE LAND REVENUE.

The 17th October, 1861.

(CONTINUED FROM OUR LAST.)

31. Provision will be made for a further grant to the same grantee to the following extent:—As soon as the grantee's name shall have been provisionally entered in the Collector's records as proprietor of a grant (as prescribed in paragraph 27), any one adjoining plot, not exceeding the previous grant in area, if not previously applied for, and if available for disposal by Government, may, at the grantee's request, be surveyed at his expense, marked off, and reserved as a future grant to him: but subject to the obligations that within five years from the date of his previous grant he shall fulfil the conditions necessary to his being recorded as proprietor of this further grant, and that two-thirds of the previous grant shall within the same time have been brought under cultivation. If he should fail in either obligation, the reservation of the plot will cease.

32. There need be no limit to the number of further grants which may be successively taken up on fulfilment of these obligations.

33. Holders of grants under any existing rules, who have not yet completed the purchase of their grants, will be allowed to commute them under the new rules, but without being subject to the limitation of the new rules as to area. The area which, in such cases, the grantee will be at liberty to purchase absolutely, will be determined by the provisions of the original grant, and he will be free to purchase absolutely as much or as little of that area as may suit him, retaining, if he pleases, the remainder upon the terms of the original grant.

34. Where there are exclusive rights of occupancy, pasturage, wood cutting, sturf cutting, or other like rights in unassessed waste land, such waste land may be sold under the above rules, but only to those who shall satisfy the Collector that they possess such rights by prescription, or have obtained them by purchase. It will be an important part of the Collector's duty to make certain that any transfer of such rights shall have been made with a complete and fair understanding on the part of all concerned.

35. In a Ryotwarry district lands, for which an assessment has been fixed, but which have been uncultivated for five years or upwards, and which are at the absolute disposal of the Government, may be sold under the same conditions as unassessed waste lands, excepting that the price shall be twenty years' purchase of the assessment.

36. The right of purchase on these terms should, in the first instance, be tendered to the inhabitants of the village within whose bounds the land may be situated, or who may have been in the habit of using it.

37. The tenure of all waste lands granted under this resolution will be that of an heritable and transferable property held in perpetuity, free from all claims either of the Government or of third persons prior to, or inconsistent with, the grant.

II.—As to the redemption of the land revenue.

38. Great caution is necessary in dealing with what has always formed so large a part of the revenue of the Government of India. The Governor General in Council proposes, therefore, in the first instance, to limit the permission of redemption in any one district to such a number of states as shall, in their aggregate assessment, not exceed ten per cent. of the total land tax of the collectorate, or corresponding fiscal division of the country.

39. This restriction will enable Government to ascertain in each province, without undue risk to its permanent fiscal resources, the practical effect of permitting the redemption, both in completely populated and well-cultivated districts, and those where there is much uncultivated land and a thin population. It will afford an opportunity of hereafter reconsidering the effects of the measure with the light of ample experience; while the limit which it prescribes is large enough to allow of a considerable number of those who may be able and desirous of redeeming the land revenue of their estates to do so partially or wholly.

40. In any case when the redemption shall have reached the limit of ten per cent. of the total land revenue of the collectorate, the result is to be reported to the Governor General in Council, with a view, if expedient, to the enlargement of the limit in that collectorate, and to the permission of further redemption.

41. The price to be paid is fixed at twenty years' purchase of the existing assessment.

42. Doubts are expressed by experienced officers whether many purchasers will come forward at such a rate, so long as the current rates of interest for money lent on security or employed in trade continue as high as at present. But justice to the public creditor, and a due care for the resources of the Government, require that, as long as the public revenue is no more than sufficient to meet the current charges of the Empire and the interest of the debt, no lower terms of redemption of a permanent tax forming the security for that debt should be accepted than

will, when the price is invested in the public securities, afford a corresponding relief in the payment of interest.

43. The tenure obtained will, as in the case of waste lands, be that of an heritable and transferable property held in perpetuity, free of all demand on account of land revenue, or of the Government. But such tenure will not carry with it, as that of waste lands will, immunity from any legal claims, other than those of Government, to which the lands may be subject, and which may date prior to the grant under this resolution.

44. Also the same steps will be taken to define the exact extent and limits of the property by means of plans and survey records.

45. In districts in which the land revenue is permanently settled, permission to redeem will be confined to the person who has the right to pay the Government land revenue, rent, assessment, or jumma; and its effect will be strictly limited to such Government claims, reserving all existing sub-tenures or subordinate rights of occupancy.

46. In districts in which the land revenue is not permanently settled, the party who has the right to pay the Government land revenue, rent, or jumma, will be permitted to redeem it only when he also possesses the right of occupancy of the land.

47. The freedom of tenure conferred by redemption of land revenue will be absolute only as against the Government. It will be given on *prima facie* evidence of the rights above mentioned, and other parties contesting those rights and claiming the land will be as free as before to sue the holder in the civil courts.

48. The assessment on which the purchase-money will be calculated will, in permanently settled dtstricts, be permanent a sessment.

In temporarily settled districts, it will be the assessment of the last settlement.

49. It has been apprehended that the Government will suffer loss by such a rule, where a temporary assessment has been fixed so low as to render it certain that a considerable enhancement may be expected at the next settlement.

In such cases the enhancement of the direct revenue from the land will of course be foregone; but in many parts of the country where this would happen, there exist, in a peculiar degree, that amount of general intelligence and of confidence in the measures of the Government, and that sufficiency of capital, which would encourage landholders to redeem their land; and where this is the case, his Excellency in Council considers it a wise policy that those who may come forward to redeem should not be shut out from the full advantage of the measure by reason of their actual assessment being low.

The price fixed precludes any sacrifice of immediate revenue; and his Excellency in Council is convinced that even a few estates on which the land revenue has been redeemed, scattered through the country, would have, in many indirect ways, a beneficial effect on the unredeemed land revenue itself, as well as on other sources of Government income.

50. Grants which have already been given for a term of years at progressively increasing rents, such as those of the Sunderbunds, will be treated as if the land were permanently settled, if the holder wishes to redeem the future land revenue at the highest rate fixed for any year during the currency of the grant,—provided it shall not exceed the rate fixed in paragraph 29 of this resolution,—and if there is no right of occupancy other than that of the lessee, or that derived from him.

51. Where no right of proprietorship or of occupancy exists in any party, and the land is simply held from year to year or by tenants at will, the actual tenant should be allowed to redeem, unless there be competition, when the redemption should take place by auction.

52. Where estates are assessed in shares (such as co-parcenary estates held on Byachara, Pattadaree, Nirwa, or Baghdar tenures), it will be necessary to define that nothing more is sold than the right of the Government to levy an assessment, and that this is sold only to those who are under liability to pay that assessment. Moreover, that the purchasers will remain subject to all other customary liabilities, whether to individuals or to communities.

These conditions are indispensable to insuring that no other shares' rights shall be injuriously affected.

53. Such tenures will require peculiar care in dealing with them; but, provided that suitable and sufficient precautions be taken, there is no reason why those who hold them should be excluded from the benefits of the measure.

54. As in the cases of sale of waste lands, so in these of redemption of land revenue, no conditions will be imposed as to the expenditure of a given amount of capital, the growth of particular staples, or the like. The party redeeming the land revenue will be left entirely free to follow the course which he may deem most profitable to himself.

55 Provisions will be made in any legal enactment which may be passed to give effect to this resolution, that the party named in the grant, whether of waste land or of land on which the assessment has been redeemed, or his legal heir or representative, shall be regarded as the sole legal owner of the land, subject only in the latter case to claims other than those of Govenment, and to sub-tenures and subordinate rights of occupancy existing at the time of redemption, and that no transfer of property in it shall be recognised by our courts of fiscal officers unless duly registered.

56. With a view to secure the Government and the public creditor against any loss of existing sources of Government income, provisions will be made by law that all sums paid in purchase of waste lands, or in redemption of land revenue, or in otherwise forestalling the land revenue, shall be paid to commissioners, and periodically invested in such manner as the law may direct. The commissioners will report annually to Government the total amount they have received and invested, and the districts from which it has been received, and their reports will be published.

57. The local Goverments will be called on to prepare the draft of a law to give legal effect to these measures within their several jurisdictions, so as to secure for all grantees a legislative title to their property.

But it is not necessary to await the enactment of such a law before making known, and, as far as practicable, acting upon the rules which have been here laid down.

By order of his Excellency the Governor General in Council,
W. GREY, Secretary to the Government of India.

EXPORT OF ARMS, AMMUNITION, &c.

Two extraordinary *Gazettes* have been published, prohibiting the export or arms, ammunition, &c., from this country, The proclamations run thus :—

BY THE QUEEN.—A PROCLAMATION.

VICTORIA, R.—Whereas in and by a certain statute, made and passed in the Parliament held in the 16th and 17th years of our reign, and intituled "The Customs Consolidation Act, 1853," it is, among other things, declared and enacted as follows, that is to say:—

"The following goods may, by Proclamation or Order in Council, be prohibited either to be exported or carried coastwise:—Arms, ammunition, and gunpowder, military and naval stores, and any articles which Her Majesty shall judge capable of being converted into or made useful in increasing the quantity of military or naval stores, provisions, or any sort of victual which may be used as food by man; and if any goods so prohibited shall be exported from the Udited Kingdom or carried coastwise, or be water-borne to be so exported or carried, they shall be forfeited."

And whereas we have thought fit, by and with the advice of our Privy Council, to prohibit either to be exported or carried coastwise the articles hereinafter mentioned (being articles which we judge capable of being converted into or made useful in increasing the quantity of military or naval stores), we, therefore, by and with the advice of our Privy Council, and by this our Royal Proclamation, do order and direct that, from and after the date hereof, all gunpowder, saltpetre, nitrate of soda, and brimstone shall be, and the same are, hereby prohibited either to be exported from the United Kingdom or carried coastwise.

Given at our Court, at Windsor, this 30th day of November, in the year of our Lord 1861, and in the 25th year of our reign.

GOD SAVE THE QUEEN.

At the Court at Windsor, the 30th day of November, 1861, present the Queen's Most Excellent Majesty in Council.

Whereas, it has appeared expedient and necessary to Her Majesty, by and with the advice of her Privy Council, to prohibit the articles hereinafter mentioned to be exported or carried coastwise from the islands of Jersey, Guernsey, Alderney, and Sark, and the Isle of Man respectively, except as hereinafter provided. Her Majesty is therefore pleased, by and with the advice of her Privy Council, to order, and it is hereby ordered, that from and after the publication of this Order in the said islands respectively, the following articles:—namely, gunpowder, saltpetre, nitrate of soda, and brimstone, shall be, and the same are, hereby prohibited to be exported or carried coastwise from the said islands of Jersey, Guernsey, Alderney, and Sark, and the Isle of Man respectively, except with the licence of the Lieutenant-Governor or other officer administering the government of such islands respectively for that purpose first had and obtained.

And the Lieutenant-Governors of Her Majesty's islands of Jersey Guernsey, Alderney, and Sark, and the Isle of Man respectively for the time being, are to give the necessary directions herein as to them may appertain. ARTHUR HELPS.

BY THE QUEEN.—A PROCLAMATION.

VICTORIA, R.—Whereas in and by a certain statute, made and passed in the Parliament held in the 16th and 17th years of our reign, and intituled "The Customs Consolidation Act, 1853," it is, amongst other things, declared and enacted as follows, that is to say:—"The following goods may, by proclamation or Order in Council, be prohibited either to be exported or carried coastwise:—Arms, ammunition, and gunpowder, military and naval stores, and any articles which Her Majesty shall judge capable of being converted into or made useful in increasing the quantity of military or naval stores, provisions, or any sort of victual which may be used as food by man, and if any goods so prohibited shall be exported from the United Kingdom or carried coastwise, or be water-borne to be so exported or carried, shall be forfeited."

And whereas we have thought fit, by and with the advice of our Privy Council, to prohibit either to be exported or carried coastwise the articles hereinafter mentioned—that is to say, arms, ammunition, and military stores (including percussion caps and tubes), and also lead (being an article which we judge capable of being converted into or made useful in increasing the quantity of military or naval stores): We, therefore, by and with the advice of our Privy Council, and by this our Royal Proclamation, do order and direct that from and after the date hereof all arms, ammunition, and military stores (including percussion caps and

tubes), and also lead, shall be and the same are hereby prohibited either to be exported from the United Kingdom or carried coastwise.

Given at our Court at Windsor this 4th day of December, 1861, and in the 25th year of our reign.

GOD SAVE THE QUEEN.

At the Court at Windsor, the 4th day of December, 1861, present the Queen's Most Excellent Majesty in Council.

Whereas it has appeared expedient and necessary to Her Majesty, by and with the advice of her Privy Council, to prohibit the articles hereinafter mentioned to be exported or carried coastwise from the islands of Jersey, Guernsey, Alderney, and Sark, and the Isle of Man respectively, except as hereinafter provided, Her Majesty is therefore pleased, by and with the advice of her Privy Council, to order, and it is hereby ordered, that from and after the publication of this order in the said islands, respectively, the following articles:—namely, arms, ammunition, and military stores (including percussion caps and tubes), and also lead, shall be and the same are hereby prohibited to be exported or carried coastwise from the said islands of Jersey, Guernsey, Alderney, and Sark, and the Isle of Man respectively, except with the licence of the Lieutenant-Governor or other officer administering the government of such islands respectively for that purpose first had and obtained.

And the Lieutenant-Governors of Her Majesty's islands of Jersey, Guernsey, Alderney, and Sark, and the Isle of Man respectively, for the time being, are to give the necessary directions herein as to them may appertain. ARTHUR HELPS.

Agriculture.

LAND DRAINAGE; OUTFALLS.

IT was suggested some three years ago, after a succession of seasons had occurred with considerably less than average falls of rain, that there had been such an amount of drainage executed throughout England as permanently to affect the climate. The suggestion, if not actually laughed at, met with but little acceptance, and the year 1860 offered a too complete and very practical refutation of the figment. The truth is, that the extent of land requiring drainage which has been drained is comparatively small, and nothing can be more important than to call the attention of owners and occupiers of land to the absolute necessity which exists for prosecuting with vigour this fundamental improvement. Until land too retentive of moisture has been relieved of its surplus water, all other attempts to improve it are practically useless. Underdrainage has recently formed the subject of a lecture at the London Farmers' Club, by Mr J. Bailey Denton, who, as the engineer and surveyor of one of the Drainage Companies, and an excellent practical drainer, is fully competent to discuss the subject. His thesis was "The Effect of Underdrainage on the Arterial Channels and Outfalls of the United Kingdom." He states, that the passing of the Public Moneys Drainage Act in 1846, which first placed at the disposal of the landed interest public money on loan for drainage purposes, and established the principal of charging entailed properties with the gradual repayment of the loans, gave an immense impulse to drainage improvements. Besides public moneys so lent, there are several Companies which grant loans for drainage and other improvements, and which have powers for obtaining first charges on settled estates. There is also a Private Moneys Drainage Act, which enables the life-tenant of an entailed estate to charge the property for similar purposes. The sum actually expended under the Public Moneys Drainage Act amounts to 3,520,258*l*, and under the Private Moneys Drainage Act 234,800*l* have been expended. The various Companies have negotiated advances of money to landowners for drainage and other agricultural improvements to the amount of 1,503,498*l*. And a large capitalist is stated to have recently obtained a special Act of Parliament enabling him to make advances for the improvement of entailed estates upon the same terms and in the same manner as such advances are made by the Improvement Companies. Thus it is obvious no landowner need omit to improve for want of the necessary funds. The extent of the land drained under the several public and private Acts is 910,000 acres, at an average cost of 5*l* 7s per acre. Mr Denton estimates the land drained by landowners with their own capital at 500,000 acres. Yet, although a total sum of 5,258,555*l* has been expended in drainage under the supervision of the Inclosure Commissioners, and in accordance with the powers of those Acts of Parliament, and nearly a million and a half of acres have been drained altogether, Mr Denton says: "But, after all the lands drained by one means and another are summed up, they do not amount to one-sixteenth of the extent yet required to be drained, which is estimated at above twenty-one millions of acres of cultivated land and land capable of profitable cultivation after drainage."

He also mentions a fact worthy of notice, *i. e.*, that the higher rate of interest paid for loans to the companies and private capitalists than the rate paid for Government loans has checked the drainage by owners of entailed estates, but that the increased extent of land drained by the larger and richer proprietors with their own money more than makes up for the deficiency. This shows that the public money was lent under the market price, and that, after all, the best course is to leave improvement of land to be worked out by the owners without petting or advances by the Government. The larger proprietors, whose estates are in most cases entailed as well as those of smaller proprietors, find it better to drain their land with their own money, instead of availing themselves of the more cumbrous system of advances by the Improvement Companies. The advantage of improvements made with the landlords' own money is that they are commonly effected by means of income, and constitute, in fact, savings on the part of the proprietors. At the same time, it may be well that landowners should bear in mind that they can lay out their money, whether savings or other funds, on their own settled estates, and yet secure such money for the benefit of their younger children. The son who succeeds to the estate will also have been greatly benefited by finding the estate improved by means of the outlay after the charge is run out. Mr Denton also referred to the effect of the wet year 1860 as awakening farmers to the necessity of deep draining strong land. Indeed, draining and deep cultivation are now well nigh universally acknowledged to be the primary and essential improvements on strong soils. A minimum depth of four feet is now the admitted rule, to be applied wherever practicable, and with proper attention to the irregularities of surface, and the proportioning the width of drains to the character of the soil and subsoil, constitutes the drainer's axiom. The main difficulty is in the cost, for in stiff clays the drains cannot well be laid too close together. And strong lands, even when drained, must not, if in grass, be poached and trodden by heavy stock, or, if arable, by culture or by sheep, in wet weather.

The lecturer classifies soils surcharged with water as free or percolating, and absorbent retentive soils. The first class of soils can usually be dried by distant drains, and test holes are the best index of their successful and economical drainage. By attention to the levels and the like, land of this kind can often be laid dry by a few and comparatively distant drains, often laid at irregular intervals. The strong and retentive soils must be uniformly drained throughout. No increase of depth beyond the four feet will enable the drainer to lay his drains in clay soils at a greater distance than seven or eight yards apart. And test holes afford on the latter class of soils no criterion of the effect or efficiency of the drainage. In practice, these classes of soils will be found a good deal mixed up together, and hence skill and discretion are often required to drain effectually at the least practicable expense. Mr Denton says all soils which contain 1-10 of argillaceous matter are found to require underdraining; and the distance between the drains will vary with the proportion of alumina the soil contains. The effect of drainage is to lessen floods, which arise chiefly from heavy falls of rain flowing off the surface of the soil, and on drained land nearly all the water makes its way through the soils into the drains, whence it is gradually carried away by the outfall ditches, brooks, and rivers. It also strengthens the natural springs by retaining at a lower level the water-bed and lessening evaporation. Early in the season the free soils, when drained, discharge the rainfall most rapidly, but after the autumn and early winter rains, when the clay soils "have had their peculiar faculty of retention fully satisfied, and hold within them as much as in their drained condition they are capable of holding," they discharge the largest proportion of any subsequent rainfall in the shortest time.

We here find the clay-land farmer's practical rule of taking all his stock off his land by Christmas, and earlier if there be great falls of rain, fully justified. We may also comprehend how the general drainage of a clay-land district may, late in the season, say in January and February, throw upon the outfalls and rivers an enormous mass of water in a short time, and render the improvement of river outfalls essential to protect low-lying districts from severe floods.

To that object the "Land Drainage Act 1861" is directed. It authorises the appointment of commissions of sewers, and the creation of elective drainage districts throughout the country wheresoever a large area requires drainage, or a combined system of drainage, warping, or irrigation. For these purposes large powers to clear rivers and outfalls, and to rate the lands thereby affected, are given. To go into details of the Act would be merely tedious. There is a power to private owners to procure outfalls, which is of more individual interest. Thus a person about to drain his land may find it necessary, in order to effect his object, that new drains should be opened through the lands of another person, or that existing drains or ditches belonging to another owner should be cleansed, widened, straightened, or otherwise improved." He may, in such cases, apply to the other owner for leave to make drains or improvements through his land. This is done by a notice, stating the nature of the works he proposes to make, as well as the compensation he proposes to afford: The adjoining owner may by deed assent to the application and the terms proposed, and such assent is then to be binding on all persons having any interest in the estate. If the adjoining landowner be under disability, *i.e.*, an infant, married woman, or lunatic, and therefore having no power to assent, the arrangement must be approved by two surveyors. A record of the assent to be registered by the Clerk of the Peace.

Should the adjoining owner refuse to assent, the applicant may procure the matter to be decided by justices at petty sessions or by arbitration. By these means, the terms on which an outfall is to be obtained will be settled between the parties. After outfall drains have been thus opened, they may be kept clear and maintained by the person whose land has been drained by such means

or his successors. Mr Denton referred to this Act, and considered its provisions to be too complex, but we cannot help seeing that it affords relief in cases where before the landowner was helpless, and that it may be made the means of much useful improvement.

Literature.

THE CORNHILL MAGAZINE. December. Smith and Elder.
MACMILLAN'S MAGAZINE. December. Macmillan.
THE SIXPENNY MAGAZINE. Ward and Lock.

THE December number of the "Cornhill" winds up the year with spirit. "Philip" improves on his way through the world, *i.e.*, the story becomes more interesting, and, strange to say, we have in Charlotte a female character that we can really and honestly like—and more, one even that its creator does not sneer at—a character simple, loveable, and honest. We welcome a more genial spirit in our great satirist, as the one thing wanting to make his writings as agreeable as they are racy and piquant. We must still lament over Mrs Stowe's great mistake in her choice of a subject. Her peculiar talent finds no free play in this tale of saints and monks, and every time we turn to it we feel as if we were being defrauded of that inimitable humour which plays through and lightens the deep pathos of "Uncle Tom's Cabin," and which finds its proper sphere in the New England life so happily described in "The Minister's Wooing." The faint sparkles which enliven this, we must say, rather dull Italian story, do but serve to make us more deeply regret this error. In America Mrs Stowe is racy, graphic, and humorous: out of it she is weak, wordy, and vapid, comparatively so at least. "Brown, Jones, and Robinson," and their struggles with Mrs Morony, the courageous Irishwoman, who insists on taking possession of the superior silk mantle marked at "one, eighteen, eleven and a halfpenny," worth much more in reality, and placed in the windows as a lure to the unwary, is amusing enough, and, though highly coloured, is perhaps scarcely an exaggerated picture of some of the advertising establishments so common in these days. We apprehend that a tragical termination is at hand to the short-lived prosperity of Magenta House. There is a carefully written paper on "Competitive Examinations," the main purport of which may be gathered from the following extract:—"The general result of the whole is, that considered as instruments of education, competitive examinations are useful, but that they are useful in proportion to the immaturity, the languor, and the absence of the higher qualities of the mind in the persons examined; and that there is a point which is soon reached, at which they become positively injurious to students of a higher kind. Considered as tests for the distribution of political offices, they are useful as pledges of the sincerity of Government, and of their will to distribute their patronage on pure principles; they are also useful as a rough, but effectual cure for jobbing; they would raise the standard of efficiency amongst Government officers of an inferior kind, and for others of a superior kind under certain special circumstances. On the other hand, they would be unfavourable to men of the highest order, and also to useful men of a lower order, who are required for rough purposes. In a word, they would form a rather low level of mediocrity, to the exclusion of all other persons." A paper on the "Further Reconstruction of the Navy," another number of the "Roundabout Papers," and one of Mr Doyle's "Bird's-Eye Views of Society," more carefully drawn than the subject deserves, complete all that is noticeable in the present number. The illustrations to the "Excursion Train," though clever, are exaggerated and rather vulgar.

"Macmillan's" opens with a paper by Miss Cobbe on the part that women play in Social Science Congresses. She defends her sex with much ability and also some pedantry. She is a clever and vigorous writer, and may be pardoned for mingling a little feminine virulence with her vivacity. "Ravenshoe" progresses with spirit, but Mr Henry Kingsley must take care that his rough manly style does not degenerate into coarseness. The tale possesses the great merit of originality, and a wild freedom pervades the atmosphere which reminds one of a fresh sou'-wester; but there is a degree of licence of expression and sometimes of thought which could not be increased by a hair's-breadth without greatly injuring the novel. "Mr Patmore's Victories of Love" is finished, we presume, in this number by a wedding sermon, which combines very characteristically Mr Patmore's peculiar beauties and peculiar faults. "Paris Revisited," a second article on the subject, is a very interesting paper on the present state of things in France. The writer looks below the surface, and sees hopeful elements even under the Imperial *regime*. Three of them, the *Associations Ouvrieres*, or manufacturing and trading associations of working men, Young French Protestantism, and Liberal Roman Catholicism, he enters into at some length. We have not space to discuss the subject here, but must refer our readers to the paper, which they will find well worthy of a perusal: they are the impressions of a thoughtful mind on a most interesting subject. Mr Hughes contributes a paper on "Anonymous Journalism," which he deprecates whilst admitting its expediency and agreeableness. This number contains an interesting letter from Mr Maurice in defence of the Thirty-nine Articles,—a direct reply to the comments of our contemporary the *Spectator*, on Dr Lushington's recent judgment. Mr Maurice believes that the Articles are the great bulwarks of clerical freedom, though evidently disposed to protest strongly against Dr Lushington's recent interpretation of them. That Mr Maurice is profoundly sincere in his view of the Articles we honestly believe; but what that view is, it is not quite so easy to say. We recommend the letter to the careful study of dialectic theologians. The spirit which breathes through it is of course both noble and religious.

Of the "Sixpenny Magazine," we may briefly say that there is an instructive article on the Cotton Supply, written, however, before the new phase of the American question, and that this, with the continuation of M. About's tale, is the only important part of the number.

THE DUBLIN UNIVERSITY MAGAZINE. December. No. 348. Hurst and Blackett.

THE "Dublin University Magazine" for this month is peculiarly national in its tone, more than one-half the number being filled with Irish tales, ballads, and historical gleanings. Many of the last, drawn from original sources, throw a curious light upon the state of Ireland under the rule of its O'Neils and O'Donnells, and are amusing as well as instructive reading. The only two articles upon modern politics are one on "Austria and the House of Lords," showing that, in spite of Conservative prejudices, Austria is no longer a source of strength, but of weakness, to the political equilibrium of Europe; and one on "Strikes," in which the writer's just horror of the suicidal effect of warfare between employer and employed renders him, we think, somewhat unjust to the more active and prominent party in such quarrels—the workmen.

THE ENGLISH WOMAN'S JOURNAL. December. No. 46.

THIS month's number of this useful and intelligent periodical gives a full report of the doings of the various Societies for the promotion of the employment of women. It is able to report a gradual, but steady progress at home, and an extension of the same spirit to France and Italy, as proved in the last named country by the establishment of a Ladies' Philanthropic Association, and in the former by an aroused attention to the education of women. Some letters from the Colonies on the subject of the emigration of well-educated governesses; a pleasing memoir of "Rosa Ferruci," an Italian lady of great talent and amiability; a few additional sketches of "Slavery in the South"; and a sensible article on the vexed question of "What makes a Lady?" are the principal attractions of the number.

The ART-JOURNAL. November. Hall, Virtue, and Co.

THE steel engravings for this month are Phillip's "Gipsy,"—a rather common-place mother and child,—and Turner's "Frosty Morning—Sunrise," a beautiful English landscape. The sculpture is the Princess Helena as "Peace," a graceful, simple figure, from a statue by Mrs Thornycroft in the possession of the Queen. We have the conclusion of the Rev Mr Cutts' illustrated article on the "Pilgrims of the Middle Ages," and a continuation of Dr Bell's ingenious and entertaining inquiry into the "Origin and Nomenclature of Playing Cards," with its curious woodcuts from German, Dutch, and Spanish cards. The current chapter on British artists is devoted to Fuseli, of whose pictures three specimens are here engraved—the "Nightmare," a scene from the "Tempest," and "Titania," of which the second is the only one that can, we should think, give any pleasure to the spectator. "Gothic Metal Work," and Part 22 of the "Hudson," are the remaining illustrated articles. Among the other papers, the most interesting is that on "Stereochromy, or Water-Glass Painting," a new mode of mural painting, which has been practised with much success by Kaulbach and his pupils in decorating the New Museum at Berlin, and which offers great advantages over the old methods of wall-painting. The present article gives an interesting account of Mr Maclise's difficulties in acquiring this new art, which he has now mastered, and which he is going to put in practice in the Royal Gallery, with his picture of the "Meeting of Wellington and Blücher after the Battle of Waterloo." We should also mention an article sent from Florence, by Mr John Stewart, on the Italian Exhibition, and some good suggestions for the "Portrait Gallery at the Exhibition of 1862."

GOOD WORDS. November. Edinburgh: Strahan. London: Groombridge.

THIS is rather a better number than usual. There are two pleasant articles on natural history: "Checks and Counter-checks," by J. H. Fyfe, and "Meadfoot and the Starfish," by Mr Gosse,—the latter being the description of a picturesque Devonshire stroll by the sea side. "Alexandria and its Christian School," by Principal Tulloch, is a short well-written sketch of that city and its teachers in the first two centuries after Christ, for which the writer confesses his obligations to an article in the "North British Review" for August, 1855. It seems strange that Dr Tulloch should so often borrow the substance of his articles from previous recasts by other hands. "Missionary Enterprise in Equatorial Africa," by the Rev. A. Bushnell, communicates a good deal of original and valuable information, and is, perhaps, the best article in the number. Dr Whately contributes a short paper on "Consistency," of a

rather threadbare character. There are two papers by foreigners,—"The Emancipation of the Serfs," by O. Orischinsky, of St Petersburg, and a curious account, by the Rev. J. de Liefde, of "The Waker, the Dreamer, and the Sleeper," three embankments in Holland which bear those names, and which for three centuries have guarded the coast from the incursions of the sea. Mr de Liefde gives an interesting account of the great danger which threatened the Waker from a storm in November, 1751, and of the heroic efforts by which the embankment was repaired just in time to avert the rising tide which would have overwhelmed the surrounding country. The editor's tale of "The Old Lieutenant and his Son" seems to be approaching its *denouement*. The illustrations to this periodical are of very unequal merit, the steel engraving being the only good one; but even that is seldom of a pleasing character. In the present instance it is Lazarus at the Rich Man's Gate. Religious dissertations, by Dr Guthrie and Dr Robert Lee, open and conclude the number.

THE COSMOPOLITAN REVIEW. Nos. 10 and 11. October and November. London: F. Pitman, 20 Paternoster row.

THIS little monthly, which calls itself "a Political, Social, Philosophical, Scientific, and Literary Magazine," continues to be one of the crudest specimens of the cheap press. The paper entitled "Labour—Is it a Pleasure or a Necessity?" is too exquisitely absurd to be worth refuting; but the article on "Property," though equally ill written, presents just such a mixture of truth and error as may give it power to do harm to those who are not able to see through its sophisms. A similar spirit of misrepresentation shows itself in the lucubrations of a Mr A. C. Cuddon on "Liberty! Freedom!" who affirms that "the populations of the world are reduced and divided into Rich and Poor—viz., those who possess the land and bits of metal, and those who possess them not—the Oppressors and the Oppressed." The only political article in these two numbers which contains any sense is that on the American Peace Society, which really administers a just criticism, though in rhetorical language. A novel by Berkeley Aikin, entitled "Dr Vanhomrigh," which has reached its 21st chapter, is nearly as crude as anything in the Review. Each number contains an article headed "Progress of Cosmopolitanism," which proves to be nothing more than a collection of newspaper notices of the magazine itself. We do not anticipate a brilliant success for the "Cosmopolitan Review."

BEETON'S BOOK OF GARDEN MANAGEMENT AND RURAL ECONOMY. Part 1. London: S. O. Beeton, 248 Strand.

A CHEAP manual, interspersed with woodcuts, and pleasantly written. Of its accuracy respecting different soils, and the plants that grow thereon, we are no judges, but assuming the information to be correct, the book will doubtless be very useful to young gardeners.

BEETON'S BOOKS OF HOME PETS. Part I. The Parrot Tribes. Part II. Ravens, Jackdaws, Jays, Starlings, Magpies. Part III. Thrushes, Blackbirds, Blackcaps, &c. London: S. O. Beeton, 248 Strand.

THE BOY'S OWN LIBRARY.—WILD SPORTS OF THE WORLD. No. 7. London: S. O. Beeton.

THESE are amusing books, full of lively anecdote, and interspersed with good illustrations, both woodcuts and chromolithographs. Nothing can reconcile us to the selfish practice of caging birds; but we cannot help indulging in a faint hope that the multiplicity of directions here laid down for preserving the health of the tiny prisoners misnamed "home pets," may tend to discourage some children from undertaking so thankless a task.

The "Wild Sports of the World" is chiefly made up of extracts from recent works of travel.

SEA-SIDE DIVINITY. By the Rev. ROBERT W. FRASER, M.A., Author of "Scientific Wanderings," "Sacred Rites of Ancient Israel," &c. James Hogg and Sons.

IT is hard to make a really dull book out of the study of nature. Mr Fraser has done his best, but the innate attractiveness of his theme has been too much for him. In spite of his ponderous style and the sermon appended to each chapter, his book is readable as well as instructive.

An acquaintance with the phenomena and laws of nature, and an eye open to perceive the wonders and beauty that lie round us on every side, no doubt add greatly to the enjoyment of the sea-side, as of any other country place; and "Sea-Side Divinity" may be put into the hands of young people (often more tolerant of moralising than their elders) with a tolerable confidence that they will find in it something that is entertaining, as well as much that is worth knowing, and much very true, if rather trite, religious exhortation.

The illustrations by Humphreys, Wolf, and others, are very pretty, and the whole getting-up of the book is in good taste.

BOOKS RECEIVED.

Map of Australia, New Zealand, and Tasmania. Black.—Lectures on the Ancient and Modern Drama. Lacy.—Four Conquests of England, 2 vols.—Experiences of an English Sister of Mercy.—The Wonderful Adventures of Tuflongbo.—Lavinia.—The Lady's Guide.—Warp and Woof. 3 vols.—Song Birds.—Household Education.

[For remainder of Literature see Special Supplement published this day.]

Foreign Correspondence.

(FROM OUR OWN CORRESPONDENT.)

PARIS, Thursday Evening.

M. Fould has not yet made any revelations as to what his financial plans will be, and consequently people are beginning to doubt that he has any prepared. This has occasioned some surprise, as it was thought that when he entered office amidst such a loud flourish of trumpets, he had not only ascertained the gravity of the situation, but had settled in his own mind the remedy for it. Owing to his silence respecting his schemes, public rumour ascribes many to him, of which, perhaps, he has no thought. One of these schemes is the adoption of an income tax. The propriety of establishing such an impost has occurred to many people, and there is no doubt, as I said in a previous letter, that if great financiers like Peel or Wilson had to deal with the difficulties now existing in France, they would have recourse to such a tax. But there is reason to fear that the unpopularity of the measure, in the midst of the financial ignorance which prevails in this country, would be so great as to intimidate M. Fould from proposing it.

In my last proof was given that the new Minister, in his famous report on the financial situation, had considerably understated the amount of "supplementary and extraordinary credits" accorded in 1860; he having said that they were only 115,000,000f, whereas in reality they were 237,326,375f. With regard to the year 1861, he has also fallen into grievous error. He calculates the supplementary and extraordinary credits for *the whole* year as "approaching" 200,000,000f, without, however, counting those which might have to be opened on account of the dearness of food; but on referring to the decrees which grant such credits, and which are inserted in the *Bulletin des Lois*, I find that in eleven months of the year, from the 1st January to the 30th November, the amount greatly exceed the Minister's estimate, and yet that no grant was taken for food. It is not improbable, besides, that the credits accorded are, in reality, much greater than what is set down in that publication, since there is no certainty that *all* the decrees are inserted. Be that as it may, the following is an analysis of the supplementary and extraordinary credits for which decrees appear in the *Bulletin des Lois* of the present year, from the 1st January to 30th November:

SUPPLEMENTARY CREDITS.

No. of Credits.	Department to which Accorded.	Amount. francs.
9	Finance	13,631,609
8	Public Instruction	2,374,444
14	Ministry of State	3,780,406
3	Marine	3,049,339
2	War	329,332
3	Foreign Affairs	1,611,300
3	Interior	1,285,459
3	Agriculture and Public Works	7,583,382
1	Justice	630,946
1	Algeria	547,450
37		34,823,967

EXTRAORDINARY CREDITS.

No. of Credits.	Department to which Accorded.	Amount. francs.
8	Finance	7,327,238
5	Public Instruction	1,164,844
7	Ministry of State	5,487,706
3	Marine	87,256,917
3	War	95,299,694
4	Foreign Affairs	4,804,697
7	Interior	6,572,666
12	Public Works	30,193,000
1	Justice	55,000
1	Legion of Honour	145,000
51		238,306,762

The total of these credits is 273,130,729f, more than 73,000,000f above M. Fould's calculation. In addition, there are decrees which accord "extraordinary credits," under the title "exceptionally allowed by the law of the 31st July, on what remains of the 500,000,000f loan in 1859, and of the credits granted in that year which were annulled." These decrees allowed credits as follows:—

	f.
Ministry of State	5,550,000
— Interior	2,000,000
— War	1,500,000
— Marine	4,000,000
— Public Instruction and Worship	2,900,000
— Agriculture and Public Works	29,050,000
Total	45,000,000

The conclusions to be drawn from the discrepancies between the statements made by M. Fould and the reality presented by the decrees in the *Bulletin des Lois*, are—1. That the French Treasury owes considerably more than the 40,000,000*l* sterling set down by that honourable gentleman. 2. That the accounts of the Ministry of Finance must be kept in a very strange way, when an eminent financier, who had been a Minister of Finance and was on the eve of becoming a Minister again, could go so far astray.

The Senate has met to pass a Senatus Consultum for making the alterations in the mode of voting the Budget by the Legisla-

tive Body, which the Emperor was pleased to order some time back. This famous measure has fallen far short of public expectation. It divides, it is true, the Budget into 66 sections instead of 9, but it requires that each section shall be voted in a block, so that the Legislature will not be able to make any reduction in the details of any one; neither will it be able, in order to cut off a useless expense, to reject a whole section, inasmuch as to do so would create confusion in the public service, owing to the manner in which different subjects—the indispensable and the unnecessary—are jumbled together in the sections. As to the power of decreeing supplementary and extraordinary credits without the consent of the Legislature, which the Emperor has abandoned, it will, it is now feared, be of little practical utility, in presence of the privilege reserved to the Ministers of transferring to any one branch of their respective departments the sums granted for another.

Subjoined is a detailed account of the imports and exports of flour and grain from the 11th to the 20th of the month of November:—

Designation.	Importation. General Commerce. quintals	Importation. Special Commerce. quintals	Exportation. General Commerce. quintals	Exportation. Special Commerce. quintals
Flour	48,174	48,628	5,376	3,434
Wheat, spelt, &c.	816,793	746,858	5,643	1,693
Rye	2,368	2,368	7,509	7,509
Barley	13,464	13,464	1,470	1,470
Maize	12,623	13,548	1,305	15
Pulse and other grain	5,095	9,264	1,589	1,380

The quintal is nearly 2 cwts. As has been before explained, the phrase "General Commerce" in imports means the total quantities brought in, and "Special Commerce" the portion thereof which is taken out of bond for consumption. As to exports, "General Commerce" signifies foreign and French productions, and "Special Commerce" the quantities thereof which are exclusively French.

The failure of a banker at a place called Valonges, in Normandy, with liabilities to the amount of 8,000,000f, is announced in the newspapers.

The Credit Foncier advertises this day the issue of the second half of the loan of 75,000,000f which it was some time back authorised to raise. The issue is to be in bonds of 430f, to be paid off at 500f, or in bonds of 86f 75c to be paid off at 100f; the interest is only to be 3 per cent., but premiums of 100,000f, 20,000f, &c., to be drawn for by lot, are to be distributed half-yearly.

The demands on the Bank of France for discounts have recently been very numerous.

The Bourse has naturally been influenced by the apparently impending conflict between England and the United States, though not to such a great extent as might have been anticipated. The following are the week's quotations:—

	Thursday, Nov. 28. f	c	Thursday, Dec. 5. f	c

The Minister of Commerce has addressed a circular to the Chambers of Commerce, informing them that the Treasury in England has decided that Manchester shall enjoy new facilities for the import of foreign merchandise and the export of its productions—in fact shall be in the same position as London; that is to say, "That cargoes, instead of being subjected to the onerous obligation of disembarkation, storing, re-embarkation, &c., at the intermediate port of Liverpool, may be taken direct to Manchester without any other removal than that which may be necessary to place them in vessels of a small draught of water. If," the Minister adds, "the merchandise is free from duty, it will go straight to Manchester without being accompanied; in the contrary case, it will be escorted by Customs officers at the expense of the owners," The Minister, moreover, announces that similar facilities are to be accorded to exports from Manchester.

By a recent decision of the Board of Customs, machines for warping, &c., and "other analogous apparatus" from England and Belgium, are to pay the same import duties as machines for weaving; and machines for combing flax and other textile matters are to be admitted at the same duties as those of cleaning, &c., flax, wool, and cotton.

An official account of French railways in the first nine months of the present year, compared with the corresponding period of last year, has just been published, and the following are the principal features of it:—The designation "Old Network" means the original concessions of the great trunk lines, or of independent small lines; that of "New Network" signifies the embranchments or prolongations of old lines, or the entirely new lines, on which the Government has guaranteed the payment of interest:—

The following is an account of the markets:—

FLOUR.—Business at *Paris* has not been active. Yesterday the quotations were at 79f to 84f the sack of 159 kilogs for disposable, and 83f to 88f for delivery. In the four marks, the current month was offered at 84f; January and February, 86f; the four first months, 87f to 87f 25c; March and April, 88f.

WHEAT.—At *Paris*, yesterday, offers were very restricted; however, the prices were 50c to 1f higher than last Wednesday. In foreign wheats, white English and white Dantzic, offered at 48f 50c to 49f, were taken at 48f and 48f 50c; for red ditto, 47f; and for Pomeranian, 47f 50c were demanded. American spring was taken at 41f 25c. Some American wheat of a little better quality, offered at 43f, was not bought, and the same was the case with Hungarian, offered at 44f. In French qualities, Lorraine, offered at 46f 50c, Burgundy at 45f and 46f, were also taken at these prices, or with an abatement of 50c. Centre was offered at 44f, 46f, and 46f 50c. Of the provincial markets, 39 present a rise of 3c to 70c, 34 a fall of 70c to 5c, 15 are reported firm, 49 without variation, and 16 calm.

COTTON.—At *Havre*, in the week ending Friday, business was not very active, and under the influence of the news from America, prices receded considerably. The sales were 6,627 bales, and the arrivals 7,599, of which 1,780 were from Savannah. The closing prices were 12f lower for the very low, 11f for low, and 12f other sorts; consequently, very low New Orleans was at 131f the 50 kilogs; low ditto, 142f; very ordinary, 149f. The stock on Friday was 154,840 bales, against 104,760 at

the same date in 1860, and 40,500 in 1859. This week, prices have continued to decline. Yesterday, very low New Orleans was quoted at 114f to 117f: low, at 125f to 128f.

SUGAR.—At *Havre*, business in the week which ended Friday was very calm, but prices were firm. The sales consisted only of 74 casks. French West India "usiné" went at 54f, duty paid, the 50 kilogs; 518 casks Havana, for delivery, 33f 50c in bond. By auction, 377 Havana damaged were also disposed of. The arrivals were 917 casks and 4,416 sacks. This week, prices have somewhat receded. French West India has been quoted 45f 25c; and Havana, 32f in bond. At *Nantes*, last week, business was very dull, and consisted only in the sale of 429 sacks *candi* Reunion at 54f; 97 ditto ditto Havana, 55f 75c; 55 sacks *sirop*, 48f duty paid. This week, no business has been done. At *Bordeaux*, last week, business was regular, and prices were firm. 100 bales Reunion, disposable, went at 50f 50c; 1,040 ditto, 50f; 1,000 ditto, 55f 50c. The sales for delivery consisted of 5,344 bales at prices kept secret. This week, French West India has been quoted 46f 50c. At *Marseilles*, last week, business in French colonial sugar was not very considerable, but of a certain importance in Brazilian and Spanish West India sugars. By auction, considerable quantities of French and foreign sugar, damaged, were also disposed of.

COFFEE.—Business at *Havre* was, in the last week, little animated, and on the Hayti article prices somewhat declined. The sales were 200 sacks Hayti Cape disposable at 91f to 92f the 50 kilogs in bond; 200 ditto, ditto, for delivery, 90f 50c; 100 Gonaives disposable, 92f 50c to 93f; 1,100 Port-au-Prince for delivery, 90f and 87f; 486 Rio, not washed, disposable, 78f to 84f; 1,000 ditto ditto, 82f 54c to 84f; 63 Rio washed, disposable, 96f; 200 Java, 117f 50c, duty paid; and 117 ditto Demerara, 120f. The arrivals were about 4,600 sacks. This week, Hayti has been at 88f in bond; Rio 86f ditto; Gonaives, 90f to 91f. By auction, 300 Rio damaged have been disposed of. At *Nantes*, last week, no business. This week, same situation. At *Bordeaux*, last week, business was calm. The sales consisted of 545 sacks Rio, not washed, at 101f to 106f; 1,325 ditto, not washed, 88f. This week, 4,595 sacks East India have been sold at prices kept secret. At *Marseilles*, last week, prices were very firm, but business was inconsiderable. 1,400 Rio went at 71f to 73f; 2,000 ditto, 74f in bond; and 1,500 ditto, 68f to 80f. This week, no business has been done.

INDIGO.—At *Havre*, in the week which ended Friday, business was little animated. The sales were 40 chests Bengal prices not stated. This week, no business. At *Bordeaux*, last week, prices were very firm. Business consisted in the sale of 8 chests Vellore, 24 chests Madras, and 6 *ditto* Bengal. This week, some Madras, in quantities, at prices not stated, have been sold.

HIDES.—At *Havre*, in the week ending Friday, business was very active, and prices improved. The sales were these: 6,700 La Plata, dry, went at 107f 50c to 120f the 50 kilogs; 950 ditto, salted Saladeros, 70f to 71f for ox, and 63f for cow; 2,200 Pernambuco, salted, 80f to 82f 50c; 500 Rio Grande, salted, 68f; 110 Martinique, salted, 63f; 28 ditto, dry, 80f. By auction, 340 Carthagena salted, damaged, were also disposed of. In addition, 14 bales Vachettes East India were sold at 110f the 50 kilogs, and 6 bales kid. La Plata at 8f 75c per dozen. The arrivals were 31,875. This week, Valparaiso have been quoted 60f for cow, and 63f for ox; Rio Grande, 65f; Monte Video, 70f to 73f; Rio Grande, salted, 60f for cow, and 67f 50c for ox; California, 47f 50c; Buenos Ayres, dry, for cow, 120f.

WOOL.—At *Havre*, business, in the week which ended Friday, was somewhat active, and prices were firm. The sales were 160 bales La Plata, not washed, at 2f 15c to 2f 55c the kilog; 102 ditto Africa, not washed, 2f 10c; 14 ditto sheepskin Buenos Ayres, not washed, 1f 20c to 1f 45c. The arrivals were in wool 825 bales, and in sheepskin 523. This week, Buenos Ayres, not washed, has been at 2s 15c.

TALLOW.—At *Havre*, last week, no business. The stock on Friday consisted only in 150 casks Russian, 300 La Plata, and 100 New York. This week, America has been at 64f the 50 kilogs. At *Paris*, yesterday, the 100 kilogs were at 128f.

SPIRITS.—Yesterday, at *Paris*, 3-6 of 90 deg., first quality, was at 70f the hectolitre; Montpellier, disposable, of 86 deg., 105f. At *Bordeaux*, the day before yesterday, Languedoc was at 95f, and beetroot, first quality, 84f.

COMMERCIAL AND MISCELLANEOUS NEWS.

Advices from Calcutta, to Nov. 9, are to the effect that increased firmness was observed in the piece goods market, and that prices had advanced 1 to 2 annas. Quotations were as follows:—7 lb shirtings, 5 rs 4 annas to 5 rs 6 annas; 3 lb madapollams, 2 rs 2 annas to 2 rs 3 annas. Few sellers.

The annexed commercial news is dated Bombay, Nov. 12:—Imports—The high price which cotton has now attained to at Liverpool, and the consequent advance in the price of manufactured fabrics at Manchester, coupled with an improved demand for piece goods in the native bazaar, have at length caused a considerable, but as yet partial advance in prices. On the native dealers resuming their purchases of piece goods after the Dewallee holidays, they showed great eagerness to operate largely, and prices advanced at once four to six annas per piece on those makes of grey shirtings in most favour, whilst some other staple makes advanced two annas per piece. Twist—All kinds has rallied, and is now in excellent demand at advanced rates. Metals are dull. Exports—Cotton continues to arrive in large quanties, and, as shipments are still on a limited scale, stocks are fast accumulating. Since our last, prices have not varied much. For linseed, the demand is very active for immediate shipment. Rapeseed is in excellent demand, but our market is nearly bare of stocks. For wool the demand is good, and large purchases have been made both by European and native merchants at an advance of 5 rs per candy on our last quotations. We quote:—To Liverpool cotton, 2*l* 5s; seeds, 1*l* 7s 6d to 1*l* 10s. To London: cotton, 2*l*; seeds, 1*l* 17s 6d to 2*l*.

Other Deposits	13,273,192		
Seven Day and other Bills	738,197		
	36,896,585		36,896,585

Dated the 5th December, 1861. M. MARSHALL, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	20,748,662	Securities	27,214,287
Public Deposits	5,206,334	Coin and Bullion	15,139,763
Private Deposits	13,273,192		
	39,228,188		42,354,050

The balance of Assets above Liabilities being 3,125,862*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

An INCREASE of Circulation of	£43,000
An INCREASE of Public Deposits of	1,002,402
A DECREASE of Other Deposits of	813,117
No change in the amount of Government Securities.	
An INCREASE of Other Securities of	29,431
An INCREASE of Bullion of	194,985
A DECREASE of Rest of	7,869
An INCREASE of Reserve of	188,900

The principal feature in the above account is the large increase in the Government balance, which is in great part compensated by the decrease in the other deposits. The bullion and reserve again show a considerable augmentation. For the first time since the commencement of the quarter, a slight increase has taken place in the other securities, which, however, are still nearly 1,400,000*l* below the point on which they stood on the 2nd October.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1851:—

At corresponding dates with the present week	1851.	1858.	1859.	1860.	1861.
Circulation, including bank post bills	£ 20,011,368	£ 20,883,078	£ 21,942,827	£ 20,923,607	£ 20,748,662
Public deposits	8,077,344	8,855,814	8,608,215	6,617,485	5,206,334
Other deposits	9,539,188	12,371,668	13,444,361	12,472,348	13,273,192
Government securities	13,241,768	10,808,591	10,925,157	9,490,273	10,892,859
Other securities	11,547,043	15,505,731	19,350,811	20,104,335	16,224,428
Reserve of notes & coin	11,664,079	13,357,261	10,261,410	7,933,577	9,779,298
Coin and bullion	16,518,584	18,921,171	16,936,815	13,665,666	15,139,763
Bank rate of discount	3 p. c.	2½ p. c.	3½ p. c.	5 p. c.	3 p. c.
Price of Consols	98¼ xd	96⅝ xd	95⅞ xd	94	90¼ xd
Average price of wheat	37s 6d	41s 5d	44s 8d	54s 10d	60s 6d
Exchange on Paris (short)	25 17½ 22½	25 7½ 15	25 7½ 15	25 17½ 25	25 30 35
— Amsterdam ditto	11 16 16½	11 16 16	11 13 13½	11 14½ 15	11 17 18
— Hamburg (3 months)	13 10 10½	13 7 7½	13 5 5½	13 6½ 7	13 8½ 9

In the corresponding week of 1851, the principal event was the *coup d'état* of the President of the French Republic, by which he dissolved the Assembly by force, and assumed absolute power. A number of the most influential leaders of parties had been arrested, and some disturbances had taken place in the streets, but the insurgents were few and easily mastered. Many innocent persons, however, had fallen under the fire of the troops. Austria had just promulgated a new tariff, but the prohibitive system remained practically unchanged. The difficulty between Spain and the United States had been finally arranged. At home the events in Paris had caused some tightness in the money market and a general fall on the Stock Exchange.

In 1858, the Bank of England adopted the long deferred and then very unexpected step of lowering the rate of discount from 3 to 2½ per cent. The new Chilian loan commanded ¼ premium; the old Turkish Six per Cents. were at 93, and the last loan about par.

In 1859, the unallotted balance of the Turkish five million loan of the previous year, amounting to 620,000*l*, was offered at 62½ per cent., the current quotation of similar bonds in the market being about 65. The whole sum was eagerly taken, and Turkish bonds of 1858 rose to 66 to ⅔, and those of 1854 to 77½ to 78. The French and English funds were both advancing in anticipation of a Congress which was expected to confirm the peace of Europe. There was also an active demand for Indian securities.

In 1860, the advices from America described a severe mercantile crisis owing to the secession panic, but by the latest accounts some recovery had taken place. Gold was still being sent from this side to New York. The siege of Gaëta continued. King Victor Emmanuel had visited Sicily, and been received with the greatest enthusiasm. At home the sailors of the North of England had addressed their brother seamen on the advantages of joining the naval reserve. A terrible colliery explosion had taken place at Risca, South Wales. The case of Streatfeild, Laurence, and Mortimore, the great leather house, was still proceeding in the Court of Bankruptcy.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1851, a deficiency of 2,007,855*l*; in 1858, a deficiency of 3,134,063*l*; in 1859, a deficiency of 5,906,450*l*; and in 1860, a deficiency of 7,631,987*l*. In 1861, the deficiency is 2,951,236*l*.

DISCOUNT AND MONEY MARKET.—The demand for discount this week has again been very quiet, and for short periods the rates of interest continue with a downward tendency. Owing, however, to the uncertainty respecting the present differences with the Federal States of America, there is a disposition to avoid engagements for any lengthened term, and hence long-dated paper is only taken out on advance. For first-class six months' bank drafts 3½ per cent. is required, and for trade bills 4 per cent., and occasionally more. Annexed are the usual charges for the best paper, though some variation necessarily prevails at the different establishments:—

30 days	2½ to ⅝ per cent.
60 days	2⅝ per cent.
3 months	2¾ per cent.
4 months	3 to ¼ per cent.
6 months	3½ to 4 per cent.

On the Stock Exchange the supply of capital continues abundant, and loans on Government securities are offered at 1½ per cent.

At Lloyds' the war risk on outward English vessels to the East is about 15s per cent., and for homeward ships 20s, but these rates are merely an approximation, the terms variously quoted differing considerably. American shipping is now comparatively seldom chartered, and no insurances have been in the market for some days.

The general opinion in the City respecting the probable termination of the San Jacinto outrage continues adverse, and it is mostly feared that a war is inevitable. In other quarters there is a feeling that the determined attitude of the British nation will produce so great an impression in America that the matter may be amicably arranged. The course of our own Government in this affair has been universally approved. Much satisfaction was felt at the appearance of the proclamation forbidding the export of arms as well as of the materials for gunpowder.

The following are the rates of discount in the principal cities of the Continent, showing a rise at Amsterdam. At Paris and Turin, on the other hand, there is rather more ease:—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	5	4¼
Vienna	6	6
Berlin	4	3½
Frankfort	4	3
Amsterdam	3½	3½
Turin	5½	5
Brussels	4	3⅞
Hamburg	...	3½
St Petersburg	7	8

ENGLISH FUNDS.—The Consol market this week has been very flat and unsettled, the public having sold stock on the American dispute. Compared with last Friday, a decline has taken place of 2 per cent., the present prices being 89¾ to ⅞ for money, and 90 to ⅛ for the new account on the 9th of January. At one period of the morning the quotation for

the account was as low as 90, sellers. The market has been entirely influenced by the American affair, to the exclusion of any other subject. Yesterday there was, for a short time, a rather better feeling on the publication of General Scott's letter, but a reaction speedily followed on a statement in the French paper *Patrie*, that the seizure of the Southern Commissioners was directly authorised by the Washington Cabinet. The later news to-day has also been viewed rather unfavourably. Apart from speculative operations, the market remains weak, from the large floating supply of stock with the dealers.

In consequence of the abundance of money, Exchequer bills have been in demand for temporary investment, and a fresh rise has taken place to 10s to 14s premium for the March issue, and 14s to 17s for those of June. India bonds are also slightly higher, at 13s to 17s premium.

Indian securities have fallen considerably with Consols. The downward movement has been especially increased by the large speculative purchases induced before the American difficulty by the low value of money. Since then sales have preponderated, and both the home and rupee stocks are 2 to 2½ per cent. lower. The home five per cent. loan closed at 101 to ½ ex div., and the rupee paper at 95½ to 96¼, and 101½ to 102½.

FOREIGN STOCKS.—The fluctuations in the foreign market this week have been rather important, and have resulted in some cases in a heavy decline. The more speculative securities have been chiefly affected, particularly Turkish Six per Cents., in which a considerable fall has taken place. Mexican, Venezuela, and other Spanish-American bonds have also been pressed for sale, but some support has been derived by purchases at the low prices on Dutch account. Hence the fall in these descriptions has been in some degree arrested. Peruvian stocks continue with a firm tendency. Spanish securities are dull, particularly the Certificates. It is apprehended that for the present no attempt will be made by the Spanish Government to settle this question. The favourable news from Buenos Ayres by the last mail has had little effect on the bonds of that republic, but prices are fairly maintained. This afternoon the general tendency has been again flat, although the closing prices were a shade better than at one time of the day.

The final quotation of French Three per Cents. on the Paris Bourse this evening was 69f 10c, showing a recovery since last Friday of nearly a quarter per cent. In the interval, however, transactions have occurred at about a half per cent. higher.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and this day:—

RAILWAYS AND OTHER SHARES.—The market for British railway stocks has been in a very agitated and unsettled state throughout the week, and in nearly every case a steady downward movement has taken place. The nearer prospect of a rupture with the Federal States, and the consequences upon trade and railway traffic in general, are the chief adverse features. On the other hand, the public, although not buying to any important extent, refrain from sales, and thus the daily fluctuations are almost entirely the result of the operations of the dealers themselves. The lines in the manufacturing districts have been less depressed than might have been expected, owing to the already large outstanding speculative account for the fall in these descriptions. Caledonian and South-Eastern have been prominently flat. To-day the tendency has again been very unfavourable, and in several stocks a further decline has occurred.

In the colonial market, both Indian guaranteed and Canadian descriptions have receded. The late rise in the first-named stocks appears in some degree due to speculative purchases; and the want of confidence caused by the American affair has, therefore, been followed by sales to close open accounts. With regard, however, to the future prospects of India, the general opinion still continues eminently favourable.

Foreign railways have also been extremely flat, particularly Belgian and Brazilian. Lombardo-Venetian have receded to ¼ prem. American securities have sustained a severe fall, especially United States Five per Cents. and Erie and Illinois Central shares.

There has been a general fall in the debentures issued by the various Colonial Governments, Canadian having been especially pressed for sale, and heavy.

In the miscellaneous department, the principal feature is a decline in Crystal Palace stock and Canada Land shares. The new Mercantile Fire Insurance also left off lower at par to ¼ premium, and Commercial Union ⅜ to ½ discount.

Subjoined is our usual list of the closing prices of the principal railway shares last Friday and this day:—

RAILWAYS.

FOREIGN EXCHANGES.—The rates on Tuesday were generally a shade higher, but to-day a considerable decline has taken place in the quotation for St Petersburg.

BULLION.—Annexed is the weekly circular of Messrs Pixley, Abell, and Langley, on the transactions in bullion during the week, and the movements in Indian rupee paper:—

Gold.—The only arrival of gold during the week has been the Magdalena, from the Brazils, with 44,600*l*. The demand for export is, however, still very limited, and the Bank has purchased 137,000*l*, the balance of the amounts received from abroad last week. The sums sent to America have been small, and only comprise 6,000*l* per Teutonia, and 1,330*l* per City of Washington, to New York; but shipments of specie thither are likely now to cease entirely. The Europa has taken 49,320*l* to Halifax (chiefly on Government account); the Seine, 9,700*l* to the West Indies; and the Ceylon, 36,731*l* to the East and China.

Silver.—The silver ex La Plata, has been delivered to the consignees; and as the demand for the outgoing mail to Bombay, of the 10th instant, is likely to be good, the market is rather firm, and we quote the price as 61½d per oz. The arrivals have been limited, and include the Tagus, from Lisbon, with 12,105*l*, and the Indus, from Alexandria, with 5,819*l*. The Seine has taken 1,000*l* to the West Indies, and the Ceylon, 92,477*l* to Calcutta and China.

Mexican Dollars.—The dollars ex La Plata have not yet been sold; and, pending the receipt of advices from China, the market is quiet. As the above vessel brought the large amount of

250,000*l* of this coin, the price may probably be regulated by the value as compared with bar silver, and will in that case be from 4s 11½d to 4s 11⅝d per oz.

Exchange for banks' drafts on Bombay and Calcutta, at 60 days' sight, ranges from 2s to 2s 0¼d per rupee; bills, with documents, 1s 11⅝d to 1s 11½d; on Madras, 1s 11¾d to 2s; bills, with documents, 1s 11d to 1s 11¼d.

India Government Loan Notes have been materially affected during the last week by the aspect of political matters, and prices have receded. The 5½ per Cents. are now 102 to 103; and the 5 per Cents. 96 to 97, showing a reduction of about 2½ to 2¾ per cent. respectively from our quotations of the 28th of November.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; bar gold, fine, 77s 9d per oz std, last price; bar gold, refinable, 77s 11d per oz std; Spanish doubloons no price; South American doubloons, 74s per oz, last price; United States gold coin, 76s 6d per oz, last price. Silver—Bar silver, 5s 1¼d per oz std; bar silver, containing 5 grs gold, 5s 1½d per oz std; fine cake 5s 5⅞d per oz, last price; Mexican dollars, 4s 11⅝d per oz, last price; Spanish dollars (Carolus), 6s 6d per oz, nominal.

There have been no operations in bullion at the Bank for the last few days. The amount of gold brought by the steamer La Plata, from the West Indies, about 54,000*l*, is expected, however, to be taken there, as there is no demand for the Continent.

FAILURES AND MERCANTILE EMBARRASSMENTS.—Messrs Froom, Gregory, and Co., machine agents, at St Petersburg, who lately stopped payment, have notified that they have now resumed business.

The suspension has taken place of Messrs Fairhead and Son, seedsmen, with liabilities of about 13,000*l*.

The local journals announce the suspension of Messrs Broadfoot, Douglas, and Co., shawl manufacturers, of Glasgow, with liabilities for about 40,000*l*. The assets are estimated to produce about 23,000*l*.

PUBLIC COMPANIES.—A meeting of the Madras Irrigation Company took place last Saturday, when the report, of which an abstract has already been published, was carried unanimously. Since the date of the report, satisfactory advices have been received from the engineer respecting the progress of the works, and showing that the original estimates will be adhered to. A portion of the district is especially fitted for the growth of cotton, and no difficulty, it is thought, would be experienced in obtaining labour. It is to be regretted that the Company have been unable to come to an agreement with Sir Charles Wood respecting the contract, and that no progress has been made in the settlement of these differences. The capital account shows that 566,759*l* has been received, and 111,090*l* expended, of which 38,833*l* was for cost of management, salaries, &c., 32,522*l* for stoves, tools, engines, &c., and 40,235*l* for actual working expenses in the several districts.

At a meeting of the Bank of British North America, the report, announcing a half-yearly dividend at the rate of 6 per cent. per annum, free of income tax, was carried unanimously without discussion. It appears that the profits of the six months ending in September show an increase over the corresponding period of last year, after making ample provision for all contingencies. The Directors, however, regard with anxiety the continued crisis in the United States, which it is feared will press heavily on the trade of the colonies. The harvest in Canada has again been abundant, and the marked progress and prosperity of the agricultural classes can scarcely fail to attract emigration, while the recent gold discoveries in Nova Scotia are expected to prove highly advantageous to that province.

The Agra and United Service Bank have just opened a new branch at Edinburgh.

The annual meeting of the Peninsular and Oriental Steam Company was held on Tuesday, when a dividend was declared of 3 per cent., and a further distribution was ordered of 3½ per cent. out of the proprietors' underwriting account, both free of income tax. It was announced that the service during the past twelve months has been efficiently and punctually performed, and that no casualties have taken place. This result is especially gratifying, since the distance annually travelled by the Company's ships is no less than 1,261,350 miles, and that much of the navigation is of a peculiar and intricate character. The commercial operations have been generally favourable, the regular traffic having been fully maintained, but a diminution is shown in the revenue from the carriage of specie. A more than corresponding reduction, however, has been effected in the expenditure, owing to the smaller outlay for coal. The Mooltan, the last new steamer of the Company, which has been fitted with superheating apparatus and other mechanical improvements for saving coal, has completed two trips between Southampton and Alexandria, and has attained a satisfactory rate of speed at a consumption of only about half the ordinary quantity of fuel. The item of coal is one of the greatest importance to this Company, the expenditure in one year on this account having been as much as 800,000*l*. The Peninsular and Oriental fleet now represents a total of 51 steamers (including three building), and eight transport store and coal ships, of an aggregate tonnage of 83,385 tons and 17,771 horse-power.

At a meeting, on Wednesday, of the African Steam Company, a dividend was declared for the past half-year of 7s per share, free of income tax, being at the rate of 7 per cent. per annum. It was also announced that the usual sum has been set aside for depreciation, that the loss by the sale of the Gambia has been extinguished, and a portion of that by the Hope been provided for. The cost of refitting the Retriever has likewise been liquidated, and an addition made to the boiler fund. During the past six months the mail service has been satisfactorily performed, the ships, without exception, having kept their contract time. The Retriever will be despatched in a few weeks for the intercolonial service. The new steamer, Macgregor Laird, building for the Company in the Clyde, has been successfully launched.

At a half-yearly meeting of the London Chartered Bank of Australia, this afternoon, the proposed dividend for the past six months, at the increased rate of 8 per cent. per annum, free of income-tax, was unanimously agreed to without discussion. A sum of 5,000*l* was also added to the reserve, leaving a balance of 8,967*l* to be carried forward.

It has been officially announced that the Directors of the Crystal Palace Company will recommend a distribution, at the ensuing meeting, of 2 per cent. on the ordinary stock for the year ending 31st October.

An association, entitled the National Credit and Exchange Company, has been formed under the Limited Liability Act. The proposed capital is 500,000*l*, with power to increase it to 2,000,000*l*. The distinguishing feature of the Company consists in the mode in which the profits are to be divided. Four-fifths of them are to be apportioned to the shareholders, and the remaining one-fifth as bonus to the depositors, in addition to their interest, which is to be at the rate of 4 per cent.

The following is a translation of a telegram communicated to the Directors of the Ottoman Railway by the Turkish Ambassador:—"Communicate officially to the Directors of the railway from Smyrna to Aidin that the Imperial Government has accepted the portion of the line from Smyrna to Kosbounar as the first section. Consequently the Company is authorised to make the sixth call, and will be entitled to the guarantee of 6 per cent., to take effect from the date of the opening of the first section of this line."

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The supply of English wheat at Mark lane, to-day, was much restricted. Factors were very firm in their demands, and although no quotable change took place, the tendency of prices was decidedly upwards. With foreign wheat, the market was well supplied. The business doing was not to say extensive; nevertheless, the quotations were fully supported. Good and fine barley changed hands to a moderate extent, at full quotations; but inferior qualities ruled heavy at barely late rates. The inquiry for oats, beans, and peas was by no means active, yet very little change took place in their value. The flour trade was firm, and the currencies were well maintained. This week's imports amount to 34,060 quarters of wheat; 4,350 of barley; 5,760 oats; 120 sacks and 21,030 barrels of flour.

At Liverpool, this morning, wheat was held at fully the late advance in the quotations. Flour was very firm, and the value of maize was quite supported.

The following is M. Othon Trithen's monthly report of the corn trade of Odessa, under date Nov. 18:—Stocks of wheat are estimated at 1,500,000 chetwerts; and the scarcity of shipping, coupled with adverse accounts from Marseilles, has caused a decline in prices of low and ordinary qualities, but superior descriptions fully maintain previous currency. Linseed is very scarce; clean seed on the spot fetches from 48s to 49s; and for June 44s to 45s per quarter f. o. b. Current Prices:—Superior Polish Odessa wheat, 43s 6d per 495 lbs, 42s 3d per 480 lbs; fair average ditto, 39s 3d per 480 lbs; superior Sandomirka wheat, 46s 6d per 485 lbs, 46s per 480 lbs; fair average ditto, 42s 3d per 475 lbs, 42s 9d per 480 lbs; superior Ghirka wheat, 42s 3d per 500 lbs, 41s 6d per 492 lbs; fair average ditto, 38s per 485 lbs, 38s 6d per 492 lbs; hard wheat, 39s 3d per 500 lbs, 38s 6d per 492 lbs; maize, 25s 3d per 500 lbs, 24s 9d per 492 lbs; barley, 16s 9d per 385 lbs, 17s 6d per 400 lbs; oats, 19s per 285 lbs, 20s per 300 lbs; rye, 24s 6d per 450 lbs, 26s 3d per 480 lbs f. o. b.; clean superior linseed, 48s 3d; fair average ditto, 47s; mixed ditto, 46s 3d; fair average rapeseed, 26s 6d per quarter.

The Liverpool cotton market, in consequence of the Trent affair, has been in a very unsettled state during the whole of the present week. The sales only reach 29,000 bales, including 16,000 for spinners, 9,000 on speculation, and 4,000 for export; and quotations are for fair 1d, for middling fair 1¼d, below those of last Friday. However, it would be difficult to buy large quantities at these prices, as only a few holders, compelled by temporary financial difficulties, sell at this reduction, most of them keeping their cotton off the market till the future course of the article becomes more discernible. Yesterday there was a very good demand at the reduced limits, and prices in consequence rose ¼d. To-day, however, this feeling has subsided again, and sales are only 5,000 bales. These fluctuations no doubt will occur till politics are more settled.

The shipments of cotton from Bombay for the month of October, as well as for the ten months ending Oct. 30, were as follow:—

	Great Britain. bales.	Cowes, &c., for Orders. bales.	Foreign Europe. bales.	China, &c. bales.	Total. bales.

In tea, by private contract, a fair average business has been transacted, and prices have been steadily supported. The public sales, however, have gone off slowly, at rather lower rates.

The market for sugar, both low and refined, has continued heavy. In some instances the quotations have ruled in favour of buyers.

The following is from Messrs Trueman and Rouse's circular:—

IMPORTS and STOCKS of SUGAR and COFFEE at the PRINCIPAL EUROPEAN PORTS, for the Ten Months ending 31st October, 1860 and 1861.

	SUGAR.

On the whole, the demand for coffee has been steady, at previous rates. In cocoa, a limited business has been transacted, yet prices have ruled firm.

Rice has met an improved sale, and its value has been well maintained. Dry fruit, however, is again rather cheaper.

The rum market has been very firm, and an advance has taken place in prices. Brandy continues dull, at about last week's currency.

The public sales of colonial wool, which will be brought to a close next week, have been progressing steadily, at full quotations. In English wool, by private contract, only a moderate business has been passing, on former terms. Hemp has ruled firm, at 35*l* for clean St Petersburg.

COMPARATIVE STATEMENT of HEMP and FLAX on hand in London, on the 1st of December, 1860 and 1861, Dealers' Stocks included.

Messrs Powell and Co. write as follows in reference to the leather trade of the past month:—"It is seldom that we have to report so little change in the leather market as during the past month. November is usually a period of rather restricted business, but the transactions have not been below the usual average of the season: the supplies have been limited, and the stocks, which are not large of any article, have, in the aggregate, rather diminished than increased. Prices have shown the greatest uniformity. In raw goods the transactions have been to a fair extent. The imports have not been large, and prices have varied very slightly."

Messrs Grant, Hodgson, and Co., in reference to the tobacco trade of the past month, observe:—"A very good demand has continued for export qualities, resulting in sales to a considerable extent, and which would have been further increased had holders shown a disposition to meet the views of buyers. For home trade a fair amount of business has been transacted, chiefly consisting of small lots for immediate use; the firmness of holders and their declining to sell, in some instances only parts of parcels, contracted purchases of some descriptions. Sales during the last month were 2,537 hhds, viz., 102 hhds Virginia leaf, 28 hhds and tierces of strips, 1,749 hhds Kentucky leaf, 398 hhds strips, 260 hhds Maryland, exclusive of about 2,000 cases and bales of various growths. Imports, 1,065; deliveries, 1,274 hhds, against 983 hhds in the corresponding month of last year. Stock, 27,220 hhds, against 2,246 hhds in 1860, 18,829 hhds in 1859; 13,254 hhds in 1858; and 10,576 hhds in 1857.

We extract the following from Messrs Churchill and Sim's timber circular:—

COMPARATIVE STOCK of TIMBER at the PUBLIC DOCKS, Dec. 1.

	1861.	1860.	1859.
Foreign deals	pieces 1,835,000	1,331,000	1,607,000

United States pitch pine timber	3,200	1,800	4,300
East Indian teake	6,900	600	5,400

The demand for saltpetre has been active, and prices rule nearly as high as previously to the prohibition of its export. In the present position of affairs, the following monthly statement of saltpetre at Boston, U. S., the principal market for the article in that country, is interesting:—

COMPARATIVE STATEMENT, October 31.

	1861.	1860.	1859.
Number of bags to arrive	11677	32640	42579
Stock in importers and speculators' hands	15627	7214	4481
Arrivals from October 1 to date	8255	11576	3566
Deliveries for consumption from Oct. 1	14230	7740	9814
Prices ruling	c 9 to 9½	10¾ to 11	7¾ to 8¼

Scotch pig iron has been dull, at 48s to 48s 3d cash, mixed numbers. Tin is lower, and spelter continues dull; but in other metals, very little change has taken place.

Linseed oil has been in fair request, at 35s 3d to 35s 6d per cwt on the spot. Rape is dull, on rather easier terms. Other oils are a slow sale, at about late rates. Turpentine has been much neglected, and the quotation for American spirits has fallen to 65s per cwt.

Annexed are the receipts and exports of naval stores at New York from Jan. 1 to Nov. 18:—

	RECEIPTS.		EXPORTS.	
	bbls 1861.	bbls 1860.	bbls 1861.	bbls 1860.
Turpentine	32,139	52,303	19,465	47,082
Spirits of turpentine	47,487	144,910	20,163	63,981
Rosin	192,648	592,972	205,883	468,980
Tar	48,919	47,323	26,104	25,689

On the whole, the tallow trade has been steady, the market having shown more firmness towards the close of the week. P.Y.C. is quoted at 52s per cwt on the spot; and at 52s 6d to 53s for January to March delivery.

"The money market," observes the New York *Shipping List* of the 20th ult., "wears an unchanged appearance. The demand for money on call loans is fair, and quite a large amount is now daily changing hands at from 5 to 6 per cent. We resume our previous quotations, viz.:—

	Per cent. per annum.
Loans on call, stock securities	5 to 6
Do. bond and mortgage	6 7
Prime endorsed bills, 60 to 90 days	6 7
Do. 4 to 6 months	8 9
First-class single signatures	7 ...
Other good bills	... ...

The Bank statement of this week, compared with the report of the previous week, shows the following result:—

	Nov. 9. dols	Nov. 16. dols		dols
Loans	140,627,660	137,308,655	Dec.	3,319,025
Specie	41,213,998	41,461,833	Inc.	248,375
Circulation	8,918,897	8,799,671	Dec.	149,322
Deposits	113,425,895	110,214,604	Dec.	3,211,291

The following is a comparative statement of the imports of dry goods and general merchandise at the port of New York for the week ending November 15, and since January 1st:—

	1860. dols	1861. dols
Dry goods	1,248,874	434,298
General merchandise	1,233,255	1,378,489
Total for the week	2,482,129	1,812,787
Previously reported	204,411,923	108,936,155
Since January 1	206,894,052	110,748,942

The seizure of Mason and Slidell occasioned a great flurry at the Stock Exchange on Saturday and Monday, and the bears seized

the opportunity to force down prices. Yesterday, the seizure was universally acknowledged to be right in every way, and the market resumed something of the buoyancy which charaterised it previous to our last. The business at the First Board was tolerably heavy, the market closing firm. At the Second Board the sales were also heavy, and full prices were obtained."

COTTON.

NEW YORK, Nov. 20.—The market is dull, heavy, and irregular. The sales since Friday have been light, and confined exclusively to the wants of spinners. We reduce our quotations about ½c per lb, to correspond with the current rates. The sales comprise about 1,200 bales. We quote:—

NEW YORK CLASSIFICATION.

	Upland.	Florida.	Mobile.	New Orleans and Texas.
	c	c	c	c
Ordinary	20¼	20¾	20¾	20½
Good ordinary	22	22	22	22
Middling	24	24½	24½	24½
Good middling	24½	24¾	25	25½
Middling fair	...	...	...	...

The arrivals have been from Port Royal, S. C., 1 bale. Total import since 1st inst., 1,898 bales; total import since 1st Sept., 8,022 bales. Export from 1st to 19th November, 562 bales, against 20,105 in 1860.

NEW YORK, Nov. 27.—The market for cotton was very firm, and prices had an upward tendency. Middling Upland was quoted at 24½ to 24¾c per lb.

LIVERPOOL MARKET.—DECEMBER 6.

The past week opened with a serious panic in the cotton market, induced by the seizure of the Confederate Commissioners on board the Trent. A sudden decline took place in prices of 1½d to 1⅝d per lb, and in some cases 1⅝d per lb. In the last few days partial recoveries have several times occurred, and corresponding relapses to the lowest range, prices varying within 24 hours to the extent of ⅝d to 1d per lb. Our closing quotations are ¼d to ½d above the minimum rates for American. Long-stapled kinds have been much neglected, Egyptian especially unsaleable. East India have suffered a decline, varying from 1d to 1½d per lb, but cannot now be bought at the extreme depression. The sales to-day are estimated at 3,000 bales, the market continuing very sensitive. The reported export amounts to 4,080 bales, consisting of 1,790 American, 20 Brazil, and 2,270 East India.

MARKETS IN THE MANUFACTURING DISTRICTS.

Throughout the manufacturing districts, great heaviness has prevailed during the whole of the present week. As the stocks of goods are only moderate for the time of year, no material change has taken place in the quotations; but, to force sales, lower rates must be submitted to. The demand for iron has been by no means active; but coals have continued in good request, at full prices.

MANCHESTER, Dec. 5.—The uncertainties of prospective war have caused a very irregular fall in the prices of our leading staples, and quite put a stop to business in the great mass of other articles. The influential classes of sellers have, however, quite refrained from even naming a price, and it is only in the last day or two that a few buyers are beginning to test the stability of holders generally, by making offers at a very low rate indeed. A partial recovery, or at least greater uniformity of value amongst those who must or will sell, cannot, therefore, fail to be arrived at ere long. The economy of production so far, and to be yet further practised, has arrested a considerably greater fall. Spinners and manufacturers feel it their only source of stability in this crisis, and so abide the issue. Shirtings have fallen about 9d per piece, having been largely held on speculation; printing cloths scarcely 1⅛d to 3d. Yarns have been too irregular to quote, but sales of all sorts have been small.

COMPARATIVE STATEMENT OF THE COTTON TRADE.

BRADFORD.—But little wool has changed hands during the week, and, where sales are made, prices are undoubtedly in buyers' favour. Many staplers are anxious to sell. The market for yarns is governed by the same circumstances that affect wool. Spinners are many of them well engaged to order, but the inquiry for export is remarkably small. The piece market has also been very quiet, and business remains dull and cheerless in all departments

LEICESTER.—The return of cold weather creates an increased demand for goods suitable for the season, and business generally remains in a healthy condition. There is no important change in the price of yarns, and spinners are well employed.

NOTTINGHAM.—The lace trade continues exceedingly depressed. There are a few German buyers in the market, but their purchases are limited. There is still a little doing in plain stiff nets and other goods of a plain character, but certainly far below an average amount of business is doing. In the silk branch very little is doing.

LEEDS.—Prices of cloth keep steady, and the mills are employed fully as well as of late. Business has been dull in the warehouses for the home trade; but a little more than of late is doing by the foreign houses.

ROCHDALE.—The transactions in flannel have been limited. Notwithstanding the dulness of the public market, the chief warehouses in the town continue busy, dyed Saxonies being yet in very brisk demand. Other qualities of flannel are less inquired for, but generally a moderate production is maintained. There has been a good inquiry for wool, but it is wanted at lower rates, which holders are not disposed to concede; many of them, indeed, are asking rather more money. The few transactions have been at late rates.

BELFAST.—The uneasy feeling created in mercantile circles relative to the peculiar relations between England and America has been acting against the exports of goods hence to New York. South America has been taking pretty large lots of light linens, and the West India trade is moderately active. Home markets have seldom been so dull as they were for the past ten days.

WOLVERHAMPTON.—We copy the annexed report from Mr S. Griffiths' circular:—The official list of prices of Staffordshire finished iron is as follows:—Common Staffordshire bars, 7*l* at the works; best bars, 8*l*; sheets, 8*l* 10s; doubles, 10*l*; nail sheets, 8*l*; latten, 11*l* 10s; boiler plates, 8*l* 10s; best and best best in proportion; common rods, 7*l*; hoops, 8*l*; gas strip, 7*l* 10s; Canada plates, 11*l* 10s; and all other sorts in proportion. Second and third-class makers are selling below these rates. Current prices of pig iron:—Staffordshire cold blast, 4*l* 5*s*; Old Windmill End Mine, Nos. 1, 2, and 3 melters, warm air, 4*l*; Old Windmill End, second quality, Nos. 1 and 2, melting pig iron, 3*l*; Old Windmill End Mine forge pig iron, 3*l* 5*s* to 3*l* 7*s* 6*d*; best native hydrate pigs, 3*l* 7*s* 6*d* to 4*l*, according to the brand; first-class All Mine grey forge pigs, 3*l* 5*s* to 3*l* 7*s* 6*d*; Seend Grey Forge Mine pig iron, 3*l* to 3*l* 2*s* 6*d*; Seend Mine melting pigs, 3*l* 10*s* to 3*l* 15*s*; good mine pigs, with a modicum of flue cinder, 2*l* 10*s* to 2*l* 15*s*; mine pigs, deteriorated by cinder, 2*l* 10*s* to 2*l* 12*s* 6*d*; Cleator Moor hæmatites, 3*l* 5*s*; Barrow hæmatites, 3*l* 5*s*; Workington hæmatites, 3*l* 5*s*; grey forge cinder pig iron, 2*l* 10*s* to 2*l* 15*s*; white forge cinder pigs, 2*l* 5*s* to 2*l* 10*s*; ordinary melters, Nos. 1, 2, and 3, 2*l* 12*s* 6*d* to 2*l* 17*s* 6*d*; superior makes of mine melting iron, 3*l* 7*s* 6*d* to 3*l* 17*s* 6*d*, according to make and quality. The above prices are all delivered on to the wharfs at the South Staffordshire manufactories. Gadlys (Aberdare, South Wales), No. 1 foundry pig, cold blast, 4*l* 10*s* f.o.b. Favourite Shropshire and Forest of Dean brands, hot blast, 3*l* 12*s* 6*d* to 3*l* 15*s* delivered; Northern hæmatites, 3*l* 5*s*, according to brand or quality.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Nov. 20.—The market for State and Western our—owing to satisfactory receipts—was far from active, and prices had a downward tendency. Canada flour has been in fair request for the most part, but the market was dull and drooping yesterday, though quotations were unchanged. Southern flour

has been in limited demand, and the market is rather heavy at about previous quotations.

EXPORT from 1st to 19th November.

	1861. barrels	1860. barrels
Wheat Flour	229,413	168,791

The market for wheat ruled very buoyant on Saturday and Monday, when the demand was active both for export and home use, and prices experienced a further considerable advance. The demand abated somewhat yesterday, and a part of the advance was lost, the transactions being heavy at the reduction. The sales comprise 650,000 bushels, of which 210,000 bushels changed owners yesterday. Corn is in fair request, but at lower rates; the sales comprise 200,000 bushels, including 114,000 yesterday, at the following rates: — White Southern, 70c to 75c; yellow Southern, 68c to 70c; mixed Southern, 67c to 68c; round yellow, 68c to 69c; round white, 70c to 75c; mixed Western, 65c to 66c; and unsound, 60c to 63c.

EXPORT from 1st to 19th November.

	1861. bushels	1860. bushels
Wheat	2,990,243	1,892,922
Corn	681,373	458,766

NEW YORK, Nov. 27.—A good business is doing in wheat and flour, both for home use and for export, but at a slight reduction on previous quotations. Corn is in steady request, on former terms.

EXPORT of BREADSTUFFS from the UNITED STATES to GREAT BRITAIN and IRELAND, since September 1, 1861

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Most of the leading markets held this week have been fairly supplied with home-grown wheat; yet, owing to the prospect of a war between England and America, the demand for most kinds has somewhat improved, and prices have advanced fully 1s per quarter. Some of the importers from the States having withdrawn their samples from sale, foreign wheats have commanded 1s to 2s per quarter more money, but at which the transactions have been on a limited scale. The barley trade has continued very inactive, at about stationary prices. No change of importance has taken place in the value of any kind of malt. Good sound oats have maintained their previous value, but damp parcels have been much neglected. Beans and peas have changed hands slowly, but the flour trade has ruled firm, at extreme rates.

The transactions in wheat in most of the French markets have been seasonably large, at about previous quotations. The demand for all kinds of spring corn has not increased, but flour has sold at extreme rates. Advices from Odessa state that the stocks of grain at that port amount to 1,500,000 quarters. New York advices state that the outflow of food to the United Kingdom continued on a very large scale.

The metropolitan and other markets are now well supplied with potatoes in somewhat improved condition, and the demand for them is steady, at from 70s to 140s per cwt. We understand, however, that the arrivals from Scotland during the remainder of the winter will be very moderate compared with the season.

The Scotch markets have been but moderately supplied with produce. Fine wheat and flour have commanded rather more money. In other articles, the transactions have been on a limited scale.

In Ireland, wheat has been held for higher rates. Otherwise, the corn trade has ruled very inactive. The shipments of produce to England have not increased.

At Mark-lane, to-day, English wheat was firm, and prices had an upward tendency. The business doing in foreign wheat was not to say extensive; nevertheless, the currencies were well supported. The finest qualities of barley were steady in value; but inferior parcels moved off heavily, at barely late rates. Oats, beans, and peas changed hands slowly, at about previous quotations. The flour trade was firm, at extreme rates.

MR E. RAINFORD reports the arrival of 53 vessels off coast laden with grain, and a steady business in floating cargoes at full prices.

Messrs Sturge, of Birmingham, write as follows in reference to the corn trade:—"The alternate rain and frost of the past month stopped the wheat-sowing; but except in those fields that had before grown roots, this had been previously completed, and a strong and healthy plant has since shot up. We believe the shipments for France have nearly ceased, but arrivals will be very heavy until the end of the year, so much is on passage and bought for forward delivery. That country has already imported, according to the latest return in the *Moniteur*, 10,500,000 hectolitres, or about 3,600,000 quarters—as much wheat and flour, it is estimated, as can be consumed before July, the time the harvest begins in some of the Southern districts. Some of that now arriving at Marseilles is being transhipped for the United Kingdom, though we do not hear that the quantity from any other port is sufficient to be worth notice; still we have little doubt that, as was the case on the occasion of previous large importations into France, considerable re-shipments will sooner or later be made to this country. Prices have not varied more than 1s per quarter in the past month, and the difficulty with America having recently caused some speculation, may for a while prevent the decline which would otherwise probably have taken place. The shipments at the date of our last advices making from the United States and Canada were large, but frost would soon stop those from the former, and much lessen them from the latter. The number of grain-laden vessels on passage from the East of Gibraltar is reduced to 400; but as the stocks of corn are almost beyond precedent at Odessa—a port which is only closed by frost about one winter out of every three, and then only for a short time—we do not think arrivals from the East will lessen so much as usual this winter."

The London averages announced this day are:—

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS, SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—There has not been any improvement in the demand; indeed, the market shows greater flatness than during the previous week, and the transactions up to yesterday (Thursday) were unusually small, including 1,257 casks West India at previous rates to 6d per cwt reduction. Other kinds are unsettled, and some foreign muscovado sold upon easier terms. By auction, 348 casks Barbadoes partly found purchasers: brown, 35s 6d to 36s; heavy low to good yellow, 36s 6d to 41s per cwt. The deliveries last week reached 3,450 tons, leaving the stock at the close 74,425 tons, or 20,000 tons above that of 1860 at the same period.

Mauritius.—Some business has been done by private contract at previous rates.

Madras.—502 bags native were bought in at 30s to 32s 6d per cwt for low brown to low yellow.

Foreign.—At auction, 720 casks Porto Rico partly found buyers: brown to grey, 36s 6d to 38s 6d; low to fine yellow, 39s to 44s. Of 521 casks Cuba, a small portion sold: brown, 34s to 35s 6d; yellow, 36s to 40s. 176 casks foreign muscovado, from New York, 34s to 39s. Some business has been done privately in Porto Rico. A floating cargo of Havana, No. 10½, sold at 25s 7½d per cwt for the United Kingdom.

Refined is rather lower: middling to fair dry goods, 48s to 49s. Supplies keep moderate. Crushed sells less freely than of late.

MELADO.—138 casks 66 barrels, by auction, were chiefly withdrawn. 350 casks have sold privately at 24s to 24s 6d per cwt.

MOLASSES.—54 casks Cuba, by auction, part sold at 16s per cwt.

COFFEE.—The sales have progressed without spirit, and occasionally at slightly lower rates for native as well as plantation Ceylon. Of the latter, 297 casks 458 barrels and bags partly sold at 73s 6d to 77s 6d for fine ordinary and small berry to middling. 1,450 bags native found buyers: good ordinary to good, 68s to 70s 6d; low and small, 65s to 67s 6d. 48 bales long berry Mocha withdrawn. 49 barrels Jamaica realised 68s to 73s. Floating cargoes command extreme rates for the Continent. Two of St Domingo sold during the week at 68s per cwt.

RUM.—An improved demand has prevailed, and common kinds show 1d per gallon advance. Leewards, 1s 8d; Demerara, 1s 9d to 1s 10d proof; Jamaica, 3s to 4s 6d per gallon.

TEA.—New season's congous have met with moderate inquiries at former prices, but the market in other respects is quiet, partly owing to the public sales declared. These commenced yesterday, when 7,200 packages were brought forward, and 3,083 sold without spirit. Tayshan Congou went at ½d reduction; green teas, 1d to 2d per lb cheaper.

RICE.—A large business has been done in Rangoon to be shipped next year at 11s. Ballam sold to arrive at 10s 3d ex ship, 6d more if landed. Privately, the sales on the spot are limited, without alteration in quotations. 1,437 bags low cargo Bengal, by auction, were bought in, and since sold at 10s 6d per cwt.

IMPORTS and DELIVERIES of RICE to November 30, with STOCKS on hand.

	1861.	1860.	1859.	1857.
	tons	tons	tons	tons
Imports	67400	34730	37220	79900

Exported	...	...	19490	21450
Stock	25450	37160	72930	86700

SAGO.—447 boxes of old import were partly sold at 25s per cwt for dark brownish small grain.

SPICES.—The market has been quiet. 500 Zanzibar cloves sold at rather lower rates, from 3¾d to 3⅞d. 2,310 bags Singapore black pepper at 3⅞d for good quality, showed a slight decline. Of 1,132 bags Penang, a few lots superior realised 3⅞d; the common quality being taken in at 3¾d. 499 bags Singapore white were bought in at 6¾d, and a portion since sold rather under 6d, which was ⅛d cheaper. Of 189 cases brown nutmegs, 133 cases from Rotterdam sold at moderate rates: small to fair mixed quality, 1s 1d to 1s 5d. 24 cases mace went cheap, at 10d to 1s 4d per lb for low mouldy to good. Good second quality cassia lignea sold at 88s. 156 cases Cochin ginger went at 48s to 49s for ordinary to wormy; part bought in at 54s. 28 casks and barrels Jamaica sold at 52s to 70s per cwt.

SALTPETRE.—This article, after declining 2s, is in active demand, the consumers being barely supplied. Bengal, in course of landing or near at hand, at one period during the week sold at 38s 6d to 39s, and yesterday the market was much firmer, 40s being paid.

IMPORTS and DELIVERIES of SALTPETRE to November 30, with STOCKS on hand.

	1861.	1860.	1859.	1858.
	tons	tons	tons	tons
Imported	10420	11800	17350	9350
Delivered	10980	11950	16340	13150
Stock	2750	2700	3950	2360

DYESTUFFS.—Gambier is quiet but firm at 17s 6d to 18s for middling to good. With improved deliveries, the stock shows a gradual decrease. 74 bales Bengal safflower sold at 5*l* 5s to 7*l* 15s per cwt for ordinary to good middling quality.

LOGWOOD.—A floating cargo of St Domingo sold for a near port at 6*l* 5s per ton.

METALS.—The tendency to improvement in this market last noticed has been checked by the uncertainty attending the American question. Foreign tin is offering upon much lower terms: Straits quoted 118s to 118s 6d. Scotch pig iron last sold at 48s. Copper now sells slowly at the advance last referred to. The stock of spelter has been augmented to 5,175 tons, against 5,150 tons last year. No sales are reported this week. Shipments of lead are prohibited.

HEMP.—Petersburg clean firm at 35*l*. The stock of 3,140 tons is smaller than for many years past. The stock of Manilla reaches 5,200 tons. Ample supplies still afloat, and the receipts at the shipping ports do not fall off. 100 tons have sold at 23*l* per ton.

LINSEED.—Prices are fully supported, notwithstanding dulness and a slight reduction in the value of manufactured articles.

OIL.—Supplies of linseed continue in excess of the demand, and purchases may now be made on the spot at 35*l* 5s to 35*l* 10s per ton, and at 34*l* January to March.

TALLOW.—The market opened flatly, but afterwards experienced an improvement. Latest sales show 1s to 1s 6d recovery. Petersburg Y.C., 51s to 51s 6d; January to March, 52s to 52s 3d per cwt.

PARTICULARS OF TALLOW.—Monday, December 2.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market was dull. 1,000 casks West India only partly sold at rather lower rates, making 2,102 casks, and prices were 6d to 1s per cwt lower. A floating cargo of white Maroim reported at 26s for the United Kingdom.

MELADO.—454 casks were chiefly bought in. 210 casks Cuba molasses taken at 15s 6d.

COFFEE.—908 bags native Ceylon sold at 68s to 69s for good ordinary to good, being 6d cheaper. 1,542 bags Rio chiefly taken in at 54s to 62s. 163 casks 34 barrels 76 bags plantation Ceylon sold at barely previous rates.

COCOA.—477 bags Trinidad were chiefly bought in.

RICE.—7,053 bags Necrancie Arracan were taken in at 11s to 11s 6d. 13,500 bags new Rangoon sold at 11s to 11s 6d; heated, 9s to 9s 6d. 200 bags pale cargo Bengal at 11s per cwt.

SAGO.—270 boxes good small grain sold at 24s to 24s 6d.

SPICES.—510 bags half-heavy Malabar pepper were bought in at 5d. 318 bags good Singapore white part sold at 6d per lb.

TEA.—Lower prices were again accepted for congou and common green teas at to-day's sales. Of 8,550 packages offered, 7,000 found buyers.

SALTPETRE.—A large business was done in Bengal, to arrive, at 41s to 41s 6d. By auction, 989 bags were taken: refraction 6¼ to 5¼, 41s 6d to 42s.

GAMBIER.—1,057 bales about half sold at 17s 6d to 17s 9d; heated, 6d per cwt less.

DYEWOODS.—650 tons Lima were bought in at 8*l* 5s to 9*l*.

TALLOW.—Town was advanced to 53s 6d per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar has been very heavy this week; in some instances 1s lower: crushed, 32s 6d to 33s. Nothing doing in Dutch crushed.

DRY FRUIT.—Further public sales of Valencias without reserve is the only new feature of interest in the fruit market. The range now is 34s to 37s for the ordinary quality of fruit, but for selected 45s to 56s has been paid. Currants are dull, and not at all inquired for. Figs sold at public sale freely at a reduction.

ENGLISH WOOL.—Very little doing, except in long wool, which maintains its price.

COLONIAL WOOL.—The sales have progressed languidly, inferior descriptions, particularly Cape of Good Hope, going rather easier.

FLAX.—Market unaltered.

HEMP.—Market firm at our quotations.

COTTON.—There are no sales reported this week, and the quotations are quite nominal. 520 bales Surats offered yesterday at public sale were bought in much above their value. 50 Carriacou were sold at 10d.

SILK.—No change in the market. Prices unchanged, but rather a downward tendency.

TOBACCO.—Demand has been less active, both for home trade and exportation. The market remains firm at present quotations.

TIMBER.—No change in the wood market. The holders of Canadian wood are hopeful of making some advance on the cheap importations of pine and spruce deals, which have for some time past been selling for less than the import cost. In other respects, the stock of wood here is so large, that a sensible effect on prices can scarcely be expected at the present time; and as to Baltic wood, it is questionable if a rupture with America would not stimulate increased supplies from the North of Europe, and these, with a diminished consumption, would more than compensate for a deficiency of colonial wood, and be sold for less than now.

METALS.—The attention of all classes is so fully given to our critical position with America, that operations are almost suspended. Copper is less easy to sell, and prices of foreign have receded somewhat. Iron is unchanged, keeping steady in prices and demand. Tin has declined considerably in foreign, and little or nothing is doing. Spelter is neglected, and price drooping. Lead having been prohibited from export is at a standstill. Tin plates unchanged.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	53	6
Fat by ditto	2	8½
Yellow Russian	53	6
Melted stuff	39	0
Rough ditto	22	6
Greaves	18	0
Good dregs	7	0

Imports this week 5,907 casks.

PROVISIONS.

Bacon market very dull, with lower prices. Stock accumulating at wharf. Friesland butter in better demand this week, in consequence of quality being fine: price, 112s. Very little doing in American butter, with rather declining prices.

METROPOLITAN CATTLE MARKET.

MONDAY, Dec. 2.—The total imports of foreign stock into London, last week, amounted to 8,128 head. In the corresponding period in 1860, we received 6,661; in 1859, 5,387; in 1858, 4,932; in 1857, 1,721; in 1856, 3,548; and in 1855, 4,545 head.

Our market to-day was but moderately supplied with foreign stock, which moved off slowly, on easier terms. The arrivals of beasts fresh up from own grazing districts were seasonably good, both as to number and quality, and those from Ireland and Scotland were in full average condition. All breeds met a dull inquiry, at a decline in the quotations, compared with Monday last, of 2d per 8lbs. The top price for Scots was 4s 10d per 8lbs. From Lincolnshire, Leicestershire, and Northamptonshire we received 2,220 Shorthorns, &c.; from Norfolk, 150 Scots and Shorthorns; from other parts of England, 300 various breeds; from Scotland, 300 Scots and crosses; and from Ireland, 800 oxen and heifers. Notwithstanding that the supply was limited, the mutton trade was in a sluggish state, at barely last week's quotations. Downs and the best half-breds sold at from 5s 4d to 5s 6d per 8lbs. The general quality of the sheep was very middling. We have to report a dull sale for calves, at about stationary prices, viz., from 4s 4d to 5s 4d per 8lbs.

SUPPLIES.

	Dec. 3, 1860.	Dec. 2, 1861.
Beasts	4850	5240
Sheep	20420	18240
Calves	202	107
Pigs	320	380

THURSDAY, Dec. 5.—The supply of beasts to-day was moderate, and the demand for most kinds ruled steady, at fully Monday's currency. Although the show of sheep was limited, the mutton trade was in a sluggish state, at about stationary prices. The top quotation was 5s 6d per 8 lbs. The few calves on offer changed hands slowly, at late rates. Prime small porkers were tolerably firm; otherwise the pork trade was heavy. In milch cows very little doing.

Per 8 lbs to sink the offal.

Foreign supply—Beasts, 440; sheep, 780; calves, 55.

NEWGATE AND LEADENHALL.

FRIDAY, Dec. 6.—The supplies of meat are moderately extensive. Good and prime qualities command a steady sale at very full prices. Inferior descriptions move off slowly on former terms.

Per 8 lbs by the carcase.

Large Pork	3	8	4	2	Lamb	0	0	0	0
Inferior mutton	3	2	3	6					

HOP MARKET.

BOROUGH, Monday, Dec. 2.—Our market maintains a healthy character, though, from the advanced period of the year, business has become restricted. The few fine samples of new hops on hand are firmly held for full value, and other sorts are in short supply. The demand for foreign hops has materially diminished; and the large quantity of inferior samples offering has caused a decline in price of fully 7s per cwt. Mid and East Kents, 180s to 195s, choice 220s; Weald of Kents, 147s to 165s, choice 185s; Sussex, 135s to 145s, choice 155s.

FRIDAY, Dec. 6.—A moderate business is passing in most kind of hops, and prices are steadily supported.

POTATO MARKET.

SOUTHWARK WATERSIDE, Monday, Dec. 2.—During the past week the arrivals, both coastwise and by rail, have been quite equal to the demand; trade still dull. The following are this day's quotations:—Kent and Essex Regents, 120s to 140s; Yorkshire Flukes, 120s to 140s; ditto Regents, 100s to 130s; Lincolnshire ditto, 90s to 110s; Scotch ditto, 70s to 100s; French whites, 90s to 110s per ton.

FRIDAY, Dec. 6.—The supplies of potatoes are moderately extensive. Generally speaking, the demand rules steady, at full currencies. The best samples command 140s per ton.

HAY MARKETS.—THURSDAY.

SMITHFIELD.—Meadow hay, 2*l* 0s to 5*l* 0s; clover ditto, 3*l* 10s to 6*l* 0s; and straw, 1*l* 8s to 1*l* 16s per load. A fair demand.

CUMBERLAND.—Meadow hay, 2*l* 5s to 5*l* 0s; clover, 3*l* 10s to 5*l* 16s; and straw, 1*l* 8s to 1*l* 16s per load. Trade dull.

WHITECHAPEL.—Meadow hay, 2*l* 0s to 5*l* 0s; clover, 3*l* 10s to 6*l* 0s; and straw, 1*l* 8s to 1*l* 16s per load. Supply tolerably good.

COAL MARKET.

FRIDAY, Dec. 6.—Lambton 17s 6d—Hasswell 18s—Stewarts 17s 6d—Tunstall 16s 9d—Byron 17s—Hunwick 15s 6d—Sheriff Hill 15s—Whitworth 15s 6d—Wylam 16s—Tanfield Moor Butes 14s—Bebside Hartley 15s 6d—Davidson's Hartley 15s 6d—Hasting's Hartley 15s 6d. 87 ships at market.

EPITOME OF RAILWAY NEWS.

TRAFFIC RECEIPTS.—The traffic receipts of railways in the United Kingdom for the week ending the 23rd of November amounted to 498,076*l*, and for the corresponding week of last year to 495,717*l*, showing an increase of 2,359*l*. The gross receipts of the eight railways having their termini in the metropolis amounted to 224,501*l*, and for the corresponding week of 1860 to 218,766*l*, showing an increase of 5,735*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, Dec. 2.—The railway market to-day opened firmly, but an improvement which subsequently took place was not fully maintained. Compared with Saturday, however, Great Northern and Sheffield advanced ¾ to 1 per cent., and several of the other leading stocks, including London and North-Western, and South-Eastern, ⅛ to ¼. In the colonial department, Grand Trunk improved to 19 to 20, and Great Western of Canada to 9¼ to ½. Foreign descriptions likewise showed a better tendency, especially Brazilian and Lombardo-Venetian. American securities experienced another decline, United States Five per Cents. being especially heavy. Erie ordinary and preference shares exceptionally advanced. Mines were in fair demand, and generally steady.

TUESDAY, Dec. 3.—The railway market was depressed the whole day in sympathy with Consols. The lines in the manufacturing districts were chiefly affected, especially London and North-Western, Midland, and Lancashire and Yorkshire. Great Northern, Caledonian, and Eastern Counties were also very flat, and compared with last evening a general decline took place of about ½ to 1 per cent. The closing prices were at nearly the lowest point of the day. In the colonial department there has been a general reduction in Indian guaranteed stocks. Grand Trunk was lower at 18¾ to 19¼, and Great Western of Canada at 8⅞ to 9⅛. Foreign descriptions declined, Belgian and Brazilian being chiefly offered. Lombardo-Venetian left off at ½ to ⅝ prem., or an eighth worse than yesterday. Canada, New Brunswick, and Nova Scotia Government debentures were again lower. American securities generally receded, Illinois Central and Erie shares exhibiting the greatest depression. The principal movements in mines were a rise in West Caradon and a fall in United Mexican. Joint stock bank shares were rather dull. In miscellaneous descriptions, a reduction took place in London Dock stock and in Electric Telegraph.

WEDNESDAY, Dec. 4.—The railway market opened this morning without change, but a reduction soon took place, from which there was only a temporary recovery. After official hours the general tendency was again unfavourable, and several stocks finally closed at a decline of ½ to ⅝ per cent. Midland, Lancashire and Yorkshire, Great Western, and North British chiefly receded. In the colonial department, Canadian descriptions again receded, Grand Trunk closing at 18 to 19, and Great Western of Canada at 8¾ to 9. Foreign railways generally left off the same as yesterday. Lombardo-Venetian, however, were firmer at ⅜ prem., and Great Luxembourg at 8⅞. Canada, New Brunswick, Nova Scotia, and Victoria Government debentures continued to decline. American securities were also depressed, Illinois Central and Erie shares especially exhibiting a fresh reduction. British mines were in fair demand, and occasionally higher. Foreign, however, were dull. No change of importance occurred in joint stock banks. In miscellaneous descriptions, Canada Land shares and Crystal Palace stock were quoted lower.

THURSDAY, Dec. 5.—The railway market opened firmly this morning, but subsequently gave way with Consols, and closed at a general decline of ¼ to 1 per cent., chiefly in anticipation of the injurious effect which a war with America would have upon trade, and consequently railway traffic. The daily fluctuations, however, were principally due to the operations of the dealers, the public buying or selling to a very limited extent only. The final prices this afternoon were at the lowest point of the day. Great Northern were exceptionally steady. In the colonial market, Indian guaranteed stocks were generally lower. Grand Trunk of Canada stocks also receded to 17½ to 18½, and Great Western shares to 8⅝ to ¾. Foreign descriptions were dull. American securities showed increased heaviness, United States Five per Cents., Illinois Central, and New York Central shares being especially depressed. A fair business was transacted in mines, and prices were generally steady. West Caradon, however, relapsed.

FRIDAY, Dec. 6.—The railway share market was inactive, but where any alteration occurred in prices it was in an adverse direction. Foreign lines were rather flat, as well as Indian. Grand Trunk of Canada Railway stock again declined. The mining share market was steady.

STAND 200.
THE NEW TRACTION ENGINE AND NEW STEAM PLOUGH.
To CONTRACTORS and AGRICULTURISTS.
TAPLIN and CO.'S New Patent Prize Traction Engine for Drawing Heavy Loads, Steam Ploughing, Thrashing, &c. Particulars sent post free by applying to Messrs B. D. Taplin and Co., Traction Engine Works, Lincoln.

GLENFIELD PATENT STARCH,
USED in the ROYAL LAUNDRY.
The Ladies are respectfully informed that this Starch is EXCLUSIVELY USED in the ROYAL LAUNDRY, and Her Majesty's Laundress says, that although she has tried Wheaten, Rice, and other Powder Starches, she has found none of them equal to the GLENFIELD which is the FINEST STARCH SHE EVER USED.
WHEN YOU ASK FOR
GLENFIELD PATENT STARCH,
see that you get it, as inferior kinds are often substituted
WOTHERSPOON and CO., Glasgow and London.

DINNEFORD'S PURE FLUID MAGNESIA has been, during twenty-five years, emphatically sanctioned by the Medical Profession, and universally accepted by the Public, as the Best Remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion, and as a Mild Aperient for delicate constitutions, more especially for Ladies and Children. Combined with the Acidulated Lemon Syrup, it forms an agreeable Effervescing Draught, in which its aperient qualities are much increased. During hot seasons and in hot climates, the regular use of this simple and elegant remedy has been found highly beneficial. Manufactured (with the utmost attention to strength and purity) by DINNEFORD and CO., 172 New Bond street, London; and sold by all respectable chemists throughout the Empire.

MERCHANTS HAVING commissions for Furniture or Carpets of a superior class, are respectfully invited to visit the manufactory and show rooms of Messrs JACKSON and GRAHAM. By the introduction of machinery worked by steam power in various processes, J. and G. have effected a considerable improvement and economy in the manufacture of furniture, and their spacious show rooms afford to purchasers unrivalled facilities for the selection of all requisites, useful and ornamental, in the best taste. Four show rooms, each 120 feet long, are exclusively devoted to the display of Bedsteads and Chamber Furniture. J. and G. are also large importers of Silks, Tapestries, and other Fabrics for Curtains, and their Gallery of Bronzes d'Art is the sole depot for the celebrated productions of F. Barbedienne and Co., of Paris, which they sell at the prices of the Paris catalogue, with 5 per cent. added for expenses of importation.

DEANE'S TWO-HOLE BLACK PENS which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped
"G. and J. Deane, London bridge,"
and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed
"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

GREAT FIRES IN BELFAST, in which nine of MILNER'S SAFES (six in the first and three in the last) have preserved their contents. The following is one of the certificates from all the owners:—
(Copy.)
"Messrs Thos. Milner and Son.
"Belfast, February 13, 1861.
"Gentlemen,—We beg to say that the block of buildings in Bedford street, in which our warehouses and offices were situated, was totally destroyed by fire on the 8th instant, but we are happy to say that all our books contained in two of your Safes were found, on forcing the Safes open, to be perfectly secure and the writing quite legible, though the edges and some leaves were stained by the steam, and some of the covers damaged by adhering to the sides of the Safes from the heat to which they were exposed.
"We are, Gentlemen, your obedient servants,
"J. B. RALSTON and Co."
Milner's Phœnix Safe Works, Windsor, Liverpool.
London Depot, 47A Moorgate street, City.

BLAIR'S GOUT AND RHEUMATIC PILLS.—Price 1s 1½d and 2s 9d per box.
This preparation is one of the benefits which the science of modern chemistry has conferred upon mankind; for during the first twenty years of the present century, to speak of a cure for the gout was considered a romance; but now the efficacy and safety of this medicine is so fully demonstrated, by unsolicited testimonials from persons in every rank of life, that public opinion proclaims this as one of the most important discoveries of the present age.
Sold by all medicine venders. See the name of "Thomas Prout, 229 Strand, London," on the Government stamp.

TAYLOR BROTHERS' ICELAND MOSS COCOA, is an invaluable article of diet for Invalids and persons of weak digestion.
Sold by all Grocers at 1s 4d per lb.

KENTISH TOWN COLLEGIATE SCHOOL, N.W.—Head Master, DR SHERRIN, F.R.G.S.—The above school offers high advantages to parents seeking for their sons sound practical tuition, combined with domestic comfort, and careful moral and religious training. Premises very commodious. Situation most healthy. Masters selected with great care. For prospectus and references, which are unexceptionable apply to Head Master, Leighton House, Kentish town.

VISITORS TO THE CATTLE SHOW must not consider that they have seen all the sights of London without having visited the
COLOSSAL ESTABLISHMENT
of
E. MOSES and SON,
at the Corner of Minories and Aldgate, and their branches, at the Corner of Tottenham Court road and Euston road, and at New Oxford street, Corner of Hart street, all of which are acknowledged to be the finest specimens of Shop Architecture in the World, and are fitted up in a style of elegance and completeness commensurate with their magnitude and importance. The stock with which they are furnished, unequalled for extent and variety, includes every description of apparel for all classes and all ages, for all occupations and all occasions, and is as distinguished for excellence as for cheapness.
N.B. In the Bespoke or Measure Departments, a perfect fit is combined with the best materials and the neatest workmanship.
NOTICE.—All goods are marked in plain figures the lowest prices, from which no abatement can be made.
E. MOSES and SON wish it to be particularly observed that should any article not give satisfaction, it will be exchanged or the money returned without hesitation—a great advantage and convenience to purchasers.
A card of Fashions for the present season, with Rules for Self-Measurement, and lists of prices gratis on application, or post free.
The Establishments are closed every Friday evening at sunset till Saturday evening at sunset, when business is resumed until Eleven o'clock.
CAUTION.—E. MOSES and SON regret having occasion to give notice that they have no connection whatever with any other House in or out of London, except the undermentioned:—
E. MOSES and SON,
Ready-made and Bespoke Tailors, Hatters, Hosiers, Drapers, Boot Makers, and General Outfitters.
London Houses.

154, 155, 156, 157, Minories; 83, 84, 85, 86, Aldgate.
Oxford street Branch.
506, 507, 508, New Oxford street; 1, 2, 3, Hart street.
Tottenham Court road Branch.
137, 138, Tottenham Court road; 283 Euston road.
Country Establishments.
Sheffield and Bradford, Yorkshire.

DR DE JONGH'S
(Knight of the Order of Leopold of Belgium)
LIGHT-BROWN COD LIVER OIL,
Prescribed by the most Eminent Medical Men throughout the world as the safest, speediest, and most effectual remedy for
CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GOUT, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,
Is incomparably superior to every other variety.
SELECT MEDICAL OPINIONS.
Sir HENRY MARSH, Bart., M.D., Physician in Ordinary to the Queen in Ireland.—"I consider Dr de Jongh's Light Brown Cod Liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."
Sir JOSEPH OLLIFFE, M.D., Physician to the British Embassy at Paris.—"I have frequently prescribed Dr de Jongh's Light Brown Cod Liver Oil, and I have every reason to be satisfied with its beneficial and salutary effects."
Dr LAWRANCE, Physician to H.R.H. the Duke of Saxe-Coburg and Gotha.—"I invariably prescribe Dr de Jongh's Oil in preference to any other, feeling assured that I am recommending a genuine article, and not a manufactured compound, in which the efficacy of this invaluable medicine is destroyed."
Dr BARLOW, Senior Physician to Guy's Hospital.—"I have frequently recommended persons consulting me to make use of Dr de Jongh's Cod Liver Oil. I have been well satisfied with its effects, and believe it to be a very pure Oil, well fitted for those cases in which the use of that substance is indicated."
Dr de Jongh's Light Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; capsuled, and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists and Druggists.
SOLE CONSIGNEES:
ANSAR, HARFORD, and CO., 77 STRAND, London, W.C.
CAUTION.—Beware of Proposed Substitutions.

CURE OF ASTHMATIC COUGHS BY DR LOCOCK'S PULMONIC WAFERS.—From Mr Ince Gamis, Medicine Warehouse, Yeovil.—"A lady purchased a 2s 9d box, and observed that she had suffered for years from an asthmatic cough, and spent many pounds on other medicines to no purpose. Weeks after the same lady called again, when 'she had been completely cured by them,' merely one 2s 9d box. Other instances are from time to time occurring, which prove the value of these Wafers above other medicines for pulmonary diseases, coughs, colds, &c.—Ince Gamis." To singers and public speakers they are invaluable for clearing and strengthening the voice. They have a pleasant taste. Price 1s 1½d, 2s 9d, and 11s per box. Sold by all druggists. Beware of counterfeits.

PETROLEUM FOR EXPORT.—A large Supply in Yard, in prime shipping order, on consignment, from the principal Wells in the United States, for Sale on the most favourable terms. Shipping facilities direct from the Yards.—SCHIEFFELIN BROTHERS and CO., 170 and 172 WILLIAM STREET, NEW YORK.

MR LEWIS AND SON, 113 Strand.—The Royal Lewisian Systems of Writing, Arithmetic, Bookkeeping, and Shorthand, as taught for upwards of fifty years by Mr Lewis, the real inventor and first teacher of these world-renowned and only infallible systems, insures perfection in any of the above branches after a few easy and interesting lessons. Persons unable to take the lessons may obtain the inventor's works for self-instruction at his only institution, 113 Strand.

TEETH.—REGISTERED PNEUMATIC VENTILATING PALATE.—Discovery of a new principle in dentistry, and great reduction in price.—Mr LEWIN MOSELY, 30 Berners street, W., established 25 years, offers for inspection Specimens of all the latest inventions in ARTIFICIAL TEETH. His PNEUMATIC VENTILATING PALATE is recognised as the best combination of improvements submitted to the medical profession, supplying all dental deficiencies without extraction of stumps or any painful operation. Sharp edges, wires, springs, ligatures, and all metals, especially avoided, rendering impossible unpleasant secretions and vitiated breath (hitherto causes of general complaint). This Palate may be added to teeth in wear, and defies competition for cheapness and durability. Consultation and every information free. Success guaranteed in all cases by Mr Lewin Mosely, 30 Berners street, Oxford street, W.

DR KAHN ON MARRIAGE.—A new and entirely re-written edition (the forty-seventh of this celebrated treatise), with illustrations, engravings, &c., is now ready.
The object of the work is not to maintain any particular hypothesis, but to enable every one to understand for himself the structure and functions of the organs concerned in the fulfilment of the physical obligations of the married state; to acquaint him with the consequences arising from excesses; to prevent unnecessary misapprehension from unfounded fears, and to indicate, when those fears are well founded, the means of speedy relief. The work is not crowded with the technicalities of ordinary professional books, nor does it present the crudeness which characterises the so-called "popular works" on the subject.
Price One Shilling, free by post for thirteen stamps, or in a sealed envelope twenty stamps, either from the publisher, J. Allen, 20 Warwick lane; or from the author's address, 17 Harley street, Cavendish square, London, where he may be consulted daily.

A BOON TO NERVOUS SUFFERERS.—Twenty Thousand Copies of a Medical Book for gratuitous circulation. HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., who has devoted fifteen years to the study and treatment of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, will send free, for the benefit of Nervous Sufferers, a copy of the New Medical Guide, containing his highly successful mode of treatment, with necessary instructions, by which sufferers may obtain a cure. Post free on receipt of a stamped directed envelope. Address Dr Henry Smith, 8 Burton crescent, Tavistock square, London, W.C.

HOLLOWAY'S PILLS.—WINTER Ailments.—Each season of the year has its peculiar diseases; but in our winters the sick list much increases. Bronchitis, diphtheria, mumps, liver complaints, and dyspepsia, or disordered stomach, generally prevail at this period. The most philosophical and successful mode of preventing or curing this calamitous catalogue of sufferings is to purify the blood. With its purification all disorders depart. This desirable result can and will be readily and effectually accomplished by a judicious course of Holloway's estimable Pills, which act by directly expelling all impurities. These pills wonderfully assist digestion, and promote natural activity in the kidneys, liver, lungs and heart, whereby they strengthen the nerves, and confer energy, power, and health to the entire frame.

DR CURTIS'S MEDICAL WORK "MANHOOD," An Essay on Nervous and Generative Diseases. The 140th thousand, with numerous plates, in a sealed envelope, price 1s, or post paid, by the Author, for twelve stamps.

MANHOOD: THE CAUSE AND CURE of PREMATURE DECLINE in MAN, with Plain Directions for Perfect Restoration to Health and Vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, the result of twenty-five years' successful practice. By Dr J. L. CURTIS, 15 Albemarle street, Piccadilly, London, Consultations, Ten till Three and Six till Eight.
REVIEWS OF THE WORK.
"We feel no hesitation in saying that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a parent, preceptor, or clergyman."—SUN, evening paper.
"Dr Curtis has conferred a great boon by publishing this little work, in which is described the sources of those diseases which produce decline in youth, or more frequently premature old age."—DAILY TELEGRAPH, March 27, 1858.
N.B. The author of the above Medical Treatise may be consulted, as usual, either by letter or personally, at his residence. The efficacy and harmless nature of the remedies employed by Dr Curtis having been demonstrated by the most complete success during a practice extending over a period of 20 years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.
Published by Allen, 20 Warwick lane, Paternoster row; Mann, 39 Cornhill; and free from the Author for 12 stamps.

TRELOAR'S KAMPTULICON, OR CORK FLOOR CLOTH.

F. G. TRESTRAIL AND CO., 19 AND 20 WALBROOK, LONDON, E.C.
MANUFACTORY—SOUTH LONDON WORKS, LAMBETH.

HUBBUCK'S PATENT WHITE ZINC PAINT,

By their process, which is patented, Pure White Zinc Paint is cheaper than White Lead. It is the most durable and beautiful paint known, and does not stain or discolour with the London atmosphere.

ADULTERATIONS.—Several Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, some even to the extent of thirty per cent. Another White Zinc has been now introduced containing impurities from the mode of manufacture which retard the drying. Whether these are sold under the name of "Improved Zinc Paint," or as the Number Two or Three qualities, no workman can produce good work with such material. Workmen who have once used the Patent Zinc Paint will never willingly use any other Paint for their best work.

To prevent the prejudice which the inferior article must produce, each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

"Among other tests to which it has been subjected, has been that of painting the hold of a sugar vessel, which after a voyage to St Kitt's and back, was found, after washing, to be as white as the first day the paint was applied."—JOHN BULL, September 14, 1850.

Samples, testimonials, and full instruction on application to CROGGON and CO, 2 Dowgate hill, London and at 2 Goree Piazzas, Liverpool.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER TRUSS

is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

ELASTIC STOCKINGS, KNEE CAPS, &c.,

for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price, 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.

WHITE, MANUFACTURER, 228 Piccadilly, London.

THE HAFOD LEAD MINING COMPANY (Limited).

SOLICITORS—Messrs Hughes, Kearsey, Masterman, and Hughes, 17 Bucklersbury, E.C.
OFFICES—No. 9A Great St Helen's, Bishopsgate street, London, E.C.

ABRIDGED PROSPECTUS.

This Company is formed for the purpose of raising the rich silver lead ore on the Hafod Estate, Cardiganshire, north of the River Ystwith, twelve miles from the seaport of Aberystwith.

The grant is about 2,050 acres, and it is immediately surrounded by the richest and most lasting mines in the principality; on the west are the well-known Grogwinion, Frongoch, Logylas, and other lodes of the Lisburne mines; on the east the celebrated Cwmytwith series of lodes, the Bodcall mines, and numerous others, the great value of all of which has been known for many years.

The shares of the Cwmystwith Mines, with £60 paid, have paid in dividends £231 10s per share, and the Lisburne, with £18 15s paid, £377 10s per share.

The term of the lease is 40 years from 1st January, 1861, at 1-20th royalty, free from any dead rent, terms of unusual liberality compared with the surrounding mines, the generality of which are leased for 21 years only, at 1-10th royalty.

Applications for shares may be made to the Directors, at the offices of the Company, No. 9A Great St Helen's, accompanied with a deposit of 5s per share on the number applied for, or the amount thereof to be paid to the Company's bankers; and in every case where no allotment is made, the deposit will be returned.

Prospectuses may be had on application, by post or otherwise, and specimens of the ore and reports seen, at the office of the Company, No. 9A Great St. Helen's, E.C.

N.B.—A large amount of the capital having been already subscribed, operations have been commenced at the mines.

FORD'S COLOURED FLANNEL

SHIRTS.—Patterns of all the newest designs in fancy wove and printed flannels sent per post free.
RICHARD FORD and CO., Patentees, 38 Poultry, London.

FORD'S EUREKA SHIRTS,

known from Cornhill to China, for the last ten years, as the acme of perfection for fit and quality. Where difficulty occurs in procuring Ford's Eureka Shirts, send to the Patentees.
RICHARD FORD and CO., 38 Poultry, London, E.C

"MIMEMA."—

Her Majesty's Royal Letters Patent have been granted to Richard Ford and Co., of 38 Poultry, London, for the Mimema, or Demi-Shirt, which is intended to be worn over an outside flannel shirt, giving the appearance of dress at any time without the necessity of changing the flannel shirt, and thus preventing taking cold. The Mimema is made of long-cloth, with plain and fancy linen fronts and wrists, and being close fitting, not the slightest incumbrance is experienced by the wearer. An illustrated price list, with instructions for measurement, sent free on application. Wholesale and retail by the Patentees, RICHARD FORD and CO., 8 Poultry, London, E.C.

DR MARSTON'S LECTURES—

FREE ISSUE.—The following Lectures are ISSUED GRATUITOUSLY by the Professors of the Royal Institute of Anatomy and Science, 369 Oxford street, London, Firstly, as a mark of esteem to their distinguished colleague, Dr MARSTON, M.R.C.S., L.S.A., and Secondly, from a conscientious belief that the Lectures will do a vast amount of good by enlightening the public upon subjects of the highest importance to their moral welfare and physical health, ignorance of which has to the present day been a most fruitful cause of human suffering and misery.

No. I.—NERVOUS DEBILITY (the result of youthful error), loss of memory, shortness of breath, dimness of sight, exhaustion, and general incapacity. Addressed specially to Young Men.

No. II.—MARRIAGE: Its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who desire Children.

No. III.—THE BRAHMIN'S ELIXIR OF LIFE: Its History—Secret Remedies of the Hindoos no Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Reinvigorator of the Impaired Functions, and in all Cases of Nervous Debility.

No. IV.—THE DISEASES INFLICTED UPON MANKIND BY THE GREAT SOCIAL EVIL. With a simple means of complete Cure without Mercury.

"These lectures contain Dr Marston's experience during Twenty-five Years of Successful Practice, and point out to those who need it Simple yet Effectual means of complete restoration to vigorous health."—MEDICAL JOURNAL.

State the No. of the Lecture required, and enclose 2 Stamps to prepay postage; or the whole Four may be had, neatly bound, 164 pages, octavo, post free, for 6 Stamps.—Address, Treasurer, Royal Institute, 369 Oxford street, London,

ORIENTAL PARCELS CONVEYANCE.

—THE ORIENTAL INLAND STEAM COMPANY (Limited), under subsidy from the Indian Government. Capital £500,000.

The Directors have the pleasure of intimating for general information that they are now prepared to transmit parcels, and various descriptions of merchandise, from the coast to many places in the interior of India, by the most eligible means of conveyance, and at very moderate charges: and also, in connection with such internal traffic, to forward such parcels and other goods from Europe to India.

The Company having efficient agents established for their own steamers at Kurrachee, Calcutta, and most of the principal stations on the Indus and the Ganges, as well as in various other parts of India, are enabled to offer unusual advantages in the transmission of goods to the interior, and such as no existing agency can afford, undertaking to act as forwarding agents from the termini of their own navigation.

Packages will be cleared at and removed from the Customs in India, and forwarded to their destination, bearing import duty, which, with the landing and other internal charges, must be paid by the consignee previous to delivery; but the freight to India of such goods as are required to be forwarded from Europe must be paid in England.

For tariff rates, &c, apply at the Company's offices, 9 Billiter street, London, E.C.; or 2 Queen's terrace, Southampton; or to the Company's agents at the following stations in the East, at which agencies have either been already formed, or will be formed as early as practicable. Agencies have been already established at many other points not enumerated herein:—

Agra.	Ferozepore.	Moultan
Ahmednuggur.	Futteyghur.	Neemuch.
Allyghur.	Fyzabad.	Nynee Tall.
Allahabad.	Ghazeepore.	Patna.

LOANS ON DEBENTURES,

guaranteed by the Secretary of State for India.—The Directors of the MADRAS RAILWAY COMPANY are prepared to issue DEBENTURES, as under, at par, in sums of not less than £100 each, bearing interest at 5 per cent. per annum, payment of interest and principal being guaranteed by Her Majesty's Secretary of State for India in Council. The interest is payable by coupon, half-yearly, at the Union Bank of London.

1. For a term of 5 years from the 1st of January last, transferable by endorsement without stamp, and renewable at the option of the holder for a second term of 5 years at the same rate of interest.

2. For a term of 5 years from the above date, convertible, at the option of the holder, into Capital Stock of the Company, bearing 5 per cent. interest, and with the option also of renewal for a second term of 5 years at the same rate of interest.

Forms of application may be obtained at this office.

JAMES WALKER, Managing Director.

Company's offices, No. 33 New Broad street, London, E.C., Nov. 8, 1861.

NORTH LONDON RAILWAY COMPANY.

FOUR-AND-A-HALF PER CENT. PREFERENCE STOCK.

The North London Railway Company are prepared to receive applications for their new shares of £20 each, created under the powers of their Acts of 1861, bearing a fixed Preferential dividend at the rate of 4½ per cent. per annum, with a contingent right to a further increase up to £5 per cent. per annum. The shares will be issued on such terms that the holders will be entitled to 4½ per cent. on the whole nominal amount of the shares, from the 1st January, 1862, to the end of 1865, after which they will be entitled to the further contingent increase.

A form of application, in which the terms are fully and particularly stated, may be had on application at the Company's offices.—By order,

HARRY CHUBB, Secretary.

Euston Station, London, 20th November, 1861.

CALEDONIAN RAILWAY COMPANY.

At an Extraordinary General Meeting of the Shareholders of the Caledonian Railway Company, held at Glasgow, Dec. 3, 1861, Lt.-Col. Salkeld in the Chair, the Secretary having read the advertisement calling the Meeting, it was resolved unanimously:—

1st. That the sum of £25,000 be raised under the powers of the "Carlisle Citadel Station Act, 1861;" that the sum of £80,000 be raised under the powers of "The Caledonian Railway (Stonehouse Branch) Act, 1861;" that the sum of £160,000 be raised under the powers of "The Caledonian Railway (Cleland Extension and Branches) Act, 1861;" that the sum of £180,000 be raised under the powers of "The Caledonian Railway (Rutherglen and Coatbridge) Act, 1861;" and that the sum of £39,550 be raised under the powers of "The Caledonian and Symington, Biggar, and Broughton Railways Amalgamation Act, 1861;" and that these several sums, amounting together to £484,550, be raised by the creation of 19,382 Half Shares of £25 each, to be called "Caledonian Railway Four-and-a-Half per Cent. Preference Half Shares C," bearing a dividend at the rate of four-and-a half per cent. per annum in perpetuity, preferable out of the profits of each year, commencing on the first day of February, in priority to the ordinary shares of the Company.

2nd. That the first instalment shall be £2 10s per share upon the said preference half shares, and the same shall be payable on the 27th day of December next, and the remaining instalments shall be payable at such periods as may be fixed by the Directors, under the provisions of the Caledonian Railway Act, 1845.

3rd. That the Directors be, and they are herbey, empowered to allocate the said shares to those holders of stock and shares who may apply for the same, and agree to pay the first and remaining instalments as the same respectively fall due—whom failing, to such other parties as may make application and come under a like obligation

4th. That so soon as the said several sums of £25,000, £80,000, £160,000, and £180,000 shall have been subscribed for, and one-half thereof shall have been paid up, the Directors be, and they are hereby authorised, in addition to the amount which they are or may be authorised to borrow by any other Act of Parliament, from time to time to borrow on Mortgage; and if paid off, again to borrow any sum or sums of money not exceeding in the whole the following, namely:—In terms of the "Carlisle Citadel Station Act, 1861," £8,300; in terms of "The Caledonian Railway (Stonehouse Branch) Act, 1861," £26,600; in terms of "The Caledonian Railway (Cleland Extension and Branches) Act, 1861," £53,300; and in terms of "The Caledonian Railway (Rutherglen and Coatbridge Branches) Act, 1861," £60,000.

5th. That when and so often as the sum of £12,000, borrowed by the Symington Company, or any part of such sum, shall be paid off, the Directors be, and they are hereby, authorised to re-borrow, upon Mortgage, on the security of the Company's undertaking, any sum or sums of money not exceeding the amount so paid off, in terms of "The Caledonian and Symington, Biggar, and Broughton Railways Amalgamation Act, 1861."

6th. That so soon as the said sum of £39,550, authorised by "The Caledonian and Symington, Biggar, and Broughton Railway Amalgamation Act, 1861;" and the sum of £45,000, authorised by "The Symington, Biggar, and Broughton Railway (Extension) Act, 1860," shall have been subscribed for, and one-half thereof shall have been paid up, the Directors be, and they are hereby, authorised from time to time to borrow on mortgage, on the security of the Company's undertaking, and, if paid off again, to borrow any sum or sums of money, not exceeding in the whole £24,900, in addition to the said sum of £12,000, and to the amount which they are or may be authorised to borrow by any other Act of Parliament.

THOS. SALKELD, Chairman.
ARCH. GIBSON, Secretary.

LOANS ON DEBENTURES.—

The Ipswich Dock Commissioners are prepared to receive TENDERS for LOANS, in sums of not less than £100 each, on security of the rates and duties payable under the Ipswich Dock Act. Coupons for payment of the interest half-yearly, either at Messrs Alexander's, bankers, Ipswich; or Messrs Barnett's, bankers, London, will be attached to the debentures. Tenders, stating the amount desired to be advanced and the rate of interest, may be sent to the undersigned, of whom any further information can be obtained.

PETER BW. LONG,
Solicitor and Clerk to the Commissioners.

Ipswich, Nov. 13, 1861.

ATLANTIC AND GREAT WESTERN RAILWAY (New York Division).

Coupons due 1st of January next will be paid in London at the Bank of London, or in New York at the banking house of Messrs Duncan, Sherman, and Co., No. 10 New Cannon street.

December 6, 1861.

THE LANCASHIRE AND YORKSHIRE RAILWAY COMPANY.—Debenture Stock.—

The Directors are prepared to receive applications for the issue of a portion of the Company's Perpetual Four per Cent. Debenture Stock, which will be recorded in the books of the Company in the names of the applicants free of stamp duty or other charge.

This stock will be entitled to the same priority against the property and income of the Company as the mortgage debt, in substitution of which it will be issued.

Forms of applicat on may be obtained from the undersigned, either personally or by letter.—By order,

S. WM. BULTEEL, Treasurer.

Manchester, Nov. 1861.

THE OTTOMAN RAILWAY

from SMYRNA to AIDIN of His Imperial Majesty the Sultan, guaranteed by the Sublime Porte a minimum dividend of £6 per cent. per annum, and an equal division (with the Ottoman Government) of profits over 7 per cent.

Sixth Call of £2, making £13 per share paid.

Notice is hereby given, that the Board of Directors have this day passed a resolution, making a further call of £2 per Share on each and every Share in this Company, making, with the deposit and former calls, £13 per share paid.

Pursuant to such Resolution, proprietors of shares in this Railway are hereby required to pay the said call on or before the 10th January now next ensuing, to either of the undermentioned bankers, viz.:—Messrs Smith, Payne, and Smith, 1 Lombard street, London; Messrs Charles S. Hanson and Co., Constantinople; and Messrs Hanson and Co., Smyrna.

Pursuant to the statutes, the Directors are authorised to receive sums in anticipation of future calls, upon which interest at the rate of 6 per cent. per annum will be allowed.

It is indispensable that Shareholders, in paying the call, should furnish the bankers with the number of the share certificates, in order that the same may be entered on the receipt, without which the call cannot be be received, and the receipt, together with the share certificates, must be presented without delay at the Company's offices in London, or at the Company's bankers at Constantinople or Smyrna, for endorsement.

Interest at ten per cent. will be charged on all calls in arrear, and no interest will be payable on shares so long as any calls are in arrear.

ABRIDGED PROSPECTUS.

This Company holds the celebrated Lead and Copper Mines of Sir Carbery Price, known as Esgair-hir and Esgair-fraith, situate in the rich mineral district of Cardiganshire.

Messrs Phillips and Darlington state, "It is quite certain that the old men made enormous returns from the ground near the surface, and that the mine has from time to time commanded very considerable attention. It would be requisite that adequate capital should be provided, and in case of this being found, we are of opinion that the Cardigan Consols Mine offers more than average security for the money so employed. We may further observe, that the lode in this mine appears to be very analogous to that of Wildberg, in Germany, which, under our management, returned about £55,000 worth of ore in a period of 2½ years, and which undertaking has been worked during several centuries, and at various periods afforded large profits to the proprietors."

Among the reports will be found a joint one from the managing agents of the Dyliffe and Dyfngwm mines, who have minutely examined the Cardigan Consols property, and having traced the lode for the distance between these mines, they confirm the previous belief that Cardigan Consols is on the Esgair-gold lode of Dyliffe. The Dyliffe mines were purchased about three years ago by Mr Bright, M.P., and his friends, for the sum of £24,000, and they were bound also to lay out £10,000 in explorations, &c. The returns are now upwards of 200 tons of lead ore per month, which it is believed yield a profit of about £1,000 per month. At Dyfngwm (adjoining Dyliffe) they are making a profit of about £200 per month, and likely to improve.

The managers of Dyliffe and Dyfngwm also state that if their recommendations are carried out at Cardigan Consols, "it is our firm opinion that the mine would again open out productive, and large bodies of ore be discovered. It would then prove itself to be what it was always supposed to be by those who have known it longest and best, viz., one of the first in the kingdom. We speak from experience of 30 and 20 years in a similar stratum to yours And what we recommend you to do, we have already done something similar ourselves. And we are now carrying on works of the same magnitude on the very same lode." Mr Davies, of Dyfngwm, also states in a letter, "we consider that Esgair-hir has a national character, and if this mine turns out a complete failure, nothing is safe."

In a letter also, written by Mr John Taylor, jun. (of Messrs John Taylor and Sons), dated 22nd April, 1857, he states, "As to the mine itself (Cardigan Consols, then called Welsh Potosi), I have a high opinion. This opinion is not formed from personal inspection, for I never was on the spot; but I have watched the returns of ore from it for very many years, and I have received many reports on the lode from competent judges. Moreover I know the character of this lode well at the Dyliffe mine, where I have the management."

Application for shares, in the form annexed to the prospectus, accompanied by a deposit of 5s per share, may be addressed to the Directors, or to the brokers. On allotment, 15s per share additional will have to be paid, but if no shares are allotted, the deposit will be returned in full.

Detailed prospectuses, with the reports, and forms of application for shares, may be obtained at the office, 117 Bishopsgate street within, E.C., or from any of the brokers. The prospectus will also be found at length in The TIMES, DAILY NEWS, MORNING POST, ECONOMIST, MINING JOURNAL, and LIMITED LIABILITY JOURNAL of 30th November.

QUEENSLAND COTTON COMPANY (LIMITED).

Notice is hereby given, that no Applications for Shares in this Company will be received after Thursday the 12th instant.—By order of the Board.

ABSTRACT OF THE PROSPECTUS.

This Company is established to supply merchants and the trading community with facilities not yet afforded by bankers or any existing associaton, to make advances on produce and merchandise, and to receive upon the credit of a large subscribed capital, money on deposit at a fixed rate of interest, and to lend the same, together with the paid capital, on convertible mercantile securities.

Although bills of exchange are readily negotiated without the deposit of any collateral security, there does not exist any adequate means of obtaining advances on merchandise or produce.

This Company proposes to supply this want by making advances upon the security of merchandise, bills of landing, or warrants representing merchandise lying in the docks, wharves, or bonded warehouses, or other marketable securities.

It is well known that consignments of merchandise of great extent and value are made annually to London from all parts of the world, as well as from the Manufacturing Districts throughout England; and it is expected that merchants and manufacturers will readily avail themselves of the facilities, now for the first time offered by any public company, for obtaining immediate advances on their property.

The aggregate amount of trade of the United Kingdom in exports and imports, in 1860, exceeded £350,000,000 sterling, and during the last 25 years the exports alone have increased 400 per cent.

The Company will afford every facility for sampling and inspection of goods, to effect sales, to redeem any portion or the whole at any moment.

It is well known that the large yearly increasing dividends of the banking institutions are mainly produced by their advances on mercantile securities.

The following table exhibits the progress and condition of the principal London Joint Stock Banks:—

Name of Bank.	Paid up on shares.	Dividend declared.	Present value per share.	Net profit per share.	Profit per share on capital paid up.
	£	Per Cnt.	£	£	Per Cnt.
London & Westminster Bank	20	20	72	52	260
London Joint Stock Bank..	10	25	34	24	240
Union Bank of London.....	10	10	28	18	180
London and County Bank	20	10	39	19	95
City Bank	50	9	75	25	50
Bank of London	50	5	64	14	28

The London joint stock banks show an increase for the last 10 years of 202 per cent., while it will be seen that the shares bear a premium in relation to capital of 95 to 260 per cent., and that the dividends range from 15 per cent. to 20 per cent. per annum.

These facts show that if the London joint stock banks under a restricted system have made such enormous profits, this Association may, by the application of a large capital to advances on produce and merchandise, not only be placed on a firm basis, but be enabled, under its extensive system of operations, to realise large profits, equal to those of any of the joint stock banks.

Application for shares to be accompanied by a deposit of 5s per share on the number of shares applied for, as part payment of such shares, for which the Company's bankers will give a receipt.

Prospectuses and forms of application for shares may be obtained of Fredk. Everett, Esq., 18 Royal Exchange, London; Lewellin A. Crowley, Esq., 38 Throgmorton street, London; Messrs Taunton, Molyneux, and Co., Liverpool; Samual Fennyhough, Esq., 30 Cross street, Manchester; Messrs Macallum and Sidey, Prince's street, Edinburgh; David Edmd. Outram, Esq., Royal Bank place, Glasgow; the Brokers of the Company, or at the offices of the Company.

GEORGE SMITH,

Wine Merchant, 86 Great Tower street, 9 and 10 Great Tower street, and 1 St Dunstan's hill, E.C., and 17 and 18 Park row, Greenwich, S.E. Established 1785. A large and valuable stock of old bottled Ports, of various shippers and vintages, accumulated during the last forty years, including a bin fourteen years in bottle, of eight hundred and fifty dozen, bottled by the late Mr Fenwick, of the firm of Messrs Ruck, Fenwick, and Ruck, known to the trade as his celebrated "Six Vintage" Wine, dry, full of "bee wing," of immense flavour, delicacy, and bouquet. Samples forwarded on payment.

528 PRIZES,

amounting in value to upwards of £3,000, have been awarded during the present year 1861, to CATTLE fed on Food seasoned with THORLEY'S CONDIMENT. See reports and testimonials from Noblemen, and most of our first-class Agriculturists through ut the World,—sent post-free on application. A Barrel, containing 448 Feeds, carriage paid to any Rail Station in the United Kingdom on receipt of Post Office order for 40s, made payable to the Inventor, JOSEPH THORLEY, Newgate street, City. Address, Steam Mills, Caledonian-road, King's cross, London.

HARVEY'S SAUCE.—CAUTION.—

The admirers of this celebrated Sauce are particularly requested to observe that each bottle bears the well-known label, signed "Elizabeth Lazenby." This label is protected by perpetual injunction in Chancery of the 9th July, 1858, and without it none can be genuine.

E. LAZENBY and SON, of 6 Edwards street, Portman square, London, as sole proprietors of the receipt for Harvey's Sauce, are compelled to give this caution, from the fact that their labels are closely imitated with a view to deceive purchasers.

Sold by all respectable grocers, druggists, and oilmen.

OVERLAND ROUTE.—

COMMUNICATION by STEAM INDIA, AUSTRALIA, &c., via Egypt.—The PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY BOOK PASSENGERS and receive Cargo and Parcels for Gibraltar, Malta, Egypt, Aden, Ceylon, Madras, Calcutta, the Straits, and China, by their steamers leaving Southampton on the 4th and 20th of every month; for Gibraltar, Malta, Egypt, Aden, and Bombay, by those of the 12th and 27th of each month; and for Mauritius, Reunion, King George's Sound, Melbourne, and Sydney by the steamers leaving Southampton on the 20th of every month.—For further particulars apply at the Company's offices, 122 Leadenhall street, London, E. C., or Oriental place, Southampton.

[GRATIS]

Vol. XIX. SATURDAY, DECEMBER 7, 1861. No. 954

COMMERCIAL LITERATURE.

WHAT IS CONTRABAND OF WAR AND WHAT IS NOT? Comprising all the American and English Authorities on the Subject. By JOSEPH MOSELEY, Esq., B.C.L., Barrister-at-Law. Butterworths, Fleet street.

THIS valuable little book, which has evidently been written with much care and after a great deal of well-directed research, is a curious example of the teasing manner in which the circumstances of the world disappoint the anticipations of authors. Mr Moseley designed his book for practical use during the present American war, and especially for the use of the English during that war. He evidently hoped that he had considered all the important cases which could arise, and examined the effect of the best authorities regarding them. Yet the event has not corresponded with his expectation. Fortune has been perverse: he expended his pains and learning in telling us what *things* are contraband of war, and has not deigned even to discuss what *people* are so. Yet at the present moment the peace between the two greatest countries which speak the same tongue is dependent on the knowledge whether certain Confederate gentlemen are properly included in the topic of Mr Moseley's treatise or are not. Writing a little while since, our author was guided by the evident probabilities; it is only within ten days that we perceive how entirely these probabilities have withdrawn his attention from the point which is now most important.

On some subsidiary points, however, even of the present controversy, Mr Moseley's learning is useful. He appears to be pretty clear that despatches to a neutral country are not contraband of war. He says:—"A neutral vessel carrying despatches from the governor of one of the enemy's colonies or provinces to the home government is liable to confiscation, and the cargo also, if it belongs to the same master, especially if such were concealed. But this does not apply to despatches on board a neutral ship, but going from the consul of the enemy's state resident in the neutral state. And the legal presumption in such case is, that the despatches have reference to the commercial relations of the belligerent and neutral state."

Even here the fates have been against Mr Moseley. It has not occurred to him to consider the precise case of a despatch from the Government of a belligerent to the consul or other representative in the neutral state. He tells us that the consul's letters to his Government are not contraband, but he does not speak in so many words of the replies. It can, however, hardly be that one-half of a correspondence is permitted and the other half prohibited by international law. "The pride of the human intellect," as Mr Burke called the science of jurisprudence, can scarcely have adopted a conclusion so absurd.

On another point which till lately was much more interesting, and which may, if the present painful conjunction of circumstances should pass away, soon become more interesting again, Mr Moseley is much more instructive and full, and though he arrives at no very decided conclusion, this is not perhaps his fault, but the fault of the doubtful state of the law which he is expounding. He observes:—

> A very learned authority on the subject of International Law, after observing that the principles of law prohibit a neutral from assisting a belligerent with money, in the shape of a loan or in any other form, as much as assisting him with arms, adverts to a case decided in the Common Pleas, where it was held contrary to law in this country, as contrary to the law of nations, for a person residing here to enter into engagements to raise money for the purpose of supporting subjects of a foreign state in arms against a government in alliance with our own. It was also held in that case that no right of action could be maintained on such a contract. That case arose out of a proposal for a loan to assist the Greeks in their struggle for liberty against the Turks in 1825. And C. J. Best said, that the same point had been determined by the Lord Chancellor in a case then before him, as to an attempted loan by the Spanish patriots.

This decision, however, seems scarcely to be an authority in support of the position to its full extent in favour of which it is cited. For in both those cases one of the belligerent parties were in the nature, perhaps, of a mere rebel against their government, and to assist them with money or arms would be different to assisting an independent belligerent state. And this consideration might, perhaps, affect one of the belligerent parties now engaged in war in North America, namely, the Confederate party, though the acknowledgment and dealing with them by the British and French Governments, which has already taken place, would preclude or emancipate us, perhaps, from now treating them as mere rebels.

And, independent of this difficulty in the question, it seems doubtful whether the mere obtaining the loan of money in a neutral country, more than the obtaining the loan of or the purchase of anything contraband of war there, is unlawful. For even the sale of arms to a belligerent by a neutral is lawful in his own country or elsewhere, subject to the belligerent right to seize them as contraband. To hold that the sale or loan of money to a neutral is unlawful, would be to hold a doctrine in contradiction to an universal and well-established principle in the law of nations, namely, that belligerents may buy arms even in a neutral state. Mr Phillimore likens it and treats it the same as recruiting troops in a neutral country for one of the belligerents. But this, by the law of nations, is a doubtful point, and, in England, its interdiction rests rather on statute than on general law.

On principle, and international law is peculiarly the domain of intelligible principle, it would certainly seem that the supply of money to one belligerent is an injury to his opponent, since money is the primary instrument of *civilised* warfare. It is difficult to see how a neutral who aids a belligerent with the *sine quâ non* of warfare can remain neutral still. But, on the other hand, it is certain that money is in some sense impartial, and that if it aids one belligerent it will aid the other, supposing the credit of the two to be equal or nearly equal. It is certain, too, that money will always be lent to any belligerent who wishes it and who will probably repay it, by any neutral who happens to have it. The first principle of this part of the law of nations is in opposition to the first principle of the law which regulates the course of the money market. The question does not, therefore, admit of any very sharp decision in the present state of jurisprudence, and will long perhaps remain undetermined, since the mode in which the two most important parties are concerned in it is necessarily so different. Bold men will always lend to foreign belligerents, and strict lawyers will always say that they should not do so.

THE SCIENCE OF THE EXCHANGES. By N. A. NICHOLSON. Trinity College, Cambridge. Effingham Wilson, Royal Exchange.

THE title of this book will not give ordinary readers an accurate idea of its contents. The exchanges here do not mean the foreign exchanges, to which in ordinary parlance and even in grave treatises the phrase is usually restricted, but the common interchange of commodities in the market. Political economy has been called the science of "bargain and sale," and it is in this light that Mr Nicholson regards it. He proposes to show why some part of everything is equivalent in the market to some part of every other thing, how it comes to be equivalent, and how the proportions are settled. He has given us, in a word, a treatise on political economy. We think the title of the work inaccurate, and we much regret that the book is composed in dialogue instead of being a straightforward exposition; but, these defects excepted, it may be recommended as a clear outline of the accepted portions of political economy, which is generally accurate and is always clear.

SPANISH CERTIFICATES. Baily Brothers, Exchange buildings. 1860.

THE Committee of Spanish Certificate-holders lately published their report on the position of this question, a document of especial interest at the present juncture. It will be remembered that the certificates represent the unpaid portion of the accrued

interest which, at the last adjustment of the debt, was arbitrarily confiscated by the Spanish Government. Since then repeated efforts have been made to obtain reparation, but hitherto without success. The claims of the certificate-holders have been fully recognised both by English and Spanish jurists, and appended to the report are two opinions to that effect. There appears reason to believe that a satisfactory settlement of this affair is not far distant.

THE LAW OF BANKRUPTCY. By W. A. HOLDSWORTH, Author of "The Law of Landlord and Tenant," "Wills," &c. Routledge, Warne, and Routledge, Farringdon street, and New York.

THE above is a useful synopsis of the New Bankruptcy Law, a knowledge of which is by the recent changes desirable not only to the trading, but also to the non-commercial public. The work appears to have been prepared with judgment and care.

GENERAL LITERATURE.

LECTURES ON COLONIZATION AND COLONIES, delivered before the University of Oxford, in 1839, 1840, and 1841. By HERMAN MERIVALE, A.M., Professor of Political Economy. New Edition. London: Longmans. 1861.

[FIRST NOTICE.]

THESE very able and elaborate Lectures were composed and originally published twenty years ago, "at a time when public attention had been rather suddenly and strongly directed to the subjects which they embrace." Since then, the state of our Colonial Empire in every part of the globe has undergone many changes, and a large number of the problems which were then anxiously discussed have been solved by the progress of events, frequently in ways which were wholly unforeseen. It might, therefore, be supposed by some that Mr Merivale's lectures, however interesting or useful at the time of their delivery, would be scarcely worth republishing at the present day; but this is far from being the case, owing to a feature in this new edition which gives it a special interest of its own. Mr Merivale, while he has retrenched some details rendered obsolete by the lapse of years, has retained most of his calculations and suggestions, but has accompanied them with very frequent notes and appendices, dated in 1860 and 1861, in which he has been forced to signalise "not a few speculations which have turned out erroneous; to recant not a few opinions which have proved unsustainable; and to confess the disappointment of some cherished fancies." Thus the work affords a comparative view of the current ideas of two different periods, whose very changes themselves form the basis for firmer and wider speculations for the future.

Part I. is devoted to an "Historical Account of the Progress of the Colonies of Modern Europe," and briefly sketches the history of the colonies of Spanish America, of the West Indies, of North America, South Africa, and Australia. These four lectures abound with interesting details, but do not, of course, contain much that relates to present controversies, except the curious account of the early history of Porto Rico in Lecture II., and the admirably written sketch of the British West Indian troubles in Lecture III.

Part II. treats of the "Economical Effects of Colonisation on the Parent State," and commences with a lecture on emigration. Mr Merivale considers that the probable effect of emigration in reducing the number of labourers in the mother country has been greatly exaggerated. "Emigration is no remedy for over-population," he says, "unless it be continually repeated; which, on a really great scale, is scarcely likely to happen in any country."—(P. 144.) Those who urge the contrary "*have assumed the ratio of births to the population, of an age to have children, as something invariable.* The fact is, that if a certain number of marriageable couples were removed in every year, the ratio of births to the remaining population, of an age to have children, would immediately increase."—(P. 162.) He also quotes the statistics of such emigration as had then taken place, to show what an insignificant proportion the diminution bore to the yearly increase of population by births. Referring especially to Ireland, as the most over-populated and unprosperous part of the Kingdom, he gives at some length his reasons for dissenting from Colonel Torrens's proposition for extensive emigration under Government assistance. Nevertheless he regards emigration as capable of effecting many "individual or local" benefits in this direction. It often rescues the emigrant from a state of destitution. "It not unfrequently relieves overburdened parishes and estates in which the consolidation of farms is going on: it may relieve to a still greater extent over-peopled corners of the Empire, such as the Western Islands; it may possibly (I wish this could be stated with more confidence) relieve the working classes in particular trades and places in times of great pressure."—(P. 160.) Thus far the edition of 1842. In a note dated 1861, Mr Merivale says: "The events of 1847 and the following years in Ireland disconcerted far more elaborate calculations and better founded conjectures than can be found in these lectures." The Irish emigration from 1841 to 1851 he estimates at about a million, but the decrease of the population during that period is so far affected by the large ravages made by famine and disease, that it is impossible to draw any exact inferences as to the effect of emigration alone. For the years 1851-60 he also estimates Irish emigration abroad at somewhat above a million, and adds:—

> The effects of this further drain on the progress of population must be matter of conjecture until the next census appears. As to the effects on the social economy of the country, I leave the speculations contained in the text unaltered; but it must be admitted that the theory of Colonel Torrens as to the probable results of a very large removal of the cottier class has been much more nearly justified than I anticipated.—(P. 157.)

The sixth lecture treats of the "Effects of the Exportation of Capital, which takes place in the Progress of Colonising, on the Wealth of the Mother Country," of which subject the author gives a succinct view. He concludes by saying that the question is really of little practical importance: firstly, because, in relation to the enormous expenditure of England in other directions, "the minute fractions of her wealth which are, or can be, devoted to such an object as colonisation, sink into utter insignificance in the sum of her transactions." Secondly, "the capital spent on colonisation by a country exporting manufactures, is not wasted unproductively, or lost to the resources of the parent State. It is spent in founding a fresh market for her goods, and in stimulating a new and more intense demand for them."—(P. 185.)

The seventh and eighth lectures are devoted to "Colonial Trade and the 'Colonial System'," and comprise an elaborate examination of all the various restrictions placed on the mutual intercourse of the colony and the parent State in respect to trade and manufactures. Through all the windings of monopolist theories, Mr Merivale patiently threads his way, unravelling their errors with a clear argumentative power which must have done good service at the time these lectures were delivered. Happily the question is, in England, so nearly obsolete that it is not necessary to recapitulate the discussion of it here. The author adds, in a note, dated 1861, that this so-called "colonial system" "has been abolished piece by piece in this country, and is only partially maintained by foreign countries;" but that, as "the subject, though practically out of date as regards ourselves, is not without its historical and philosophical interest," he has only shortened these two lectures by the omission of some details.

We now come to Part III., in which Mr Merivale enters upon the most important part of his subject, viz., "The Progress of Wealth and Society in Colonies."

The first point which he takes into consideration is "the scarcity of labour in new colonies, and its effects on the progress of wealth." "Land and capital," he observes, "are both useless unless labour can be commanded.....There are two principles constantly at work; the desire of obtaining land, which is hostile to all combination of labour; the natural diminution in the fertility of occupied land, which continually urges its possessors to change it for fresh."—(Pp. 256-7.) The retarding influences of these principles on the development of the colony is evident. What is the best remedy? Here Mr Merivale proceeds to examine the deductions drawn from these facts by the advocates of "systematic colonisation," of whom Mr Gibbon Wakefield is the chief representative. Their principles are reduced by Mr Merivale to the following elementary propositions:—

"1. That it is desirable to provide colonists acquiring land with a greater supply of labourers, to work on their account, than their capital would naturally attract.

"2. That it is desirable to prevent the population of new colonies from spreading over so large and scattered a surface of land as it would be tempted to occupy, were every facility given for the acquisition of land."

These are their practical principles; and another proposition appears to be implied in some of their reasonings; that an ample supply of hired or compulsory labour tends not only to increase the wealth of the community, but also to produce this second object, namely, the concentration of the people.—(Pp. 259-60.)

Upon these propositions Mr Merivale justly remarks that they are by no means equally applicable to all colonies. The colonies of modern times he divides into two very different classes; (1) those which are established in countries possessing no peculiar advantages for the production of valuable articles of export, and (2) those in which the chief industry of the settlers is devoted to the raising of such articles. In the former case, he thinks "it is certain that the average industry of an unassisted colonist on fertile soil, and in a temperate climate, will be sufficiently productive, after a little time, to afford him, not only the necessaries of life, but a certain quantity of surplus to exchange for its comforts." Had the tract been "systematically" colonised, and thus made to yield a far greater surplus produce, such produce would with difficulty find a market, as there would be little demand for it out of the colony. "Still less would the concentration of her inhabitants, produced by any artificial means, be of advantage to such a colony in the earlier stage of her progress," because to prevent the colonist's occupation of the most fertile soil within reach, "is to force him to waste a portion of his precious labour," and "every deduction from the liberty of man as a free agent is, in an economical sense, a diminution of his power." Mr Merivale holds, therefore, that such settlements are best left to the natural energies of the colonists, and that their development, although frequently slow, will probably be steady, and may be great; in proof of which he refers to New England, which "reached, in 200 years from its first settlements, a

density of population equal to that which Old England had attained, six centuries after the Norman conquest."

He then turns to the other class of colonies, "where the chief employment consists in *raising staple articles of produce for foreign markets*."

In such communities as these, it is obvious that the necessity for an ample supply of labourers is of a far more urgent character.....It is this necessity which caused the enslavement of the original inhabitants of Spanish America; which produced negro slavery and the slave trade; which has turned to profit the compulsory toil of convicts; and to satisfy which, without a resort to any of these odious resources, is now the greatest practical problem of colonisation.—(P. 269.)

In drawing attention to this important necessity, Mr Merivale holds that the advocates of "systematic colonisation" have done good service, and rest on very sure ground. But with regard to their supplementary theory, that an ample supply of labour tends to concentration of people, he thinks that "*that* seems still less applicable to colonies producing valuable agricultural commodities, than to the other class which we have just considered." That very ample supply "has, in North America, invariably gone along with the greatest possible dispersion" of population; in proof of which he refers to the relative densities of population in New England and in Virginia, which are as 100 per square mile in the former to 30 in the latter. From this he argues "that an artificial concentration of population, by restraining the abandonment of occupied lands, would seriously check the prosperity of most new colonies," and that even if such concentration were desirable, "the mere ensuring a sufficient supply of labour would not in any degree tend to promote it, but rather the contrary."—(P. 274.)

We must defer to another article our consideration of the remainder of these valuable lectures.

ON FOOD. Being Lectures delivered at the South Kensington Museum by E. LANKESTER, M.D., F.R.S. Robert Hardwicke, 192 Piccadilly.

THANKS to the progress of chemical science, we have of late years had considerable light thrown upon the mysteries of our animal economy. The material conditions of our being, and many of the secret processes by which life is carried on, are in some measure revealed to us. We can now, if we please, examine into the workings of our bodily machines as we would into any other wonderful bit of mechanism: combustion, combination, assimilation, and such like terms by which these workings are described are familiar and intelligible. We have knowledge, and weak digestions. Our more ignorant ancestors ate their beef and mutton in the simple faith that they would be fed thereby; we can give a reason for our faith—we can analyse our food, divide it into its constituent parts, and explain how each has its own peculiar effect upon the system, but we are dyspeptic. If, indeed, ignorance could bring again the days of good Queen Bess, when beefsteaks and ale were not too heavy diet for the morning meal of royal and courtly dames, we might be inclined to welcome it as bliss; but, since "Time will" not "run back and fetch the age of gold," we are perforce grateful to such men as Dr Lankester, learned in chemical and medical science, who will lend us safe guidance in our perilous course amid gastronomical dainties; and tell us what to eat or avoid, and why we should eat or avoid it.

Many have spoken on this subject before Dr Lankester; but none, we think, "so wisely and so well" as he. In reading his book we look down as from a height upon the whole range of animal and vegetable food: we see in what the nourishing properties of different kinds consist, and what is their specific action upon the human body. As Superintendent of the curious and instructive collection of food at the Kensington Museum, he learnt how ignorant most people are of what it really is they eat and drink every day of their lives, and proposed, if the Committee of Council on Education would permit, to deliver an explanatory course of lectures at the Museum. These were well attended, but ceased at the conclusion of the first six; the remaining six, in the volume now in our hands, were written out from prepared notes, but never delivered.

The book, then, naturally divides itself into two portions. The first, containing the lectures properly so called, treats of the actual and essential sustainers of life, classified under three heads:—Mineral; Carbonaceous, Respiratory, or Heat-Giving; and Nitrogenous, Nutritive, or Flesh-forming Foods. Stimulants, neurotics, and narcotics are reserved for the second series, under the name of Medicinal or Auxiliary Food. Here we find those whose action is entirely, or chiefly, on the nervous system—alcohols, tea, coffee, spices, tobacco. Dr Lankester discusses them all with the ease that comes of a thorough knowledge, and with, in general, an avoidance of too scientific a phraseology. Sometimes, indeed, in suiting himself to the more learned portion of his hearers (or rather readers, for it is from the latter half of his book that our example is taken), he forgets the puzzled feelings of the uninitiated, as where he tells us that "Weak wines cannot be kept long in the cask without a danger of the oxygen of the air converting their hydrated oxide of ethyle (alcohol) into the hydrated tri-oxide of acetyle (vinegar)." If it were not for these interpolated words, we should hardly recognise the simple process of vinegar-making under this elaborate explanation.

Instances of this kind, however, are of rare occurrence. Dr Lankester's book is intelligible enough to even the unlearned in science, and is full of curious and novel information. We have mentioned its main divisions: we will now endeavour to fill in the bare outline with such particulars as strike us as most illustrative of its tenour, and general tone and style.

Since, according to our author's calculation, "a human body weighing 154 lbs contains 111 lbs of water," water is clearly entitled to the first place in any consideration of life-supporting substances. Over this first chapter, however, we shall pass briefly, as it contains comparatively little that we have not heard of before, in perhaps a less complete and compressed form. Water has been so much debated over and analysed of late, that we are all more or less familiar with the disgusting animalcules that disport themselves in our cisterns, and even in our wells. We were aware, too, that deep water wells—viz., Artesian—alone are free from some kind of animal or vegetable impurity. In this case, happily perhaps for us, the old proverb, "What the eye does not see the heart does not grieve for," comes into force. Yet it is disturbing to be told that the clearer, cooler, and more sparkling our waters are, the more they are open to grave suspicion. We do not wish to swell the ranks of those who admire the water of the churchyard pump, and we fear that Dr Lankester may be right in the genesis he gives of London pump water. The mode in which such waters disagree with the stomach from the fermentation they produce, is well illustrated by an incident that occurred in the baking of bread by Dr Dauglish's process. "This bread is made without fermentation, and for the purpose of preventing some of the bad effects of fermentation on bread; but during last summer it was found that this bread underwent a change similar to that of fermented bread. Dr Dauglish suspected it might be owing to the organic matter from the Thames water supplied to the bakery, and had his suspicions confirmed by the fact, that when the water was boiled, and filtered before it was used for making the bread, no unusual change was observed."

On the importance of a due supply of mineral constituents in the food we eat, Dr Lankester is emphatic:—"Without these, babies get rickets, young ladies acquire crooked spines, fathers get gouty, and mothers have palpitations." For all these evils the cook is to blame in throwing away the liquor in which meat and vegetables have been boiled, and ourselves also in taking only refined sugar and the whitest of flour, heedless of the phosphates and sulphates, the carbonates and the chlorides, we ignorantly reject. We are quite willing to allow the importance of salts of potash, and have no objection to soups, but we must beg Dr Lankester to excuse us the use of water in which cabbage at least has been boiled, however full it may be of most desirable and health-bringing salts. Of the potato in particular he says, in speaking of the importance of the salts of potash:—

Now I do not know whether any of you have speculated upon the reason why Europe should have seized with such avidity upon that plant which is foreign to its shores; but there are philosophical writers who trace the cessation of the plague and other epidemic visitations to the use of the potato. When we come to compare the potato with wheat and the cereal grains, we find it contains not so much starch as rice, or wheat, or barley, and very little nutritious matter. It seems, then, looking at it from this point of view, as if it was a matter of very little importance whether we eat potatoes or not, as long as we get flesh-forming and heat-giving substances from other sources; but here are these ashes, one pound in a hundred pounds, and what are they principally? Why, salts of potash. It is not much to be sure, about a drachm in the pound, but that quantity seems in some measure explanatory of its influence on the health of the populations of Europe.

Have any of our readers heard before of this "very conclusive proof that iron really exists in the human body"? "The French," says the author, "after burning their friends, take the ashes and extract the iron, and convert it into a mourning ring, which they wear in memory of their dead friends."

Besides the needful materials for supplying the waste of the muscular and nervous system, the body requires a certain equable amount of heat to be maintained at all temperatures of the atmosphere. This heat it gains from the fat, sugar, and starch contained in the food it consumes. Of these fat is more than doubly as effective as starch or sugar; while starch, though equally heat-giving with sugar, is not so ready in its action, since it requires to be converted, by an elaborate process within the body, into sugar before it can be consumed. It is the carbon in all these substances that gives them their heating power. "Now," says Dr Lankester, if we calculate the quantity of carbon and the quantity of water contained in starch, we shall find that every 162 lbs of starch contain 72 lbs of charcoal. Here, then, is the source of its heating power. When we eat starch in sago pudding, arrowroot, or whatever form we are taking it, we take just so much fuel; and just as we heap charcoal on a fire, so we add starch to our body to keep up our animal fire, and carbonic-acid gas is the result. However, you must not imagine that we could live on charcoal, or that charcoal is good for dinner or for breakfast. The fact is, charcoal in its pure form cannot be digested, and before you can consume it, you must digest it." "The fact is that starch, before it is used in the system, is converted into sugar, and unless the starch of our bread and our puddings is converted into sugar, it is not converted into blood at all."

We now come to the most important division of Dr Lankester's

work, the nutritive or flesh-forming substances. These in the most important forms they assume in our food, are called albumen, fibrine, and caseine. "These substances are found in both the animal and vegetable kingdoms." Dr Lankester estimates that each person loses, in necessary waste, a fortieth part of his weight daily, and that in forty days the whole body is renewed. This waste is supplied by the albumen, fibrine, and caseine taken in with our daily food, as the animal heat is kept up by starch, sugar, and fat. It is curious to glance at the table of comparative constituents of food, and observe the amount of the nutritious or heating properties of each. Cheese contains much more of both than cooked meat; yet, owing to its indigestibility, it is not, in general, so nourishing. Dried peas are in a similar position: they actually contain more flesh-forming and more than four times as much heat-giving power as cooked meat; yet he would be a deluded man who relied on the nourishing qualities of Revalenta Arabica. Sugar contains no mineral and no flesh-forming substances; it is purely carbonaceous. Cocoa is highly fattening, heating, and in some degree nutritious: it is half as nutritious and six times as heat-giving as cooked meat. Barleymeal is more nourishing than wheatflour, and green peas than milk. But we must leave our readers to study this table for themselves, and pass on to a hasty survey of the second division, or auxiliary foods.

We will begin with the proviso that Dr Lankester is no advocate of teetotalism any more than of vegetarianism. He acknowledges to the full the beneficial uses of stimulants; his warnings, therefore, of their pernicious abuses are entitled to the more attention. Let us glance at some of his conclusions with respect to alcoholic liquors. "As far as its physical action is concerned," says he, "I do not know that we can say anything good of alcohol at all; it may seriously interfere with the functions of absorption, and injure the coats of the stomach, and when taken injudiciously, a very long way short of producing any effect on the nervous system, may yet prevent the proper nutrition of the system, and insidiously lay the foundations of incurable disease. The practical admonition which this part of our subject conveys is this:—Avoid taking wines, spirits, and beers on an empty stomach. In cases where they must be taken, let them be as dilute as is compatible with the object sought to be obtained by taking them." One marked effect of alcohol is its repression of change in the tissues of the body. Under its constant use the blood retains much that would otherwise pass away. This, where there exists too rapid a waste, is a beneficial action, as in some weakening diseases, or in old age; but it is often injurious, and the cause of gout, rheumatism, and "other disorders which depend upon the retention in the blood of certain compounds which ought not to be there." One of the consequences of this retention of substances otherwise cast out from the blood, would seem to be the increase of fat arising from the practice of taking small repeated doses of alcohol. This quality is by no means an unmitigated benefit, for, if it offers a valuable assistance in wasting illnesses, it also "may assist in that fatty degeneration of the tissues which is one of the most frequent causes of the predisposition to fatal diseases." Of course the most peculiar and marked effects of alcohol are those on the nervous system. Here we do not purpose following Dr Lankester. He fully explains its action, and leaves it to his hearers to draw their own conclusions as to its use or disuse in their particular cases. As a further guide, he appends a table of the relative strength of various wines and beers. Brown sherry stands at the head for strength—out of 20 oz, 4½ oz are pure alcohol. Pale sherry and port are equal, 4 oz; strong ale contains 2 oz and pale ale 2½ oz to the 20 oz. Common table beer has only about ½ oz to the pint. This is the only fermented beverage Dr Lankester can conscientiously recommend for daily use. Porter—aye, even stout—we are surprised to find has only 1½ oz, against the 2½ oz of pale ale. But we must linger no longer over alcohol, but hasten to the cup "that cheers but not inebriates."

Of all our author's lectures we think those on tea and coffee are the most interesting. Spices and condiments have their own attractions, but our space is limited and we pass them by. Our nerves having been excited with alcohol, we seek its "natural antagonist"—tea. "Alcohol, on being brought in contact with a nerve, excites it to action; tea, on being brought into contact with the same nerve, calms and subdues its activity." The theine to which this action on the nerves is due, if given in sufficient doses to animals kills them. "I have given it to frogs," says Dr Lankester, "and found that half a grain is sufficient to kill a full-grown frog." It acts like hemlock or any other sedative poison, but taken moderately it exercises "a calmative influence," "produces a sense of repose which, without being depressing in the slightest degree, prevents a morbid activity of the nervous system. I cannot but think that the craving for tea and coffee which is frequently exhibited by strong men, depends upon this influence of the theine on the nervous system." We have no doubt it does, but that which diminishes the activity of any part of the bodily machine may also tend to weaken that part, and the nervous influence even of tea is not always beneficial. Besides theine, tea contains another important ingredient, tannic acid, or tannin. The effects of this substance upon animal fibre is well known. Its strong astringent qualities, and its power of hardening albumen, appear to be the cause of that unwholesomeness of meat teas, which many people perceive, without being able to explain.

Now, as tannic acid is soluble in hot water, tea must contain a very considerable quantity, at least two or three grains of this substance in every cup of the first brewing. It cannot be supposed but that the effect of this agent is very considerable. The two most remarkable points of its action are its effects upon the food in the stomach, and its effects as an astringent. I have so often seen dyspepsia removed by persons giving up the practice of taking tea at breakfast, that I have no doubt that the tannic acid of the tea renders the food taken with it more difficult of digestion. Of course, this would only occur in the case of persons in whom the digestive function was already impaired. Such persons may frequently take tea with advantage on an empty stomach.

The caffeine of coffee does not perceptibly differ from the theine of tea, or the theobromine of cocoa. The quantity contained in the pound is less than in tea, and the caffeic acid is in such small quantities that it needs no consideration. It is in its aromatic oil that coffee differs chiefly from tea. It would not seem that coffee has either the astringent or antidigestive qualities of tea. Coffee leaves, it is stated, contain more theine than either coffee or tea. "The Sumatrans," says Dr Lankester, "prefer the tea from coffee leaves to the beverage made from coffee seeds." "Mr Ward himself employed it habitually, and found in it all the comfort and advantage of tea." It can be prepared and packed for the European market at the rate of 2d a pound. The coffee plant will grow, although it will not ripen its seeds, over a wide extent of country. The suggestion of so cheap and apparently successful a substitute for tea, is worth consideration.

We have no space left for a proper reference to Dr Lankester's concluding lecture on narcotics. We must content ourselves with a few words on tobacco, with extracting his analysis of the ingredients of tobacco smoke, and his final summing up against the prisoner. The verdict that would naturally follow might be put thus:—"Not guilty, but recommended to the hangman." Tobacco smoke contains "nicotine, empyreumatic oil, butyric acid, carbonic acid, ammonia, paraffine, empyreumatic resin, acetic acid, carburetted hydrogen, water." After such a list we are almost surprised when Dr Lankester continues:—

But with regard to the effects of the moderate use of tobacco, I am sorry to say that I have nothing decidedly to tell you against it. The opinions of medical men are really not worth quoting unless backed by something like evidence.....If you will not, therefore, give up this habit of smoking from motives of economy, from a sense of its unseemliness, from its making your breath smell and your clothes filthy, from its polluting your hands and your house, and driving women and men from you who do not smoke, I dare not, as a physiologist or a statist, tell you that there exists any proof of its injurious influence when used in moderation. I know how difficult it is to define that word, moderation; and yet in my heart I believe that every one of you has an internal monitor that will guide you to the true explanation of it in your own case. The first symptoms of giddiness, of sickness, of palpitations, of weariness, of indolence, of uneasiness whilst smoking, should induce you to lay it aside. These are physiological indications of its disagreement, which, if you neglect, you may find increase upon you, and sensibly embarrass your health.

With this moderate, yet affecting "counterblaste to tobacco," we will end our imperfect view of these interesting and instructive lectures.

The Farmers' Almanac for 1862. Ridgway.
Morton's New Farmers' Almanack. 1862. Blackie and Son.
Warning us of the speedy end of 1861 and of the approach of 1862, we have the two standard and very useful Farmers' Almanacks above mentioned. The "Farmers' Almanac," by Johnson and Shaw, has been published for 21 years, and it was, we believe, the first work of the kind which combined the usual almanack with a farmer's calendar in which the monthly operations of the farm are dealt with, and suggestions are made in accordance with the most approved systems of modern husbandry.

"Morton's New Farmers' Almanack," by Mr John C. Morton, though of shorter standing, is a worthy competitor of the elder publication. In addition to his monthly memoranda of farm business, Mr Morton gives a monthly note of the agricultural events of 1861, thereby affording a valuable comparison, which may serve to remind the farmer of his mistakes and shortcomings of the past year, and help to guard him against similar errors in the year now coming. To the young farmer, the numerous practical suggestions both of these works give from month to month are invaluable, while the most experienced agriculturist will often find the benefit of the notes and memoranda they contain. Every farmer should buy the one or the other of these almanacks.

Lists may be had on application on and after the 20th inst., and the Coupons must be left three clear days for examination.
15 Bishopsgate street within, London, Dec. 14, 1861.

EXCELLENT INVESTMENT.—LIMITED to £4 PER SHARE.—Send for prospectus to J. S. PHILLIPS, C.E., 7 George yard, Lombard street, London.

WANTED, BY A YOUNG MAN thoroughly conversant with the French language, and just returned from the Continent, a situation as CLERK in a Mercantile office, or to act as Paris Agent for an English House. Good references.—Address J. W., 19 St Mary-le Strand place, London.

WANTED, THE ECONOMIST, during the First Week of Publication.—Address, H. E. W., 12 Kensington park terrace, W.

OFFICES NEAR MINCING LANE.—An excellent Suite of Offices, comprising Principals' and Clerks' Rooms, with plate-glass windows, and exceedingly well fitted with desks and every requirement. Rent £126. Apply to Messrs Wilson and Scoble, Auctioneers, 12 Leadenhall street.

PARTNERSHIP.—WANTED, a SLEEPING PARTNER, with £700 to £1,000, to assist in carrying on an Old-established Business, which would produce a handsome profit. Every satisfaction will be given as to the genuineness of the business.—Address T. S., Mr Riley's, printer, 1 Hammond court, Mincing lane, E.C.

LIVERPOOL AGENCY.—A Gentleman, of twenty years' experience of Liverpool business, twelve of which in a prominent position in two of the leading firms there, would be glad to ACT for a LONDON or MANCHESTER FIRM on moderate terms.—Address, "R. 48," Liverpool.

TO MERCHANTS, &c.—A Gentleman, age about 30, of small independent fortune, being lately married, wishes to enter into BUSINESS. Has served in the army, and been in various parts of the world; speaks French, and has lived a good deal on the Continent. Would be useful as Correspondent abroad to a large house or otherwise employed in a situation of trust. The highest references can be given. Salary to increase; to commence at not less than £120 per annum.—Address C. F., post office, Preston street, Brighton.

GEORGE SMITH, Wine Merchant, 86 Great Tower street, 9 and 10 Great Tower street, and 1 St Dunstan's hill, E.C., and 17 and 18 Park row, Greenwich, S.E. Established 1785. A large and valuable stock of old bottled Ports, of various shippers and vintages, accumulated during the last forty years, including a bin fourteen years in bottle, of eight hundred and fifty dozen, bottled by the late Mr Fenwick, of the firm of Messrs Ruck, Fenwick, and Ruck, known to the trade as his celebrated "Six Vintage" Wine, dry, full of "beeswing," of immense flavour, delicacy, and bouquet. Samples forwarded on payment.

LAST MONDAY POPULAR CONCERT, before Christmas at St James's hall.—On Monday Evening next, Dec. 16, the programme will include Beethoven's celebrated Septet in E flat (by desire). For full particulars see programme. Pianoforte, Miss Arabella Goddard; Violin, M. Vieuxtemps (his last appearance); Vocalists, Mlle Florence Lancia, and Mr Winn. Conductor, Mr Benedict. Sofa stalls, 5s; balcony, 3s; admission, 1s. Tickets at Chappell's, 50 New Bond street; Cramer's and Hammond's, Regent street; Keith, Prowse, and Co.'s, 48 Cheapside; and at Austin's ticket office, 28 Piccadilly.

MR LEWIS AND SON, 113 Strand.—The Royal Lewisian Systems of Writing, Arithmetic, Bookkeeping, and Shorthand, as taught for upwards of fifty years by Mr Lewis, the real inventor and first teacher of these world-renowned and only infallible systems, insures perfection in any of the above branches after a few easy and interesting lessons. Persons unable to take the lessons may obtain the inventor's works for self-instruction at his only institution, 113 Strand.

KENTISH TOWN COLLEGIATE SCHOOL, N.W.—Head Master, DR SHERRIN, F.R.G.S.—The above school offers high advantages to parents seeking for their sons sound practical tuition, combined with domestic comfort, and careful moral and religious training. Premises very commodious. Situation most healthy. Masters selected with great care. For prospectus and references, which are unexceptionable apply to Head Master, Leighton House, Kentish town.

UNITED KINGDOM LIFE ASSURANCE COMPANY,

No. 8 WATERLOO PLACE, PALL MALL, LONDON, S. W.

DIRECTORS.

THE HON. FRANCIS SCOTT, CHAIRMAN.

CHARLES BERWICK CURTIS, ESQ., DEPUTY-CHAIRMAN.

Edward Lennox Boyd, Esq. (Resident.)	A. H. Macdougall, Esq.
William Fairlie, Esq.	F. C. Maitland, Esq.
D. Q. Henriques, Esq.	William Railton, Esq.
J. G. Henriques, Esq.	Thos. Thorby, Esq., F.S.A.
Marcus H. Johnson, Esq.	Henry Toogood, Esq.

SUPERIOR ACCOMMODATION AFFORDED BY THIS COMPANY.

This Company offers the security of a large paid-up Capital held in Shares by a numerous and wealthy Proprietary, thus protecting the Assured from the risk attending Mutual Offices.

There have been three Divisions of Profits, the Bonuses averaging nearly 2 per cent. per annum on the sums assured from the commencement of the Company.

Sum Insured.	Bonuses added.		Payable at Death.	
£	£	s	£	s
5,000	1,987	10	6,987	10
1,000	397	10	1,397	10
100	39	15	139	15

To assure £100 payable at death, a person aged 21 pays £2 2s 4d per annum; but as the profits have averaged nearly 2 per cent. per annum, the additions, in many cases, have been almost as much as the premiums paid.

Loans granted on approved real or personal security.

Invalid Lives.—Parties not in a sound state of health, may be insured at equitable rates.

No charge for Volunteer Military Corps while serving in the United Kingdom.

The Funds or Property of the Company as at 1st January, 1861, amounted to £730,665 7s 10d, invested in Government and other approved securities.

Prospectuses and every information afforded on application to E. L. BOYD, Resident Director.

THE LIVERPOOL AND LONDON

FIRE and LIFE INSURANCE COMPANY.

The Annual Fire Premiums..... £315,000

Mercantile Risks in *London* and elsewhere, at home and abroad, freely insured by Floating Policies and otherwise.—20 and 21 Poultry.

Empowered by Act of Parliament. 3 Wm. IV.

THE ECONOMIC LIFE

ASSURANCE SOCIETY, 6 New Bridge street, Blackfriars, London.

Pascoe Charles Glyn, Esq.	
Sir Alex. Duff Gordon, Bart.	

ACTUARY.—James John Downes, Esq., F.R.A.S.

SECRETARY.—Alexander Macdonald, Esq.

The Society offers the following Advantages:—

The lowest rates of Premium on the Mutual System.

The whole of the Profits divided every Fifth Year.

Reversionary Bonuses have been added to Policies to the extent of..... £ 1,365,000

The last Bonus, declared in 1859, which averaged £65 per cent. on the Premiums paid, amounted to..... 475,000

8,471 Policies are now in force, yielding an annual income of £189,000, assuring the sum of £6,697,572, which, with £610,827 Bonus additions, makes a total Liability of £7,308,399.

The Invested Capital is £1,911,505, producing upwards of £76,000, thus making the present Annual Income of the Society £263,000.

Service in the Militia, Yeomanry, or Volunteer Corps will not affect the validity of Policies.

Prospectuses and further particulars may be obtained on application to

ALEXANDER MACDONALD, Secretary.

ESTABLISHED 1837.

BRITANNIA LIFE ASSURANCE

COMPANY.

BANKERS—The London and County Bank.

SOLICITORS—Messrs Marten, Thomas, and Hollams, Mincing lane.

The Directors are prepared to accept proposals for Fire Insurance on all descriptions of property.

Without being fettered by any combination with other offices, this Company's tariff for MERCANTILE BUSINESS has been adjusted on the principle of classification—charging a premium proportionate to the risk.

A commission will be allowed to solicitors and agents.

Forms of proposal and all information can be obtained at the temporary offices of the Company, 34 Gracechurch street, E.C.

IMPERIAL LIFE INSURANCE

COMPANY, No. 1 Old Broad street, London, E.C. Instituted 1820.

DIRECTORS—1861.

Thomas Newman Hunt, Esq., Chairman.

James Gordon Murdoch, Esq., Deputy-Chairman

Thos. G. Barclay, Esq.	George Field, Esq.
James C. C. Bell, Esq.	George Hibbert, Esq.
Charles Cave, Esq.	Samuel Hibbert, Esq.
Ed. H. Chapman, Esq.	Frederick Pattison, Esq.
Geo. W. Cottam, Esq.	W. R. Robinson, Esq.
Geo. Henry Cutler, Esq.	M. T. Smith, Esq., M.P.
Henry Davidson, Esq.	Newman Smith, Esq.

Profits.—Four-fifths, or 80 per cent. of the profits are assigned to policies every fifth year. The assured are entitled to participate after payment of one premium.

Bonus.—The decennial additions made to policies issued before the 4th of January, 1842, vary from £78 to £16 15s per cent. on the sums insured, according to their respective dates.

The quinquennial additions made to policies issued after the 4th of January, 1842, vary in like manner from £28 17s to £1 5s per cent. on the sums insured.

Purchase of Policies.—A liberal allowance is made on the surrender of a policy, either by a cash payment or the issue of a policy free of premium.

Loans.—The Directors will lend sums of £50 and upwards on the security of policies effected with this Company for the whole term of life, when they have acquired an adequate value.

Insurances without participation in profits may be effected at reduced rates.

Prospectuses and further information may be had at the chief office as above; at the branch office, 16 Pall Mall; or of the agents in town and country.

SAMUEL INGALL, Actuary.

SEVENTH DIVISION OF PROFITS.

IMPERIAL LIFE ASSURANCE

COMPANY, No. 1 Old Broad street, London, E.C. Instituted 1820.

Policies effected during the year 1861 will participate in the profits to be declared in the year 1866, equally with policies of the longest duration, in proportion to the amounts insured.

Prospectuses and further information may be had at the chief office, as above; at the branch office, 16 Pall Mall, S.W.; or of the agents in town and country.

SAMUEL INGALL, Actuary.

NORWICH UNION FIRE

INSURANCE SOCIETY.

NOTICE.—CHRISTMAS RENEWALS.

Losses by fire occurring during the fifteen days of grace are made good to the assured.

The business of the Company exceeds £68,000,000.

The duty paid to Government for the year 1860 was £31,332 9s 9d, and the amount insured on farming stock £9,988,368.

A bonus of three-fifths of the profits periodically made to parties insuring, who have thus from time to time received sums amounting in the aggregate to £400,000.

A further sum is applicable for a bonus upon policies renewed in 1861.

The rates of premium are in no case higher than those charged by the other principal offices making no returns to their insurers.

For prospectuses apply at the Society's offices, Surrey street, Norwich, and 6 Crescent, New Bridge street, Blackfriars, E.C.

LONDON LIFE ASSOCIATION,

81 King William street, E.C.—Instituted 1806.

PRESIDENT—Charles Franks, Esq.

VICE-PRESIDENT—John Benjamin Heath, Esq

TRUSTEES.

Francis H. Mitchell, Esq.	Robert Hanbury, Esq.
Alfred Head, Esq.	Bonamy Dobree, Esq.

The London Life Association was established more than 50 years ago on the principle of mutual assurance, the whole of the benefits being shared by the members assured. The surplus is ascertained each year, and appropriated solely to a reduction of the premiums after seven yearly payments have been made.

If the present rate of reduction be maintained, persons now effecting assurances will be entitled, after seven years, to a reduction of 73½ per cent., whereby each £10 of annual premium will be reduced to £2 13s.

This Society has paid in claims more than £4,150,000.

And has policies now in force amounting to £6,450,000.

Its accumulated fund exceeds £2,750,000.

And its gross income is upwards of £340,000.

Assurances may be effected up to £10,000 on the same life.

The Society has no agents, and allows no commission, nevertheless the new assurances effected in the last financial year amounted to £287,240, and the new annual premiums to £10,567.

EDWARD DOCKER, Sec.

THE SCOTTISH WIDOWS' FUND

LIFE ASSURANCE SOCIETY,

HEAD OFFICE—9 St Andrew square, Edinburgh,

Is now in annual revenue and extent of business the largest Mutual Life Office in the world.

I. BONUS SYSTEM.

The Last Bonus for the seven years ending December, 1859, yielded additions on the sum assured of from £1 12s 6d on the most recent policies, up to £3 6s per cent. per annum on the oldest policies, which was equal, on an average, to from £50 per cent. to £107 per cent. of the seven premiums paid, and was one of the largest bonuses ever declared by any Insurance Company.

II. CASH VALUE OF POLICIES PAYABLE ON DEMAND.

Cash Value is allowed at any time from the issue of a policy on a strictly equitable scale, by which neither retiring nor remaining members are benefited at the expense of the other.

III. FUNDS AND REVENUE.

Invested Funds, £3,700,000; Annual Revenue, £430,000.

LOCAL AGENTS.

Major R. S. Ridge, 49 Pall Mall.

Benton Seeley, Bookseller, Islington green.

Robertson and White, Accountants, 4 Princes street, City.

SPECIAL NOTICE.

Proposals lodged at the Head Office, or with any of the Agents, before 31st December, will secure participation in the above advantages, and also One Bonus more than proposals of later date.

HUGH McKEAN, Central Agent.

London, 4 Royal Exchange buildings, Cornhill, November, 1861.

The Political Economist.

THE UNWILLINGNESS OF REFLECTING MEN TO ADMIT THE PROBABILITY OF AN AMERICAN WAR.

It cannot be denied that the mercantile classes and the more reflecting and sensible part of the English people at large are very loath to credit the imminent danger of an American war. The utter absurdity of supposing that a nation so hard pushed as the United States can desire to offend, or be unwilling to propitiate, a new combatant so powerful as Great Britain, bewilders the imagination and staggers the judgment of reflecting Englishmen engaged in common avocations. On the other hand, official persons, especially those most closely engaged in warlike preparations, undoubtedly believe an immediate war to be a most probable calamity and peace to be an improbable blessing. Which of these opposed opinions rests upon the better grounds?

Unquestionably our men of business are right in thinking that it would be inexpedient, absurd, and almost mad in the Federal States to force a war upon us now. They are engaged in a difficult civil struggle which they commenced with unnecessary arrogance, which they continue with revolting virulence, in which they have had no conspicuous success, in which they have incurred disgraceful disasters. We were told by Mr Clay and by other Northeners, 'Conquer the South? *Of course* we can. We can march 'two columns through their country, overcoming all we 'meet, and subjugating as we go.' The result has been entirely different. As yet there has been more fear that the Southern army may occupy Washington than well-grounded hope of a permanent subjugation of the Gulf States. History, indeed, does not record a more conspicuous *break down* than we see in the military system, in the administrative system, in the whole efficiency of the United States. Anything wilder than a war with a great European nation under such circumstances it is impossible for a reasoning being to imagine. It must ensure the permanent independence of the South:—that probably is not so much, for it is sure already; but it must entail the loss of the vast *debateable land* upon which the present conflict has in the main been carried on. It must secure a frontier line drawn not as they would have it, but as the South have dreamed of it.

It seems absurd to think that a nation so placed would incur such risks as these, and an ordinary nation would never dream of it. But America is a very extraordinary nation; and the time is a very extraordinary time. *Nothing is impossible to a democracy in revolution.* The President is unequal to the situation in which he is placed. He has received the training of a rural attorney, and a fortuitous concurrence of electioneering elements have placed him at the head of a nation. His Ministers are divided; his Generals are divided. The policy of the Government even on the vital question of Slavery is at variance with itself; it is one thing in one place, and altogether different in another place. Even the most sanguine Americans admit that there is *no head* at Washington.

How much can we then clearly discern through this misty turbulence? We can see many elements of danger, and but few elements of hope. We see that the two principal forces at present in American politics—the mob and the politicians now in power—are very likely to be inclined to a war with this country. The vast mass of Americans think they can inflict vital injury on this country. Even travellers here, acquainted with the relative resources of the two nations, still boast of what they could do, and of how little they have to fear. They fancy that they could create a vast though miscellaneous fleet *impromptu*; they think that they could send forth privateers infinite in number and invincible in excellence. They dream of acquiring Canada. We know how false these illusions are, but the decision is to be determined by their opinions and notions, and not by ours.

The leading politicians of the Republican party, Mr Seward and his associates, have a very considerable temptation to commence a war with Great Britain. They have promised the subjugation of the South, and it is as evident as the existence of America that the system they have created, and the measures they have authorised, will not subjugate the South. They are in the luckless position of prophets who desire an excuse for the falsification of their prophecy. A war with England is the best possible excuse which they could have or hope to have. If a rupture should intervene, they could say and would say, 'We should 'have conquered the rebel States; but England, which in former 'times wished to tyrannise over us, now wishes to destroy 'the Union which was formed in opposition to her, by which 'she has been thwarted—which she feels a shame and an 'obstacle to her glory.' All this would be folly, for England has no such thoughts, but it would be adequate to its purpose. Mr Seward would *creep out.* He would evade the destruction which awaits false prophets by throwing the blame upon the universal culprit—upon the ever-sufficient scapegoat.—upon England. The selfish interest of the present Foreigh Minister—the ablest, most potent, and most unscrupulous politician in the existing Government—the most influential of the public men belonging to the party of which Mr Lincoln is the nominal representative and the *roi fainéant*,—is as favourable to war as the bitter passion of the New York mob.

Nor is the problem which Lord Russell's despatch will present to Mr Seward one of which a pacific solution can be easy. The American Government have not formally accepted the act of Captain Wilkes, but they have not repudiated it, and their organs have unanimously accepted and applauded it. If they wished for peace, it would have been more dignified to give up the Commissioners before they were asked than to wait till afterwards. No question has been raised even as to the possibility of submitting them to an adjudica-

tion—to the decision of a Court of Admiralty. The violent act of a naval officer has been accepted as adequate to determine the *status* of two persons under British protection.

England cannot so far humiliate herself, and will not do so. If *bonâ fide* proposals of sincere reconciliation should emanate from a Government in which we had confidence, we might think it right to pause and hesitate. But for a long time past Mr Seward and his coadjutors have uniformly, at least in the opinion of those best qualified to judge, acted as if they desired a war with England, and it is not possible to suppose, *if that be so*, that they will forego the present opportunity.

The scene is doubtless a shifting one. Congress is meeting, and may have an influence for good or for evil. An army lies near Washington whose dispositions and whose General may have to be counted with. The President, who is honest though weak, may lapse into right feeling. But we are not prophets to decipher the unseen and all-important future; we can only count up the probabilities of the hour. As far as these go, the present aspect of American affairs is dark and lowering.

CANADIAN SECURITIES AT THE PRESENT CRISIS.

From very natural circumstances the price of Canadian securities has fluctuated extremely since we received the news of the San Jacinto outrage. It is certain as well as obvious that the vicinity of a country to a possible invader may derange its industry, and must be prejudicial to its credit. But is there any reason to suppose that recent events, taking the most unfavourable view of them, even on the assumption of an American war, would affect the permanent value of the securities of the Canadian Government?

It is altogether certain that the province of Canada will be not only loyal, but enthusiastically loyal, to this country. The invading Federalists, if there should be an invasion, will not have a population to liberate, but a nation to attack. Even the French peasantry, who once were disaffected to us, have not the slightest wish to be annexed to another Anglo-Saxon nation in preference to us, and will fight on our side. Canada will resist on our behalf as much as Middlesex or Devonshire.

Secondly. Without presuming to give an opinion on military details, it is plainly impossible that against the will of the population the United States could subjugate or hold Canada:—its extent is so great, and its population so scattered, that a hostile army could not hope to retain it in subjection. If dispersed, it would be cut up in detail; if concentrated, it would hold only the ground upon which it encamped.

Thirdly. The expense of the present struggle will have mainly, though of course not entirely, to be borne by the Imperial Government. Mr Gladstone, in his evidence before the Committee on Colonial Expenditure, laid this down distinctly so lately as last June. "I have not," he said, "the "least doubt that if Canada were involved in the conse- "quences of a war between us and the United States, we "should have to bear a large portion of the cost." The holders of the securities of the Canadian Government need not, therefore, fear that the present quarrel will involve that Government in an indefinite outlay for military purposes, if, as is probable, Mr Gladstone is to decide the matter. Nor need they fear that the nation will support the Chancellor of the Exchequer. The present is evidently an Imperial quarrel. It arises from no fault of Canada, and it is not right that Canada should especially suffer from its accidental vicinity to the nation which may chance to be our enemy. Very many persons (Mr Gladstone to a very considerable extent for one) are indeed of opinion that it would be desirable in future to compel our colonies to trust mainly, if not exclusively, to their own military resources,—to give notice to them that we should not protect them, and that they must protect themselves. But, whatever may be the expediency of giving such a notice hereafter, and whatever the effect of it may be when given, it is clear that until it is given we must protect the colony. Mr Lowe, and other persons well qualified to judge, are of opinion that we are now injuring our colonies by preventing the development of their natural powers of self-defence. But even on that very account, so long as we prevent them from defending themselves as they would wish, we must take the cost of defending them in the mode which we would choose.

The recent fluctuation in Canadian bonds is no more, however, than the holders of them must be prepared for. The market for such securities is very limited. At every crisis it is certain that there will be a few panic-stricken sellers; and a very few such sellers will for the moment depress the price of an article of which there are always few buyers, and which hardly any one likes to purchase just when a temporary outcry is at its loudest. Such rapid fluctuations in value are a part of the defects which raised the rate upon Canadian bonds to 6 per cent. If there were no defects, the Canadian Government could borrow at 3 per cent., and the lenders would have only one-half their present income.

PARLIAMENTARY GOVERNMENT IN ITALY.

After a week's debate, the Italian Parliament has at length affirmed its confidence in the Italian Cabinet by no undecisive vote. In a House of 311 members (out of a total of 439), 232 voted for the Government and only 79 against, giving them a majority of 153. When we consider that Naples alone (without Sicily),—the kingdom so often accused by Sir George Bowyer and his friends of universal disaffection to the new *régime*,—returns nearly double the number of the minority on this occasion, very nearly 144 members, we may consider that the statements so recklessly made on this head are entirely disposed of. Naples unassisted can command no less than one-third of all the votes in the Italian Parliament, a minority quite too large to be defied if ever it should be united. In fact, however, many of the strongest supporters of the Government come from the Neapolitan provinces, and many of its strongest opponents are, like Brofferio and several of his friends, from Northern Italy. One decision such as the above is worth a hundred rumours of discontent reported by nervous newspaper correspondents, whose impressions are necessarily taken from a very small circle of acquaintances. Indeed, how liable the best informed are to estimate that chronic discontent which must exist in every free nation in disturbed times, amiss, may be best seen from the varying colour of the information derived thence during the last few days. When the debate first opened, the prophecies even of the Minister's friends were gloomy. General Cialdini had joined the Opposition. Ricasoli was excessively unpopular. There had been, it was said, profligate expenditure in Naples, and there was no order there. The first deputy who spoke hinted at these things, and openly denounced the inactivity of the Minister. The army had been neglected. Society was in a ferment. Even some of the great cities of the Romagna were infested with robbers. The Austrians were as strong as ever in Venetia, and Italy was no stronger than she was. The French were still in Rome, and seemed likely to stay there. The Cabinet had made large promises and had fulfilled none of them. The sole yield of the vacation had been one or two "letters to the Pope which had never reached their destina- "tion," and which France had curtly declined to deliver, with the dry remark that the Pope "was not in the humour" to listen to such proposals. Such is a general summary of the charges brought by the Opposition with which Ferrari commenced the attack on the Government a week ago: and there were not wanting tremblers to report that the new order in Italy was already on the eve of dissolution,—that Parliament would paralyse the Ministry which it had created.

As the debate proceeded their fears grew. The independent supporters of the Government were not very fortunate advocates. And when Massari, after a vehement speech in their defence, sat down with the anti-climax that "any "errors of which the Government might have been guilty "were at least committed in good faith,"—the laughter of the House must have sounded ominous even in more sagacious ears than those of newspaper correspondents. On the second day of the debate the evil prophecies came dark and thick. It was confidently predicted, not only that the present Government would fall at this critical juncture, but that none other could succeed to even the same limited share of confidence. A gradual relaxation of authority was to lead to the "ultimate triumph of the revolutionary party." "It is

"easy to fall from Ricasoli to Rattazzi," wrote a spectator of the debate; "but Rattazzi is not unlikely to make way for "Cialdini, and he again to be superseded by Garibaldi. "Behind Garibaldi looms Mazzini and all the disorders of "1849." Thus thought one of the alarmed witnesses of the great constitutional experiment for which Italy has been so long training,—but faithlessly enough. The Parliament of Italy, fortified by the highest kind of aristocratic strength,—the natural predominance of independent thought, culture, rank and wealth in a thoroughly patriotic assembly,—is not disposed to commit the blunder of forsaking well-tried leaders for untried, even though it is determined to criticise freely the policy pursued. When Rattazzi, the leader of "the "middle" and the President of the Assembly, who is understood to lean yet more than the present Cabinet on the hope of fresh aid from France, had spoken, it became pretty evident that he had no new policy to propose,—had not even any new bias to suggest which would be welcome to the Italians at large. He touched on many inevitable shortcomings with the cautious air of a wary leader of Opposition who was yet not quite unprepared for a Coalition. He spoke as if he could have done far better himself, but yet was willing not to bear too hard on well-meaning men, scarcely equal to the task, on whom many difficult responsibilities had suddenly accumulated. When Rattazzi sat down, the Italian Parliament had probably discerned pretty clearly,—with that practical sagacity for which we are only just beginning to give it due credit,—that the failures of the Ministry were inherent in the circumstances of the position, and could at least find no remedy in the feeble device of a change of persons for the worse, without any change of policy for the better.

Thus matters stood when Ministers began their able self-defence. Ricasoli's speech definitively turned the scale in his favour. He did not seek to veil the evils which surrounded him and his colleagues, but he demonstrated both that they originated with the old *régime*, and that they were being successfully reduced by the new one. No one, he said, could expect that in two years the gigantic work of organising the new kingdom could be advanced to any high point of perfection. "Could we in two years educate the agents and "officers, especially those charged with the preservation of "public security? Could we in two years create them in "that number and of that efficacy which might answer the "wants of a kingdom suddenly raised to so much greater "proportions than it had before? The means which pro-"vided for public security in the former small States were "so corrupt from being long used rather as a support to "tyranny than a protection to the public, that they could "not serve the new constitution of the country; for, on the "contrary, those very forces are unfortunately those which "animate the bands of malefactors hostile to our present "movement."

The facts which illustrated this administrative difficulty were some of them striking enough. The Minister of Justice, in his account of his endeavour to obtain efficient colleagues for the conduct of the Southern administration, stated that if he had no Neapolitans in his department, it arose only from the reluctance of those whose services he had requested to quit Naples. They had all answered, "Give "me any place you like, but do not ask me to quit Na-"ples." Peruzzi, the Minister of Public Works, gave a much more striking illustration of the arduous conflict with corrupt traditions which must be waged for years before the South can be thoroughly amalgamated into a free and self-governing nation. The Bourbon Government, he said, had concentrated everything at Naples; there everything was glitter and luxury, while a few miles from the capital was squalor and misery. Hence the officials of the new Government, as of the old, are utterly unwilling to repair to their proper duties in the provinces. "The very engineers "who directed the works of roads and railroads in the pro-"vinces never went a mile from Naples, and when he "(Peruzzi) had ordered one of them to go to his post, he "was answered, 'Signor Ministro, why would you send "'me into exile?'" With such political instruments as these in Naples, and a whirlpool of political corruption such as the revolution of 1688, when all our statesmen had reputations more or less stained, can alone parallel, the wonder is not that Naples is still so disorderly, but that it is already so quiet. Baron Ricasoli gives one fact to show that the brigandage even at its worst time was grossly exaggerated by the popular rumour. The diligences and mail-coaches running in the Neapolitan provinces are, he says, 56 daily. During a period of nearly eight months, between the 1st April and the 21st November, there had been 42 attacks on these coaches, out of about 13,440 journeys performed by them. We suspect that so-called "quiet" times in England a century and a half ago would easily parallel this not very alarming extent of brigandage. In provinces where a large army of ruffians has been disbanded, where brigandage is fed by regular subsidies from a Royal purse, and animated by regular exhortations from a fanatical priesthood,—the brigandage might well have been expected to put almost a complete stop to peaceful travelling. Yet this has not been the case,—and Neapolitan commerce has received an impulse within the last two years which is already telling rapidly on our own export-tables. Peruzzi clearly sees that the best and most efficient remedy lies here,—and he is stimulating the commercial enterprise of Naples, and finding national occupation for its idle peasantry, by pushing forward the railways, on which 33,000 Neapolitan labourers are now employed. The Ministers of War and of Marine strengthened the Ministerial position by showing very considerable administrative fruits of the Government's labours in both departments. The regular army, says De la Rovere, now numbers 260,000 men, of whom 200,000 are really efficient,—and they expect it to number 300,000 before the spring,—and this without counting the volunteer force. Menabrea gave a no less encouraging account of the navy. It comprehends 83 men-of-war with 989 guns, and engines of 13,480 horse-power in all. The Austrian navy, he says, has only 80 ships 703 guns, and not half the power in the engines, which are estimated at 6,473 horse-power. All these details told with great force on the Chamber, and the collected attitude of the Ministry and weighty bearing of Ricasoli won the day.

The whole debate is likely to prove one of the most momentous in Italian history,—for the hour had come when spectators followed the new Parliament with an anxiety not quite causeless. The first enthusiasm of unification being somewhat spent,—the temporary sanguineness of great successes having in great measure faded away,—the immediate stress of peril being a little postponed,—the reaction had clearly set in. Disappointed sentiment, disgusted self-interest, hope deferred, and promises unrealised, all combined to tempt Parliament to the weak policy of an experimental and petulant change of Ministry. That temptation has been surmounted. The people stick to their leaders, and will not weaken their hands in the hour of suspense. A new Parliamentary Government can undergo no more wholesome and decisive proof.

THE FALSELY-CLAIMED RIGHT TO STOP AN AMBASSADOR ON HIS PASSAGE.

A GREAT deal of recent controversy on both sides of the Atlantic has arisen from a misquotation of Lord Stowell. That great Judge said, in a case to which the point was no way relevant, that, according to Vattel, a belligerent might stop an enemy's ambassador *on his passage*. Vattel says no such thing. He only lays down that a belligerent in his own country may stop an enemy's ambassador who is so imprudent as to venture there. The passage is as follows—

"On the breaking out of a war we cease to be under any "obligation of leaving the enemy in the free enjoyment of "his rights; on the contrary, we are justifiable in depriving "him of them, for the purpose of weakening him, and re-"ducing him to accept of equitable conditions. His people "may also be attacked and seized wherever we have a "right to commit acts of hostility. Not only, therefore, "may we justly refuse a passage to the Ministers whom our "enemy sends to other Sovereigns; we may even arrest "them if they attempt to pass privately, and without per-"mission, through places *belonging to our jurisdiction*. Of "such proceeding the last war furnishes a signal instance. "A French ambassador, on his route to Berlin, touched, "through the imprudence of his guides, at a village within "the electorate of Hanover, whose Sovereign, the King of "England, was at war with France. The Minister was

"there arrested, and afterwards sent over to England. As "his Britannic Majesty had in that instance only exerted "the rights of war, neither the Court of France nor that of "Prussia complained of his conduct."

There is no authority, therefore, for alleging that a belligerent can stop an ambassador anywhere out of his country, nor probably did Lord Stowell, though he spoke hastily, at all mean that there was.

THE CONFEDERATE PAPER MONEY.

Like very many other nations, the Confederate States are adopting a convenient rather than a correct theory of the currency. Mr Jefferson Davis comments on the "success" of his State paper with satisfaction. He observes:—"To the extent that Treasury notes may be issued, the "Government is enabled to borrow money without interest, "and thus facilitates the conduct of the war. This extent "is measured by the portion of the field of circulation which "these notes can be made to occupy. The proportion of "the field thus occupied depends, again, upon the amount of "the debts for which they are receivable, and dues, not "not only to the Confederate and State Governments, but "also to corporations and individuals, are payable in this "medium. A large amount of it may be circulated at par. "There is every reason to believe that the Confederate "Treasury note is fast becoming such a medium. The "provision that these notes shall be convertible into Con-"federate Stock, bearing 8 per cent. interest, at the pleasure "of the holder, ensures them against a depreciation below "the value of that stock, and no considerable fall in that "value need be feared so long as the interest shall be punc-"tually paid. The punctual payment of this interest has "been secured by the Act, passed by you at the last session, "imposing such a rate of taxation as must provide sufficient "means for that purpose."

It is certain that a large quantity of a Government paper may be kept afloat, if it is issued in all Government payments, is received in all Government departments, and is a legal tender that cannot be refused. It is paid by the Government to certain people; these people choose to pay it to certain other other people; these "other people" must by law accept of it; and so it circulates without end. The true difficulty is not to keep enough in circulation, but to prevent there being too much; the real danger is not scarcity from disfavour, but depreciation by excess.

The sole safeguard against depreciation which has ever been found adequate is *convertibility*. If you wish a bank note to be worth five sovereigns, the best plan is to give the holder a right to require those sovereigns for that note from some trustworthy person. Mr Davis has not, however, adopted this expedient, since it would by no means have suited his purpose. He would not wish to keep a reserve of *real* dollars in store to maintain the value of his paper. If he had those dollars, he would spend them in war, not retain them in a bank.

The next best safeguard is a limitation of the quantity to be issued. If the quantity issued should chance to be only equal to or less than that which would be maintained in circulation under the check of convertibility, the safeguard is as efficient as that check. Such, however, will rarely be the case. Those who have the power of issuing inconvertible paper will always abuse it to *some* extent; but any limitation, so far as it goes, is an advantage, and if adhered to, will tend to maintain the value of the note. Mr Davis, however, does not wish to assign a numerical *maximum* to his issues. If he does not hope that he has discovered an inexhaustible spring of pecuniary resources, at any rate he does not wish to assign a patent limit to it.

His scheme is to maintain the value of his notes, in whatever quantity they can be issued, by making them exchangeable on demand for an eight per cent. stock. But who is to maintain the value of the stock? If Mr Davis could have borrowed a great deal in stock, we may be sure he would have done so, and not have had recourse to the last expedient of needy States—an inconvertible paper. But if he could not float much of this security in the market to begin with, will its popularity be increased when indefinite quantities of paper can be at any moment converted into it? We do not believe that the value of the best funded security which the world has ever seen—the value of the 3 per Cents.—could be maintained in the face of such a contingency. The value of a stock is, like the value of other things, dependent on the laws of supply and demand. If the supply may be indefinitely increased at any moment under circumstances which would rather restrict the demand than augment it, the value of the stock will never be high, and will always be liable to a sudden decline. The event to be provided against is an issue of too much paper. Suppose, then, too much *is* issued, what is the remedy? Only that more and more stock is to be created continually with no assigned limit, and with no real limit but that of the necessities of the issuing Government. The effect of Mr Davis's plan will be to secure the depreciation of his stock, not to prevent the depreciation of his paper.

The truth is, that there is a natural limit beyond which the *loan* that is obtainable by a Government from the public by means of an inconvertible currency cannot be extended. That limit is the amount of the previous circulation current in the country. It is possible for the Confederate Government to displace all the gold and silver and bank paper current in their country and to substitute this new note, and to that extent they can obtain a real financial aid. But afterwards the greater the number of the notes issued, the less will be their value, not only at the moment, but also permanently. The use of this tempting expedient is not quite inadmissible at a great crisis—not to be denied to a Government struggling for existence,—but its true limit is fixed by its very nature; and the pretended safeguard which Mr Davis suggests will be rather a hindrance than a help, for it will withdraw his attention and that of others from the only safeguard which could be effectual.

AMERICA.

(FROM OUR SPECIAL AMERICAN CORRESPONDENT.)

Philadelphia, Nov. 25, 1861.

Nothing is yet talked of but the capture of the Confederate agents, Messrs Mason and Slidell. The topic will outlast the ordinary nine days, for its interest will be rekindled as we approach the time when the reply of the English Government may be expected. As to the way they may receive it some apprehensions are entertained, and the stock market has been considerably affected, particularly as regards rail and steam shares. On railways there has been a general fall of 3 to 5 per cent.; on Panama rails, which would be peculiarly affected by a war with England, of 7 per cent.; and on Pacific Mail Steam, of 9 per cent. Government funds are comparatively steady, but with little business doing. Exchange on London has advanced to 9 to 9½ per cent. premium. If this rate be supported, specie will begin to flow towards Europe. Government payments continue upon an immense scale. This is no doubt the immediate cause of the rise in exchange, and the fear of war with Great Britain has a similar effect. The recent arrangement concluded between Mr Chase and the banks, by virtue of which the 50,000,000 dols wanted by the Government in December is to be advanced upon twenty-year bonds instead of three-year Treasury notes, was made with the object of placing a portion of this loan in Europe. In case it cannot be sold, advances are—if possible—to be obtained upon it. But it is not likely that any considerable amount of it could be so placed without conditions being attached to the contract which the borrowers will hardly consent to till more hardly pressed. Later in the winter they will be more facile, as great sacrifices will be necessary to stop an outflow of bullion. The London bankers will no doubt first require to be satisfied that the stock will have a saleable value upon the London Stock Exchange. They will next require absolute discretionary power of sale. And with these points arranged satisfactorily, they may be found willing to advance 50 to 60 per cent. of the present market value—to a limited extent. But, even with that wide margin, it will no doubt be considered imprudent to invest in such securities to any great extent till it has been found by actual experience on a large scale that the public will take them at a price. Without that positive knowledge, no prudent banker would invest his funds in them; for, if called upon to settle with his depositors, and his securities have no saleable value, what can he do, however safe the security may ultimately prove? I have no doubt that these securities will ultimately find their way into the London Stock Exchange, and, as a speculative stock, be largely dealt in. But that will probably not occur till the American Government or the bankers (whose portfolios are already getting so full of Government paper as to alarm the boldest among them) consent to sell them at a great sacrifice. One of the shrewdest financiers of my acquaintance, and a strong supporter of the war policy, expressed the opinion to me to-day that we shall see the Six per Cents. selling at 75 and even at 50 per cent. of their nominal value before the war is over. This will

be *readily believed in* England, though few here are prepared for it. Indeed, so active has trade become under the influence of the enormous war expenditure, that the whole business community are sufficiently intoxicated to believe that now that the complicated machine is set in motion the banks can supply money *ad infinitum*—that as fast as it flows out in payments it flows in in deposits; that the country can provide everything that is wanted without foreign imports beyond the limited amount the grain exports will pay for; and that if it be found that imports are resumed to any extent under the Morrill tariff, that tariff must be doubled or raised to whatever point will answer the purpose of excluding goods and retaining specie. They close their eyes to the consideration that the six hundred thousand men (the number now estimated to be in the field and at the various recruiting depots), whom they are now supporting as extravagant consumers, were last year producers, and even then, with a moderately active trade not stimulated by any unusual expenditure of public money, the proportion estimated to be reserved by the North of the imports of foreign merchandise largely exceeded the present rate of exports. The question is simply,—Can more be permanently produced for export and less be consumed with 600,000 fewer workers and more liberal consumers? Increasing the tariff cannot keep out foreign goods, unless in the limited degree in which the consumption will be reduced by the high prices leading to economy, and especially to the use of the less expensive articles of consumption. But, on the other hand, there is always a great waste of capital and labour in the temporary adoption of an expensive tariff. The large apparent profits to be gained by manufacturing lead to the erection of buildings and construction of machinery at an excessive cost. The capital and labour which might be used in the immediate production of articles either wanted at home or having a ready exchangeable value abroad, are expended in the construction of permanent works which will probably be abandoned as soon as the war is over, or the other circumstances which may have led to the adoption of a high tariff are reversed. But simple as these principles are, they are not recognised here, and it is probable that they will be entirely ignored by the Government. The monopoly granted to home manufacturers enables them to obtain excessive profits both on their army contracts and general trade. Thus a woollen manufacturer, on a moderate scale, told me to-day—and he is a man not likely to exaggerate—that he has realised on his army contracts about 200,000 dols, or 40,000*l*, in the last few months, and it will suit him exactly if the war should last, as seems probable, for a number of years. This is the way the money goes which the Government is so anxious to obtain from Europe. I have heard the profits of another individual, a more extensive manufacturer, estimated at 400*l* per day, and these are merely specimens of what is going on all over the country; and if the Morrill tariff be doubled, so probably will these profits be doubled. Who is to pay for all this? I must say that I fear it will be the money-lenders. The New York, Philadelphia, and Boston banks are so far committed, that they must go on and sink or swim with the Government. Their power is great, and so long as the public have confidence in them and allow their deposits to be used in this way, the game may, within limits, go on. But it must be played out some day. Banks and public together have so far paid up only eighty millions of dollars of the six hundred millions, which the annual Government expenditure now probably amounts to (the *Tribune* estimates it at seven hundred millions); and yet they are already trembling for their specie.

It is not known what view this Government may take of the case of Messrs Slidell and Mason; but it is manifest that a vigorous effort is being made out of doors to twist the laws and precedents so as to make them cover the case, with the most reckless disregard of logic and of the ulterior bearings which the rule of law now attempted to be set up may have upon the rights of neutrals, of which rights America has, for half a century, been the foremost champion. The only newspaper which shows any regard for the future in its treatment of the question is the New York *Tribune*. That journal suggests that to obtain the recognition of the American doctrine that "free ships make free goods"—that is, that the neutral flag protects the cargo—it would be worth while even to release the arch-conspirators. On the other hand, our Government may find it a good opportunity to obtain the definite adhesion of that of the United States to the accepted European doctrines upon the whole question. The point should now be settled one way or the other; and if the American Government in their present arrogant temper persist in acting upon one principle while they adhere theoretically to its converse, it is high time for the Western European Powers to adopt a set of rules of law upon the question, and see that they are carried into effect. And should the particular act in question be pronounced illegal and unjustifiable, some adequate punishment ought certainly to be inflicted upon Captain Wilkes, who is primarily responsible for so much trouble, and for the imperilling of the vast interests involved in a preservation of peace between this country and Great Britain. Otherwise, we may have a renewal of angry diplomatic discussion any day, as the extravagant laudations lavished upon Captain Wilkes by the whole of this nation will be an indication to all enterprising officers of the navy that they have only to be sufficiently bold and reckless, and to make their mark for insult a British ship, to be canonised, or at least to have a chance of the Presidency. Wilkes has already been suggested by one of the most respectable of the New York journals as a candidate for that high office at the next election, and at Boston, the capital of conservative Massachusetts, a great ovation is being prepared for him. While the primary satisfaction in this case was of course the capture of the rebel agents, it has been transparent from the first that the choicest spice with which the dish was seasoned was the boldness of the act of boarding an *English mail* packet. The national vanity is vastly flattered. This success almost atones for Bull's Run!

If the act be justifiable by international law, it is most unfortunate for the Americans that their press has such a lame way of arguing the case. None of the papers have gone into the question so earnestly as the New York *Times*. It has had column after column upon it with multitudinous legal decisions, and yesterday a final article which professes to sum up the case, of the logical coherency of which you may judge by the concluding paragraphs:—"For so far," says the writer, "as yet appears, there is not on record a single case precisely similar to this." Perfectly true—there is not a case that does not differ from it in some of the most important particulars. The case of Laurens is the nearest, and yet it differs in that the vessel he was found on board of was in the direct employment of the enemy, and had thus forfeited her character of neutral, and in the still more vital respect that he was seized under an old principle of Great Britain, which the United States has battled against till it has been given up. In this sentence, therefore, the *Times* is perfectly accurate; but listen to what follows in the same paragraph:—"No Government could be more positively bound than the British Government is bound to-day by its now most *peremptory, direct,* and *authoritative decisions* to admit the legality of the capture of the rebel emissaries." How can this be if there has never been a similar case decided? And this is a fair sample of the style of argument which has prevailed here since the day the capture was first known, and which has convinced ninety-nine men out of every hundred men you meet that the act was perfectly legal. Perhaps it was, but it is a pity that this has not been more clearly demonstrated; or perhaps England will be ready to accept and incorporate into the law of nations a principle which will strengthen the arms of the Power that is strongest on the sea. And no nation in the world could suffer so much from the adoption of this principle as the United States. If at war with England or France, while the vast navies of these Powers covered the ocean, how could her despatches, ambassadors, or unofficial agents reach her good friend Russia for example, if not secure on board even neutral ships carrying the mails? How little does it concern all other Powers, compared with the United States, to keep open a safe highway and mail route across the Atlantic! So far from fighting upon this question, let England say to America:—"*Con'ent,* gentlemen! Cut yourself off from intercourse with the world in time of war if you please—make your election—say the word, and no English or French steamer shall ever again carry your despatches or messengers, while this war or any that you are in future engaged in continues." And in order to effectually protect those valuable packets from the risk of confiscation with which they are threatened, it will be necessary for their proprietors to make every passenger sign a declaration to the effect that he is not in the employment of either belligerent. If the alternative, of accepting this reading of the rights of neutrals, or of giving up Messrs Mason and Slidell, be submitted to the Government at Washington,—and nothing less should be submitted to them,—I believe they will prefer the latter horn of the dilemma. It would be in the case of a war with France (a by no means impossible contingency), that the American Government would suffer most from losing the right of communication with all foreign Governments and consulates by the network of British mail steamers with which the world is encircled. With her ports blockaded by the great French navy, her only chance of communication would be through Canada, unless with imminent risk of capture.

In order to increase the effectiveness of the blockade, the Government have taken a very serious step. They have despatched a fleet of 20 to 30 old whalers loaded with stones to be sunk at the entrances to various Southern harbours, of which Charleston will, it is supposed, be the principal point attended to. There is reason to fear that in many places permanent and impassable bars will thus be created, to the utter ruin of the ports.

Agriculture.

SMITHFIELD CLUB CATTLE SHOW.

The magnificent show of fat animals, yearly exhibited at the Bazaar in Baker street, has this year lost none of its attraction, for from morn to night the crowds of visitors, rural and urban, amateur and professional, were so great as to render it a work of some time to inspect all the animals. The accustomed classes of Devon, Hereford, and Shorthorn cattle are very well filled, and the Devon classes have been referred to as showing a decided advance. It was, however, remarked by several practical farmers that none but the small, and certainly very beautiful, North Devons obtained any prizes; while the larger and to the

practical farmer the more profitable South Devon and Somerset cattle were entirely passed over. As fancy stock, as merely beautiful cattle, perhaps several of the little Devons could scarcely be exceeded. And though well enough adapted, as regards size, to high and scanty pasturage, no rent-paying farmer would dream of grazing them on feeding pastures, or even of stall feeding them out of their own district. The South Devon and Somerset cattle, on the other hand, seem to be real farmer's stock, and the decided preference shown for the little, doubtless high-bred North Devons, points to a weak place, the rather amateur tendency of the Club Committee.

The Herefords are comparatively few but very good, although this breed does not make very much way out of its own district. Mr Heath, the well-known feeder in Norfolk, has a very fine Hereford steer, four years old, which takes the first prize in his class. Mr Heath has also no less than three prizes in the Devon classes, one being a first prize. The invariable success of this gentleman at the Baker street show indicates not only the skilful grazier, but first-rate judgment in the selection of store animals to be grazed

The Shorthorns, as usual, stand pre-eminent; but it is remarked that there are no individual animals of such surpassing excellence as are sometimes seen in the Shorthorn classes. The first prize Shorthorn cow, in class 12, which also obtains the gold medal, is as good a specimen of her breed as is often seen. Her head is perfect, and it would be difficult to find one with more general symmetry. Lord Spencer's ox, too, is a splendid animal. When the Shorthorns are regarded merely as meat producers, no one who has looked round this show can fail to understand why this breed is everywhere extending its area, more especially when it is recollected that where the Shorthorns are selected for milk-giving capacity, they are more than equal to any other breed as dairy stock.

Besides these three established breeds, we find that the Club has offered prizes for other breeds,—the Sussex, the Norfolk, the Welsh, the West Highland, the Aberdeen, and Galloway polled cattle, as well as for cross-breeds, most of which have produced very fair and some very good specimens of fat stock. There is a Norfolk ox of immense height, and the Sussex oxen are all very large. Mr M'Combie's polled Galloway cow was much and deservedly admired.

In sheep there are also new classes. Besides the Leicesters, Cotswold, South Downs, and Hampshire Downs, we find this year Oxford Downs, a variety or cross of Cotswold, the Shropshire Downs, and the Exmoor sheep. The latter are horned, and appear to be compact, hardy sheep, doubtless well suited to the high-lying districts where they are kept. Cross-bred sheep are, as usual, shown in considerable numbers.

The pigs are really miracles in size and juvenility. How they are got to the size they reach at the ages marked, is certainly wonderful to ordinary farmers.

The galleries are filled with implements, of which many are novelties, while the majority mark the actual requirements of farmers. The varieties of chaff-cutters and turnip-cutters and pulpers sufficiently prove the active demand which exists for these articles. Steam engines for general farm purposes are also largely on the increase. The seedmen's stands exhibit roots of immense size, and generally well shaped.

THE WHEAT CROP.

THERE is a concurrent opinion, gathered from farmers from all our agricultural districts who have assembled in London during the past week, that there has never been known a finer season for wheat than the past autumn. The long-continued dry weather enabled farmers to clean and prepare the land in a superior manner, and they have availed themselves of these advantages to an immense extent, so that the breadth of wheat sown is considerably more, as that of last year was less, than an average. All the wheat sown before the middle of November is up and looking well, while the later sown fields will benefit by the somewhat considerable falls of rain we have had recently. It is certain this rain will be useful, for until very lately the under soil was everywhere too dry to promote rapid vegetation.

Although the mangold wurtzel crops were generally scanty, turnips, especially swedes, have turned out well, so that there is now little fear of a fair supply of winter provender. Until the past week, when the pastures and meadows have become wet on the surface, there has been a good quantity of grass, which has carried on the stock to a rather late period in fair condition. Store cattle and sheep are consequently selling at high prices, though the trade is not very active. Indeed, farmers are by no means full of money, the losses of the disastrous season of 1860 having been very partially repaired by the half crop—for, as regards wheat, it was little more—of 1861. The prospects for the coming year, so far as the season has gone, are, however, more cheering. That farmers will do but little draining during the ensuing winter seems to be generally admitted, but landowners ought to avail themselves of the present easiness of the money market to make contracts with the draining companies for works of drainage On vast areas throughout England, draining is the first and preliminary improvement, without which advance in husbandry is hopeless.

Literature.

LECTURES ON COLONIZATION AND COLONIES, delivered before the University of Oxford, in 1839, 1840, and 1841. By HERMAN MERIVALE, A.M., Professor of Political Economy. New Edition. London: Longmans. 1861.

[SECOND NOTICE.]

IN the three following Lectures, Mr Merivale enters into a history of the various experiments made in cultivation with forced labour. He begins with the Spanish American settlements, and their legislation for the subjugated Indians, of which legislation he takes rather more favourable a view than we feel able to endorse. He then passes on to African slavery and the slave trade, of which he writes in the noblest spirit. The most important part of this Lecture is the Appendix dated 1860, on the state of the British West Indies since emancipation. In several particulars he seems to estimate their prosperity at a lower rate than Mr Sewell, whose "Ordeal of Free Labour in the British West Indies" we lately reviewed in these columns. For instance, he says (p. 344), that Trinidad and Guiana "appear to have regained, by the application of imported labour, about the same amount of productiveness which they possessed before emancipation; but hardly as yet to have exceeded it." Mr Sewell, on the other hand, tells us that under the coolie system the sugar crops of Trinidad have gradually increased so that the export of 1860 will be nearly double that of the highest average exportation under slavery.—(Sewell's "Ordeal of Free Labour," p. 139.) Again, Mr Merivale says that the inhabitants of the British West Indies "subsist, but do not accumulate wealth. Their towns, their buildings, their roads, their outward appliances of mechanical civilisation, are barely kept up to the ancient standing point."—(P. 337.) Mr Sewell's narrative distinctly shows that while the old white civilisation rather decays than advances, a new growth is springing up among the coloured classes, which, though as yet crude, is vigorous and capable of development. Besides the multitude of new villages in all the islands, he especially mentions the new roads then in progress (1860) in the rural parts of Jamaica,—the first new roads with which the island had been blessed for time immemorial, and on whose construction the negroes laboured with untiring zeal, as the road surveyor himself informed Mr Sewell. Again, Mr Merivale's apprehensions of evil from the introduction of coolie labour seem not to be justified by the history of its fortunes in Trinidad at least, judging from Mr Sewell's account of the careful preservation of families, and the marked improvement, physical and moral, in the coolies themselves, to which he bears witness.

The next Lecture, on "Convict Labour," is of course chiefly historical. We need only remark on it that Mr Merivale's rather despondent temperament induces him, while fully admitting the "hideous and fearful" evils of the transportation system, and not desiring its continuance, to "consider the prospect of *reformation by punishment*, in the great majority of cases, as altogether hopeless and delusive."—(P. 367.)

We now come to the 13th Lecture, on "Methods of obtaining Labour in Colonies without Slaves or Convicts," and here Mr Merivale enters on a minute examination of the Wakefield system, on which we have already quoted his preliminary observations in the 9th Lecture.

The principles of that system may be very briefly stated as follows:—1. That the prosperity of new colonies mainly depends upon the abundance of available labour at the command of capitalists, in proportion to the extent of territory occupied. 2. That this abundance is to be secured by introducing labourers from the mother-country, and other well-peopled regions, and taking measures to keep them in the condition of labourers living by wages for some considerable time; at least two or three years, according to the suggestion of Colonel Torrens. 3. That the revenue derived from the sale of new land is the fund out of which the cost of introducing them is best defrayed. 4. That the most convenient way of preventing them from rising too rapidly from the condition of labourers into that of independent landowners is to sell the land at a sufficiently high price. 5. That the entire proceeds of the land sales ought to be devoted to the purpose of obtaining emigrants; and that only by devoting the whole, and not any portion, will the exact equilibrium between land, labour, and capital be secured. 6. That the sale of land should be at a uniform price per acre for all qualities and all situations, and not by auction. 7 (which is not necessarily connected with the others). That this system will lead to concentrate the population, and check that inconvenient dispersion which is apt to take place in new colonies.—(Pp. 387-8.)

These propositions, our author observes, may be regarded either as a series of practical rules of varying importance, admitting of modification according to circumstances,—or they may be considered as inseparable links of a connected system; and "this latter is the character under which the projectors have themselves uniformly represented their theory." Mr Merivale, on the contrary, regards them in the former aspect, and examines the separate points one by one. We have already indicated his views as to the first proposition, which embodies the chief theoretic basis of the system. In the 14th Lecture, he examines the remaining ones, which relate to the practical working of the plan. Having expressed his strong agreement with the third proposition as *the* "great discovery of Mr Wakefield," he goes on to discuss the

problems involved in the fourth and fifth propositions. What is "a sufficient price?" Can it be be determined *a priori* in any case? It is supposed to be that price which will secure "the exact equilibrium between land, labour, and capital." But this implies that that equilibrium depends upon absolutely calculable conditions; "that a certain number of labourers are requisite for the cultivation of a certain portion of soil.

Now nature admits of no such ascertained proportion of labourers to acres. When it is said that four labourers are necessary to render 100 acres productive, the expression must mean four labourers at a given rate of wages. If wages could be lowered, it would be far more advantageous to the capitalist to employ six. But wages would be lowered if the number of emigrants were increased. The greater the number of labourers who arrived, in proportion to the number of acres occupied, the lower the rate of wages would be. Therefore it might very possibly be desirable for the capitalist to give a still higher price for land, if he could thereby secure the importation of a greater number of labourers; and in point of fact, the proposition, as has been truly and acutely observed, seems to reduce itself to this: that the sufficient price of waste land, if it is to be estimated by the quantity of labour required, will be the highest price which anybody thinks it worth while to give.—(Pp. 400-401.)

Moreover, the yearly conversion of labourers into landowners will disturb the equilibrium between land and labour, unless the improbable supposition be entertained that the natural increase of the population will supply the gaps thus occasioned. Again, the price (of land) which may be enough to obtain sufficient labour, may not be enough to restrain the labourers from acquiring land, the necessary proportion of labour to land being so very different according to the produce to be raised.

It is possible, for instance, that an acre of land employed in raising sugar in Guiana yields as great a net produce, and requires as many labourers, as 50 acres of farm and pasture land in Australia, and yet that a well-selected acre in Australia will go nearly as far as an acre in Guiana towards supporting a labourer and his family by the work of their own hands. On this supposition, the necessary price for procuring labourers would be 50 times as high in Guiana as in Australia; the necessary price for restricting purchase would be nearly the same. If, then, it be possible in either of these colonies to ascertain the exact price which shall serve both purposes, how can it be possible to ascertain it in the other?—(P. 404.)

Mr Merivale excuses himself for the length at which he has dwelt on this point, by observing that on the possibility or impossibility of ascertaining this ideal price depends the solution of one or two much debated problems of great practical importance. Having given his reasons for not believing in such a possibility, he proceeds to discuss those problems on the ground of their individual merits. The first of them is the question, whether the whole proceeds of the sale of land should be appropriated to the purpose of immigration? The advocates of the Wakefield principle uniformly insist, as the key-note of their whole system, that it should. Mr Merivale thinks otherwise. He shows that the necessary expenses of a young colony, in surveying the land, in opening up communications by roads and rivers, &c.,—which expenses may increase even in a greater ratio than capital and population,—are as essential to the success of the colony as labour itself, and ought not to be incurred on visionary securities of possible future revenues which may never be realised. "And it would be difficult to suggest any more appropriate fund for this purpose than that which is derived from the first sales of land; either to be directly applied to it, or, if the sum thus raised be insufficient, to be used as a specific security for the raising of money by loan."—(P. 412.) At the same time it is necessary that the "habitual tendency of Governments to apply all the resources under their control to the nearest emergency" should be controlled by the adoption of stated regulations. The land fund must not be "turned into a fund for miscellaneous estimates"; and it would be desirable not only to "specify the branches of the public service to which any part of the land revenue should be devoted, but also the proportion of that revenue which should be sacredly set apart for the primary purpose—the procurement of labour."—(P. 413.)

The lecturer next examines the sixth proposition, and gives an elaborate statement of the reasons which have been urged for and against the rival plans of the sale of waste land at a fixed and uniform price per acre, and of sale by auction. He does not pretend to form a judgment on this difficult question, nor to do more than present a few of the materials for arriving at one, but the fulness and impartiality with which he states the arguments on both sides, render this section a very useful preparation for those readers who wish to study one of the most complicated problems of present colonial life.

On the seventh proposition Mr Merivale does not add much to his previous remarks in the ninth Lecture. But we must observe here that we by no means concur in all which he there lays down. We are disposed to think that he does not sufficiently appreciate the evils of the dispersion of population, especially that which arises from the abandonment of occupied lands. The dispersion which arises from scattered settlements, though a great temporary inconvenience, need not be a lasting evil, and may be cheerfully encountered as a transition process to greater good. But the practice of abandoning cultivated lands for the sake of the greater temporary profits to be gained from virgin soil, is surely one which can never be widely adopted without causing purely evil results. What permanent civilisation *can* take root until the nomadic stage is passed? Moreover, *it is clear* that such migration cannot go on for ever, and that until its limit is reached in any individual colony, the real resources and character of that colony are undetermined. Until then, we cannot even know whether such prosperity as it may enjoy is or is not based on solid and reliable advantages, or on merely accidental and fluctuating ones. The instance of Virginia, to which Mr Merivale refers, speaking of its deserted fields and ruined mansions left behind by seekers after newer soil (p. 273), is surely one that tells against and not for him. Is it not a sign that the founding of a new society in the wilderness has been there indefinitely postponed to the object of immediate pecuniary profit? If it be urged that that profit is necessary to sustain the life of the colony, this is really to say that such colony can only succeed as long as there is new land to be taken up,—which is a virtual admission of its incapacity for permanent success altogether. It is precisely this process which has been going on in the Southern States of America, and which is the sure indication of their declining condition. They are coming to the end of their virgin soil, and cry for more territory as essential to their very existence, because they dare not teach their labourers those arts of cultivation which would enable them to extract prosperity from the lands already occupied. Mr Merivale is no friend to slavery, and does not regard this habit of migration as a *necessity* for the colonist; but he thinks that the colonist is the best judge of his own advantage, and he doubts "whether this tendency [to abandon old land for new], regarded in a general point of view, can be regarded as injurious at all; or, at all events, to the extent and in the manner in which the writers on systematic colonisation have represented."—(P. 387.)

The 15th and 16th Lectures briefly sketch the history of "the results of the system of free grant, the system of sale at low prices, and the system of sale at high prices," as shown in "the recent annals of our North American colonies, of the United States, and of Australia." The 7th Appendix to the 16th Lecture brings down to 1861 the history of the Australian and New Zealand attempts to realise the Wakefield system, and points out its merits and demerits as developed by experience. Lecture the 17th (greatly abridged), on Preparatory Expenses and Land Companies, closes this part of the subject.

The 17th and 18th Lectures treat of the relation between colonists and native races, and are extremely interesting. Mr Merivale thus states the question:—

There are only three alternatives which imagination itself can suggest:—
The extermination of native races.
Their civilisation, complete or partial, by retaining them as insulated bodies of men, carefully removed, during the civilising process, from the injury of European contact.
Their amalgamation with the colonists.—(Pp. 509-10.)

The second alternative Mr Merivale believes to be impossible, and he firmly holds "that native races must in every instance either perish, or be amalgamated with the general population of their country.

By amalgamation, I mean the union of natives with settlers in the same community, as master and servant, as fellow-labourers, as fellow-citizens, and if possible, as connected by intermarriage. And I mean by it, not that eventual and distant process to which some appear to look, by which a native community, when educated and civilised, is to be, at some future period, admitted *en masse* to the full rights of citizenship; but I mean an intermediate and an individual process—immediate, if not in act, at least in contemplation. To answer the view which I am anxious to lay before you, each native must be regarded as potentially a citizen, to become such in all respects as soon as possible. To this end, every step in his instruction and management must conduce. It must be the object in framing every law, in making every provision for his support.—(Pp. 510-11.)

And lastly, there should be no hesitation in acting on the broad principle that the natives must, for their own protection, be placed in a situation of acknowledged inferiority, and consequently of tutelage. This is the old Spanish system of which so much has been said in the course of these lectures, and the only one which has success to appeal to in its favour.....The Caffre or the Maori may be rendered equal in legal rights with the settler, but he is not really equal in the power of enjoying or enforcing those rights, nor can he become so until civilisation has rendered him equal in knowledge and in mental power.....If we intend to deal with the aborigines of countries of which we have taken possession as equals, then we must exclude settlers from contact with them..... and leave them, in their allotted reserves, to their own laws and usages, so far as our established morality may allow of these prevailing. There we may entrust them to the good offices of the missionary, and the "protector," so far as these can reach. But if we adopt the opposite policy, that of "amalgamation," then we shall assuredly find that they can only meet with the whites on the same field of hopeful industry on the footing of inferiors, and that if such subordinate position is not recognised by law, and compensated by legal protection, it will be enforced, at a heavy disadvantage to them, by the prevailing sentiment of the conquering race.—(Pp. 522-3.)

While we cordially sympathise in the desire for the ultimate amalgamation of noble races with our own, we demur to this proposition for placing them in tutelage. The cases in which such tutelage would be desirable, are seldom, we think, likely to be cases in which the ultimate civilisation of the race is to be looked for. Those races who are sufficiently vigorous and intelligent to adopt European institutions in good earnest, are scarcely likely to need protection of the sort here indicated, and would frequently be too proud to seek it. The Maori, for instance, is fully as acute and energetic as the Englishman, and quite as competent to "enforce his rights" for himself, as any New Zealand settler will

bear witness. What is needed by such races, we think, *is the* civil training afforded by the *equal* pressure and equal support of the law for themselves and their white companions. Of course, the admission of the aborigines to political and social *privileges* is a different matter, and must of necessity be gradual even under the most favourable circumstances.

Mr Merivale's remarks on the influence of religion in promoting civilisation, and on the good and evil results of missionary enterprise, are full of admirable sense and discrimination. One of his suggestions is particularly good,—viz., that while religion, the one living and moulding impulse which the savage feels in common with us, is evidently *the* motive by which we may excite his mind to desire civilisation,—we may be wise in adopting the reverse principle in our attempts to elevate civilised pagans, such as the Hindoos. With them, the craving after religious knowledge is satisfied by a system to which they tenaciously cling; but, on the other hand, the contact with Europeans often makes them sensible of their inferiority in mental and social attainments. By the intellectual and social side, therefore, should we seek to raise them.

In conclusion, we have only to say that the whole work is interspersed with a great number of statistical tables which will be found very useful; and that these Lectures convey from first to last the impression of a singularly candid, cautious, and generous thinker, less anxious to pronounce dogmatic opinions than to place before others the facts with which they may advance, even beyond himself, to the formation of reliable judgments and the solution of difficult social problems.

THE ART-JOURNAL. December.

THIS is an extremely good number of the Art-Journal. The first steel engraving is a charming piece, from a picture in the Royal Collection called "The Two Grandmothers," by Marie Weigmann, a lady who holds a high position in the Dusseldorf school. Two contrasted groups are here represented; a comfortable old dame, with a great open book on her knee, and a bevy of blooming and well-dressed grandchildren around her,—and an old gipsy woman, whose granddaughters are dancing and playing the tambourine for the amusement of the cottagers. The keen criticising gaze which the two old women bestow on each other's family is admirable, and the whole conception is beautifully carried out. The second steel engraving is from Turner's "Fire at Sea," which those who have seen the original will *perhaps* prefer to the painting (which was never finished). The sculpture is Mrs Thorneycroft's graceful statuette of the Princess Louise as "Plenty." The illustrated account of "The Hudson" is concluded, the present number containing several views of New York. Dr Bell's dissertation on the "Origin and Nomenclature of Playing Cards" is also brought to a close, but somewhat abruptly, and the current chapters are rather disconnected. We seem to quit the original Bohemian legend on which the author's theory is based, and to be lost in a maze of heterogenous details to which he gives us no sufficient clue. Of the other papers, the only long one is an analysis of the Florence Exhibition.

THE TECHNOLOGIST. A Monthly Record of Science applied to Art and Literature. Edited by PETER LUND SIMMONDS, Author of "The Commercial Products of the Vegetable Kingdom," "A Dictionary of Trade Products," &c., &c. Vol. I., and Nos. 1 and 2 of Vol. II. London: Kent and Co., Paternoster row. 1861.

THE title of this valuable periodical is scarcely fitted to convey to the general reader a clear idea of its contents, which are by no means confined to merely technical or professional matters. The general object of the work is to give detailed accounts of the animal and vegetable materials used in food, clothing, manufactures, and art,—especially of such new materials as have been recently discovered,—and also to record new processes of scientific culture or manufacture. The articles are extremely well written, and include some celebrated names, Professor Faraday contributing a paper on "Lighthouse Illumination;" and Captain Burton one on "The Copal of Eastern Africa." There are many papers on colonial produce, of which we may name as particularly interesting, "The Native Farinas of Jamaica," by Mr W. W. Anderson, and "The Timber of Tasmania," by Dr Milligan. Gardeners should read a very curious paper by Mr Leonard Wray on the "Scientific Culture of the Strawberry;" and Mr William Curtis's remarks "On the Formation of Local Museums" contain useful hints for those who are interested in that subject. The Editor, Mr P. L. Simmonds, contributes largely to the work, and his articles on "The Sources of Musk," "The Earth or Rock Oils of America," and "The Sources of Manna," are full of curious information. We hope this excellent periodical will enjoy the wide circulation it so well deserves.

STUDIES OF CHRISTIAN CHARACTER. By BITHA FOX, Author of "Pictures of Heroes," &c. James Hogg and Sons.

THIS book is, we presume, intended for the children of strictly Protestant parents. Its handsome binding and the stirring incidents of the lives it chronicles will, we hope, render it acceptable to them, in spite of a flavour of evangelical orthodoxy which would meet with the warm approbation of Mrs Hodgson Newcome herself. For ourselves, we confess, it is a little too strong; nor do we admire Miss Fox's taste in language. She is pompous and incorrect. She tells the stories, however, of some of the secondary movers of the Reformation with considerable spirit and fair historical correctness.

BEETON'S ILLUMINATED FAMILY BIBLE. Part 3. London. S. O. Beeton, 248 Strand.

THE printing and paper of this Bible are very superior, and the borders to each page, and ornamental red initials to each chapter, bear out its title pretty fairly. The engravings, however, which are from "Julius Schnorr and other eminent European artists," are not of a high order, and even the best of them are tame and spiritless. A few critical notes are appended, from Kitto, Chalmers, Hugh Miller, &c., but the usual marginal references are omitted. As a picture-Bible we think it far less interesting than the "Illustrated Bible" now publishing by Cassell; but Beeton's is certainly better got up.

LITTLE BIRD RED AND LITTLE BIRD BLUE. A Tale of the Woods. By M. BETHAM EDWARDS. Illustrated by T. R. MACQUOID. London: S. Low, Son, and Co. 1861.

THIS exquisite little volume consists of a German tale versified and dramatised. The history of the courtship and adventures of "Little Bird Red and Little Bird Blue" is told in four acts, entitled respectively "The Waking of the Spring," "The Life of the Birds," "The Imprisonment," and "The Release." The language is simple and pleasing, and the flower-borders and other illustrations are beautifully designed, and generally well coloured. The book deserves to take rank among the sylvan juvenile classics of Mary Howitt and Harriet Myrtle.

GREAT FUN FOR OUR LITTLE FRIENDS. By the Author of "The Voyage of the Constance," &c. Illustrated with 28 Large Pictures by G. H. WEHNERT. London: S. Low, Son, and Co., 47 Ludgate hill. 1862.

WE think this title "doth profess too much." The second and fifth tales are fair average stories, but the first and fourth are decidedly disagreeable, and the third tale, though gracefully written, is too sentimental and descriptive for a child's story. Some of the woodcuts are good, but many of them are frightfully ugly. We do not think the book a success.

Foreign Correspondence.

(FROM OUR OWN CORRESPONDENT.)

BY EXPRESS.

PARIS, Friday Morning.

The *Moniteur* of this morning has published the following return of the Bank of France. The figures of last month and of the corresponding period in 1860 are added:—

DEBTOR.	Dec., 1861.	Nov., 1861.	Dec., 1860.
	F C	F C	F C
Capital of the Bank	91,250,000 0	91,250,000 0	91,250,000 0
New ditto	91,250,000 0	91,250,000 0	91,250,000 0
Profits in addition to capital (Art. 8, of Law of June 9, 1857)	2,316,503 57	2,316,503 57	1,510,527 65
Reserve of the Bank & branches	12,980,750 14	12,980,750 14	12,980,750 14
New Reserve	9,125,000 0	9,125,000 0	9,125,000 0
Ditto in real property	4,000,000 0	4,000,000 0	4,000,000 0
Notes in circulation of the Bank and branches	715,813,575 0	728,566,125 0	747,156,075 0
Drafts drawn by the Bank on the branches or the branches on Bank, and payable at Paris or in the Provinces	4,685,144 93	6,573,619 99	10,641,321 78
Acknowledgments for money deposited and payable at sight at Paris or in the Branch Banks	4,918,844 0	3,922,900 0	10,071,588 0
Treasury account current creditor	110,373,247 67	56,646,536 6	134,057,944 9
Accounts current at Paris	116,890,815 86	132,402,091 47	158,342,231 72
Ditto in the Branch Banks	26,420,630 0	24,899,746 0	32,900,239 9
Dividends payable	826,442 75	976,343 75	675,408 75
Interest and dividends on securities transferred or deposited	2,300,407 83	3,423,852 72	2,128,937 64
Various discounts and interest at Paris and in the branches	16,954,174 53	14,731,028 78	11,518,748 14
Rediscounts of the last half-year at Paris and in the branches	1,936,567 58	1,936,567 58	1,216,446 20
Sundries	25,294,371 52	12,253,861 22	3,958,502 55
Total	1,237,336,475 38	1,197,254,726 28	1,321,783,720 73

Creditor.	Dec., 1861.	Nov., 1861.	Dec., 1860.
	F c	F c	F c
Cash and bullion	95,315,231 76	79,497,253 76	128,662,421 43
Cash in the Branch Banks	229,600,000 0	205,760,000 0	308,133,520 0
Commercial bills due yesterday, to be received to-day	817,286 2	562,091 13	613,160 72
Commercial bills discounted at Paris, including 72,996,452f 9c from the branch banks	280,694,656 55	284,100,426 21	244,423,228 39
Ditto by the Branch Banks, payable where discounted	333,852,652 0	322,705,204 0	295,152,013 0
Advanced on deposit of bullion	14,858,937 30	16,081,398 15	5,260,260 0
Ditto in the Branch Banks	2,735,600 0	4,203,600 0	1,794,900 0
Ditto on French public securities	17,149,500 0	18,371,000 0	24,858,800 0
Ditto in the Branch Banks	7,446,490 0	8,587,500 0	14,420,200 0
Ditto on railway shares&bonds	30,194,700 0	31,654,800 0	48,113,200 0
Ditto in the Branch Banks	15,012,400 0	17,034,300 0	30,748,000 0
Ditto on Credit Foncier bonds	290,300 0	390,700 0	684,600 0
Ditto in the Branch Banks	148,800 0	194,600 0	391,700 0

Ditto disposable	27,163,698 93	27,163,698 93	53,708,840 38
Ditto permanently invested (law of 9th June, 1857)	100,000,000 0	100,000,000 0	100,000,000 0
Hotel and furniture of Bank	4,000,000 0	4,000,000 0	4,000,000 0
Real property of Branch Bnks	5,836,443 0	6,008,768 0	6,075,788 0
Expenses of management of the Bank and branches	2,065,217 91	1,742,315 3	2,287,382 83
Sundries	27,173,901 77	26,216,310 93	9,464,973 4
Total	1,227,336,475 98	1,197,254,726 28	1,321,783,720 73

PARIS, Thursday Evening.

The plans which M. Fould intends to propose for remedying the evils of the financial situation are still a mystery; but probably some light will be thrown on them next week in the discussions which are to take place in the Senate on the new Senatus Consultum for increasing the powers of the Legislative Body in the vote of the Budget. The belief that the Minister will propose an income tax gains ground; and certainly such an impost, notwithstanding its unpopularity, would be far preferable to a paltry tax on matches and pianos, or to the re-establishment of the old duties on coffee, sugar, and salt, which some persons recommend. An income tax would enable the Government to modify or get rid of some of the existing indirect taxes, which are very burdensome to the people, and very costly to collect; and it would at the same time be more productive to the Treasury and lighter to the population. As to a large reduction in expenses to be obtained by a suspension of warlike preparations in dockyards, and a *real* diminution in the effective of the army,—operations which are called here "disarmament,"—it is, it appears, not to be hoped for. True, it is said, that the construction of gunboats in naval arsenals is to be carried on less actively; but *en revanche* the building of iron ships is to be continued as energetically as ever. Reports are even current that, instead of a reduction of expenses, the Government contemplates an increase thereof, by augmenting the allowances to the Legislative Body, by making provision for the Imperial Prince, by adding to the civil list, &c.; so that it is to increased taxation alone that M. Fould must have recourse to establish the equilibrium in the Budget.

A very wise decree of the Emperor appears in the *Moniteur* to-day. It declares that "it is of essential importance to financial order that the charges of the Budget shall not be augmented without the Minister of Finance being able to appreciate them, and to make known if sufficient resources for providing for them exist;" and it accordingly enacts that, "for the future, no decree authorising or ordering any works or measures whatsoever, which may have the effect of adding to the charges of the Budget, shall be submitted to the Emperor's signature unless accompanied by a report from the Minister of Finance." This decree will enable M. Fould to exercise some control over the expenditure in the different Ministerial departments, and in a political point of view it places him above the other Ministers.

Another Imperial decree allows the Board of Customs to grant, free of duty, salt for the salting of herrings caught in the French fishery.

A long report, drawn up by the Prefect of the Seine, on the state of the finances of the city of Paris, has been published to-day. It is not so clear as it might be, and many of the figures given in it seem open to criticism. But its most striking features are these:—In the year 1860 the total receipts were 161,498,673f 43c; the total expenses, 138,544,981f 17c; excess of receipts, 22,953,692f 26c. For the present year the total receipts are likely to be 204,405,749f 84c; the total expenses, 182,732,237f 81c; balance of receipts, 21.673,512f. For 1862, the receipts and expenses are alike estimated at 125,027,657 86c. But in spite of these surpluses the debt is increasing. In 1860 the municipal debt required 8,077,462f 89c to pay the annual charges, and 8,769,712f 57c for reimbursements; this year for the former chapter 12,542,205f 26c, and for the latter 12,237,475f 78c are set down; and for 1862 the estimate is that 14,224,581f 2c will be needed for the former, and 11,299,078f 56c for the latter. In reading the report and observing the fine balances presented, accompanied, however, by an augmentation in the debt, one can hardly avoid the suspicion that the situation of the municipality is somewhat like that of the country until quite recently,—splendid on paper, but embarrassed in *reality*; and that perhaps some civic Fould is able to make as startling revelations respecting the municipal finances as that personage was about those of the nation.

The subscription to the Credit Foncier bonds, amounting to 37,327,500f, which was commenced on Monday, is likely to be attended with success. The truth is that these bonds are highly esteemed because they bear a fair interest, present the advantage of allowing premiums to be won, and are so low in amount that they can easily be disposed of.

The production of beetroot sugar seems likely to be large in the present season. For the first two months of that season (September and October) the quantity produced was not less than 40,838,703 quintals (the quintal is nearly 2 cwts); whereas in the corresponding period of last year it was only 14,130,811, and in that of the year before 32,103,979.

The Board of Customs has latterly adopted the laudable plan of publishing every ten days an account of the import and export of flour and grain. In preceding letters I have given these statistics in the belief that they would be acceptable to such of your readers as are concerned in the corn trade. The following additional return has just been published:—

DETAIL of the QUANTITIES of GRAIN and FLOUR imported and exported from the 21st to the 30th of November.

Designation.	Importation. General Commerce. quintals*	Importation. Special Commerce. quintals	Exportation. General Commerce. quintals	Exportation. Special Commerce. quintals
Flour	39,906	37,156	12,983	7,387
Wheat, spelt, &c.	749,555	495,136	72,661	14,464
Rye	4,627	2,962	18,842	17,242
Barley	24,837	22,071	2,160	2,160
Maize	39,666	30,128	9,042	1,479
Pulse and other grain	20,987	16,338	9,905	9,421
Oats	25,804	16,222	2,308	2,308
Total	925,382	620,005	127,901	54,461
From the 1st Jan., to the 30th Nov.	9,697,734	9,188,954	1,259,396	898,994
General total	10,623,116	9,808,959	1,387,297	953,455

* The quintal is nearly two cwts. "General Commerce" in imports means the total quantities brought in, and "Special Commerce" the portion thereof which is taken out of bond for consumption. In exports, "General Commerce" signifies foreign and French production, "Special Commerce" the quantities thereof which are exclusively French.

From a return of French shipping just published, the following, showing the progress made in the last thirty-five years, is extracted:—

	1825.		1840.		1850.		1860.	
	Entered.	Sailed.	Entered.	Sailed.	Entered.	Sailed.	Entered.	Sailed.
Dunkirk	24,421	32,680	51,023	26,366	65,679	65,954	161,286	88,459
Calais	...	...	81,237	59,784	155,340	130,764	214,162	166,063
Boulogne	82,605	80,328	71.426	59,865	129,974	128,816	198,504	166,274
Dieppe	24,843	22,302	24,356	11,616	60.572	14,080	296,108	81,695
Havre	157,906	102,983	368,920	197,538	351,829	260,420	747,249	422,890
Rouen	20,717	7,750	74,185	7,921	60,953	44,199	119,409	47,327
Nantes	46,414	38,780	70,629	30.050	87,844	79,542	183 479	140,590
Bordeaux	84,804	128.180	135,639	114,102	147.514	150,798	321,133	291.068
Cette	17,675	32,475	21 511	61,331	47,735	61.032	113,932	99,297
Marseilles	228,116	222,855	474,587	319,100	535,525	406,192	1,022,150	907,403

The total of the above ten ports in 1825 was:—

	Entered.	Sailed.	Total.
1825	687,504	668,333	1,355,837
1860	3,287,412	2,391,066	5,678,478
Increase for 1860	2 599,908	1,722,733	4,328,641

The Bourse watches with great anxiety the movements of the Stock Exchange, and is much influenced by them. The American crisis may, in fact, be said to command the market, and it is at London of course that its effects are first felt. The following are the week's quotations:—

	Thursday, Dec. 5. f c	Thursday, Dec. 12. f c
Threes	69 35	67 50
Bank of France	2975 0	...

Do. do. 100f, 3 —	91 25	92 50
Do. do. 500f, 4 —	480 0	480 0
Do. do. 500f, 3 —	460 0	460 0

The following is an account of the markets:—

FLOUR.—At *Paris*, business has continued dull. Yesterday, the quotations were at 78f to 82f the sack of 159 kilogs for disposable. No affair took place for delivery, which, however, keeps at a price from 2f to 4f above the last quotation. In the four marks, the current month was offered at 80f 25c, and the four first months at 83f 25c, which represent a decline of 4f on the prices of the last week.

WHEAT.—At *Paris*, yesterday, offers were more numerous than demands. Quotations presented a decline of 50c to 1f on the prices of

last Wednesday, except the foreign white wheat of first quality, of which quotations are unchanged. In foreign wheat, English white and white Baltic were taken at 47f and 47f 50c. English red and Baltic red, though quoted 50c and 75c lower than last week, at 46f and 46f 25c, found no buyers. Hungarian offered at 41f, 42f, and 42f 50c; Saale, 44f; American, 41f 50c, were also not taken. Dantzic was taken at 45f and 45f 50c. In French, Burgundy offered at 42f and 44f; Centre, 41f 50c and 43f; Lorraine, 43f, 44f, and 45f, were taken with an abatement of 1f. Farmers of the countries around Paris were likewise obliged to accept an abatement of 50c to 75c, quotations being 43f to 47f. Of the provincial markets, 29 present a rise of 12c to 50c, 37 a fall of 3c to 50c, 16 are reported firm, 49 without variation, and 7 calm.

COTTON.—At *Havre*, in the week ending Friday, the market was very buoyant, and prices continued to rise considerably. The sales were 6,322 bales, and the arrivals 1,266. The closing prices were from 6f to 7f lower for the very low, 7f to 8f for low and very ordinary, 8f to 9f for ordinary, and 1f to 8f for other qualities; consequently, very low New Orleans was at 124f the 50 kilogs; low ditto, 134f; and very ordinary, 141f. The stock on Friday was 151,930 bales, against 119,750 at the same date in 1860, and 38,760 in 1859. This week, business has been hitherto calm, but prices have slightly risen. Yesterday, very low was quoted 125f; and low, 135f to 136f.

COFFEE.—Business at *Havre*, in the week which ended Friday, was not very animated, but prices were firm. The sales were 200 sacks Hayti Port-au-Prince in harbour at 90f the 50 kilogs in bond; 1,000 ditto ditto, for delivery, 90f to 91f; 50c Rio not washed, disposable, 86f; 510 ditto, ditto, for delivery, 83f; 130 Ceara, disposable, 72f 50c. By auction, 300 Rio damaged were also disposed of. 72 Pernambuco sound went at 56f to 82f. The arrivals were about 27,000 sacks. This week, Rio in bond has been at 80f, Hayti at 89. At *Nantes*, in the last week, no business was done, and this week there has been none. At *Bordeaux*, last week, the sales were 710 sacks Mysore at 117f 50c; 4,595 Rio, 77f 50c: in other sorts business was insignificant. This week, Ceylon plantation has been at 135f. At *Marseilles*, last week, various sorts of Brazil were sold from 68f to 87f, and Hayti at 88f 90c. This week, no business.

SUGAR.—At *Havre*, in the week which ended Friday, the sales were 1,430 casks French West India, disposable, at from 45f 25c to 45f the 50 kilogs duty paid, and 372 Havana, 34f in bond. The arrivals were 1,931 casks and 12,634 sacks. This week, Bahia in bond has been at 29f. At *Nantes*, in the last week, 350 sacks Reunion went at 50f 25c; 3,470 ditto, 48f 50c; 880 ditto, 50f; 400 ditto ditto, candy, 52f. This week, French West India has been at 45f 50c. At *Bordeaux*, last week, 293 casks French West India went at 46f to 46f 50c; 595 casks Reunion were also sold at the same prices as last week. In foreign sugar, no business. This week, French West India has not been asked for. 770 sacks Reunion have been sold for delivery at prices not stated. Mauritius has been quoted 50f. Some French West India damaged has also been disposed of by auction. At *Marseilles*, last week, business in French colonial sugar consisted only in two sales, transacted at prices 1f lower than those of the preceding week. In foreign, 2,000 casks Havana went at 33f 50c in bond. This week, some transactions in Brazilian sugar have taken place.

INDIGO.—Business at *Havre*, in the week which ended Friday, was calm, only 30 chests Bengal being sold; but prices were firm, and they had an upward tendency. The quotation at the date of the 6th current was 50c higher the ½-kilog than that of the 1st November. No arrivals. This week, no business. At *Bordeaux*, last week, business was very calm, only some chests of Madras and Kurpah being sold; prices not stated. This week, 7 chests Kurpah and 23 Bengal have been also sold; prices not given.

HIDES.—At *Havre*, in the week ending Friday, business was important, and prices were very firm. 7,500 dry La Plata disposable went at 107f 50c to 125f the 50 kilogs; 2,000 ditto ditto, for delivery, 125f; 1,500 Buenos Ayres and Monte Video salted at 53f 50c for 660 Mataderos, 68f for 300 cow Saladeros, and at 70f to 73f for the remainder in ox Saladeros; 500 Rio Grande salted, 65f to 67f 50c; 350 Valparaiso ditto, 60f to 63f; 200 New York salted, 48f 75c; 1,159 dry horse La Plata, at 8f 75c a piece. The arrivals were 12,504. This week, Pernambuco dry have been at 80f; Rio Grande salted at 66f; vachettes, Calcutta, 110f, 92f 50c, and 95f; horse Buenos Ayres, 82f; Buenos Ayres not washed, 120f; Monte Video dry, 120f; horse La Plata salted, 80f.

WOOL.—At *Havre*, last week, the sales consisted only of 25 bales Buenos Ayres, not washed, at 2f 15c. The arrivals were, in wool, 839 bales; in sheepskin, 12 bales. This week, Buenos Ayres, not washed, has been at 2f 65c.

TALLOW.—Last week, at *Havre*, only 25 casks Philadelphia were sold at 64f the 50 kilogs. This week, New York has been at 65f. Yesterday, at *Paris*, the 100 kilogs were at 127f 50c.

SPIRITS.—Yesterday, at *Paris*, 3-6 of 90 deg., first quality, disposable, was at 70f the hectolitre; 3-6 Montpellier, at 86 deg., disposable at 105f. At *Bordeaux*, the day before yesterday, 3-6 Languedoc was at 95f; beetroot, first quality, at 81f.

ANTWERP, Dec. 12.

The quantity of coffee imported here in the first eleven months of the present year was 266,442 bales,—same period of last year, 215,844. The stock on the 1st December was 21,000 bales, and same date last year, 16,000. Of cotton, the imports during the first eleven months of this year were 44,136 bales, and the stock on the 1st December was 1,000 bales. Last year the imports were 50,926 bales.

Correspondence.

EFFECT OF WAR ON COMMERCE.

TO THE EDITOR OF THE ECONOMIST.

SIR,—In your very interesting and able article on "The Effect of an American War on our Commerce," I think you rather underrate the evil that American privateers might inflict on our ships.

It is true, as you justly observe, that only one-half of the American coast would now be open to Northern privateers, but that half extends nearly 500 miles from the borders of New Brunswick to Cape Henry, and is indented the whole length by ports from which privateers could issue; and at this season of the year to blockade such an extent of coast would, at least efficiently, be impossible.

The mercantile marine of the Northern States would be driven from the ocean, and the sailors would naturally turn to privateering; and as all our Gulf laden cotton ships would come with the Gulf stream, they would run the gauntlet along the whole coast.

Of course our cruisers would not be idle, but privateers are like hornets, and would be everywhere.

The blockade of the Southern ports would at once be raised by our ships of war; but would this require our acknowledgment of the Southern Confederation? I hope not; for it would indeed be a great evil if Great Britain should thus re-establish slavery in the South on a sounder foundation than before.

I trust we shall not take any step in such an important matter until we effectually secure protection to our free blacks, who at present are liable to incarceration so soon as they land at Charleston. There are many such points likely to arise between this country and the South, which must be settled before we can acknowledge their independence; and such points, I doubt not, are held by our statesmen to be of more importance than a mere temporary supply of cotton.—Truly Sir, your obedient,

Dec. 11, 1861. A STUDENT OF THE ECONOMIST.

TURKISH FINANCE.

TO THE EDITOR OF THE ECONOMIST.

SIR,—In your edition of 28th September, No. 944, you have published the Budget of the Turkish Empire for 1860, which was framed, if I am correct, in the early part of that year by the Financial Commission, then composed of the Marquis de Ploene, Mr de Lackenbacher, and the late Mr de Falconnet. When this Budget was made it was accompanied by a report showing the difficulties the Commission experienced in arriving at those figure which they could not guarantee for want of reliable documents If this report had been published, it would enlighten the British public on their accuracy, and also on the real authors of the Budget. Evidently the person who translated it for publication was not equal to his task, for among other curious mistakes in the meaning of the various items of revenue, he places the heavy sum of 131,844*l* as a tax on "Japan" (imitation china). Is not this amount put down in the original document as "Tapou," a tax on the transfer of "Tarlas" (landed property) when inherited or sold?

Begging for the insertion of this letter in one of your early editions, I am, Sir, your most obedient servant, VERITAS.

Pera, October 18, 1860.

AMERICAN SUPPLIES OF BREADSTUFFS.

TO THE EDITOR OFTHE ECONOMIST.

SIR,—The corn merchants of Great Britain seem to think that America is the great magician of the West as far as breadstuffs are concerned; that if she has not an "inexhaustible bottle" she must have a never failing granary; and as the European countries now in want of grain appear to have confidence in her ability to supply them, just as a child believes implicitly in the tricks in the wizard, it is well for us to cast our eyes across the Atlantic, and take a peep under the conjurer's table. It seems that the exports of wheat, turning flour into that grain, from all the ports of the United States to Europe, for the year ending August 31st, were five millions of quarters. Of this quantity, four and a half millions of quarters were shipped to Great Britain and Ireland, and half a million of quarters to the Continent. The Northern States contributed four millions, and the Southern States one million of quarters. The usual annual shipments of wheat from America to Europe rarely exceed one million of quarters, and often not one hundred thousand quarters; but last year they ran up to five millions of quarters in consequence of the demand created by the very short crops in England, as well as the partial failure of those of France; and it so happened that the North-Western States *for the first time* had such a superabundant quantity. The largest exports in any former year were two and a half millions of quarters in 1847, when it took very high prices to bring that amount forward, notwithstanding the great States of New York and Pennsylvania at that period produced more than they consumed; but since which time the population of the Atlantic States has so increased, that they are obliged to draw largely on the West and on the South in ordinary years for their supplies. The grain trade of last year between America and Europe, although so large, strange to say, was neither profitable to the agriculturist, nor remunerative to the merchant. Prices in England remained low in consequence of these heavy supplies coming from the States, indeed too low to cover New York quotations; and the money received for the grain was nearly all consumed in charges and inland transportation, the great bulk of it having been grown far into the interior.

Nor did shipowners make much out of the increased traffic, as freights ruled very low on account of the cotton crop being one million of bales less than the previous year, which threw so much

extra tonnage into the breadstuff trade. Most of the wheat raised in the North-Western States of America was from virgin soil; and as the farmers in that part of the world never manure their land, and not having much encouragement in consequence of low prices received for their produce to sow another crop of the same dimensions, the product of that region is said to be one-fourth less this year than last. The reason that that section of America took such a sudden start in its growth of wheat was, that most of the Western operators and speculators were ruined by the panic of 1847-48 breaking down their enterprises, causing great cities with high-sounding names, *constructed on paper*, never to be more than a mere chimera, and obliging their proprietor to resume their original occupations as tillers of the soil, and the enormous yield of 1860 was the consequence. It will, therefore, be seen that there is no chance whatever of a continuance of such heavy receipts from America, and the supplies may fall off as the season advances, unless prices rise to a point to "tap further West," and to reach places where carriage is expensive owing to the want of good roads. It must be remembered that it took eight to ten shillings more than the present British quotations (making a fair allowance for the great difference of the quality of the wheats of the two seasons) to bring forward this Transatlantic produce, unremunerative as the figures were to parties interested in the trade. It must be borne in mind, too, that in addition to the supplies of Southern wheat being cut off by the civil war and the shorter Western crops, the North is obliged to furnish the commerce of the West Indies and South America with the produce of that section, when the flour hitherto shipped to those countries has been manufactured out of wheat grown in the South. This will further lessen the quantity that may be expected from New York, which will be reduced still more from the fact of the principal consumption in the large cities of New York, Philadelphia, and Boston having heretofore been of Virginian wheat. The threatened disturbances in Maryland will cause Northern millers to supply themselves with Western wheats until the *civil war* is brought to a close. It may not be out of place to add that the rates of insurance on Atlantic voyages are now much higher than last season; and, notwithstanding the cotton trade is at a standstill, freights are somewhat above what they were a year ago.
—Yours, &c.,
CERES.

P.S.—The crops of wheat in California have fallen short this year.

COMMERCIAL AND MISCELLANEOUS NEWS.

The *Moniteur* of the 12th instant contains a French Imperial decree, authorising the importation into France, free of duty, of the following quantities of salt, for curing herrings, the produce of French fisheries:—For every 100 kilogs of white herrings, 30 kilogs of salt; for every 12,240 kilogs of red herrings, 200 kilogs of salt.

The following commercial intelligence is dated Calcutta, Nov. 17:—Grey shirtings active, but prices unchanged. Mule twist dull and unchanged. Raw silk active, Indigo unchanged. Copper sheathing 1 higher. Tile advancing. Sugar active. Saltpetre dull and unchanged. Linseed active, and prices advancing. Jute unchanged. Hides, advancing tendency. Shellac declining. Rice active and prices declining. Exchange unaltered. Government Securities—Four per Cents., 16 dis.; Five per Cents., 3 dis. Freights active and advancing.

From Bombay, we have received the following news to the 15th ult: —Cotton in demand, at higher rates. Piece goods advancing. Twist higher, and in excellent demand. Government Securities—Five per Cents., 95¾. Freights steady.

An account of the importations and exportations of bullion and specie registered in the week ended 11th December, 1861:—

The following is dated Port Louis, Nov. 5:—We have to notice increased dulness in our markets generally. Money is excessively scarce. Several suspensions of payment have taken place among planters; and others are likely to follow. This state of affairs is to be traced to the reduction in the expected production of sugar, while engagements have, on the contrary, been contracted in view of a larger crop. The crisis, however, seems to be less intense at the present moment. A little buoyancy in the produce market may have a beneficial effect. But November and December are very heavy months for those having bills in circulation. In imports there is little doing. Supplies continue good; and most articles are selling at reduced prices, especially where cash transactions can be made.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT, pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 11th day of December, 1861.

ISSUE DEPARTMENT.

	£		£
Notes issued	29,080,410	Government Debt	11,015,100
		Other Securities	3,634,900
		Gold Coin and Bullion	14,430,410
		Silver Bullion	..
	29,080,410		29,080,410

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,060	Government Securities (including Dead Weight Annuity)	10,896,409
Rest	3,129,723	Other Securities	16,329,817
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	5,920,166	Notes	9,378,825
		Gold and Silver Coin	837,276
Other Deposits	13,097,426		
Seven Day and other Bills	742,012		
	37,442,327		37,442,327

Dated the 12th December, 1861. M. MARSHALL, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	20,433,597	Securities	27,323,226
Public Deposits	5,920,166	Coin and Bullion	15,267,686
Private Deposits	13,097,426		
	39,461,189		42,590,912

The balance of Assets above Liabilities being 3,129,723, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£305,065
An INCREASE of Public Deposits of	713,832
A DECREASE of Other Deposits of	175,766
An INCREASE of Government Securities of	3,550
An INCREASE of Other Securities of	105,350
An INCREASE of Bullion of	27,923
An INCREASE of Rest of	3,861
An INCREASE of Reserve of	436,863

The above account shows a further accumulation in the resources of the Bank. A considerable addition has taken

place to the reserve, which now stands at more than ten millions. The bullion also exhibits a rather large augmentation. The Treasury balance, as usual at this period of the year, is steadily increasing, the rise in the last two weeks having been 1,716,000*l.*

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1851 :—

At corresponding dates with the present week	1851.	1858.	1859.	1860.	1861.
Circulation, including bank post bills	£ 20,041,728	£ 20,510 117	£ 21.532,750	£ 20,585,465	£ 20,443,597
Public deposits	8,534,018	9,526,771	8,938,987	7,029,111	5,920,166
Other deposits	9,358,848	12 606,131	13,636,760	12,104,219	13,097,426
Government securities	13,241,768	10,808 591	10,925,157	9,540,273	10,896,409
Other securities	11,454 732	15,988,503	19,405,557	19.987,188	16,329 817
Reserve of notes & coin	12,031,713	13,753,114	10,726,762	8,000,165	10,216,101
Coin and bullion	16,920,988	19,024,369	16,999,882	13,447,105	15,267,686
Bank rate of discount	3 p. c.	2½ p. c.	2½ p. c.	5 p. c.	3 p. c.
Price of Consols	96⅝ xd	97 xd	95⅝ xd	93⅝ xd	90¼ xd
Average price of wheat	37s 5d	41s 10d	43s 11d	52s 7d	60s 4d
Exchange on Paris (shrt)	25 17½ 22½	25 7⅝ 15	25 10 15	25 17½ 25	25 27½ 35
— Amsterdam ditto	11 16½ 16¾	11 15 16	11 13½ 13⅝	11 14½ 15	11 17 17½
— Hamburg (3 months)	13 9½ 10½	13 7 7½	13 5 5½	13 6 6½	13 8 8½

In the corresponding week of 1851, the late *coup d'état* of the French President was still the chief subject of discussion. Numerous arrests continued to be made—among others of M. Theirs, who had been forcibly sent out of France. Much uneasiness had been caused in the various money markets of Europe, and in Vienna the rate of exchange at one time rose to 13—about 1½ per cent. higher—but a partial reaction had since occurred. Generally, the step was approved by the reactionary Governments of the Continent. News had been received from the Cape of the defeat of the Caffres in some small skirmishes. An important operation, however, had been performed in the driving out of the chief Macomo from his stronghold of the Water-kloof and the dispersal of his forces. From the West Indies, it was announced that the Panama Railroad was rapidly progressing. The London money market was becoming easier, and the resources of the Bank were steadily accumulating.

In 1858, the reserve and bullion of the Bank were still increasing, although withdrawals of gold had commenced on account of the new Chilian loan, which was quoted ¼ to ½ premium. The Turkish loan of 1854 stood at 93, and that of 1858 at ⅝ discount. The prospectus of the Madras Irrigation Company had made its appearance, the first issue of capital being fixed at one million.

In 1859, the money market showed great abundance, the rate of discount being 2⅜ to ½ per cent. Securities of every description were rising, especially Indian and Brazilian railway shares. Lombardo-Venetian and Grand Trunk of Canada showed a marked improvement, the latter having advanced from 39 to 43, or more than twice its present value. The bullion in the Bank was upwards of 17,000,000*l.*

In 1860, news had been received of the capture of two gates of Pekin by the allied troops, and of the taking and sack of the summer palace of the Emperor of China. The announcement had been made of the robbery of General Miramon of about 200,000*l* in silver belonging to the Mexican bondholders. Baron Schmerling had been definitively appointed Minister of State to the Austrian Empire. The prospectus had been issued of the Turkish loan of nominally 16,000,000*l*, undertaken by M. Mirès. From America there were still hopes that secession would be confined to South Carolina, but they appeared to rest upon little foundation. Large sums in gold were being transmitted to New York from this side, without, however, causing any pressure in the London discount market.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1851, a deficiency of 2,095,884*l*; in 1858, a deficiency of 3,382,372*l*; in 1859, a deficiency of 5,768,797*l*; and in 1860, a deficiency of 7,882,909*l*. In 1861, the deficiency is 3,232,391*l*.

Discount and Money Market.—The demand for discount continues on the same moderate scale as for some weeks past, and the rates of interest are without material alteration. At the Bank yesterday the applications were more considerable than usual, but to-day they were again limited. Owing to the inactivity in trade, the supply of unemployed capital remains large. The following are the approximate rates of discount for paper of various dates :—

30 days to 60 days	2⅝ per cent.
3 months	2¾ per cent.
4 months	3 per cent.
6 months—Bankers' drafts	3½ per cent.
— Trade bills	4 per cent.

Very choice short paper of about 20 days to run can be occasionally discounted at 2½ per cent. On the Stock Exchange money is very easy, and the rate for loans on Government securities is only 1 to 1½ per cent.

The impression that a war with the United States is imminent appears to be gathering strength. It is remarked that not only has the capture of the Southern Commissioners been welcomed by the lower classes in New York, but that it is also supported to some extent by the educated portion of the community, as evinced by the banquet at Boston to Captain Wilkes, and the published opinions of Messrs Sumner, Everett, and others. It is also known that the public feeling in the Northern States has been long growing more and more adverse to England, and it is believed that the despatches of Lord Lyons have for some time been drawing the attention of the Government to this fact, to which may be partly attributable the extraordinary activity in our present armaments. On the other hand, it is stated on excellent authority that General Scott was intrusted with a mission to the Emperor Napoleon, with a view to obtain the support of France for the Northern States in the event of a rupture with England. It is understood, however, that this attempt has signally failed, and that, consequently, General Scott has hastened to return to America. It is, therefore, inferred that the non-success of these negotiations may induce the Northern Government to make the reparation demanded by England, and to avert war. It must be remembered, however, that General Scott can hardly reach Washington before an answer has been given to the despatch of Lord Russell recently sent out.

There has been a good deal of business done at Lloyd's in war risks, and for British vessels from New York as much as ten guineas per cent. has been demanded. At Liverpool, however, only about 40s to 50s has been paid. For outward vessels to the East, the London rates are about 15s to 20s per cent., and for homeward ships 30s.

It is reported that the Prussian Government are about to issue a loan of 1,400,000*l* for the German fleet.

The monthly account of the Bank of France, published this morning, gives the following results :—

	£
Increase.	
Cash in hand	1,587,000
Bills discounted	310,000
Treasury balance	2,150,000
Decrease.	
Circulation	510,000
Current accounts	560,000
Advances	232,000

The amount of Government stock held by the Bank remains unchanged.

The following are the rates of discount in the principal cities of the Continent, showing an advance at Amsterdam, and a decline at Hamburg :—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	5	4½
Vienna	6	6
Berlin	4	3½
Frankfort	4	3
Amsterdam	4	4
Turin	5½	5
Brussels	4	3½
Hamburg	...	2⅝
St Petersburg	7	8

English Funds.—The funds continue entirely influenced by considerations on the probable effect of the American outrage, and the daily changes have been caused chiefly by rumours connected with that event, and mostly possessing no foundation. Yesterday, Consols showed a recovery of nearly three-quarters per cent., being quoted for the account at 90¾; but to-day the general tendency has been less favourable. This morning the opening price was 90⅝ to ½; and a decline subsequently occurred to 90¼, from which, however, there was a rally, and the final transactions were again at 90⅜ to ½. For money, the last quotation was 90⅝, rather sellers.

Exchequer bills have not maintained the late improvement, the March issue closing at 9s to 12s premium, and the June at 12s to 16s. India bonds have slightly declined, being also quoted 12s to 16s premium.

A marked advance has taken place in India Five per Cents, the last price this afternoon being 102⅝ to ⅞, or 1½ per cent. higher than last week. The rupee paper is also firm at 96 to ½ the Five per Cents., and 101¾ to 102¼ the Five-and-a-Half per Cents.

FOREIGN STOCKS.—The transactions in the foreign market have been less numerous, but some rather considerable fluctuations have occurred. Turkish Six per Cents. of 1858 were in comparatively good demand in the middle of the week, and at one period showed a rise of about 2 per cent., mainly in anticipation of the drawing of the bonds to be paid off in full. On the completion of this operation, the previous speculative purchasers sold the stock they had temporarily taken up, and caused a reaction, which was temporarily augmented by the announcement of a monetary crisis at Constantinople. Both the 1858 and 1854 loans, however, are higher than last Friday. Mexican has also experienced a considerable improvement, but left off this evening rather lower than at one time. Russian descriptions have shown more steadiness, except the last Four-and-a-Half per Cent. stock, which continues rather heavy. A recovery has taken place in Spanish and Venezuela bonds. This afternoon, prices have exhibited a tendency to droop, but no material decline occurred.

The closing quotation of French Three per Cents. on the Paris Bourse this evening was 67f 60c ex dividend, showing a decline since yesterday of an eighth, but no alteration compared with last week.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and this day:—

	CONSOLS, Money		Account		Exchequer Bills.

RAILWAYS AND OTHER SHARES.—The railway market has followed the movements in the funds, and shows a general improvement over last Friday. At one period, however, a greater rise had been attained. Speculation continues to be chiefly directed to Midland, Lancashire and Yorkshire, and the other lines in the manufacturing districts. Great Northern has been steady, but an improvement that at one time took place has not been fully supported. South-Eastern remains comparatively weak. London and North-Western has likewise been affected by the falling off in the last traffic return. The general business continues unimportant, the public operating to a very limited extent only.

In the colonial department there has also been a more favourable tendency, Indian guaranteed stocks being especially firmer. Canadian descriptions have also improved.

Foreign shares have been in better demand, and in most cases a rally has occurred from the late decline. San Paulo and Bahia (Brazilian) have been principally inquired for. Lombardo-Venetian also improved to ½ premium, but, owing to a reaction on the Bourse, relapsed to ¼ to ⅜ premium. French descriptions are dull, on a statement that the Imperial Government will not permit the companies to issue any more obligations, a determination which will compel them to raise in shares any further capital they may require. American securities have been very depressed, particularly Illinois Central shares, but this afternoon partially rallied.

In the miscellaneous market the transactions have been limited, the chief movement being a rise in Canada Land shares. Red Sea Telegraph and Crystal Palace are also firmer. Joint stock banks have been rather dull. Mercantile Fire Insurance closed at ¼ to ⅜ premium, and Commercial Union at ½ to ¼ dis.

Subjoined is our usual list of the closing prices of the principal railway shares last Friday and this day:—

	RAILWAYS. Closing prices last Friday.	Closing prices this day.
Bristol and Exeter	93 5	94 6
Caledonian	100 1	101 ½

FOREIGN EXCHANGES.—The rate on Paris this afternoon was rather higher, while Hamburg shows a partial reduction.

BULLION.—Annexed is the weekly circular of Messrs Pixley, Abell, and Langley, on the transactions in bullion during the week, and the movements in Indian rupee paper:—

Gold.—The Royal Mail steamer has taken 13,000*l* gold to the Brazils; the Armenian has brought 11,000*l* from the coast of Africa; and the Bank has purchased 52,000*l* of fine gold. The facts above mentioned comprise nearly the whole of the business that has been done in gold during the past week, and our market has been exceedingly inactive. The Wellesley is now daily expected from Melbourne, with 307,000*l*.

Silver.—The silver, ex La Plata, has been sold at 61¼d per oz standard. It was fully expected that the Bombay mail would have taken a very large sum. Owing, however, to the present political complications, some amounts that had been secured have been kept back for the present, and the steamer took only 33,600*l*. The market is now rather weaker, and we quote the price as 61½d to 61¼d per oz standard. The West India steamer has taken 9,500*l* to the Brazils.

Mexican Dollars.—The large amount of Mexican dollars brought by the West India steamer La Plata has been disposed of to-day at 59¼d per oz., being a decline of ⅜d per oz from the price obtained for dollars ex Seine. The demand for China is at present limited.

Exchange on India continues as last quoted by us, viz.:—Banks' drafts on Bombay and Calcutta, at 60 days' sight, 2s to 2s 0¼d per rupee; bills with documents, 1s 11⅞d to 1s 11¾d. On Madras, 1s 11⅞d to 2s; bills with documents, 1s 11d to 1s 11¼d.

India Government Loan Notes have been still further depressed this week, prices being lower than those quoted by us on the 5th inst. The 5½ per Cents. are now 101½ to 102½, and the 5 per Cents. 95½ to 96½.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; bar gold, fine, 77s 9d per oz std, last price; bar gold, refinable, 77s 11d per oz std; Spanish doubloons, no price; South American doubloons, 74s per oz, last price; United States gold coin, 76s 6d per oz, last price. Silver—Bar silver, 5s 1¼d per oz std, last price; bar silver, containing 5 grs gold, 5s 1½d per oz std, last price; fine cake silver, 5s 5⅞d per oz, last price; Mexican dollars, 4s 11¼d per oz; Spanish dollars (Carolus), 6s 6d per oz, nominal.

About 42,000*l* in bar gold was sent into the Bank to-day.

FAILURES AND MERCANTILE EMBARRASSMENTS.—The suspension has just taken place of the old-established house of Atkinson, Catling and Co., hemp merchants, with liabilities of about 9,000*l*. The assets are estimated at 3,000*l* to 4,000*l*.

A further dividend of 1s in the pound, making a total distributed of 11s, has been announced by Messrs E. Sievekking and Son, who stopped payment in the Swedish trade in the crisis of 1857, with liabilities of about 400,000*l*. Some

further assets remain, which are expected to be finally realised next year.

It is stated in a Manchester journal that Messrs John Spencer, Son, and Co., who suspended some months ago, have notified a third and final dividend of 5s in the pound, the liabilities of the firm having thus been liquidated in full.

In the Court of Bankruptcy, assignees have been chosen in the case of Messrs James Coster, Beater, Dennant, and Russ, warehousemen. The question whether the executors of the late Mr James Coster can be admitted to prove upon the estate equally with the trade creditors was argued at length, the Commissioner reserving his decision.

PUBLIC COMPANIES.—The Directors of the National Provincial Bank of England have announced a dividend for the past six months at the rate of 8 per cent. per annum, together with a bonus of 5 per cent. for the half-year.

The report of the Crystal Palace Company, issued preparatory to their meeting next Thursday, states that the revenue in the year ending 31st October was 48,599*l*, or rather more than in the previous twelve months. After providing for interest on debentures, preference shares, &c., the available balance is 30,235*l*, out of which a dividend is proposed on the ordinary stock of 2 per cent., leaving 10,177*l* to be carried forward. The actual increase in the gross revenue has been 6,038*l*, almost the whole of which has been absorbed, partly in works necessary for the approaching season, and partly in the expenses of special occasions. The total number of visitors was 1,650,760, being an augmentation of 118,809. The Directors look forward very hopefully to 1862, the great International Exhibition being expected to prove highly advantageous to the Company. The preparations for the Handel festival next June are being pressed forward, and every effort is being made to ensure its being a great success. It is intended to raise 50,000*l* additional debenture capital.

The Directors of the Trust and Agency Company of Australasia have announced that the 12,500 new shares authorised to be issued at the late meeting have been all taken up. They also state that arrangements have been completed for opening a branch in New Zealand, and that operations in that colony will be commenced forthwith.

The shares in the National Marine Insurance Company have been done at ¼ to ½ premium.
